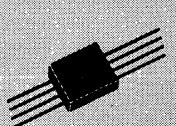
• TOLERANCES AS LOW AS .005% • TEMPERATURE COEFFICIENTS TO ±3PPM • HIGH STABILITY • CHOICE OF CONFIGURATIONS (AXIAL LEAD, RADIAL LEAD, PC, CERAMIC, BOBBIN)

WIREWOUND POWER RESISTORS

• HIGH POWER HANDLING CAPABILITIES IN SMALL SIZE • EXCELLENT PROTECTION AGAINST MOISTURE AND ENVIRONMENTAL HAZARDS • TOLERANCES TO ±.05%, TC's AS LOW AS 5PPM • BROAD RANGE OF STYLES • LOW THERMAL EMF

MINIATURE CERAMIC CAPACITORS

• THIN PLATE DESIGN (SMALLER THAN DISC CAPACITORS) • PRICED LOWER THAN OTHER THIN PLATE OR MONOLITHIC CAPACITORS • NON-MIGRATORY ELECTRODE SYSTEM FOR HIGH RELIABILITY • MEETS OR EXCEEDS MIL-C-11015 (CK 41, 42 and 43) • 100% FINAL TEST • HIGH TEMPERATURE SOLDER — ELIMINATES REFLOW PROBLEMS • FAST DELIVERY—LARGE INVENTORY MAINTAINED • HIGH VOLUME PRODUCTION CAPABILITY



HYBRID MICROCIRCUITS

• THICK FILM SUBSTRATES — PASSIVE AND ACTIVE CIRCUITS • HIGH STABILITY • LOW TC • PRECISION CIRCUIT CALIBRATION • CHIP AND WIRE ATTACHMENT OF ACTIVE DEVICES • LOWEST COST PROVEN TECHNOLOGY • DIGITAL AND LINEAR DEVICES • CUSTOM AND STANDARD CIRCUITS — 6 STANDARD DEVICES AVAILABLE FOR "OFF THE SHELF" DELIVERY — DESIGN, PROTOTYPING AND PRODUCTION OF CUSTOM CIRCUITS TO MEET INDIVIDUAL CUSTOMER REQUIREMENTS • EXPERIENCED, FLEXIBLE, COMPETITIVE — OVER 6 YEARS OF CONTINUOUS MANUFACTURING OF BOTH MILITARY (PER MIL-STD 883) AND INDUSTRIAL AND COMMERCIAL PRODUCTS

PRINTED CIRCUIT EDGE CONNECTORS

• EDGE CONNECTORS, INTERCONNECTORS, HIGH DENSITY CONNECTORS • COMBINATION CONNECTORS • COMPETITIVE PRICING • STATE OF THE ART TECHNOLOGY — HIGH DENSITY — BIFURCATED SPRINGS — STANDARD CONTACT SPACINGS — 4 TERMINATION STYLES • CUSTOM CAPABILITIES — COMPLETE DESIGN AND PRODUCTION CAPABILITIES TO PRODUCE CONFIGURATIONS TO MEET CUSTOMER REQUIREMENTS • ON TIME DELIVERY — FROM FACTORY STOCK • INTERCHANGEABLE WITH COMPETITIVE CONNECTORS

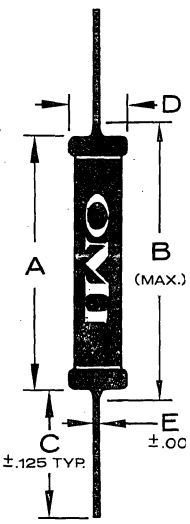
T SERIES

OMTRONICS MANUFACTURING, INC. • 2406 LEAVENWORTH STREET, OMAHA, NEBRASKA 68105 • (402) 348-9500

PRECISION POWER RESISTORS, AXIAL LEADS



Highly reliable, silicone coated, precision resistors manufactured to meet MIL-R-26 specifications. There are 17 basic sizes with power ratings from ½ to 10 watts and resistance ranges from .05 ohms to 275K ohms. Resistance tolerances from .05% to 5% (1%, standard). Temperature coefficient of resistance 2PPM up (20PPM, standard).

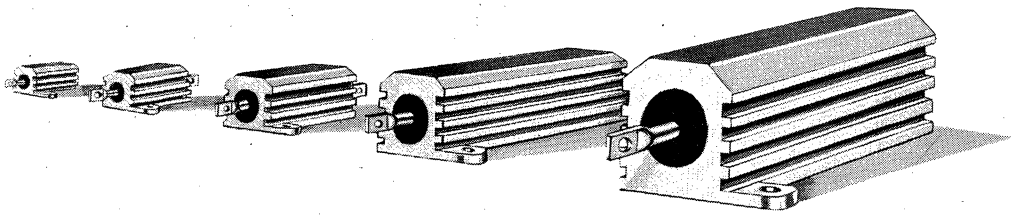
OMI RESISTORS HT HF

OMTRONICS MANUFACTURING, INC. • 2406 LEAVENWORTH STREET, OMAHA, NEBRASKA 68105 • (402) 348-9500



HT Models are anodized, aluminum-housed, precision wirewound resistors, designed to chassis mount for maximum heat dissipation. They are manufactured to meet or exceed MIL-R-18546 specifications. Four sizes: 5 to 50 watts (mounted), resistance ranges from .1 ohm to 250K, depending on size. Tolerances —1% standard — .05% to 5% available. Temperature coefficient from 2PPM up. (20PPM, standard.)

HF Models are identical in dimensions, resistance ranges, tolerance and temperature coefficients with those of the HT Series, but offer a great increase in their power ratings as similar size through the use of beryllium oxide cores for increased heat dissipation. These are manufactured to exceed MIL-R-18546 power ratings.

STANDARD ELECTRICAL SPECIFICATIONS

OMI Type		MIL Type	Power Rating (Watts)*			Resistance Range		Max. Working Voltage		Max. Weight Grams
			HF (OMI)	HT	MIL	MIN.	MAX.	HF	HT	
HF-5	HT-5	RE-60	15	5	5	.1	22K	220	160	3
HF-10	HT-10	RE-65	20	10	10	.1	47K	340	265	7

	HT-75			75		.1	75K		1500	120

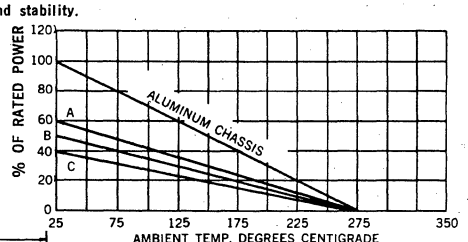
*Rating is based on chassis mounting area and stability.

Chassis Dimensions:

HT-5, HF-5, HT-10 and HF-10 — 6x4x2x .04", Aluminum Chassis.

HT-25, HF-25, HT-50 and HF-50 — 7x5x 2x.04". Aluminum Chassis.

HT-75 — 12"x12"x.062, Aluminum Panel.



DERATING

OMI, HT and HF resistors have an operating temperature range of —55°C to +275°C. Derating is required for reduced chassis mounting area and for high ambient temperatures. The graph curves shown apply to operation of unmounted resistors. Free air rating.

A = HT5, HT-10
B = HT-25
C = HT-50, all HF Series and HT-75

HN HFN — ALUMINUM HOUSED, NON-INDUCTIVE

HN and HFN Models with equivalent electrical and physical specifications to the HT and HF Series are also available with non-inductive windings. To order HT, non-inductively wound, specify "HN". To order HF, non-inductively wound, specify "HFN" instead of the basic HT and HF models. **NOTE:** The following conditions apply to non-inductive types as compared to HT or HF:

1. Maximum resistance values must be divided by 2.
2. Maximum working voltage must be multiplied by .707.
3. Maximum weights may slightly exceed those shown above.

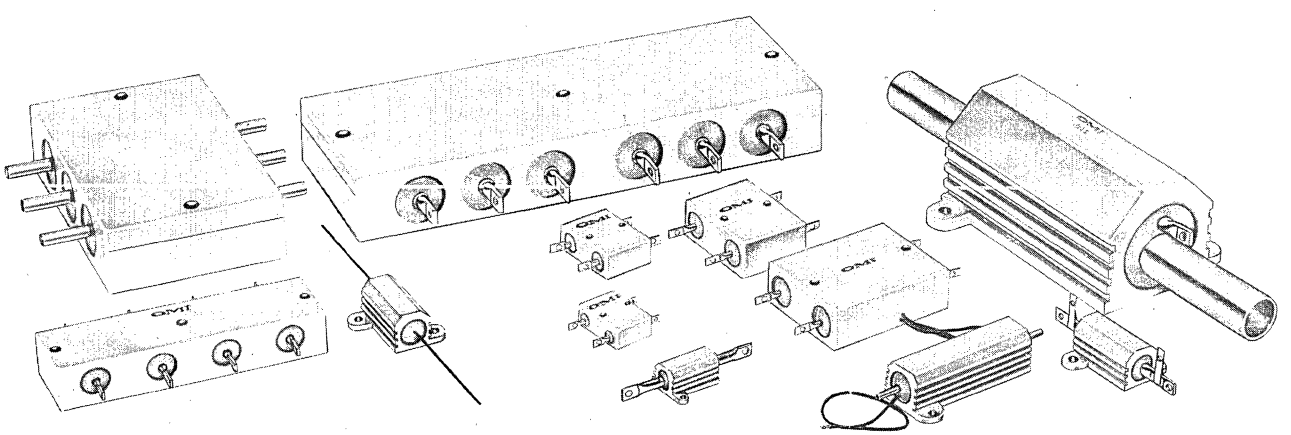
HEAT SINK CAPABILITIES

OMI's factory tooling and engineering experience put at your disposal facilities of design and production to manufacture heat sink resistors for your specific requirements.

Manufactured to your specific parameters, these resistors include the following outstanding characteristics: (A) High power capabilities, (B) 4-Wire low value resistors as well as the standard 2-wire units, (C) Combined characteristics such as .05 ohms ±5 PPM and 4-wire termination and (D) high temperature, high pressure integral molding into housing constructions.

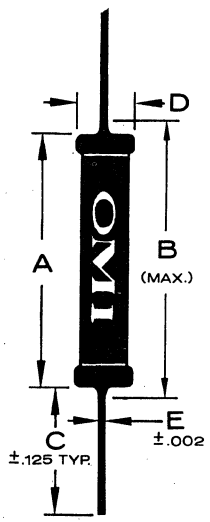
This advanced state of the art allows us to confidently solicit your inquiries for special design modes.



OMI RESISTORS F SERIES

OMTRONICS MANUFACTURING, INC. • 2406 LEAVENWORTH STREET, OMAHA, NEBRASKA 68105 • (402) 348-9500

SILICONE COATED RESISTORS, AXIAL LEADS
BERYLLIUM OXIDE CORE



The OMI F Series resistors — at ratings from 1 to 15 watts—offer greatly increased power ratings over conventional resistors of equivalent size. All resistors in the F Series are manufactured in accordance with MIL. Specs. and are available in ten basic physical sizes with resistance ranges from 0.1 ohm to 250K ohms. Resistance tolerances from 0.05% to 5% (1%, standard) and temperature coefficient of resistance from 2PPM up (20PPM, standard).

OMI TYPE	MIL TYPE	OMI WATTAGE RATING		RESISTANCE RANGE		MAX. WORKING VOLTAGE*		Max. Weight Grams	PHYSICAL DIMENSIONS

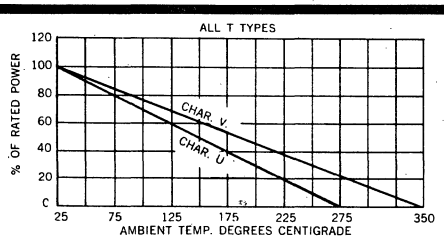
* Maximum working voltage determined at .0008 dia. wire.

SPECIAL FEATURES All features of the conventional precision power resistors, plus the beryllium oxide core for optimum heat dissipation, allow reduction of physical size of resistor while maintaining equivalent power ratings of conventional types.



DERATING
Applicable to both F and T Series

Both OMI, T and F Series resistors have an operating temperature range of −55°C to 275°C (characteristic U) or to 350°C (characteristic V). Derating is required for high ambient temperatures in accordance with the curve shown at left.

N FN NON-INDUCTIVE TYPES
Available with both Axial and Radial Leads

OMI Models of equivalent physical and electrical specifications are available with non-inductive windings. They are identified by the letter "N"; to order non-inductively wound T Series, specify "N"; to order non-inductively wound F Series, specify "FN".

NOTE: The following conditions apply to specifications applicable to the non-inductively wound types, as compared to the basic T or F types.

1. Maximum resistance must be diveded by 2.
2. Maximum working voltage must be multiplied by .707.
3. Maximum weights may slightly exceed those shown for the basic T or F types.

MINIATURE POWER RESISTORS FR SERIES
Radial Leads

As in the OMI, TR Series, models of equivalent electrical, mechanical, power rating and derating specifications are available in FR3, FR5, FR5A, FR5C, FR6, FR10, FR12, and FR15 dimensions. These models are also available non-inductively wound and identified as the FNR Series.

TEMPERATURE COEFFICIENT

Although all OMI, T, F, HT and HF resistors are manufactured with a temperature coefficient of ±20PPM/°C over the full temperature range and resistance range as standard production, closer temperature coefficients are available.

Special Close T.C. Availability: All styles can be supplied with temperature coefficients of ±10PPM, ±5PPM, and ±2PPM. Non-inductively wound styles can be supplied with ±10PPM.

Temperature Range: −65°C to +275°C.

Tolerance Range: 0.05% to 5%.

Resistance Range: 0 to 2 watts, 25 ohms to maximum for each size.
Over 2 watts, 50 ohms to maximum for each size.

Code to Designate Special T.C: 10PPM C-10
5PPM C-5
2PPM C-2

To Order Resistors with Special T.C., Specify: (example)

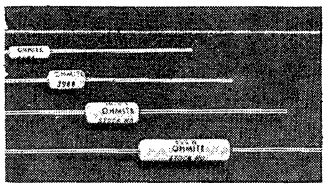
Resistor Type	Resistance Value	Tolerance	T.C. Code
T-5	4700 ohms	0.5%	C-5

SERIES 99 MOLDED AXIAL LEAD VITREOUS ENAMELED RESISTORS

- **FIRST MOLDED, WIREWOUND, VITREOUS ENAMEL RESISTOR**
- **INSULATED! Meets 1000 VAC Test**
- **WITHSTANDS 1500°F Temperature without Distortion**
- **RESISTS Chipping, Breaking**
- **VITRIFIED MARKINGS, Resist Abrasion and Active Solvents**
- **UNIFORM SIZE Permits Clip-Mounting with Significant Heat Sink Benefits**
- **HIGH OVERLOAD CAPABILITY**

An exclusive technique (U.S. Patent No. 3,229,237) permits application of the vitreous enamel coating by **molding** instead of the conventional "dip" process. The dimensionally consistent and thicker coating that results, guarantees a 1000 VAC insulation rating plus unparalleled capability for withstanding very high temperatures, high humidity and immersion in salt solution.

These resistors are normally mounted by their axial leads. However, their consistent form also permits mounting in clips with heat sink benefits up to 100%. Resistor markings are also vitreous and will not burn off even under extreme overloads. Resistance tolerance is ±5%. Series 99 resistors meet the requirements of MIL-R-26 for "insulated" resistors.



TYPE 994, COMMERCIAL, HIGH STABILITY

Standard Tolerance 3% • Tolerances to 0.25% Available

Type 994 units feature long term stability and the Series 99 low temperature coefficient of resistance (T.C.).

Stability: Type 994 resistors, on a 2000 hour, cyclic, load-life test (1½ hour on, ½ hour off) have less than ±2% △R.

Standard Tolerance for Type 994 resistors is ±3%. Tolerances to ±0.25% are available for resistance values 1Ω and above.

TYPE 991 FOR MILITARY APPLICATIONS

Meets the requirements of MIL-R-26E, 350°C max. hot spot. Surpasses the stability requirements of ±3% ΔR on the 2000 hour cyclic load-life test. The low TC of Series 99 units far surpasses the requirements of MIL-R-26E. Standard resistance tolerance is ±5% for values 1 ohm and above; ±10% below 1 ohm; other tolerances can be supplied.

RESISTORS FOR MIL-R-26E

Ohmite Style	"V" Char. MIL Style	Rated Watts @25°C	Ohm Range*	Dimensions Lgth. ±.015	Dia. +.001 −.000	Leads 1½ AWG	Typ. Wt. (g's)
991- 3A	RW69V	3	0.1-2K	.547	.203	20	1.3
991- 5A	RW67V	6.5	0.1-8.2K	.922	.312	20	3.6
991-10A	RW68V	11	0.1-20K	1.781	.312	20	6.9
991-15A	RW56V	14	0.1-9.1K	2.00	.394	20	13.0

* Max. values with .001 wire — except .00175 for RW56V only.

SERIES 88 MOLDED PRECISION POWER RESISTORS

FOR T.C. LESS THAN 0 ±10PPM/°C AND NONINDUCTIVE VERSIONS, CONSULT FACTORY.

TYPE 882 FOR COMMERCIAL POWER APPLICATIONS

This type intended for commercial power applications. These units derate to zero watts at 350°C ambient; T.C. = 0 ±10ppm/°C ; insulation tested at 1000 VAC except 500 volts for 1 watt size.

STANDARD TOLERANCE ±3%; CLOSER AVAILABLE

Ohmite Style	Nom. Rated Watts 25°C	Dimensions Lgth. +.020 −.010	Dia. ±.020	Leads 1½" AWG	Typ. Wt. Grams	Ohms Range Std. 3% Tol.	Max. Wkg. Volts RMS

882-10	11	1.82	0.343	18	6.3	0.10-316,000	1100

* Ohmite's standard power tolerance is 3% supplied at no extra charge over 5% for values 1 ohm and higher; 10% for values below 1 ohm. Closer tolerances are available.

TYPE 884 HIGH STABILITY, PRECISION-POWER TYPE

Type 884 resistors (Riteohm 88) are classified as high stability, precision-power types. They are aged and conservatively rated for maximum long term stability and exhibit superior characteristics despite relatively high operating temperature at rated wattage.

Type 884 units are available in † tolerances of 0.05% and derate to zero watts at 275°C ambient; T.C. = 0 ±10 ppm/°C; insulation tested at 1000 VAC except 500 volts for 1 watt size.
† For applications where maximum stability is of primary importance as may be the case with close tolerance resistors, a derating of 50% is recommended.

STANDARD TOLERANCES TO .05% AVAILABLE FOR VALUES 1 OHM AND ABOVE

TUBULAR VITREOUS ENAMELED RESISTORS

TYPE 200, BROWN DEVIL®

"BROWN DEVIL" (Type 200) vitreous enameled, wirewound resistors, have been an industry byword for small rugged power resistors. Compact, with surprising overload capability. Five sizes are stocked in a broad selection of values.

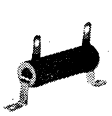
Ohmite Code	Rated Watts	Dimensions Lgth.	Dia.	Leads 1½" AWG	Resistance Range (Ohms)
200-3AA-48	3	7/16	.210	20	0.11 -10K
200-5¼CA-48	5¼	5/8	¼	20	0.15 -20K
200-8D-48	8	1	5/16	18	0.034-25K
200-12D-48	12	1¾	5/16	18	0.083-57K
200-20H-48	20	2	7/16	18	0.14 -113K

TYPE 270, FIXED, RADIAL LUG

Lug type resistors are wire-wound on high quality ceramic cores, protected and insulated by Ohmite vitreous enamel.

Wire of finest alloy and largest practical size is used for each resistance. Original uniform close spacing of the turns maintained by anchoring effect of the vitreous enamel. Wire securely welded to the terminal lugs. Resistance tolerance: ±5% for values 1 ohm or higher; ±10% below 1 ohm.

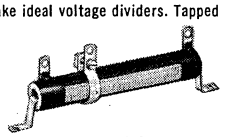
Wattage ratings are for use in free air. When mounted in closed spaces or where circulation of air is restricted, they should not be used at more than one-half wattage rating.



Ohmite Code	Rated Watts	Core Dimensions Lgth.	Dia.	Resistance Range (Ohms)
270-12D-57	12	1¾	5/16	0.075-51.6K
270-25K-40	25	2	7/16	0.15-100K
270-50K-40	50	4	5/16	0.38-260K
270-100M-40	100	6½	¾	0.23-101K
270-175P-46	175	8½	1⅛	0.13-101K
270-225P-46	225	10½	1⅛	0.17-129K

TYPE 210, "DIVIDOHM®" ADJUSTABLE

"Dividohm" resistors make ideal voltage dividers. Tapped "bleeders" are made by using one or more adjustable lugs, as required. Also useful for obtaining odd resistance values.



"Dividohm" resistors are vitreous enameled resistors on which a narrow strip has been left uncovered to expose a portion of each turn. Contact is made by an embossed contact on the adjustable lug.

Ohmite Code	Rated Watts	Core Dimensions Lgth.	Dia.	Resistance Range (Ohms)
210-12D-57	12	1¾	5/16	0.95- 30K
210-25K-40	25	2	7/16	0.24- 67K
210-50K-40	50	4	5/16	0.62-176K
210-75K-40	75	6	5/16	1.0 -284K
210-100M-40	100	6½	¾	1.0 -104K
210-175P-46	175	8½	1⅛	0.67-101K
210-225P-46	225	10½	1⅛	0.86-129K

TYPE 250, "THIN" RESISTORS — FIXED

Ohmite Code	Rated Watts	Core Dimensions Lgth.	W.	Thk.	Resistance Range (Ohms)
250-10TA-51S	10	¾	⅜	⅛	0.15 to 12.9K
250-15TA-51S	15	1	⅜	⅛	0.25 to 21.6K
250-20TA-51S	20	2	⅜	⅛	0.64 to 56.1K
250-25TD-51S	25	1½	13/16	¼	0.14 to 16.0K
250-30TE-57S	30	1¼	1	¼	0.093 to 10.8K
250-40TE-57S	40	2	1	¼	0.22 to 25.0K
250-55TE-57S	55	3½	1	¼	0.92 to 36.5K

Ohmite "Thin" Resistors are used where space is at a premium. Wirewound on flat, oval shaped ceramic cores. Coated with Ohmite's exclusive vitreous enamel.

Integral thru-core mounting brackets equalize heat distribution and conduct heat directly to metal mounting surface. Reduce wattage rating 15% if mounted on non-metallic surface.

Total height from bottom of bracket to top of resistor: 5/16" for 10 thru 20 watts; 11/32" for 25 thru 55 watt size.

Stack-mounted "Thin" resistors

TYPE 260, "THIN" DIVIDOHM® — ADJUSTABLE

Ohmite Code	Rated Watts	Core Dimensions Lgth.	Wdth.	Thk.	Resistance Range (Ohms)
260-15TA(T)-51S	15	1	⅜	⅛	2.8 to 21.6K

special temperature coefficient wire wound resistors

- Applications include transistor circuits, zener diode temperature compensation, temperature measuring devices.
- Available in a range of temperature coefficients from −50 ppm/°C. to +6,000 ppm/°C.
- Values range from 10 ohms to 5 megohms.
- All available with axial or printed circuit leads.
- All meet applicable paragraphs of Mil-R-93D

DIP NETWORKS

Available as ladder or summing networks, or any configuration required.

Depending upon application RCL utilizes wirewound resistors, thin film resistors, thick film resistors, chip resistors, or any combinations of the foregoing.

Contact our Engineering Dept. for complete specifications.

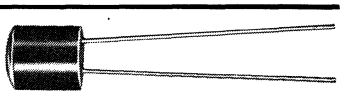
Above T.C.'s refer to .001 minimum wire diameter. Some alloys available in sizes as low as .0007.

RCL printed circuit resistors



non-inductive winding

△ All welded construction.

△ All resistor wire terminations are made at the top of the resistor rather than at the bottom.

This does the following:

a. protects the joints from damage when submerged in a solder bath.

b. by placing these joints as far away as possible from the solder bath, the body acts as a heat sink and thus these terminations are given additional protection.

c. this design generally applies to values of 2K and above.

△ Custom designs on special order.

△ Different lead spacing can be furnished on request.

SERIES T

silicone coated axial power wire-wound resistors

General Specifications Available:

- ☐ **Standard temperature coefficient:** ±10 PPM/°C, (slightly higher for lower values) Additional TC's available from −50 PPM/°C to +6000 PPM/°C.
- ☐ **Tolerance:** ±1.0% is standard. Available to ±.01%.
- ☐ **Wattage Range:** ½ watts to 14 watts.
- ☐ **Resistance Values:** from .01 ohms to 275K. Higher values available.
- ☐ **Coating:** Silicone coating withstands moisture, salt, water immersion, and cleansing solutions.
- ☐ **Leads:** Tinned copperweld is standard. Leads are weldable and solderable.
- ☐ **Dielectric Strength:** 1000 VAC "V" block test.
- ☐ **Insulation Resistance:** 5000 Megohms minimum at 100 volts D.C.
- ☐ **Wide Temperature Range:** From −65°C to +275°C (Characteristic U) or +350° (Characteristic V)

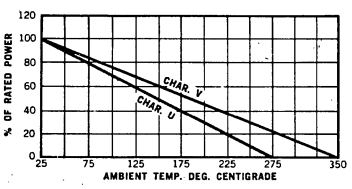
POWER RATINGS:

The RCL "T" Series has two power ratings, depending on operating temperature and stability requirements:

CHARACTERISTIC U: 275°C maximum hot-spot temperature.

CHARACTERISTIC V: 350°C maximum hot-spot temperature.

DERATING:
RCL Series "T" resistors have an operating temperature range of −65°C to +275°C (Characteristic U), or to +350°C (Characteristic V).



Ultra-fast delivery for prototpyes and initial production needs.

subminiature axial lead resistors

These extremely small, encapsulated resistors meet and exceed the specifications of MIL-R-93D. Special RCL techniques also allow the production of custom sizes at minimal cost to the customer.

Tolerances available: from ±1.0% to ±0.001%.

Temperature coefficient: Standard is ±10 PPM/°C.

Temperature coefficients available as low as ±2 PPM/°C.

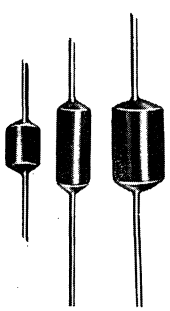
Maximum wattage rating is at 25° C through 125° C

commercial/industrial applications



RCL Economy line — low cost, precision wire wound resistors for test equipment, instruments, industrial controls, communications equipment. All the benefits of wire wounds — low T.C., high stability, close tolerance.

- Price competitive with comparable metal film resistors
- Standard T.C. = ±10 PPM/°C
- Special T.C.'s available on request (see page)
- High temperature epoxy coating provides moisture protection
- Lead Length: 1⅜" minimum
- Wattage rating at 60°C ambient; derated to zero at 105°C
- Low noise
- Molded-in leads for structural strength
- Tolerance Available: ±1.%, 0.5%, 0.25%, 0.1%
- Non-inductive winding available on special order

7070	RB-59	1/2	2	2.00	1.25	1,200	5 Meg.

Maximum wattage rating is from −55° C to +125° C.

MILITARY SPECIFICATIONS

- These standard sizes meet the physical dimensions of MIL-R-93D.
- Test data and approval information available.
- All RCL types meet and exceed the electrical and environmental characteristics of this specification.

INDUSTRY'S BEST DELIVERY

RCL ELECTRONICS, INC.
General Sales Office:
700 South 21st Street, Irvington, N. J. (Area Code 201) 374-3311 • TWX 710-999-5511

FEATURES

- Tolerance: Available from ±3% to ±.01%.
- Standard T.C.: ±10 PPM/°C. Lower T.C.'s are available.
- All popular types, 5 watts through 50 watts
- Molded and welded construction
- Screw mounts on chassis
- Exceptionally high stability at all conventional power ratings
- Utilizes heat-sink effect of chassis
- Clearly marked on top surface of housing for ease of identification after mounting
- Exceeds MIL-R-18546D
- Complete protection against environment

NON INDUCTIVE STYLES: (Series "AL" and "ALB")
The same physical and electrical specifications are available with non-inductive winding. They are identified by adding the letter N after the AL identification.

All dimensional tolerances ±1/64" or 1% whichever is greater.

° Unless otherwise specified all type B resistors are normally supplied sleeved with a .015 wall clear vinyl sleeving which increases the diameter shown by .03.
Order resistors without sleeving if units are to be operated near maximum limits, at elevated ambient, or in all coolant.

** Sleeving available on request. Increase dia. shown by .08.

Available with adjustable tap bands or with tapped windings.

NON-INDUCTIVE RESISTORS: for high frequency power circuits. Available in all fixed-lug types, 10 watts and larger. Standard tolerances: ±10%.

RESISTANCE TOLERANCES: Standard: ±5%, 1.0 ohm and over. Special: down to ±1%.

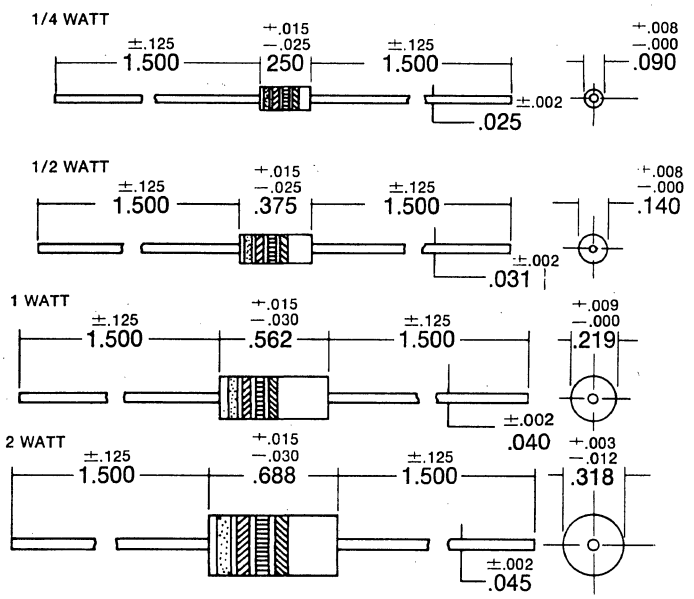
STACKPOLE

FIXED COMPOSITION RESISTORS



Stackpole Resistors offer superior performance in terms of load life, moisture resistance, shelf life, and other important characteristics. Available in ¼, ½, 1 and 2 watt insulated types in resistance values with 5%, 10% and 20% tolerances as shown below.

EASIEST SOLDERING

Soldering is assured thanks to an exclusive extra solder coating applied after the usual tin dipping. Leads of Stackpole Resistors solder readily by any method — dip or iron — stay tarnish-free even after months in storage. And, their baked-on color codes resist solvent scrubbing operations . . . maintain uniform, attractive appearance.

MILITARY APPROVED

Resistors approved to MIL-R-39008 have failure rates expressed as percentages per 1000 hours based on load life data generated at 50 percent full load operation and an ambient temperature of 70°C. The failure rates are established at a 60 percent confidence level on the basis of the life test. All Stackpole Resistors are qualified to the R level of MIL-R-39008 which corresponds to a failure rate of 0.01 percent per 1000 hours.

SAGE SILICOHM® fixed wirewound units are not ordinary power resistors. They provide remarkable miniaturization vs required wattage performance. Sage has pioneered the area of power handling capacity combined with precision and stability features ordinarily associated with MIL-R-93 and like resistors.

MIL-R-26D TYPE DESIGNATIONS

EXAMPLE: RW69 V 471

- RW69 — Body Style
- V — Characteristic, V only (350°C max.)
- 471 — Nominal resistance, Ω. Two significant digits plus third indicating number of zeros. Below 10ΩR = decimal and last digit is significant.

TOLERANCE: ±5% for values 1Ω and up; ±10% below 1Ω.
TC: ±260 ppm/°C 20Ω and up; 400 ppm/°C below 20Ω.

MIL STYLE	SAGE STYLE	MIL WATTS	DEFINED OHMIC RANGE (Single layer wound .00175 min. wire dia.)
RW55V	1900S	7	.1—5100
RW56V	1950S	14	.1—9100
RW67V	1550S	6.5	.1—3600
RW68V	1700S	11	.1—8200
RW69V	1200S	3	.1—910

EXAMPLE: RW70 U 49R9 F

- RW70 — Body Style
- U — Characteristic, U only (275°C max.)
- 49R9 — Nominal resistance, Ω. Three significant digits plus fourth indicating number of zeros. Below 10ΩR decimal and following digits are significant.
- F — Tolerance ± % B = .1% D = .5% F = 1.0%

TC: ±30 ppm/°C 10Ω and above
±50 ppm/°C 1Ω to 10Ω
±90 ppm/°C below 1Ω

MIL STYLE	SAGE STYLE	MIL WATTS	VOLTAGE Max.	DEFINED OHMIC RANGE		
				Min.	Max. for .001" wire (Navy)	Max. for .0008" wire (all other)

RW80U	1000SB	2	——	.1	1240	3160
RW81U	250SB	1	25	.1	649	——

MIL-R-18546D TYPE DESIGNATIONS

Example: RE65 G 1001

- RE65 — Style
- G — Characteristic, 275°C Max. G for regular inductive winding N for non-inductive winding
- 1001 — Nominal resistance, Ω. ±1% only. Three significant digits plus fourth indicating number of zeros. Below 100Ω R = decimal and following digits are significant.

T.C. ±30 ppm/°C 2000Ω and above
±50 ppm/°C under 2000Ω

MIL STYLE	SAGE STYLE	MIL WATTS	DEFINED OHMIC RANGE	
			Min.	Max. (.001 wire)
RE60G	3105M	5	.1	3320
RE60N	3105NM	5	1.0	1650
RE65G	3010M	10	.1	5620
RE65N	3010NM	10	1.0	2800
RE70G	3225M	20	.1	12100
RE70N	3225NM	20	1.0	6040
RE75G	3550M	30	.1	39200
RE75N	3550NM	30	1.0	19600

CONSIDER THESE DETAILS:

- Wattage Rating, ½ to 50 watts
- Tolerance and stability as close as .05%
- T.C. 20 ppm/°C or 10 ppm/°C
- 1000 volt rms body insulation
- Low values not available in other resistors (specials to .01Ω)
- Characteristic U or V wattage rating: to 275°C or 350°C
- Power load life stability <.5%/1000 hours
- Weldable leads when specified
- Non-inductive winding when specified

ELM7A	BELOW 1Ω	1Ω to 9.9Ω	10Ω to 100k
ELM10A	BELOW 1Ω	1Ω to 9.9Ω	10Ω to 275k

1. Less than 100°C temp., rise when derated to 30% of wattage under characteristic "V."
2. Silicone Coated
3. Non-Inductively wound version available. One-half the resistance value shown in data chart 1.
4. Reduces the possibility of burned printed circuit boards.
5. Insures resistor identification.
6. Shock and vibration problems reduced when properly installed.

1050 SECOND ST. MANCHESTER, N.H. 03102
TWX 710-220-1844 Tel. (603) 625-8994

TYPE SA EPOXY

ENCAPSULATED AXIAL
DESIGNED TO MEET OR EXCEED MILR93D.
All units represented may be modified for minimum inductance and capacitive effects at frequencies above the audio range. Rise and decay time characteristics are measured from 10% to 90% of peak pulse amplitude with a 100 kilocycle pulse input.
Temperature coefficients are available to 0 ± 4PPM/°C and T.C. matches are available to 2PPM/°C.
Stabilities of 0.005% per year are available on a production basis.

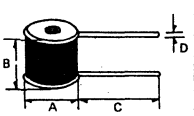
TYPE CR/CA/CL SERIES

CERAMIC CORE RESISTORS
"CR" Ceramic Radial Leads
"CA" Ceramic Axial Leads
"CL" Ceramic Lugs
Ceramic spool type unit. Windings sealed in varnish. Hole provided for screw mounting. Operate from -65°C to 105°C. Inherently good stability.
Excellent for use under laboratory conditions and most commercial applications.



Style	Diameter A ±.015	Length B ±.031	Lead Diam. D	Max Value (.0005 Wire)	Wattage	Max. V	Hole (clearance) Screw #

Each of the three volumes of **eem** contains a Product Index and Directory, the Green Section. This Index is a complete alphabetical listing of products. If the product you are looking for appears in the particular volume you are consulting, the green pages will provide a complete list of manufacturers who make that product. If the product is included in another volume of **eem**, the Index will provide a cross reference, directing you to the correct volume.

Boldface listings under product headings indicate that the listed manufacturer has products cataloged in **eem. Boldface** listings with page numbers indicate that this manufacturer's catalog pages include detailed data on the product indicated in the product heading.

Similar products are grouped together. For example, the many kinds of meters are listed in this manner: "Meters, Ampere," "Meters, Capacitance," "Meters, Flux" etc. To help you locate the prime product heading, there are hundreds of cross references, e.g. "Voltmeters — See Meters, Volt."

Catalog pages in **eem** are divided into three volumes based on very broad product groupings. These are:

Volume 1 — Test Instruments / Equipment and Systems

Volume 2 — Active Components / Circuit Assemblies / Controls and Drives

Volume 3 — Passive Components / Materials / Hardware

These volumes are further divided into 55 **eem** Product Sections which are assigned individually to the most appropriate volume. Within each of the 55 product sections manufacturers are arranged alphabetically, wherever possible. A complete index of all manufacturers' catalog pages is included in every volume. To locate the catalog pages of a specific manufacturer, refer to this index at the beginning of the white section in any of the three volumes. This index will provide the page numbers you require. In Volume 1, the index begins on page 302, in Volume 2 on page 1274 and in Volume 3, page 2310.

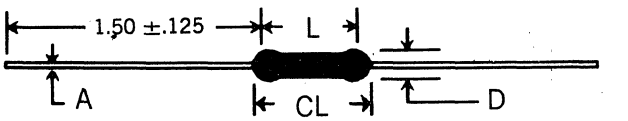
CONFORMALLY COATED (C)

PAINT COATED (P)



*These high resistance values, being above the highest MIL-R-10509 top values, have higher temperature coefficients, but otherwise are designed to meet the requirements of the specification. These high resistance values must be measured carefully under controlled conditions of humidity and temperature, to reduce possible variations due to test conditions and temperature coefficients. Due to higher temperature coefficient, value above approximately two times MIL maximum will be supplied with a standard tolerance of ±2.0%.

TYPICAL ENVIRONMENTAL EFFECTS ON TRW/IRC RESISTORS The following chart shows the comparison between the maximum allowable percent change in resistance as specified by MIL-R-55182, Characteristics H, J or K, and the typical change found in the resistors manufactured by TRW/IRC. The typical characteristics have been derived from over 170 million government monitored test hours of data. For more detailed information on any specific environmental condition, contact either your local TRW Sales Office or the factory.

Environmental Conditions	Maximum Change per MIL-R-55182(±%)	Typical TRW/IRC Performance(±%)
Temperature Cycling	0.20	0.02
Overload	0.20	0.05
Low Temperature Operations	0.15	0.03
Terminal Strength	0.20	0.02
Dielectric Withstanding Voltage	0.15	0.05
Resistance to Soldering Heat	0.10	0.02
Moisture Resistance	0.40	0.15
Shock, Medium Impact	0.20	0.05
Vibration, High Frequency	0.20	0.02
2000 Hour Life	0.50	0.10
10,000 Hour Life	2.00	0.30
High Temperature Exposure	0.50	0.10

TOLERANCE Standard resistance tolerance 0.1% (B), 0.5% (D), 1.0% (F). Closer tolerance for special specifications are available upon request.

Our capabilities are not limited to the specifications shown on this page. Should you have an application for special TC's, ranges and sizes, we can help you.

Customizing the established reliability specs to meet your particular Hi-Rel needs is our specialty.

TRW®
ELECTRONIC COMPONENTS

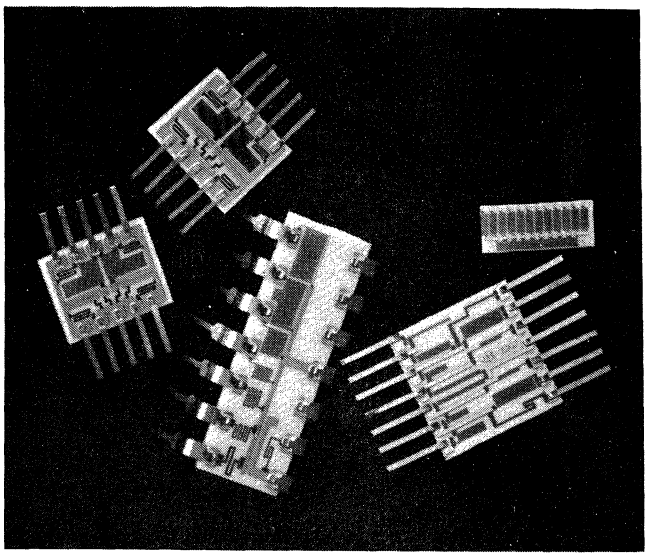
PRECISION RESISTOR NETWORKS

TaNFilm* PRECISION THIN-FILM RESISTOR NETWORKS

The IRC Burlington Division of TRW has for years been the leader in metal film resistor technology. Now this thin film resistor know-how has been applied to subminiature, precision, resistor networks. TRW TaNFilm networks are made of sputtered tantalum nitride, using TRW designed equipment and processes.

TaNFilm is inherently immune to electrolytic attack, since the manufacturing process passivates each resistor with an anodized surface layer. The precision processes used to manufacture TaNFilm networks allow routine tolerances of ±0.1% and make tolerances of ±0.03% economically feasible. The continuously sputtering process makes TaNFilm very uniform, so resistors track over the full temperature range to a few parts per million. The many hours of test data on TaNFilm and its well defined chemistry allow accurate performance prediction.

A variety of standard TaNFilm networks are available. Custom TaNFilm networks can be fabricated to your requirements in dual in-line packages, flat packs, conformal coating or unencapsulated for wire bonding, or beam lead attachment.

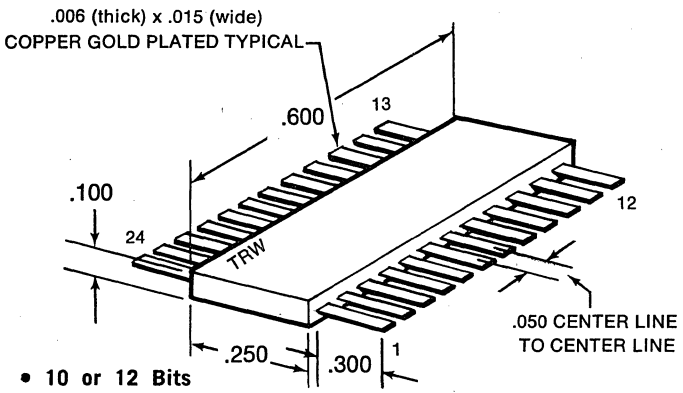


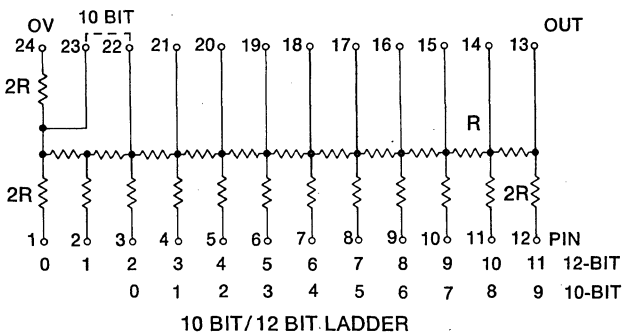
TYPICAL TaNFilm Design CRITERIA[1]

Resistive Value	20Ω to 100,000Ω
Tolerance	±0.03% to ±1.0%
TCR	0 to −80 ppm/°C
TCR Tracking	0 to 5 ppm/°C
Settling Time	< 10nSec.
Drift	0.1% per year
Noise	< −25dB
Voltage Coefficient	< 5 ppm/V
Series Inductance	< 5 nH
Shunt Capacitance	< 0.1 pF

[1] These are not absolute units. Contact factory for your specific requirements.

HIGH PRECISION TaNFilm* R-2R LADDER NETWORKS





10 BIT/12 BIT LADDER

- **10 or 12 Bits**
- **Inherent Passivation** 10/12 BIT PACKAGE
- **Wide Temperature Range**
- **Subminiature**

These subminiature R-2R ladders feature the inherent passivation of TRW TaNFilm tantalum nitride thin film, yielding hermetic performance without hermetic cost.

They will meet a wide range of requirements and offer the inherent low noise, excellent stability and short settling time of TRW TaNFilm.

*Trademark of TRW Inc. for its Tantalum Nitride thin film.

SPECIFICATIONS[1]

Ladder Resistance (R)	5K
Temperature Coefficient	−50 to −100 ppm/°C
T.C. Tracking	±2 ppm/°C
Settling Time	20 ns
Noise	< −25dB
Temperature Range	−55°C to +125°C
Accuracy	±½ Least Significant Bit
Switch Compensation	up to −5%

[1] Standard characteristics, contact factory for special requirements.

1/8 AND 1/4 WATT MOLDED METAL GLAZE RESISTORS (TYPE RG)

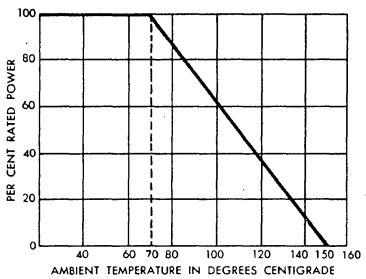
TRW®
ELECTRONICS GROUP

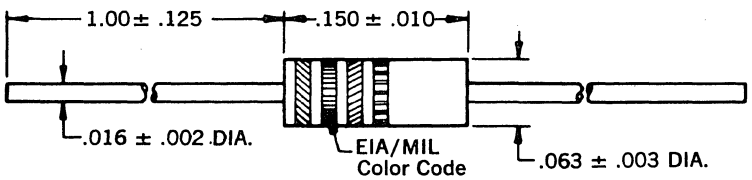
1/8 WATT

RG⅛ SPECIFICATIONS

MIL-R-11 style equivalent RC05
Resistance Range ..... 10Ω through 100K
Resistance Tolerance ..... ±5%
Power Rating ..... ⅛ Watt at 70°C, derated to 0 at 150°C
Temperature Coefficient ..... Less than ±500 PPM/°C
Maximum Continuous Working Voltage 200V
Dielectric Withstanding Voltage ..... 300V at atmospheric pressure
Insulation Resistance ..... 1,000 Megohms, Dry

DERATING CURVE TEMPERATURE — POWER

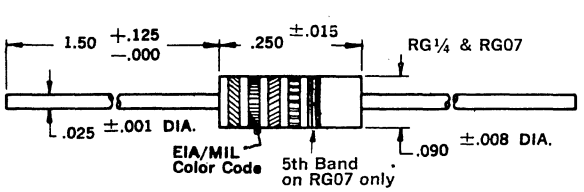




1/4 WATT

RG¼ SPECIFICATIONS

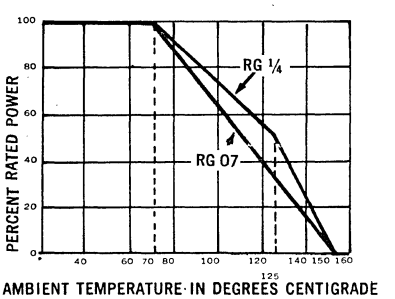
MIL-R-11 style equivalent RC07
Resistance Range ..... 6.2Ω through 680K
Resistance Tolerance ..... ±5%
Power Rating ..... ¼ Watt @ 70°C, derated to 0 at 150°C
Commercial — ½ watt @ 70°C
¼ watt @ 125°C, derated to 0 at 150°C
Maximum Continuous Working Voltage 250V
Dielectric Withstanding Voltage ..... 500V RMS at atmospheric pressure
325V RMS at 3.4 inches of Mercury
Insulation Resistance ..... 1,000 Megohms, Dry
Temperature Rise at rated power ..... ¼ watt — 20°C, ½ watt — 40°C



RG07 SPECIFICATIONS

MIL-R-22684 style equivalent RL07
MIL-R-39017 style equivalent RLR07
Resistance Range ..... 10Ω through 150K
Resistance Tolerance ..... ±2% and ±5%
Power Rating ..... ¼ Watt at 70°C, derated to 0 at 150°C
Maximum Continuous Working Voltage 250V
Dielectric Withstanding Voltage ..... 500V RMS at atmospheric pressure
325V RMS at 3.4 inches of Mercury
Insulation Resistance ..... 1,000 Megohms, Dry
Temperature Rise at rated power ..... 20°C

DERATING CURVE TEMPERATURE — POWER FOR RG¼ & RG07



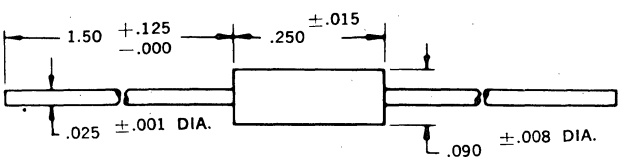
TRW® 1/4 AND 1/2 WATT PRECISION MOLDED THICK FILM RESISTORS (TYPES T & TF)

ELECTRONICS GROUP

1/4 WATT

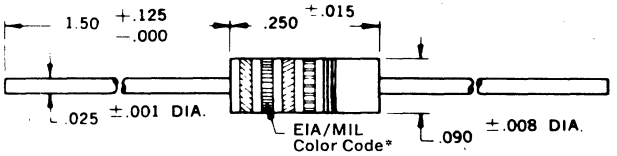
T-55 AND TO-55 SPECIFICATIONS

MIL-R-10509 style equivalent RN55
Resistance Range ..... T-55 — 10Ω through 301K
TO-55 — 10Ω through 499K
Resistance Tolerance ..... ±1%
Temperature Coefficient (PPM/°C) ..... T-55 — +200, −500
TO-55 — ±100
Power Rating ..... ¼ Watt at 70°C, derated to 0 at 160°C
⅛ Watt at 125°C, derated to 0 at 160°C
Maximum Continuous Working Voltage 250V
Dielectric Withstanding Voltage ..... 500V RMS at atmospheric pressure
325V RMS at 3.4 inches of Mercury
Insulation Resistance ..... 1,000 Megohms, Dry
Temperature Rise at rated power ..... 20°C



TF07 SPECIFICATIONS

MIL-R-22684 style equivalent RL07
Resistance Range ..... 1Ω through 10Ω
Resistance Tolerance ..... ±1%, ±2% and ±5%
Temperature Coefficient (PPM/°C) ..... ±100
Power Rating ..... ¼ Watt at 70°C, derated to 0 at 150°C
Dielectric Withstanding Voltage ..... 500V RMS at atmospheric pressure
325V RMS at 3.4 inches of Mercury
Insulation Resistance ..... 1,000 Megohms, Dry
Temperature Rise at rated power ..... 20°C

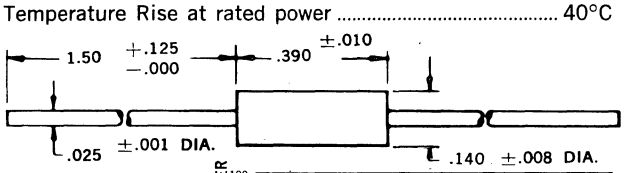


*On ±2 and ±5% units. Printed markings standard on ±1% units.

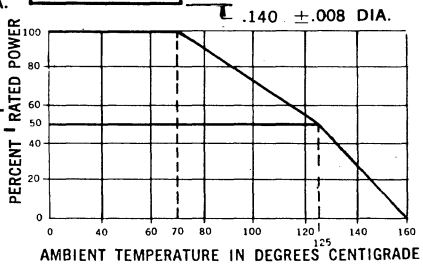
1/2 WATT

T-60 AND TO-60 SPECIFICATIONS

MIL-R-10509 style equivalent RN60
Resistance Range ..... T-60 — 24.9Ω through 499K
TO-60 — 10Ω through 1 Meg.
Resistance Tolerance ..... ±1%
Temperature Coefficient (PPM/°C) ..... T-60 — +200, −500
TO-60 — ±100
Power Rating ..... ½ Watt at 70°C, derated to 0 at 160°C
¼ Watt at 125°C, derated to 0 at 160°C
Maximum Continuous Working Voltage 350V
Dielectric Withstanding Voltage ..... 700V RMS at atmospheric pressure
400V RMS at 3.4 inches of Mercury
Insulation Resistance ..... 1,000 Megohms, Dry
Temperature Rise at rated power ..... 40°C

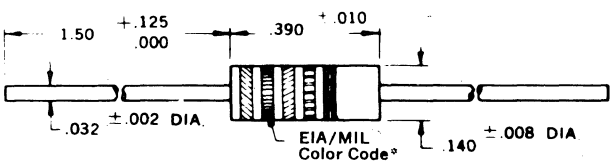


DERATING CURVE TEMPERATURE — POWER FOR T-55, TO TO-55, T-60 & TO-60



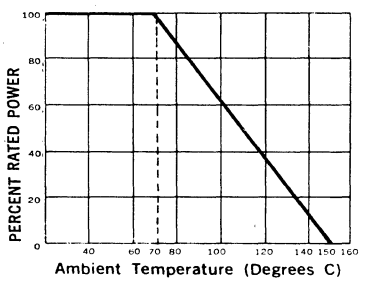
TF20 SPECIFICATIONS

MIL-R-22684 style equivalent RL20
Resistance Range ..... 1Ω through 10Ω
Resistance Tolerance ..... ±1%, ±2% and ±5%
Temperature Coefficient (PPM/°C) ..... ±100
Power Rating ..... ½ Watt at 70°C, derated to 0 at 150°C
Dielectric Withstanding Voltage ..... 700V RMS at atmospheric pressure
400V RMS at 3.4 inches of Mercury
Insulation Resistance ..... 1,000 Megohms, Dry
Temperature Rise at rated power ..... 40°C



*On ±2 and ±5% units. Printed markings standard on ±1% units.

DERATING CURVE TEMPERATURE — POWER FOR TF07 & TF20



1/2, 1 AND 2 WATT MOLDED METAL GLAZE RESISTORS (TYPE RG)

TRW ELECTRONICS GROUP

1/2 WATT

RG20 SPECIFICATIONS

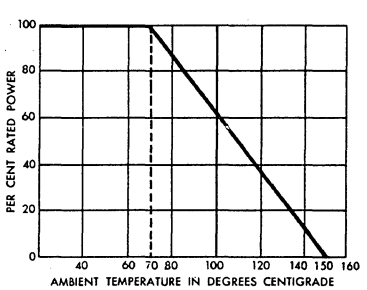
MIL-R-22684 style equivalent RL20
MIL-R-39017 style equivalent RLR20
Resistance Range ..... 4.3Ω through 470K
Resistance Tolerance ..... ±2% and ±5%
Power Rating ..... ½ Watt at 70°C, derated to 0 at 150°C
Maximum Continuous Working Voltage 350V
Dielectric Withstanding Voltage ..... 700V RMS at atmospheric pressure
400V RMS at 3.4 inches of Mercury
Insulation Resistance ..... 1,000 Megohms, Dry
Temperature Rise at rated power ..... 40°C

1 WATT

RG32 SPECIFICATIONS

MIL-R-22684 style equivalent RL32
MIL-R-39017 style equivalent RLR32
Resistance Range ..... 10Ω through 1.0 Meg.
Resistance Tolerance ..... ±2% and ±5%
Power Rating ..... 1 Watt at 70°C, derated to 0 at 150°C
Maximum Continuous Working Voltage 500V
Dielectric Withstanding Voltage ..... 1000V RMS at atmospheric pressure
500V RMS at 3.4 inches of Mercury
Insulation Resistance ..... 1,000 Megohms, Dry
Temperature Rise at rated power ..... 55°C

DERATING CURVE TEMPERATURE — POWER FOR RG20, RG32, RG2 & RG42



2 WATTS

RG2 SPECIFICATIONS

Resistance Range ..... 10Ω through 1.5 Meg.
Resistance Tolerance ..... ±5%
Power Rating ..... 2 Watts at 70°C, derated to 0 at 150°C
Maximum Continuous Working Voltage 500V
Dielectric Withstanding Voltage ..... 1000V RMS at atmospheric pressure
500V RMS at 3.4 inches of Mercury
Insulation Resistance ..... 1,000 Megohms, Dry
Temperature Rise at rated power ..... 90°C

RG42 SPECIFICATIONS

MIL-R-22684 style equivalent RL42
Resistance Range ..... 10Ω through 1.5 Meg.
Resistance Tolerance ..... ±2% and ±5%
Power Rating ..... 2 Watts at 70°C, derated to 0 at 150°C
Maximum Continuous Working Voltage 500V
Dielectric Withstanding Voltage ..... 1000V RMS at atmospheric pressure
500V RMS at 3.4 inches of Mercury
Insulation Resistance ..... 1,000 Megohms, Dry
Temperature Rise at rated power ..... 90°C

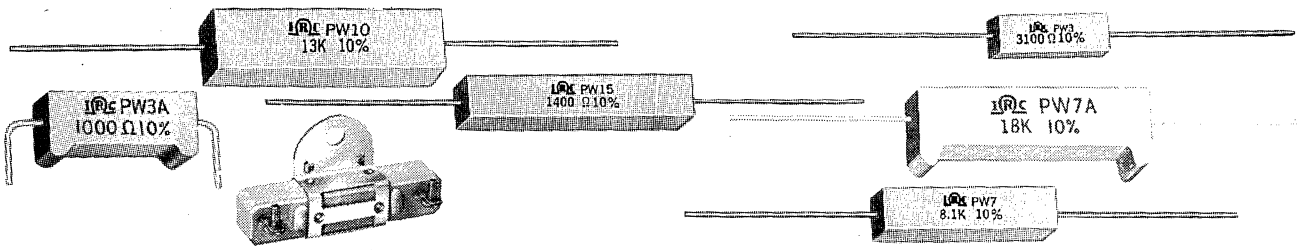
HIGH TEMPERATURE POWER RESISTORS

TRW®
ELECTRONICS GROUP



FEATURING FIREPROOF INORGANIC CONSTRUCTION
for temperature compensation • circuit protection

IRC Type PW Wirewound Resistors are available in nine ratings: 2, 3, 5, 7, 10, 15, 20, 22 and 50 watts.

DESIGN AND CONSTRUCTION: The resistance elements of PW resistors are rigorously quality controlled for resistance, temperature coefficient, diameter and elongation. The wire is wound on a fiberglass core, which forms a smooth, uniform surface. The fill is the same inorganic fireproof material used in premium IRC resistors. The husky, oxygen-free copper lead wires are held by ¼ hard brass terminals. The whole assembly is then sealed in a crackfree steatite ceramic case. Special PW resistors are also available for circuit protection and temperature compensation. Optional construction is available for printed circuit board applications.

TOLERANCE: ±10% is the standard tolerance on Standard Temperature Coefficient Resistors.

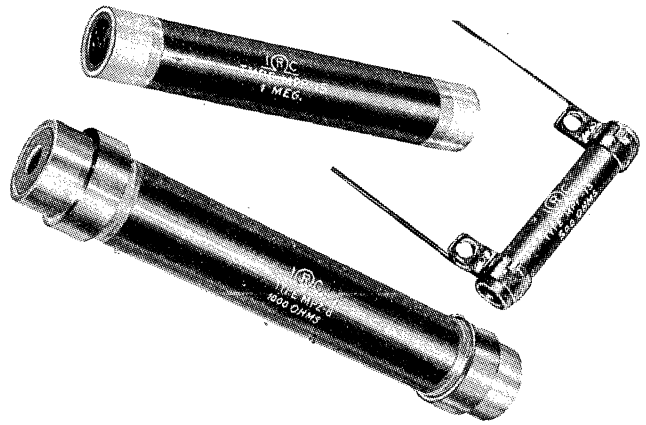
HIGH FREQUENCY, HIGH VOLTAGE RESISTORS

TRW®
ELECTRONICS GROUP



TYPE MP

IRC type MP resistors have a specially designed resistance film which provides optimum performance in all characteristics while operating at high frequencies. The cross-sectional area of this exclusive film is held to less than 0.001" thickness to assure low inherent capacity and freedom from skin-effect.

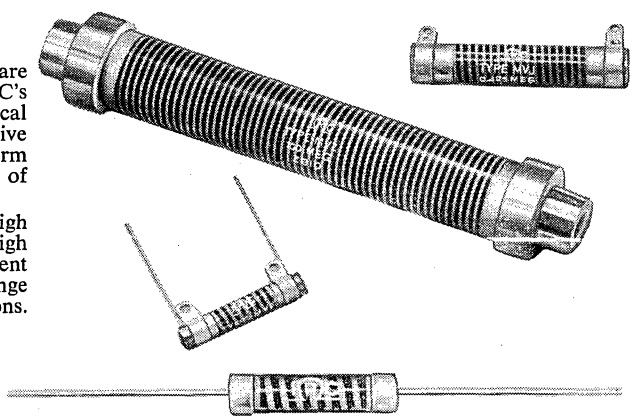
Terminal bands of colloidal silver are applied to each end of the resistor to form a permanent low resistance contact to the resistance film. Lug, axial lead or ferrule terminals, when required, are secured to the silver end-bands. A protective coating is baked on the entire resistor film.

Type MP Resistors are used extensively for applications such as broad band RF amplifiers, RF probes, rhombic antenna terminating resistors, dummy loads for transmitters and dielectric heating equipment, television side-band filters, surge generator and other circuits involving high frequency measuring circuits and radar pulse equipment.

TYPE MV

For high voltage requirements where high resistance and power are needed, IRC Type MV Resistors offer exceptional stability. IRC's exclusive composition film type resistance coating is applied in helical form on a ceramic tube to provide a conducting path of long, effective length. The mechanical spacing of the helical turns gives a uniform pitch, and allows uniform voltage gradient throughout the length of the resistor.

MV Resistors are particularly suited for voltmeter multipliers, high resistance standards, bleeders, grid leaks, voltage dividers, TV high voltage circuits, cathode ray tube circuits. Also, protective equipment for high voltage circuits, photoelectric cell applications, high range bridge circuits, ionization chambers and similar electronic applications.

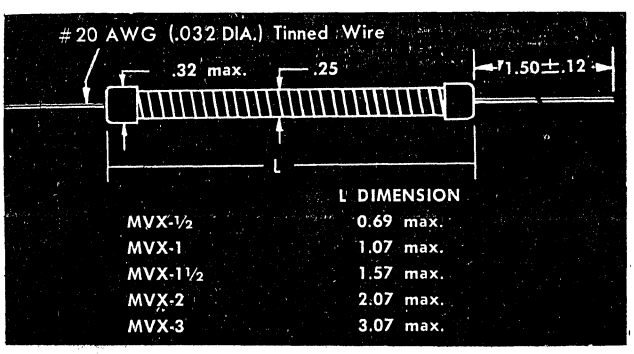


HIGH OHMIC—TYPE MVX

Type MVX meets the requirements for a small, high-range resistor with axial leads. It can be mounted through a hole in a panel or terminal board of insulating material without terminal interference. Construction corresponds to that of other MV types except for the terminal and method of terminal attachment.

TERMINALS. MVX Resistors can be furnished with or without end caps and axial leads. When furnished without leads, contact must be made to .25-inch silvered ends by pressure clips, since they cannot be soldered.

TOLERANCE. Standard tolerance for MVX Resistors is ±20%. ±5% and ±10% are available as shown in the table at right, at extra cost.



Type	Power Rating In Watts	Peak Voltage Rating	MINIMUM AVAILABLE RESISTANCE ±5%, 10%, 20% Tolerance	MAXIMUM AVAILABLE RESISTANCE ±5% Tol. In Megs	±10% Tol. In Megs	±20% Tol. In Megs
MVX-½	.5	1,000	1K	200	1,000	4,000
MVX-1	1	3,500	2.5K	350	2,500	8,000

MOX-5	2500 megohms	12.5	37,500 V	220°C	5.050±.050	.295±.015	Si Conformal

*Applicable above critical resistance

MOX-1E — MOX-5E in same values with diameter (B) .345 max.

2 and 5% available in all values. 1% to 1000 megohms.

Temp Coefficient: This parameter varies with resistance value. Coefficients of 100 ppm in the low resistance values can be maintained, increasing to 2000 ppm in the higher values.

Voltage Coefficient: This parameter also depends on resistance value. Where a low voltage coefficient is required, it is possible to obtain values of 5 ppm or less.

Stability: Better than ± 2% for 2000 hours at full load for MOX-400, -750, -1125; better than ± 1% for 2000 hours for MOX-1 through -5.

Dielectric Withstanding: Adequate to 750 volts. With our special epoxy versions MOX-1E—MOX-5E this increases to 3500 dc volts with an attendant loss of power handling capabilities.

Insulation Resistance: MOX-1 through MOX-5 will meet the requirements of MIL-R-10509F, paragraph 3.14.

Standard Tolerances: For MOX-1 through MOX-5, 5% in all values and 1% available to 1000 megohms. 0.5% for limited values on request. For MOX-400, MOX-750 and MOX-1125: 1%, 2% and 5% available below 1000, 2000 and 3000 megohms respectively. 2%, 5% and 10% are available in the upper ranges for each type respectively.

Varnished Carbon Resistors

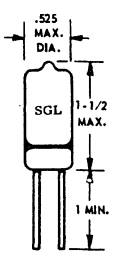
HV Series High Voltage Resistors Features—Resistances from .01—25,000 megohms. Power ratings: Radial lug 1—10W; axial lead 1—5W. Max working voltages: Radial lug 3500—40,000 volts; axial lead 3500—30,000 volts.

HP Series High Power Resistors Features—Radial band type. Resistances 0.5—100,000 megohms. Power ratings 12—100W. Max. working voltages 15—125 KV.

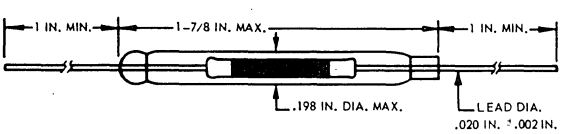
HF Series High Frequency Resistors — Elements are applied as a solid coating resulting in low inductance. Features: Resistances 20 ohms—100 megohms. Power ratings: Radial lug 1—10W; radial band 12—90W; axial lead 1—5W. Max working voltages: Radial lug 375—3100; radial band 1250—8500; axial lead 375—2600 volts.

Protective Spark Gaps

Types SGL, SGS, and SGC Series spark gaps are available for designing into equipment a high degree of protection from nearby lightning strikes or other transient producing phenomena. Various configurations and mounting arrangements available. Complete specifications on request.



TYPE RX-1 HI-MEGOHM RESISTORS



Features — Hi-Megohm resistors continue to be Victoreen's forte and the Type RX-1 series is pre-eminent as the most reliable of its type. Manufactured in accordance with MIL-R-14293A, characteristic T. Carbon coated glass rod resistor element banded with silver for electrical contact. Special silicone varnish coating. Noise level negligible. Available in resistances from 10^7—10^{14} ohms. Power rating is 1 divided by resistance in megohms. Tolerance 1% below 10^{12}, 2% and 5% below 10^{13} ohms, 10% over entire range. Max working voltage 1000V. Max ambient temperature 100°C.

PRECISION RESISTORS

TEMPERATURE COEFFICIENT

Vishay Resistors are produced by applying a specific bulk metal film of known and controllable properties on glass. This self-compensating system of glass and metal produces a dome shaped TC curve with zero TC at 25°C, and a maximum variation of 1ppm from 0 to 60°C.

TOLERANCE

The Vishay patented process, which combines photoetching techniques and bulk metal film set on glass, permits trimming to extremely high accuracy. Coarse and fine adjustment to tolerances of ±0.005% is standard and ±0.001% is available when resistors are hermetically sealed.

TRACKING

Optimum TC tracking between all Vishay resistors — *regardless of value* — is obtained because all are made of the same alloy, are of identical thickness, and are set in the same manner on glass. Vishay will guarantee TC tracking of their resistors *even when manufactured more than 2 years apart!*

RISE TIME

The etched planar construction of Vishay resistors results in extremely low and reproducible reactance. Settling time is less than 1 nanosecond for individual resistors; when grouped in network form, a typical R/2R ladder of 10 bits will have less than 10 nanoseconds rise time and less than 50 nanoseconds settling time; and no ringing.

STABILITY

Flexible welded ribbon leads and elastomeric encapsulation isolate the resistive element from mechanical stresses, giving the Vishay resistor ultra-high stability. The standard Vishay stability guarantee is 25ppm/yr. (50ppm max. over 3 years); and by hermetically sealing the resistors, Vishay can achieve 5ppm/yr.

1 PPM/ C. (0 to +60 C.) FOR ALL VALUES | **±0.001%** | **1/2 PPM/ C. FOR ALL VALUES** | **1 NANOSECOND** | **5 PPM/YR.**

Other characteristics, including .04% ΔR through Load Life; and non-measurable Noise, make Vishay resistors the most significant breakthrough in advancing circuit design since the transistor.

Each of the three volumes of **eem** contains a Product Index and Directory, the Green Section. This Index is a complete alphabetical listing of products. If the product you are looking for appears in the particular volume you are consulting, the green pages will provide a complete list of manufacturers who make that product. If the product is included in another volume of **eem**, the Index will provide a cross reference, directing you to the correct volume.

Boldface listings under product headings indicate that the listed manufacturer has products cataloged in **eem. Boldface** listings with page numbers indicate that this manufacturer's catalog pages include detailed data on the product indicated in the product heading.

Similar products are grouped together. For example, the many kinds of meters are listed in this manner: "Meters, Ampere," "Meters, Capacitance," "Meters, Flux" etc. To help you locate the prime product heading, there are hundreds of cross references, e.g. "Voltmeters — See Meters, Volt."

Catalog pages in **eem** are divided into three volumes based on very broad product groupings. These are:

Volume 1 — Test Instruments / Equipment and Systems

Volume 2 — Active Components / Circuit Assemblies / Controls and Drives

Volume 3 — Passive Components / Materials / Hardware

These volumes are further divided into 55 **eem** Product Sections which are assigned individually to the most appropriate volume. Within each of the 55 product sections manufacturers are arranged alphabetically, wherever possible. A complete index of all manufacturers' catalog pages is included in every volume. To locate the catalog pages of a specific manufacturer, refer to this index at the beginning of the white section in any of the three volumes. This index will provide the page numbers you require. In Volume 1, the index begins on page 302, in Volume 2 on page 1274 and in Volume 3, page 2310.

Speed Production and Reduce Labor Costs —

Once you've set one Vista-Trim trimmer to a given value, the same (approximate) value can be set on others by visual measurement.

Saves Valuable Time —

Both the element and contact carrier are visible through the semi-transparent top. Approximate final settings can be made with or without an ohmmeter. Example: For 50 ohms, set the contact at half the length of its travel along a 100 ohm element.

Reduce Field Service Time —

The repair of installed equipment is speeded up because the same advantages apply as for new equipment. The technician can visually adjust all units to approximate final settings. This saves time, aids him considerably by allowing quick easy final adjustments to balance the circuits.

Vista-Trim trimmers have the same electrical, mechanical and environmental specifications as the standard series presented in Amphenol Catalog T-2. To order, add suffix: -2 to the standard Amphenol part number, e.g. 3810P-101-2.

Optional 0.100" or 0.200" Pin Spacing on ¾" Commercial Trimmers

Amphenol has expanded its entire line of ¾" rectangular cermet, Film-Met™ and wirewound trimmers to include 0.200" pin spacing. You can now specify 0.100" or 0.200" pin spacing as standard on the following models. To order, indicate the appropriate terminal designation -P, K or Y- in Amphenol's part numbering system for the spacing desired, e.g. 3800**P**-101 or 6034**K**-101.

Models Available	Termination Designation	Pin Spacing
3805 3815 6034 3811 3800 3810	P	0.100"
	K	0.200"
6034	Y	0.100"

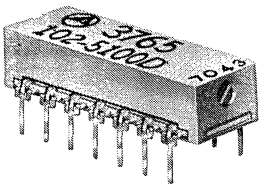
TRN: A Unique Solution to Circuit Problems



Some background — Several developments recently have profoundly changed electronic industry design and manufacturing techniques—not the least of which has been the trend toward dual-in-line packaging (DIP). The quest for an effective DIP trimmer package has been industrywide. Several manufacturers already have modified existing trimming potentiometers by turning them on their side, adding terminals, and calling them DIP trimmers.

But this solution didn't go far enough for Amphenol. A DIP trimmer is a definite plus but the manufacturer of circuits still has to insert individual fixed resistors either by hand or machine. So Amphenol came up with a new concept: a trimmer with up to five fixed resistors on one substrate contained in one DIP package. We've named the product TRN, or Trimming Resistive Network*.

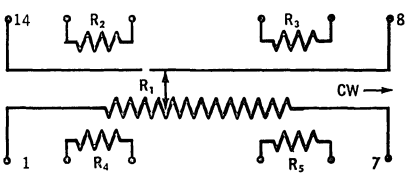
The product will conserve PC board "real estate" by a six to 1 ratio and will save its users money. With TRN there is only one component to procure, inventory and prep for insertion instead of six and the TRN can be automatically inserted.

Not only does Amphenol's new TRN offer exceptional economies, it does more jobs, and does them better, than anything currently available.

Consider: Amphenol's cermet TCR performance values of 50 or 100 ppm/°C. The one-paste, one-step deposition method that we use allows for uniform predictable drift of TCR within the range of ±10 ppm/°C of each other for each resistor in the circuit. In addition the unit features a ratio accuracy with respect to the variable resistor available as low as ±1%.

All componentry is housed in a single package, which means that ambient temperature for each resistor in the circuit is the same as for all others. Plus you get versatility of applications and reliable, long life.

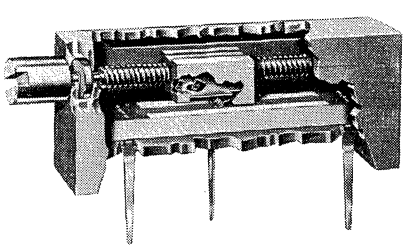
DIMENSIONS: In accordance with EIA Microelectronics Outline, DIP Family, 0.300 inch row spacing.



This voltage divider network consists of thick film cermet resistors R_1 through R_5 individually terminated to provide flexibility for connecting in various circuit configurations. R_1 is adjustable by means of a leadscrew.

*Patent Pending

Film-Met™ by Amphenol*



It's the first major improvement in infinite resolution trimmers since cermets. Film-Met is an exclusive Amphenol resistance element completely different from wirewound and cermet types.

100% METAL ELEMENT — Amphenol's exclusive Film-Met element uses the same vacuum deposition process as precision metal-film fixed resistors. Continuous monitoring techniques during deposition assure maintenance of established performance levels and continuing high quality.

ENDS COMPROMISE—This new trimmer won't always replace wirewounds and cermets. Their characteristics fit many design parameters perfectly. But not all!

TEMPERATURE COEFFICIENT — Film-Met has a low TCR of ±50 ppm/°C maximum as standard. Perfect for applications requiring extremely low TCR.

NOISE—For applications requiring critical low noise levels, Film-Met must be your choice. This is especially true in applications where other components feature low thermal noise. Film-Met is now available for that critical job.

SETABILITY—Film-Met contact setability is improved over cermet because of lower contact resistance variation, and vastly improved over the resolution inherent in wirewound trimmers which have limited setability due to the turns of the resistance wire. The lower CRV of Film-Met results from the smooth metallic element surface which provides a low resistance interface with the precious metal contact.

OTHER FEATURES — Your choice for high frequency and pulse applications should also be Film-Met because of its excellent performance characteristics in these areas. Investigate Film-Met performance features for solutions to your circuit problems.

*U.S. Patent No. 3,354,134; also foreign patents.

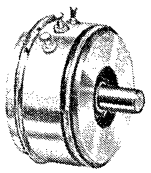
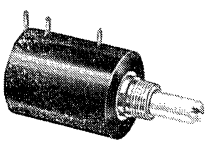
◀Linear Function Single-Turn Potentiometers



Amphenol offers five single-turn wirewound potentiometers that meet MIL-R-12934 in all requirements. The 2500 series potentiometers feature rugged welded terminations; a dual contact wiper that withstands up to 50 g's shock or acceleration; diallyl phthalate construction of rotor, insulator ring and element mount for high stability under varying humidity and temperature environments; and a movable clamp band that allows all phasing and zero settings to be accomplished in the field.

Multi-Turn Potentiometers

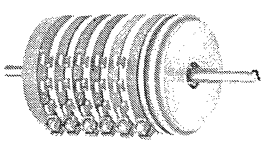


In precision multi-turn potentiometers, Amphenol offers a complete line of wirewound devices in both three-turn and ten-turn versions. Models range from the inexpensive ⅞" diameter 4100 series to the high precision, finely-made 2" diameter 900 series. The 900 and 205 series offer precision stainless steel leadscrews, molded windings, and fine linearity adjustment. The 4100 series offers high electrical precision with a durable, simple design which insures long, trouble-free operation at a modest price. Amphenol's line also includes MIL-type and MIL-qualified three- and ten-turn models.

▼Non-Linear • Loaded Linear • Sine-Cosine Functions CUSTOM ENGINEERED PRODUCTS

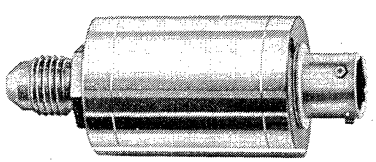
Amphenol offers a complete line of custom engineered products to meet your special requirements. Identified below are but a few examples of basic product lines which can be custom engineered to your exacting requirements. Special modifications or unusual mechanical features are available as adaptations to these standard designs which can be easily accomplished by our Engineering Department.

Conductive Plastic Potentiometers



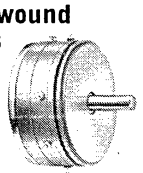
Infinite resolution, conductive plastic potentiometers are available in sizes ranging from ⅞" to 3" diameter, resistance values to 200K ohms, single cup or ganged. Features include: Operating life over 10 million cycles; constant low electrical noise; high linearity; stable resistance throughout operating life; minimum torque; comolded element, terminals, taps and base for high reliability through environmental extremes; taps, shorted or switching sections; output curves in linear and non-linear functions to meet every requirement.

Potentiometer Type Pressure Transducers



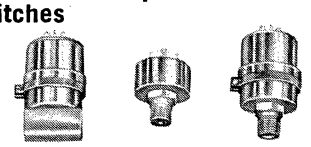
Amphenol's line of precision pressure transducers include bourdon tube, capsular diaphram and bellows types. Linear or non-linear precision potentiometer outputs are available. Pressure ranges from 1 to 10,000 psi absolute, gage or differential. Sizes from 1" to 3" diameter.

Precision Wirewound Potentiometers



Single-turn, wirewound potentiometers are available, in a complete line of linear, non-linear, sine-cosine functions, in sizes from ¾" to 6" diameter, single cup or ganged. Meet all requirements of MIL-E-5272 and MIL-R-12934 for linearity, resolution, operating life, noise and environmental compatibility. Taps, shorted or switching sections, output curves and special resistances available.

Adjustable Snap Action Pressure Switches



Amphenol offers a complete line of pressure switches for measuring gage, absolute and differential pressure changes in gases and liquids and all are adjustable under a wide selection of calibration ranges. A Ni-Span-C pressure capsule encased in a stainless steel housing utilizing a snap action switch make the units compatible with varied pressure medias and atmospheres. All are field adjustable with locking screw for positive settings. Pressure ranges from 2 to 200 psi gage and 0 to 100 psi absolute and differential.

ALLEN-BRADLEY
Milwaukee, Wisconsin 53204

Hot Molded Composition and Cermet Variable Resistors.

The Allen-Bradley name on variable resistors means quality performance that helps protect the reputation of the equipment you manufacture.

We give you a choice of composition or cermet resistance tracks to satisfy your applications. Many electrical and mechanical options are also available. You can select the precise combination for the performance level required.

The key to quality in A-B composition variable resistors is a unique hot-molded resistance track. This molded track has a large cross-section that results in low current densities for improved short-term overload protection and a long operating life. Control is smooth, resolution virtually infinite with a low noise level. Since they are essentially non-inductive, they can be used at high frequencies where wirewound units are impractical.

All composition types are available in five standard tapers (linear, modified linear, CW modified logarithmic, CCW modified logarithmic and CW exact logarithmic). Special tapers can be provided.

Allen-Bradley's perfected cermet resistance material is a natural for severe environmental applications in industrial or military equipment. Stability is exceptional in high temperatures and high humidity. Resolution is virtually infinite. Linear taper standard.

Series 70 MOD POT available with cermet or composition resistance tracks. Types CJ, CQ and SP have cermet tracks. Types J, K, G, L, W and GD have composition tracks.

Dual and triple section Type J, dual section Type GD and the multi-section Series 70 with composition tracks are ideally suited for attenuator applications. Special resistance values can be supplied.

Series 70 MOD POTs are extremely versatile variable resistors. The unique modular construction permits ganging resistance sections, switches and verniers in many combinations utilizing solid and concentric shafts. Various shaft and bushing diameters available.

Types J and G are MIL-R-94 approved for Styles RV4 and RV6 respectively. The most thoroughly field tested variable resistors available. Dependability is built-in.

Types G, GD, L, W, CQ and SP are miniature controls for critical applications where space is a factor.

Types K and CJ dissipate 3 watts and 5 watts respectively at 70°C. Available in dual or triple section versions.

Standard options for all types include a wide variety of shaft endings, shaft lengths, bushings and hardware.

Hot Molded Composition and Cermet Trimming Potentiometers.

Allen-Bradley trimmers are designed for you to install, set, and forget. Easy, pinpoint control and dependable stability are two of the best reasons why A-B's family of variable resistors are specified for high quality electronic equipment. A-B trimmers give you smooth adjustment with virtually infinite resolution. There are no abrupt changes in resistance to produce transients (common to wire-wound trimmers).

These rugged and compact trimmers will satisfy the most demanding requirements. Their continuous stepless resistance control makes possible easy and accurate adjustment. Since they have low distributed capacitance, and are relatively non-inductive, regardless of resistance value, Allen-Bradley trimmers can be used in applications where the ordinary wire-wound type trimmers are unsatisfactory.

© Allen-Bradley 1971

Standard options include vertical or horizontal mounting, panel mount bushing, and thumb-wheel adjustment, depending on type of trimmer.

TYPES F, FD, O, Y, R, and N feature Allen-Bradley's unique hot-molded composition technique. The resistance material, collector track, insulation and metal terminals are all molded into one integral structure for durability and dependability. The dual-section Type FD is ideally suited for Bridged-T or L-Pad attenuator applications. Linear tapers are standard; however, other tapers and special resistance values can be supplied.

TYPES S and Z are cermet trimmers, designed for severe environment applications. Allen-Bradley perfected cermets have exceptional stability in high temperature and high humidity environments. Leads are mechanically anchored and bonded.

EC 71-11

	Type	Resistance Range and Tolerance	Power Rating	Voltage Rating (rms or dc)	Operating Temperature Range	Electrical and Mechanical Rotation	Configurations	Case Dimensions	Enclosure
	Composition Series 70 MOD POT	50 ohms—10 megohms ±10% ±20%	1.0 W @ 70°C	350 V	−55°C to +120°C	300°	Single Dual Triple Quadruple Options include: • several switch types • vernier drive • concentric shafts	19/32 inch deep by 5/8 inch square (single section)	Dust and Splash Resistant

CARTER
MANUFACTURING
CORPORATION

CARTER MANUFACTURING CORP. IS AN ORGANIZATION OF ENGINEERS AND CRAFTSMEN SPECIALIZING IN THE UNUSUAL IN POTENTIOMETERS AND SWITCH ENGINEERING AND THEIR MANUFACTURE. SINCE THE FOUNDING IN 1955 WE HAVE DEVELOPED FULL CAPABILITY IN WIRE WOUND AND CONDUCTIVE PLASTIC POTENTIOMETERS AND WILL WELCOME THE OPPORTUNITY TO WORK WITH YOU ON YOUR UNIQUE REQUIREMENTS AS WELL AS STANDARD COMMERCIAL OR MIL TYPES.

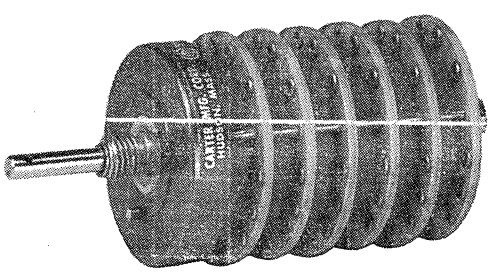
CARTER manufactures many custom variations of these rectilinear potentiometers. When requesting quotations please specify stroke, resistance, linearity, any taps, any switching, environmental requirements and quantity.

Wire wound and conductive plastic elements can also be furnished for special requirements.

SWITCHES



CARTER manufactures custom made switches in conjunction with potentiometers or as enclosed wafer types. They may be simple angle indicators or precision commutators. Such applications requiring high precision, miniaturization and sophisticated switching functions have been solved, many within the parameters of common switch approaches. CARTER's unique switch engineering has supplied the answer when the number of poles or contacts are in contradiction with the available space. When interconnections become a problem they can be greatly reduced by custom designed internal interconnections increasing reliability and improved appearance.

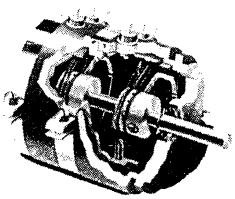
1. Immersion proof per MIL-R-27208
2. Humidity proof per MIL-STD-202, Method 106
3. Sealed per MIL-R-39015
4. Humidity proof per MIL-STD-202, Method 103, Condition B
5. Immersion proof—sealed for board washing, leak tested in 70° C water
6. Immersion proof per MIL-R-22097

PRECISION POTENTIOMETERS—SINGLE TURN *(Write for Catalog B)*



• Precision machined anodized aluminum cups • Molded Diallyl Phthalate liners • Welded tap and terminal construction • Precious metal wipers and slip rings • Flush clamp bands • Gold-plated terminals • Precision sleeve or ball bearings • Centerless ground stainless steel shafts • Single or ganged units.

SPECIFICATIONS:

- Meet requirements of MIL-R-12934 and NAS-710
- Eight physical sizes, 3/4" to 3" diameter
- Electrical angles and functions to specification
- Special mechanical configurations available

ORDERING INFORMATION

WHERE TO ORDER:

From your Authorized Dale Distributor, your Dale Representative, or Dale Electronics, Inc., Box 609, Columbus, Nebraska 68601—PHONE 564-3131 AREA CODE 402 TWX 910-626-8314

TERMS: 1% 10—Net 30 **F.O.B. POINT:** Columbus, Nebraska

SPECIAL CHARGES:

Minimum Order Charge.....$10.00
Minimum Item Charge.....$ 7.50

DALE ELECTRONICS, INC.

A subsidiary of The Lionel Corporation

Centralab potentiometers and trimmers are available in the size, resistance wattage and styles you need!

Request your copy of this potentiometer catalog through Centralab's advertising department.

Below is a brief summary of the types listed in our sixty page potentiometer catalog. These potentiometers are in many cases available ganged and with either front or rear mounted wafer switches as well as rear mounted line switches. Special tapers for almost every application are already available.

Most of these potentiometers have dustproof construction. Equivalent noise resistance of as low as ½% of nominal maximum resistance is available.

Many models are available with numerous mountings and terminal configurations, enabling easy fitting into printed circuit boards or wired construction.

Diameter Inches	Rotation Mechanical	Resistance Range, Ohms	Tapers	Terminals	Power Rating	Application Mil.	Com'l.	Ind.
MODEL 1 MINIATURE COMPOSITION—SPST Switch Available								
5/8 without knob 45/64 with knob	260°	200—10 meg	variety	solder lug or P.C.	.2W @ 40°C		X	X
MODEL 2 COMPOSITION—Available in an almost unlimited range of mountings, terminals, shafts & line switches								
15/16	300°	200—10 meg	variety	variety of solder lugs & P.C.	.5W @ 40°C		X	X
MODEL 3 COMPOSITION								
43/64	260°	100—10 meg	variety	solder lug	.25W @ 40°C	X	X	X
43/64	260°	100—10 meg	variety	solder lug	.5W @ 70°C	X	X	X
MODEL 3W WIRE WOUND								
43/64	250°	30K—10 meg	variety	solder lug	1.5W @ 40°C		X	X
43/64	250°	30K—10 meg	variety	solder lug	2.W @ 70°C	X		X
MODEL 4 WIRE WOUND								
1-5/32	295°	1—100K	variety	solder lug	.5W @ 40°C	X	X	X
MODEL 5 COMPOSITION SINGLE OR MULTIPLE MINIATURE TRIMMERS (with integral fixed PEC® resistors & capacitors on ceramic plate optional)								
approx. 3/4" square (single unit)	290°	200—10 meg	linear	solder lug or P.C.	.25W @ 70°C	X	X	X
MODEL 6 MINIATURE COMPOSITION—SPST Switch Available								
1/2	250°	200—10 meg	variety	solder lug	.1W @ 40°C		X	X
MODEL 8 MICRO-MINIATURE COMPOSITION—SPST Switch Available								
9/32	250°	200—10 meg	variety	P.C.	.1W @ 40°C		X	
MODEL 9 MINIATURE COMPOSITION								
45/64	260°	100—10 meg	variety	solder lug or P.C.	.2W @ 40°C	X	X	X
MODEL 12 HOT MOLDED								
1-7/64	312°	10-5 meg	variety	solder lug	2.25 @ 70°C	X	X	X

FOR IMMEDIATE DELIVERY

Many types, in most popular resistance ranges, are stocked by Centralab Industrial Distributors.

CENTRALAB

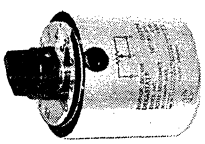
MILWAUKEE, WISCONSIN 53201

e|s|i® precision decades and components

Electro Scientific Industries makes available panel mount decades, dividers and individual resistors that provide the nucleus components for all our precision measurement and calibration equipment (see Section 2900). The patented Dekadial® stacked decades save panel space at 0.02% accuracy in the decades, 20 ppm for the dividers. Solid silver-alloy switches are used throughout, plus silicone-treated ceramic switch wafers. The wire-wound resistors are produced by a proprietary winding aging process for highest precision and stability.

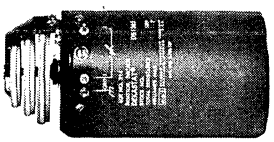
Resistive Decades



DS 12 Individual Decade Resistor

Nine different total resistances available for DC and audio frequency applications. Can be used as a divider by cutting jumper.

Dekastats®



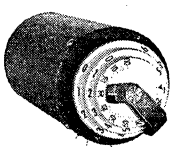
DS 1365 Precision Dekastat

Three coaxial decades available in four different total resistances.

MODEL	DESCRIPTION	PER STEP	TOTAL RESISTANCE	NOMINAL ACCURACY	PRICE
DS 12	Single 10-step resistance decades	0.01 Ω—1 MΩ	0.1 Ω—10 MΩ	0.02%	**$25.—$110.**
DS 1265	Decade resistor, coaxial 2 decades plus rheostat	0.1, 1, 10 Ω/dial div.	1.2, 12 kΩ	0.02%	**95.**
			120 kΩ*	0.02%	**115.**
DS 1365	Decade resistor, coaxial, 3 decades	1, 10, 100 Ω	1.2, 12, 120 kΩ	0.02%	**95.**
		0.01 Ω	120 Ω*	0.02%	**120.**
DS 1463	4 dial coaxial, 3 decades plus rheostat	0.1, 1 Ω/dial div.	12, 120 kΩ	0.02%	**110.**
DS 1464	Decade resistor—4 decade coaxial	0.1, 1 Ω	1.2, 12 kΩ	0.02%	**115.**
		10 Ω	120 kΩ	0.02%	**125.**
		0.01 Ω, 100 Ω	120 Ω, 1.2 MΩ*	0.02%	**150.**

*Special order

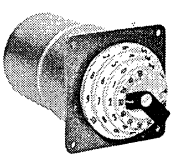
Dekapot® Dividers



DP 1311 Decade Potentiometer

Kelvin-Varley linearity is guaranteed 20 ppm stable/yr. Three decades plus 100-division potentiometer gives resolution of 0.0003%. Three different values available.

Dekatrans®

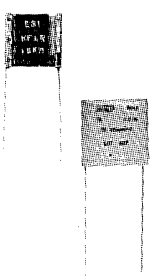


DT 1145 Miniature Decade Ratio Transformer

Dekatrans are inductive voltage dividers for use at audio frequencies. High input impedance, low output, and low phase shift make it ideal for testing voltage and current division, turns-ratio measurement, divider calibration and impedance comparison.

MODEL	DESCRIPTION	VALUE OR RATIO	LINEARITY	PRICE
*DV 411	Resistive divider, adjustable base, 3 decades plus pot	10, 100 kΩ	20 ppm	$195.
DP 1211	Panel-mounting—coaxial dial decade potentiometer (Kelvin-Varley); 2 decades plus pot	1, 10 kΩ	20 ppm	100.
		100 kΩ*	20 ppm	115.
		1 k to 100 kΩ*	20 ppm	150.
DP 1311	Decade potentiometer—3 decades plus pot	1, 10, 100 kΩ	20 ppm	150.
		1 kΩ to 100 kΩ	20 ppm	180.
DT 1135	Panel mounting ratio transformer—2 decades plus pot	1.1105	100 ppm	190.
DT 1145	Panel mounting ratio transformer—3 decades plus pot	1.11100	10 ppm	260.

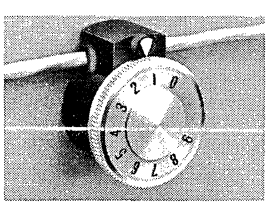
*Special order



Wirewound Resistors

A special ageing process ensures stability to 0.005% standard, or 0.001% on the best available. Standard accuracy is 0.01%, but 0.0015% is available. Changes in environment have little affect and ac residuals are low. Come in open frames (RF), encased in daillyl phthalate (RC) or hermetically sealed cases (RH).

Special Feature



New DATA-DIAL easily adapts calibration instruments for automatic data logging. Simple knob replaces all decade switches on front panel of your calibration equipment. Each DATA-DIAL contains circuitry and wiring for digital output. Take off old knob, put on DATA-DIAL without removing panel, dust cover or exposing switch decks. Costs only $35.00 per dial.

SINGLE-TURN CONDUCTIVE PLASTIC AND WIREWOUND PRECISION POTENTIOMETERS

- **AVAILABLE WITH LINEAR OR NONLINEAR FUNCTIONS**
- **AVAILABLE WITH MULTIPLE TAPS**
- **AVAILABLE IN SINGLE OR MULTI-CUP CONFIGURATIONS**
- **AVAILABLE IN SERVO OR BUSHING MOUNTS**
- **AVAILABLE WITH OTHER COMPONENTS DESIGNED-IN** (SPRING-RETURNS, STOPS, SWITCHES, MOTORS, ETC.

RELATIVE MERITS OF CONDUCTIVE PLASTIC VS. WIREWOUND

The major advantages of conductive plastic potentiometers over wirewounds are infinite resolution and longer life. In most other respects, the two types are comparable. NEI has made it a strong point over the years to maintain **balanced** capability in conductive plastic and wirewound potentiometers. Each has its advantages in given applications, and NEI is the **only** company that can objectively recommend and supply **either** type.

GENERAL SPECIFICATIONS — CONDUCTIVE PLASTIC

Resistance Tolerance
Standard: ±10%

Ambient Temperature Range
Standard: −55°C to +150°C

Bearings
Stainless steel ball bearings are standard.

Mechanical Rotation
Normally continuous; however, stops are available.

Electrical Function Angle
Standard: 340° ±5°

Travel Resolution
Essentially infinite

Life
50 million revolutions

OHMITE has the answer in wirewound rheostats

Twelve sizes in wirewound, vitreous enameled rheostats are stocked by Ohmite distributors all over the country and at the Ohmite factory. This selection, the most extensive available to industry, covers ratings that meet the major portion of design, production and emergency needs. Ratings of 7½, 12½, 25, 50, 75, 100, 150, 225, 300, 500, 750 and 1000 watts are standard.

FEATURES OF CONSTRUCTION: Ohmite rheostats are designed to produce permanently smooth, close control. The construction is all ceramic and metal; there is nothing to smoke, char, shrink, or shift. All models have insulated shafts with provision to keep the rheostat from turning on the panel. The resistance wire is wound over a solid ceramic core. Each turn is a separate resistance step and is locked against shifting by vitreous enamel (except Model C). The core and base are also bonded by vitreous enamel. The pivoted universal-action-mounted contact brush is of metal-graphite and varies to fit current and resistance. It rides upon a large flat surface and assures perfect contact without wear on the wire. Pressure at the contact and at the center lead are independent. Ohmite Rheostat Models H, J, G, K, L, P, and N, all marked Series A, are listed under the Underwriters' Laboratories Reexamination Service.

RATING: The current carrying capacities shown in the tables are for use in **free air;** when units are enclosed, these currents should be reduced possibly as much as 30% to 50%, depending upon the degree of ventilation. The rated current will cause the rheostat to dissipate its rated wattage when the full resistance is in the circuit.

MODEL C, MINIATURE — 7.5 Watts* (See Bul. 203)

The Model C provides greater design flexibility. In addition to its small size, its versatile solder terminals will also plug into common transistor sockets or circuit boards. It is stocked with both standard and locking type bushings.

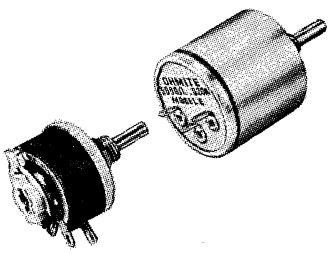
MODEL E — 12.5 Watts*



Diameter: ⅞″ Unenclosed.
Code: E—_____—R-1 Dia: 1 3/64″ in Ohms aluminum enclosure
Code: EW—_____—R-1 Ohms
Shaft: ⅛″ Diameter.
Resistance Tolerance: ±10%.
Torque: 1 to 6 oz.-inch
Weight: 0.6 oz.; enclosed 0.85 oz.
Standard Mounting: For panels up to ⅛″ by ¼″-32 bushing, with non-turn projection.
Rotation: 300° ±5°.
Standard Knob: No. 5151. Specify separately on order when desired.

Precision Potentiometers
Trimming Potentiometers
Multidials • Switches

THE INDUSTRY'S FINEST PRECISION POTENTIOMETERS

For more than fifteen years, Spectrol has been a leader in the design and manufacture of precision potentiometers, both linear and non-linear, standard and special designs. All Spectrol single-turn, three-turn, five-turn, and ten-turn precision potentiometers meet or exceed applicable military and commercial specifications for rotational load life, temperature range, shock, vibration, humidity, and salt spray; and Spectrol is the only manufacturer who produces every Mil-Approved precision potentiometer qualified to MIL-R-1294.

HIGH-QUALITY COMPETITIVELY PRICED TRIMMERS

For more than ten years, Spectrol has been engaged in the design and manufacture of high quality trimming potentiometers. Spectrol's complete lines of both cermet and wirewound trimmers are available in all the primary configurations—rectangulars, squares, and rounds—in both low-cost industrial and Mil-Approved versions, and Spectrol trimmers are stocked in depth at more than 75 distributor locations throughout the United States and Canada.

ATTRACTIVE PRECISION-MADE MULTIDIALS

Spectrol's line of handsome, precision-made Multidials includes both vernier and digital types. These turns-counting dials, for use on multi-turn potentiometers and other rotating devices, are not only superior in appearance but also in sturdy design, "feel," and precise operation.

VERSATILE ROTARY SELECTOR SWITCHES

Spectrol's versatile Model 87 Rotary Selector Switch brings a new dimension of flexibility to discrete component circuitry. Available in volume quantities at production line prices, these handy switches can be mounted directly on to printed circuit boards or panel mounted. They can be used in many ways... often to make other components do multiple duty.

CONDUCTIVE PLASTIC, CERMET, AND WIREWOUND CAPABILITY

At Spectrol, there is a tradition of personalized engineering service to assist the customer in selecting standards or developing "specials" that will fit his design best. This tradition is backed by an unusual in-depth capability that is dedicated to the design and production of wirewound, cermet, and conductive plastic potentiometers, trimmers, and related components.

INDUSTRIAL WIREWOUND & NON-WIREWOUND TRIMMING POTENTIOMETERS

Backed by a vigorous and extensive program of reliability testing, Techno wirewound trimming potentiometers have earned a reputation for quality and performance unmatched in the industry. Complete Quality Assurance facilities, including a fully equipped and MIL-approved test and environmental laboratory, guarantee the consistently superior performance of every Techno trimmer.

Techno's unique design incorporates a limited number of internal parts into a two-half plastic case that permits 100% final inspection prior to sealing. The design provides maximum flexibility and a uniform standard of excellence for a wide variety of military and industrial applications. Throughout the electronics industry, designers and engineers have learned to trust Techno when precision trimming potentiometers are needed.

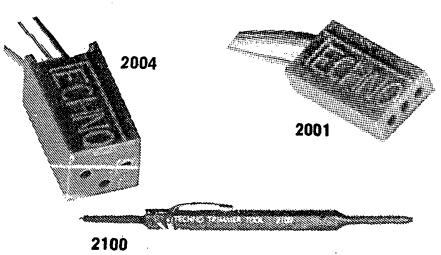
ADJUSTMENT TOOL & TEST CONNECTORS



Model	Pin Pattern	Terminal Pin Sizes Diameter	Length
2001	In-Line	.028" to .031"	x 3/16"
2002	In-Line	.019" to .021"	x 3/16"
2003	In-Line	.013" to .015"	x 3/16"
2004	Triangular	.028" to .031"	x 3/16"
2005	Triangular	.019" to .021"	x 3/16"
2006	Triangular	.013" to .015"	x 3/16"

NOTES:

1. Tolerance: ±5%. Closer tolerance available.
2. Terminal legend: L = stranded insulated leads. P = printed wiring pins, base mounted. W = printed wiring pins, edge mounted 180° from adjustment shaft. X = printed wiring pins edge mounted 90° from adjustment shaft. SH = solder hooks.
3. All models with clutch stop rotation.
4. Standoffs to facilitate printed wiring board washing.
5. Available with Teflon insulated 5-inch leads as Model 11S.
6. Available with Teflon insulated 5-inch leads as Model 13S.
7. Available with .030" printed wiring board standoffs as Model 16S.
8. Resistance value per section.

ELECTRICAL

Resistance Range — 2Ω to 20KΩ (over 10K — Model 1201 only)
Resistance Tolerance — ±5% except 2Ω, 5Ω and 10Ω is ±10% ±1% available on request
Power Rating — Model 1202: ½ watt at 85°C — zero at 150°C, Model 1201: ¾ watt at 85°C — zero at 150°C
Temperature Coefficient (−55°C to +150°C) — Element — 10 ppm/°C max., 5 ppm/°C typical Through the wiper — 10 ppm/°C typical
Resolution — "Infinite" (.05% Setability)
End Resistance — 2Ω max.
Insulation Resistance — 1000 Megohms min. — 500V D.C.
D.C. Offset (Contact Resistance) — less than .01Ω
Dielectric Strength — 1000 volts
Frequency Capability — Up to 100 MHz — Rise time 1 nanosecond — Inductance 0.08 μh
Dynamic Noise (ENR) — 10Ω maximum

MECHANICAL

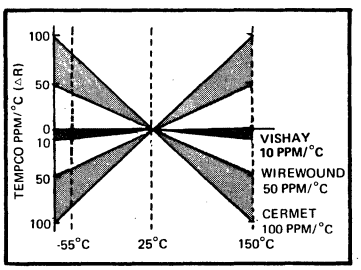
Full Adjustment — 25 turns
Mechanical Stops — Wiper idles — no discontinuity
Shaft Torque — 5 oz. in. max.
Solderability — Per MIL-R-22097
Terminations — All welded — no flux

ENVIRONMENTAL (PER MIL-R-22097)

Operating Temperature Range — −55°C to +150°C
Moisture Resistance — less than 1% ΔR
Thermal Shock — less than 1% ΔR
Shock — Setting stability — **less than .1%**
Vibration — Setting stability — **less than .1%**
Immersion — No leaks
Load Life — **Less than .5% ΔR-2000 hr. (.1% with burn-in)**
Rotational Life — Less than 1% ΔR-200 cyc.
Terminal Strength — Push & Pull — 2 lb.; Bend — 2 Cycles
Salt Spray — No corrosion
High Temperature Operation — Setting Stability .5%, ΔR .5%
Resistance to Solvents — Per MIL-R-39015

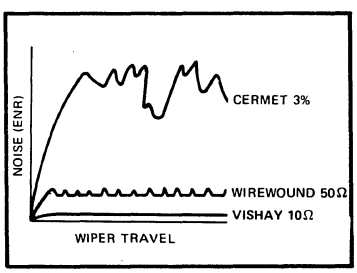
VISHAY TRIMMERS HAVE BETTER TEMPERATURE COEFFICIENT

The Vishay resistor element, a self-compensating combination of a proprietary BULK METAL film set on a glass substrate, produces a dome shaped TC curve with a typical TC of 5ppm/°C (absolute maximum TC of 10ppm/°C for all values).



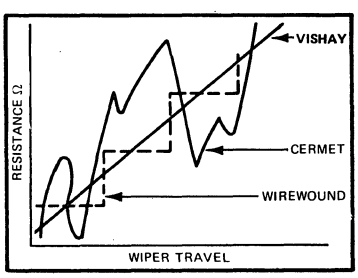
VISHAY TRIMMERS HAVE THE LOWEST NOISE

A multi-fingered precious metal alloy wiper in contact with the highly conductive surface of multiple resistance paths virtually eliminates both dynamic noise and catastrophic failures.



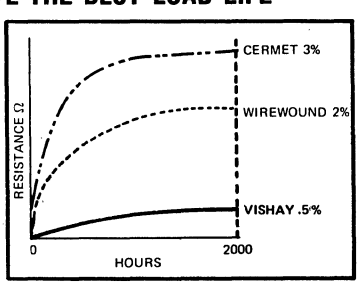
VISHAY TRIMMERS HAVE THE BEST RESOLUTION

The combination of an absolutely uniform resistance material, multiple wiper contact points, and multiple resistance circuit paths, yields a uniquely accurate setability of less than 0.05%.



VISHAY TRIMMERS HAVE THE BEST LOAD LIFE

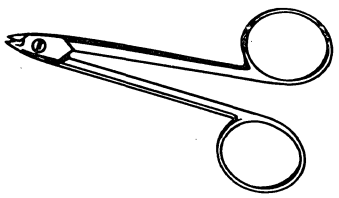
Only the ultra-stable Vishay metal film element can provide a 2,000 hour load life of 0.5% ΔR maximum (0.1% ΔR maximum with burn-in).



Vishay trimmers meet or exceed all requirements of MIL-R-27208 and MIL-R-22097 and additionally meet the requirements of MIL-R-39035 characteristic J. The decreased test time and improved product performance resulting from selection of Vishay trimmers more than offset the slight additional cost for better TC, lower noise, better resolution and best load life.

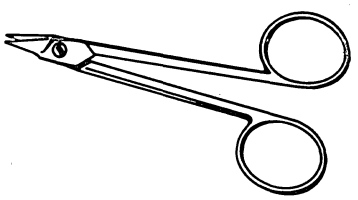
Clauss ELECTRONIC TOOLS

SCISSORS



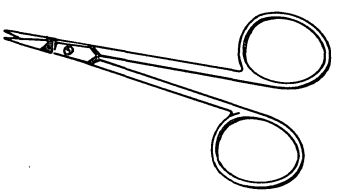
554D – 4″

Same as No. 564 with cut-down blades. 6/Pack.
564D – 4″: Same as above with straight blades. 6/Pack.



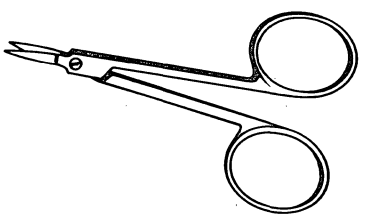
563½ – 3¾″
564½ – 4¼″

High carbon cutlery steel. Nickel plated. Special jaw ground to grip and cut where clearance is limited. 6/Pack.



33¼ – 3¼″

High carbon cutlery steel. Nickel plated. Curved razor sharp blades. 6/Pack.

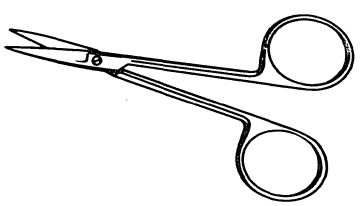


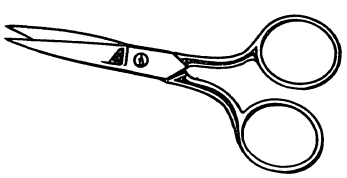
43½ – 3½″

Same as No. 33¼, slightly longer and stronger straight blades. 6/Pack.

IS4¼ – 4¼″

Same as No. 33¼, longer and stronger straight blades. Needle sharp points. 6/Pack.



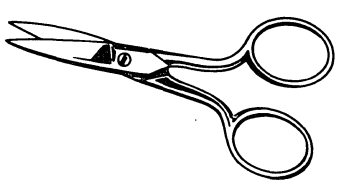


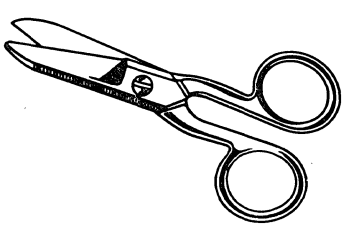
383½ – 3½″
384 – 4″ **385** – 5″
384½ – 4½″ **386** – 6″

DOUBLE SHARP high carbon cutlery steel. Nickel plated. Both points sharp. 6/Pack.

194 – 4″

HEAVY DUTY high carbon cutlery steel. Nickel plated. Double sharp points. 6/Pack.



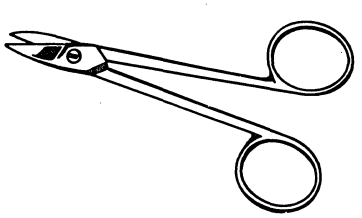


925 – 5″

ELECTRICIANS' high carbon cutlery steel. Nickel plated. 12/Pack.
925C – 5″: Same as above but with two stripping notches for 19 gauge and 23 gauge wires. 12/Pack.

564 – 4″

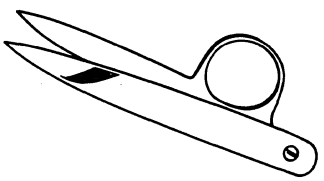
High carbon cutlery steel. Nickel plated. 6/Pack.
564C – 4″: Same as above except serrated blade to prevent slip-out while cutting. 6/Pack.
554 – 4″: Same as No. 564 with curved blades (not serrated). 6/Pack.



FINE CUTLERY SINCE 1877

Clauss ELECTRONIC TOOLS

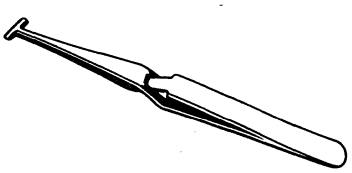
CLIPS



FL4½ – 4½"
"FLIPPER" THREAD/WIRE CLIP. Replaceable blades of sharp, hard steel available. Teflon coated housing rustproof, self-lubricating. Easy to adjust. 6/Pack.
BLS SHARP OR BLR ROUNDED POINT BLADES: Replacement blades 6 pair per pack. Specify sharp or rounded safety points. 6/Pack.

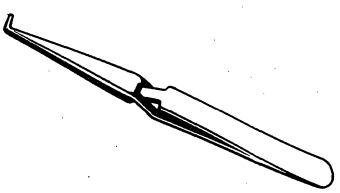
TC4½ – 4½"
THREAD/WIRE CLIP high carbon cutlery steel. Double plated – chrome over nickel – stainless steel screw for maximum rust protection. 6/Pack.

ANTI-WICK



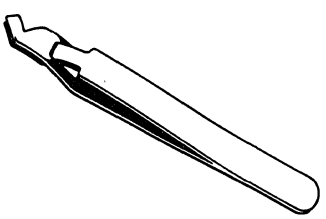
AW 18 – 5"
AW 20 – 5" AW 24 – 5" AW 28 – 5"
AW 22 – 5" AW 26 – 5" AW 30 – 5"

Non-fatiguing beryllium copper alloy, positive contact without corrosive deterioration. Maximum thermal conductivity. Satin chrome finish.
Stock numbers give correct AWG size wire tools are made to fit. For other sizes than shown add 10% to cost and 30 extra days for delivery.
Bullet shaped head grips conductor, supports insulation. Box joint prevents side slippage, perfect conductor contact. 12/Pack.



AWG 18 – 4½"
AWG 20 – 4½"
AWG 22 – 4½"
AWG 24 – 4½" **AWG 28 – 4½"**
AWG 26 – 4½" **AWG 30 – 4½"**

"L" shaped head affords greater visibility. Box joint design prevents side slippage. Perfect conductor contact. Satin chrome finish. Same as above model. 12/Pack.



AWS 10 – 3½"
AWS 12 – 3½"
AWS 14 – 3½"
AWS 16 – 3½"

Diagonal head makes positive conductor contact. Same as models above in shorter length. 12/Pack.

"SOFTY" WORK MATS

NON-SKID • SANITARY • RESILIENT • LINT FREE

	NO.	SIZE	STANDARD PACK
WORK MATS	M11	11" x 14"	36 per carton
	M14	14" x 22"	
ROLL GOODS	R22	22" width	360' per roll (approx.)
	R44	44" width	

Make small parts handling quicker, easier. Protect instrumentation.
The working surface is nylon* tricot, bonded permanently to a latex formulation developed especially for work mat. 3/32" thickness compresses to give tweezers, pliers or fingertips sure grip on parts. Cushion surface. Non slip backing.

FINE CUTLERY SINCE 1877

Clauss
ELECTRONIC TOOLS

DOMESTIC TWEEZERS

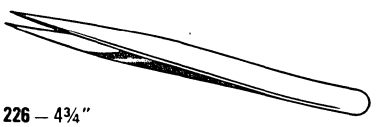
5 – 4¼"

Non-magnetic stainless steel. Satin polish finish. Long, slender, smooth inside points. 12/Pack.

7C – 4½"

Surgical steel. Satin-chrome finish. Curved, smooth inside points. 12/Pack.

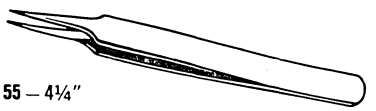
7SS – 4½": Non-magnetic stainless steel. Satin polish finish. Curved, smooth inside points. 12/Pack.



226 – 4¾"

Surgical steel. Satin-chrome finish. Serrated inside points. 12/Pack.

231 – 4¾": Non-magnetic stainless steel. Satin polish finish. Serrated inside points. 12/Pack.



55 – 4¼"

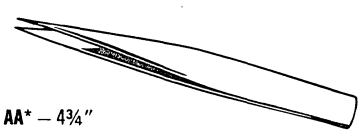
Non-magnetic stainless steel. Satin polish finish. Smooth inside points. 12/Pack.

227 – 4¼": Surgical steel. Satin-chrome finish. Smooth inside points. 12/Pack.

AA – 4⅞"

Stainless steel. Satin polish finish. Smooth inside points. 12/Pack.

IMPORTED TWEEZERS

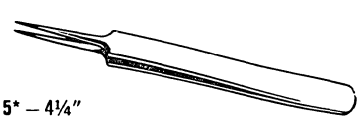


AA* – 4¾"

Carbon steel. Nickel plated. Fine points, beveled edges. 12/Pack.

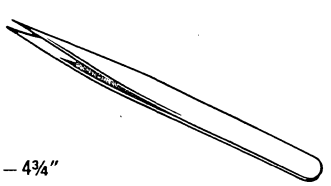
MM* – 5"

Carbon steel. Nickel plated. Extra long, strong blades. 12/Pack.



5* – 4¼"

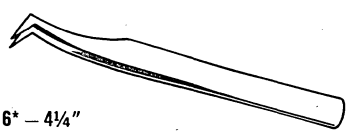
Carbon steel. Brushed satin finish. Extra thin blades, fine points. 12/Pack.



3* – 4¾"

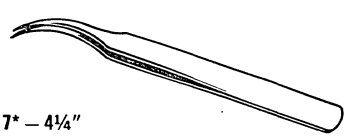
Carbon steel. Brushed satin finish. Fine point. 12/Pack.

3C* – 4¼": Same as above except ½" shorter in length. 12/Pack.



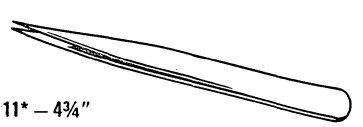
6* – 4¼"

Carbon steel. Brushed satin finish. Sharply angled super fine point. 12/Pack.



7* – 4¼"

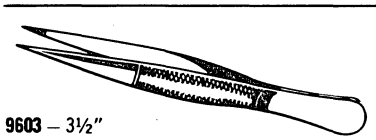
Carbon steel. Brushed satin finish. Curved blades, super fine points. 12/Pack.



11* – 4¾"

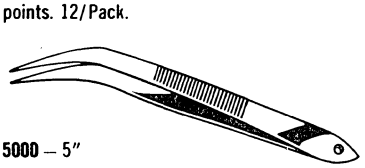
German silver, non-magnetic. Fine points. 12/Pack.

SPECIAL TWEEZERS



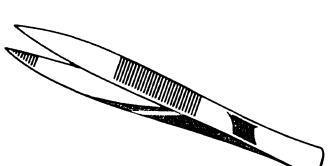
9603 – 3½"

Carbon steel. Nickel plated. Serrated needle points. 12/Pack.



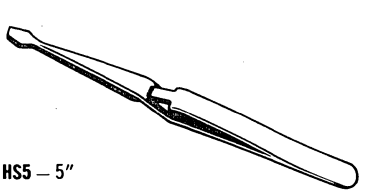
5000 – 5"

Carbon steel. Chrome plated. 12/Pack.



11C – 4½"

Carbon steel. Chrome plated. Serrated points. 12/Pack.



HS5 – 5"

Non-fatiguing beryllium copper alloy. Satin chrome finish. 12/Pack.

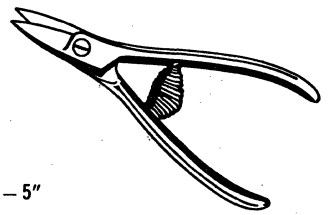
B50 – 4½": Same as above with square points. 12/Pack.

B47 – 4½": Same as above with needle point. 12/Pack.

FINE CUTLERY SINCE 1877

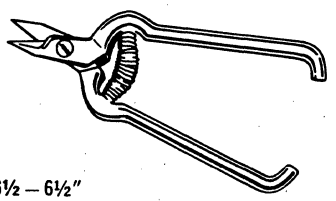
Clauss ELECTRONIC TOOLS

SNIPS



75 – 5″

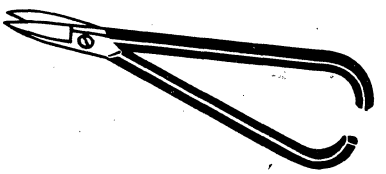
FILAMENT high carbon cutlery steel. Polished jaws and handles. 6/Pack.



76½ – 6½″

FILAMENT high carbon cutlery steel. Polished jaws. 6/Pack.

76½S – 6½″: Same as above except serrated blade to prevent slip-out while cutting. 6/Pack.

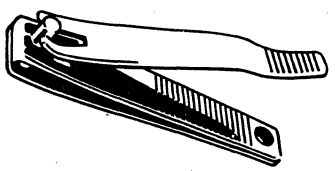


57 – 7″

LIGHT METAL high carbon cutlery steel. Polished blades. Curved blades. 6/Pack.

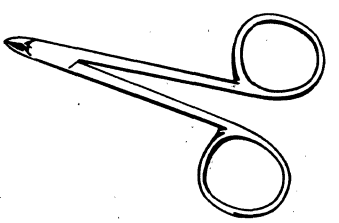
67 – 7″: Same as above except straight blades. 6/Pack.

NIPPERS



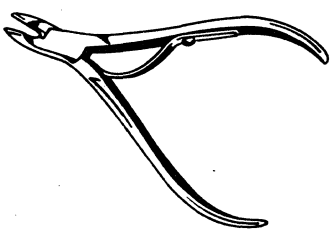
PD1 – 3¼″

◀ Double plated—chrome over nickel—ground jaws and leverage action. 12/Pack.



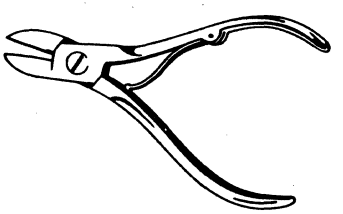
202 – 3½″ ▶

Same as above except scissors handles. 6/Pack.



201 – 4″

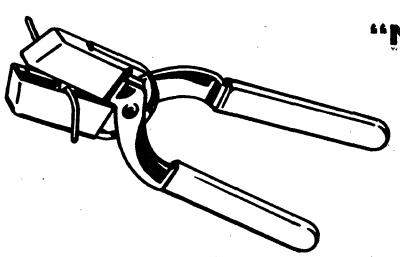
◀ Imported. Completely nickel plated. Box joint. Plier handle nipper thin, precisely ground jaws. 6/Pack.



973 – 4¼″ ▶

Nickel plated. Regular pattern. Imported. 6/Pack.

"NO-NIK" WIRE STRIPPERS



All No-Nik wire strippers are 5½″ overall length. Weight ¼ lb.

Each tool is made to strip one wire size only. Handles are color coded to size of cutter holes marked on centering device.

Blades are finest razor blade steel. No adjustment needed.

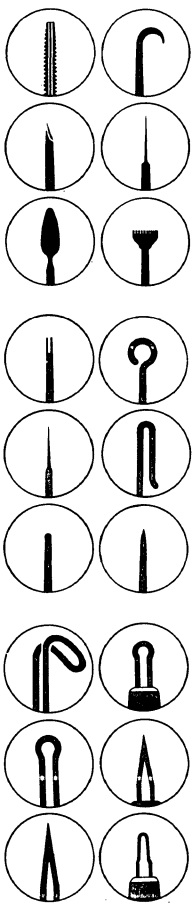
THE CLAUSS CUTLERY COMPANY • Fremont, Ohio 43420 / *An Alco Standard Company*

CIRCON microTechnology

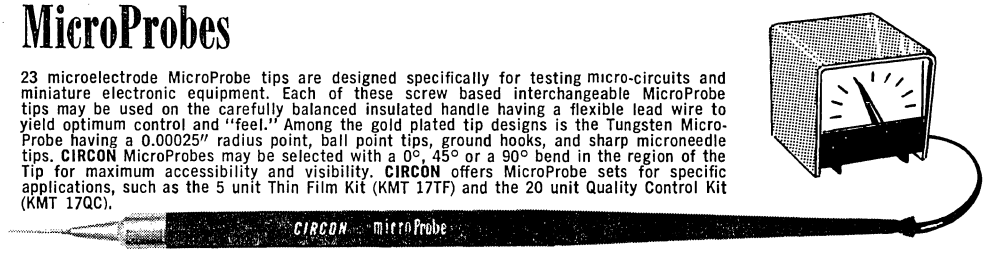


MicroTools

60 screw based tips are precision forged, ground and lapped onto corrosion resistant, stainless steel shafts. Each is designed for use in producing and repairing the smallest electronic and mechanical instruments. The unique features of the **CIRCON** MicroTool line are the micro-size of the working tips, the range of tip designs, and the perfectly balanced interchangeable MicroTool Handle. Tip designs include a MicroScale having divisions of 0.002″, a Tungsten Ultra MicroNeedle with a 0.00025″ radius point, and a MicroKnife sharpened to surgical standards. The 8 piece MTK-11 Project set and the 23 piece MTK-3 Technician's set are each packaged in an attractive, foam lined hardwood case for maximum accessibility and protection.

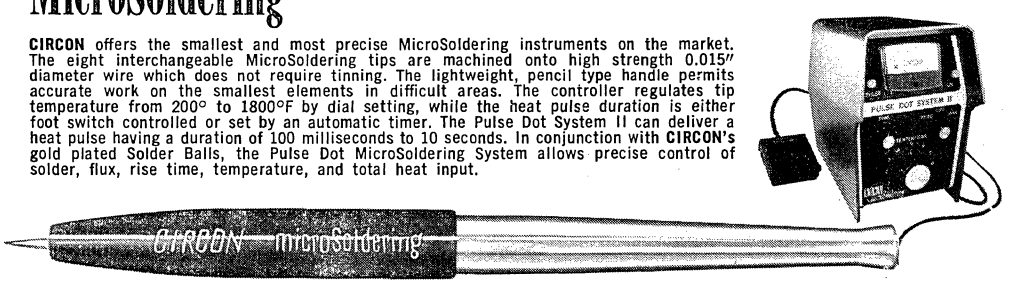
MicroProbes

23 microelectrode MicroProbe tips are designed specifically for testing micro-circuits and miniature electronic equipment. Each of these screw based interchangeable MicroProbe tips may be used on the carefully balanced insulated handle having a flexible lead wire to yield optimum control and "feel." Among the gold plated tip designs is the Tungsten MicroProbe having a 0.00025″ radius point, ball point tips, ground hooks, and sharp microneedle tips. **CIRCON** MicroProbes may be selected with a 0°, 45° or a 90° bend in the region of the Tip for maximum accessibility and visibility. **CIRCON** offers MicroProbe sets for specific applications, such as the 5 unit Thin Film Kit (KMT 17TF) and the 20 unit Quality Control Kit (KMT 17QC).



MicroSoldering

CIRCON offers the smallest and most precise MicroSoldering instruments on the market. The eight interchangeable MicroSoldering tips are machined onto high strength 0.015″ diameter wire which does not require tinning. The lightweight, pencil type handle permits accurate work on the smallest elements in difficult areas. The controller regulates tip temperature from 200° to 1800°F by dial setting, while the heat pulse duration is either foot switch controlled or set by an automatic timer. The Pulse Dot System II can deliver a heat pulse having a duration of 100 milliseconds to 10 seconds. In conjunction with **CIRCON's** gold plated Solder Balls, the Pulse Dot MicroSoldering System allows precise control of solder, flux, rise time, temperature, and total heat input.



Electronic MicroHardware

(Delivery from stock. Minimum order 100 units.)

MicroEyelets — Miniature rolled, flat and funnel flange electronic eyelets from the World's Widest in Stock Selection. Every brass and copper eyelet is a precision product with absolute uniformity from part to part. Shot burnished — Gold Plated eyelets meeting **NASA** and **MIL** Specs are stocked; cadmium, tin, silver, and solder plated upon order. Lengths from 1/64″ to 7/16″ in 1/32″ increments, including the world's smallest eyelets. **CIRCON** has prepared three general purpose kits — the Prototype Kit for designers, a Laboratory Kit with a supply of the most popular sizes, and the Stocking Kit with a total of 40,000 eyelets in 108 sizes.

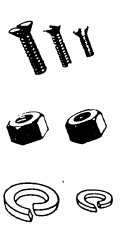
MicroSetting Tools — Superior quality tools designed to provide flexible inexpensive tooling for precision setting of **CIRCON** eyelets. May be used in automatic or manual press equipment.

MicroRivets — For instrument, electronic and printed circuit applications involving space requirements smaller than normal subminiature hardware permits. Sizes from 1/16″ x 1/32″ and up in 1/32″ increments. Shot burnished and 24 carat gold-plated.

MicroScrews — Precision instrument screws of stainless steel or brass, plated with gold, nickel, and cadmium. Instrument head (oval, modified fillister) or flat head (82°). Size from #000 to #4. Lengths from 1/8″ and up in 1/16″ increments. Taps are available for all screw sizes.

MicroNuts — Nickel, gold, and cadmium plated brass instrument nuts in sizes from #000 to #4. Precision manufactured to **NASA** and **MIL** specs.

MicroWashers — Split Lock, Insulating, and Flat instrument washers in sizes #000 to #4. Precision manufactured to be smooth, clean and free from burrs. Suitable for use in vigorous environment, at all frequencies.



A MicroHardware Slide Guide giving detailed specifications for hard to find **MicroHardware** is available free upon request. The 10″ x 4″ slide rule device reads out data on 1300 sizes of **CIRCON's MicroHardware.**

Miniature Indicator Lights

DirectVue

OmniVue

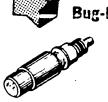
Two unique lines offering unparalleled flexibility for the Panel Designer. **CIRCON's** Micro-Miniature indicators are 0.25″ diameter and may be mounted in densities of 14 per square inch.

The 3/8″ diameter SubMiniature Indicators may be combined into more than 1500 possible configurations due to interchangeable components. Each SubMiniature Indicator may incorporate any of: 5 lens types; neon or incandescent bulbs; 16 to 1 range in brightness; insulated or grounded mounting; 2 standard bases; and 7 colors. Of special interest are **CIRCON's** Pola-Lens variable intensity indicator, and the BugEye 3-D plastic lens available in standard shapes or on a low volume custom basis.

ClearVue

Pola-Lens

Bug-Eye



MicroMiniature

The Panel Designer's Kit (MIK-3) containing CIRCON's complete line is a valuable aid in design and prototype work. Hundreds of configurations possible at a $25 introductory price.

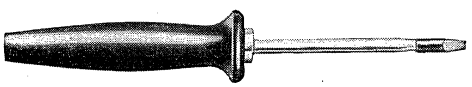
LIGHTWEIGHT SOLDERING IRONS — 120 VOLTS; 40 AND 60 WATTS



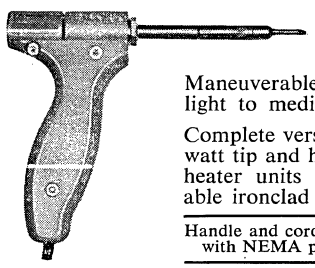
Ideal for light and medium production-line soldering and maintenance and repair operations in electronics and communications industries. Tip and heater units can be changed in seconds.

* U.L. listed.

Complete Iron - Includes handle and 6-foot cordset, and 60-watt tip and heater unit	
7/32" Ironclad Chisel Tip*	6A273
3/16" Ironclad Pyramid Tip*	6A283
3/16" Ironclad Chisel Tip	6A283G23
Handle and Cordset	
Two conductor	6A273G62
Three-conductor with NEMA standard plug	6A273G63

Tip and Heater Units - 60 watts	
7/32" Ironclad Chisel Tip	6A300
3/16" Ironclad Pyramid Tip	6A301
3/16" Ironclad Chisel Tip	6A301G4
Heater Units for Threaded Tips (Use Interchangeable Tips listed above)	
40 watts	6A304
60 watts	6A301G7

PISTOL-GRIP SOLDERING IRONS - 120V; 40, 60W



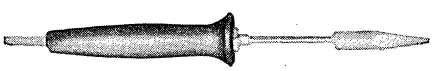
Maneuverable and comfortable, excellent for light to medium production.

Complete versatility with choice of three 60-watt tip and heater units; or 40- and 60-watt heater units with 20 different interchangeable ironclad or copper threaded tips.

Handle and cordset, three-wire with NEMA plug	6A303

Can be used with Lightweight tip and heater units or with Lightweight heater units and interchangeable tips.

MIGHTY MIDGET SOLDERING IRON - 12V; 100W



A lightweight iron with high heat capacity for heavy soldering where larger irons, up to 200 watts, prove unwieldly for rapid repetitive soldering.

Tip and Heater Unit
1/2" Ironclad Chisel Tip — for 60 w, 6A211G54; 80 w, 6A211G50; 100 w, 6A211G33.

Handle and Cordset	
Two-conductor	6A210G61
Transformer - 115-volt primary	
Four Tap — for 55/70/85/100 watts	6A364G7

MIDGET SOLDERING IRONS — 6 VOLTS; 25 and 45 WATTS (Also tapped transformers)

A versatile iron for light production in electronics, and communication industries — handles like a pencil, weighs but 1¾ oz. Tip renewal is easy and fast — complete tip and heater unit can be changed in a few seconds.

Handle and Cord Set			
For single-and 4-tap transformers	6A203	For transformer with 3-heat switch	6A203G2

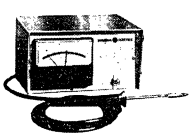
Tip and Heater Units All ironclad tips		
5/32" Chisel Tip	25 watts	6A211
1/8" Cone Tip	25 watts	6A213
3/16" Pyramid Tip	25 watts	6A215
1/8" Chisel Tip	25 watts	6A217
3/16" Chisel Tip	45 watts	6A211G31

Heater Unit for Threaded Tips (Use Interchangeable Tips)	
25 watts	6A221
Transformers - 115-volt Primary ¶	
Single Tap 35 watts	6A362G2
Four Tap —for 26/29/32/35 watts	6A364G2
With Three-heat Switch† —18 to 35 watts	6A434

¶Single- and four-tap transformers are available with 240-volt primary in quantities of 36 or more.

†Suitable for use only with Handle and Cordset 6A203G2.

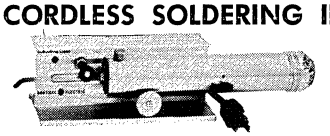
TEMPERATURE CONTROLLED SOLDERING IRON 120V; UP TO 135W



2½-ounce iron maintains selected temperature; is variable for microminiature jobs to high-mass joints. Ideal for high production and high quality work, laboratory use, service shops, and wherever temperature limits are specified.

Complete Iron — Includes Control Box, Handle and 5-foot Cordset, and 1/8-inch and 3/16-inch Chisel Tip and Heater Units	6A490

CORDLESS SOLDERING IRON



New soldering tool, powered by rechargeable batteries, is cordless — making it easier to use in remote and inaccessible areas. 18-watt tip unit attains 800 F in 15 seconds. Battery charging stand, with 6-foot 3-wire cordset, restores batteries to peak power; operates from 110 VAC.

Handle and Battery Holder, including Tip Unit	6A298G2
Charging Stand	6A299
Battery Stack	6A672

Soldering Irons and Tips from Hexacon

VOLTAGE RANGE: 6 to 240 • OPERATE IDENTICALLY ON A.C. OR D.C., ANY CYCLE
STANDARD VOLTAGES 110/120, 121/130, 220/240 • SPECIFY VOLTAGE ON ORDER

Equipped with flexible 5 and 6-ft. approved Neoprene rubber heater cord, which is water-proof, kink-free and resistant to oil, abrasion and heat. Nickel chromium replaceable heating elements, insulated with finest mica, protected by rugged outer housing. Replaceable tips.

HEXACON MINIRONS

WITH ALL THE EXTRA FEATURES

- Rugged quality construction that will withstand production line conditions
- Slim-line case promotes maximum visibility
- Long life and non-freezing Durotherm tips

SLIM LINE CASE — SLIM LINE HANDLE

No. 21A	tip diameter	1/8"
No. 22A	tip diameter	3/16"

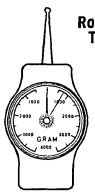
PRECISION TOOLS

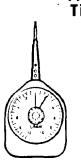
FOR PRODUCTION, SERVICE & MAINTENANCE

PRECISION DYNAMOMETER TENSION GAUGES

LARGE — Round Tip



SMALL — Flat Tip



Accurately measure forces required to actuate all sensitive mechanisms . . .

Available in two sizes and a total of thirteen ranges. Measure in both directions. Equipped with maximum reading pointer that retains reading.

LARGE GAUGES

Type	Range In Grams	Conversion In Ounces
GD-50	60-500	18 $32.70
GD-100	100-1000	32 $32.70
GD-200	200-2000	70 $32.70
GD-400	400-4000	140 $36.60

SMALL GAUGES

Type	Range In Grams	Conversion In Ounces
GD-1	0-10	3/8 $14.20
GD-2	2-20	3/4 $14.20
GD-3	4-35	1 5/16 $14.20
GD-5	6-50	1 3/4 $14.20
GD-10	10-100	3 1/2 $14.20
GD-15	15-150	5 1/4 $14.20
GD-20	20-200	7 $14.20
GD-25	30-250	9 $14.20
GD-30	40-350	12 $16.00

CONTACT INSERTION / REMOVAL TOOLS AND KITS

Just 2 tools insert and remove contacts on all types of connectors . . .

A12, 16, 20

R12, 16, 20

AMPHENOL, CINCH, BENDIX, CANNON, PYLE, etc. . . .

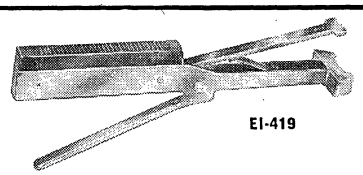
KITS

KA-260 — 3 PIECE CONTACT INSERTION TOOL KIT
Consists of one each A-12, A-16, A-20 .....Price **$36.00**

KR-260 — 3 PIECE CONTACT REMOVAL TOOL KIT
Consists of one each R-12, R-16, R-20 .....Price **$45.00**



EI-419

EI-419 INSERTING AND EXTRACTING TOOL

For printed circuit boards, connector assemblies, telephone-cord stoppers, flat-packs, IC's and many other applications.

Precision made, with leaf spring to remain in open position. Made of special alloy, molded finger-grip type handle for easy gripping. Fully nickel-chrome plated. Overall length 6½". .....Price **$8.90**

INNOVATIONS IN SERVICE, PRODUCTION & LAB TOOLS

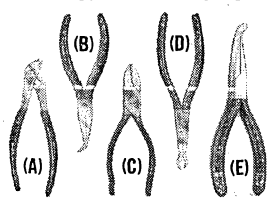
WASH AND LUBE SPRAYS

24 oz.

8 oz.

JIC-22 ELECTRO-WASH
Degrease, eliminate grease, dirt, oil. No carbon-tet, safe, no residue, non-flammable. Std. pkg: 12 pcs. **$3.25 ea.** 6 pcs. **$3.50 ea.** Sample order **$4.00 ea.**

JIC-33 ELECTRO LUBRI-FOAM
Cleans, lubricates, protects, polishes. Exclusive foam action. Eliminates noise, non-flammable. Std. pkg: 24 pcs. **$2.25 ea.** 12 pcs. **$2.50 ea.** Sample order **$3.00 ea.**



(A) **PL-4** — MIDGET "GROOVE-GRIP" PLIERS. 5" **$3.00**

(B) **PLS-1** — DUCK BILL, PARALLEL, BENT NOSE PLIER. 5".. **$5.82**

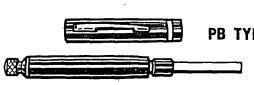
(C) **PLS-2** — DIAGONAL ANGLE, FLUSH CUTTING AND STRIPPING PLIER. 5" **$6.46**

(D) **PLS-5** — HEAT COIL PLIER. 6" **$6.24**

(E) **PLS-9** — DUCK BILL, BENT NOSE, 90°, PLIER. **$6.60**

ECONOMY AND POCKET TYPE BURNISHERS

OB TYPE



PB TYPE

ECONOMY BURNISHERS — Leave no grit or dust and will not affect contact points. Plastic handles for working on live contacts.

OB-1 — For fine contacts. Abrasive coated, 3½" long, 3/16" wide, .007" thick.
Pkg. 12 pcs. Price **$5.20** Pkg. 48 pcs. Price **$18.80**

OB-2 — For extra-fine contacts. 3½" long, ¼" wide, .010" thick.
Pkg. 12 pcs. Price **$7.20** Pkg. 48 pcs. Price **$25.80**

OB-3 — General purpose type. Abrasive-coated. Hard molded handle. 3½" long, ¼" wide, .010" thick.
Pkg. 12 pcs. Price **$9.80** Pkg. 24 pcs. Price **$17.60**

OB-4 — For industrial use. Abrasive-coated. Hard molded handle. 3½" long, ¼" wide, .020" thick.
Pkg. 12 pcs. Price **$12.00** Pkg. 24 pcs. Price **$21.60**

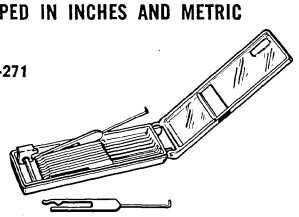
POCKET-TYPE BURNISHERS — Used for cleaning general type contacts. Supplied with 6 non-residual abrasive replaceable blades and/or 6 rods stored in pen barrel, as noted. Pen made of sturdy plastic for dielectric work. Length 4½". Diameter 3/8". Blades 3/16" wide, 1¾" long, .007" or .0035" thick.

		Price
PB-3	Pen with 6 blades .0035" thick	$4.90
PB-3R	Same as PB-3 plus 6 abrasive rods	5.80
PB-7	Pen with 6 blades .007" thick	4.80
B-3	Pkg. 25 Repl. blades for PB-3 (.0035")	4.80
B-3R	Pkg. 50 Repl. rods for PB-3	12.50
B-7	Pkg. 25 Repl. blades for PB-7 (.007")	4.50

UNIQUE GAUGE SET

STAMPED IN INCHES AND METRIC

T-271



T-271 — WIRE THICKNESS GAUGE SET. Extremely versatile. Designed for use in restricted places. Gauges can be used in or out of case. 9 round blades, .006", .008", .016", .020", .028", .031", .039", .046", .059" and one flat blade .004" thick. Blades 3" long, tips bent 90° x 3/16" high. Overall case size: 1¼" wide x ½" high x 4" long. .....Price **$19.40**

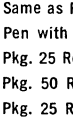
SPECIALIZED TOOLS

C-356

M-117

S-391

S-340



E-421

C-356 — CONNECTOR TOOL. Serves as terminal winding device, pull strength tester and spring hook. Insulated, 7" long. .....Price **$7.90**

S-391 — SPRING REMOVER. Adjusts, inserts and removes relay springs in tight spaces or hard to reach places. 6½" long. Tips bent 90° angle with .042" slots each end.....Price **$3.46**

M-117 — SPIN-TYPE SPANNER WRENCH. For use on odd shaped or extremely thin nuts and where regular nut driver cannot be used. Swivel head. 4" long. .....Price **$4.20**

S-340 — EXTRACTOR, TWEEZER TYPE. Extracts miniature, lamps, caps, readouts, flatpacks, IC's, p.c. components, etc. ½" normal opening closes to 1/16" with stop guide. 3½" long. Price **$3.20**

E-421 — EXTRACTOR, TERMINAL. Will extract terminals of most types. Finger-grip "T" type handle. Tip bent to 90° angle and tapered to fine point with center notch. Overall length 3". Price **$3.60**

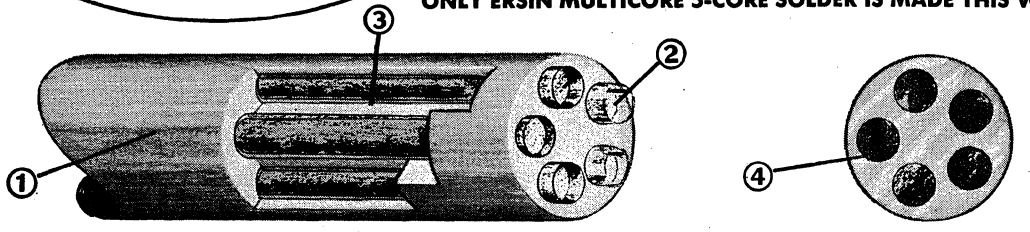
ERSIN Multicore

5-core wire rosin solder
Available in 1-lb. and 7-lb. reels

This is no ordinary solder!

ONLY ERSIN MULTICORE 5-CORE SOLDER IS MADE THIS WAY



These illustrations show the construction of ERSIN Multicore 5-Core Solder. Multicore solder is made only from pure virgin metals (1) with 5 cores of exclusive extra-active, non-corrosive ERSIN Flux (2). Multicore's special manufacturing process locates the 5 cores of ERSIN Flux close to each other and at the perimeter, so that there is only an ultra-thin wall of solder between the cores of flux and the work (3). This unique core configuration (4) also keeps the flux near the heat source, to melt faster—wet the metal more effectively. This enables ERSIN Multicore solder to produce the consistently reliable joints for which it is known.

Conforms to Federal Specification QQ-S-571

INDIVIDUAL REEL-SKIN WRAPPED FOR UTMOST PROTECTION IN SHIPPING AND STORAGE

STANDARD TIN/LEAD ALLOYS AND GAUGES

Available from stock: 63/37; 60/40; 50/50; 40/60; Savbit; Special Alloys—H.M.P. (High Melting Point, 565° F.); L.M.P. (Low Melting Point, 354° F.). Other alloys upon request.

Gauges: 14 s.w.g. (.080") through 24 s.w.g. (.022"). NOTE: Soldering iron tips should always be 108° F. above melting point of alloy.

NEEDLE FINE GAUGES

For microminiaturization, integrated circuits and other similar requirements. Off-the-shelf delivery in alloys 63/37 and 60/40, in even gauges from 28 s.w.g. (.014") through 34 s.w.g. (.009").

COPPER LOADED SAVBIT ALLOY

Copper-loaded SAVBIT stops the wear and erosion of copper soldering iron tips...increases tip life by 1,000%.

Characteristics and specifications: Savbit Alloy is available in Ersin Multicore 5-core solder containing non-corrosive extra-fast Ersin Flux in 14, 16, 18, 20, 22 and 24 gauge. Melting point: Virtually the same as standard tin/lead alloys. Excellent conductivity, tensile and shear strength.

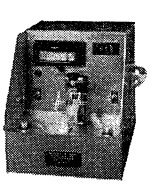
EXTRUSOL—HIGH PURITY BAR SOLDER

The same superior quality solder as in Multicore 5-Core Wire Rosin solder. Highest purity is achieved by advanced quality control, possible only with the Extrusion process. Extreme uniformity and smooth texture, without the cross-graining of cast bars. Virgin metals. Conforms to Federal Specification QQ-S-571d with respect to alloy composition in Sn60 (60/40), Sn63 (63/37), and Sn50 (50/50). Skin wrapped for distributors; bulk-packed for manufacturers. Also, low antimony "EXTRUSOL" Commercial Bar Solder—bulk packed.

ERSIN LIQUID FLUXES

Made to the high quality standards of Ersin Multicore. Three formulas. No. 5380 meets Military Specification MIL-F-14256C, Type A (Activated). No. 0360 meets Military Specification MIL-F-14256C, Type W (Non-activated). Other commercial liquid fluxes available such as: No. 4370 highly activated commercial flux. Foam, water soluble, protective coatings and cleaners upon request.

NEW SOLDERABILITY TEST MACHINE



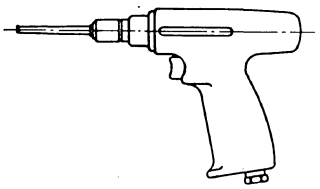
A precision instrument to determine the solderability of component termination wires that operates on a principle entirely different from, and superior to, the immersion method—electronic digital timing. Accurate, positive, totally reliable, yet economical because no technician is needed to operate it, and tests are run with great rapidity. Developed in association with I.E.C. Built in England by Multicore Solders, Ltd. Complies with I.E.C. Publication 68-2 Test T. Descriptive literature available on request.

FREE evaluation test samples, to qualified manufacturers, "Modern Solders" technical booklet, and fully detailed information on any of these products will be sent promptly. Address request, on company letterhead, to: Multicore Sales Corp., Dept. RY399, Westbury, N.Y. 11590.

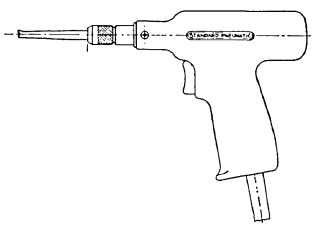
MULTICORE SALES CORP., WESTBURY, N.Y. 11590, Div. British Industries Co.

AIR TOOLS

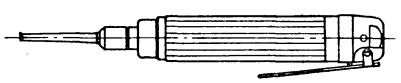
Wire Wrapping Tools



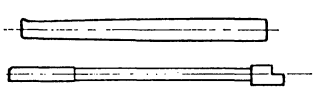
Model 663 — Comfortable pistol grip, lightweight, low air consumption and noise level, fast operating cycle.



ELECTRIC WIRE WRAPPING TOOL — For operating where commercial air is not available. Speeds over 3000 rpm, weight 10 oz., 20 to 32 AWG wire.

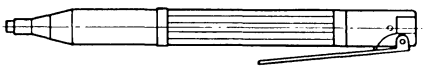


Model 662 — Fluted-grip, straight type tool, for wiring horizontal panels.

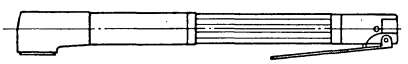


Bits and Sleeves—Available for 20 to 32 ga. wire for both regular and modified connections. Different models and accessories described in catalog.

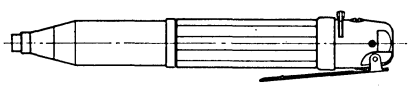
Screwdrivers Nutsetters



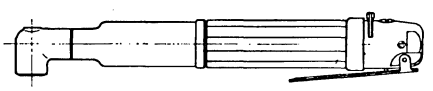
Model 263 — Ideal for electronic assembly, small, lightweight, quiet . . . for screw and nut sizes #00 to #6.



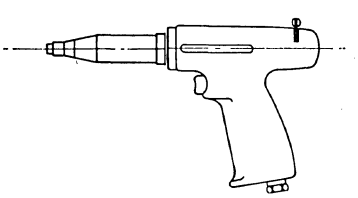
Model 263 — With right angle attachment for nutsetting or screwdriving in closely confined areas.



Model 863 — Straight type with comfortable fluted grip and precise torque control, for screw sizes #4 to #10.



Model 863 — With right angle attachment with plenty of power and still able to get into closely confined areas.



Model 266 — Pistol grip type that balances nicely in the hand. Air exhausts through the handle.

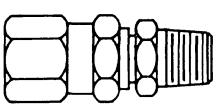
Miniature Grinders

Ideal for finishing operations and precision grinding, 22,000 RPM, reversible, 3/32″ or 1/8″ collet.

Collet Spindles

Self contained spindles are ideal for small hole drilling on close centers.

Accessories



Model 463 — Hose swivel that eliminates twisting in air lines and makes tools easier to handle.

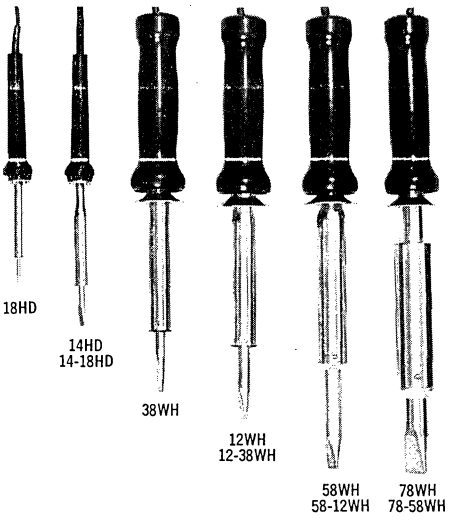
WALL BRAND SINCE 1864
MADE IN USA

SOLDERING PRODUCTS

HOT AIR GUNS AND TIPS



HD Type and WH Type Heavy-duty Irons

Wallbrand heavy-duty irons are engineered for highest efficiency performance. Rugged construction assures long-life for demanding production line needs. No radionic interference. Triple-life resistance wire wound on pure mica and constant tip temperature with extra fast recovery permits continuous heavy-duty use. 120 volts AC or DC. Other voltages available on request. Handles remain cool after long hours of operation. Tips are easily changed. Special irons customized to particular requirements.

Model	Watt Input	Tip Dia.	Length W/O Tip	Thermo/ Gram Value
18HD	25	1/8″	6⅝″	300

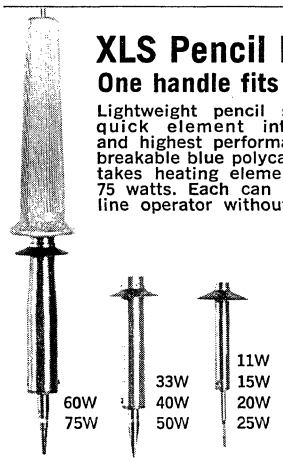
78-58WH	300	5/8″	12⅜″	5400

XLS Pencil Iron

One handle fits 9 elements

Lightweight pencil series features quick element interchangeability and highest performance. Cool, unbreakable blue polycarbonate handle takes heating elements from 11 to 75 watts. Each can be changed by line operator without special tools. Available with either 2 or 3 wire cord. Uses regular or iron plated tips. Elements encased in long-life stainless steel jackets.



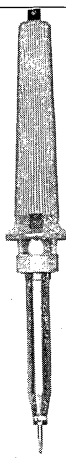
DH (DUO HEAT) Pencil

Pat. Pending

Developed for use in intermittent soldering operations

Revolutionary lightweight pencil operates continuously at low heat, but has higher heat available when needed. Constant low heat is adequate for light to medium jobs, get high heat instantly by pressing handle switch; tip and element life infinitely increased. Indestructible molded handle stays cool and comfortable. Wide variety of plug-in tips easily interchangeable.

Model	Continuous Low Heat	High Heat
DH-1	15W 520°F	47W 920°F
DH-2	20W 630°F	53W 975°F

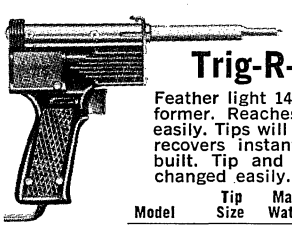


IDL INSTANT DEPENDABLE LASTING IRON

Pat. Pending

3 oz. pencil controlled by thermal time delay relay

Heats in seconds. No transformer. When handle button is depressed 180W element heats initially until soldering temperature is reached. Thermal time delay relay then cuts in 40W element automatically. Pencil cannot overheat. Interchangeable plug-in 1/8″ tips need no special tools to change. Unbreakable handle stays cool. Especially good for diversified light to medium jobs.

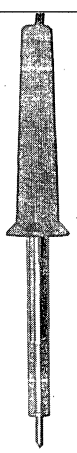


Trig-R-Heat Gun

Feather light 14 oz. gun has no transformer. Reaches hard-to-get at spots easily. Tips will not deform. Heats and recovers instantly. Rugged, precision built. Tip and element assemblies changed easily.

214LT

Model	Tip Size	Max. Watts	Min. Watts	AC/DC Volts	Weight W/O Cord
214LT	1/4″	400	150	120	14 oz.
212LT	1/2″	500	300	120	24 oz.
TIP AND ELEMENT ASSEMBLY					
214TE	1/4″	400	150	120	6 oz.
212TE	1/2″	500	300	120	16 oz.



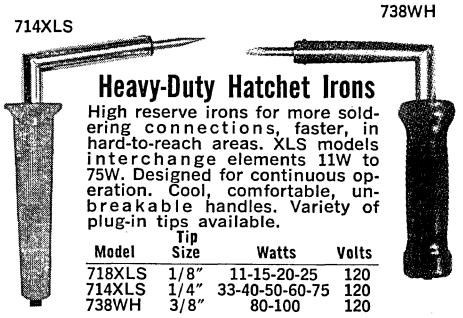
864 Commercial Duty Iron

Pencil iron has cool, molded plastic handle, balanced for comfort. Triple-life resistance wound. Copper tip maintains constant temperature.

Tip Size	Watts	Volts
3/16″	30	120
3/16″	40	120

714XLS

738WH



Heavy-Duty Hatchet Irons

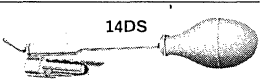
High reserve irons for more soldering connections, faster, in hard-to-reach areas. XLS models interchange elements 11W to 75W. Designed for continuous operation. Cool, comfortable, unbreakable handles. Variety of plug-in tips available.

Model	Tip Size	Watts	Volts
718XLS	1/8″	11-15-20-25	120
714XLS	1/4″	33-40-50-60-75	120
738WH	3/8″	80-100	120

SPH
(SIH not shown)

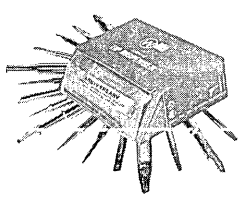
Soldering Pencil Holder

Can be mounted on top, in front or below bench. Adjusts to any angle. Bench model includes tip cleaning sponge and tray. SPH for up to 5/8″ shaft. Model SIH for up to 1″ shafts.



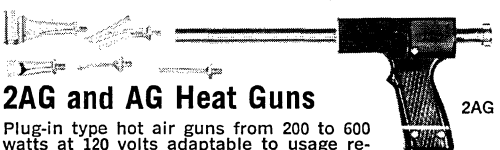
Desoldering Tool

Keeps solder in molten state in reservoir. Operated with one hand. Tip replaceable with two openings — .080″ dia. and .064″ dia. Fits 614, 14HD, 714XLS and XLS 33W to 75W series.



Tips and Tip Dispenser

Tip sizes from 1/8″ through 7/8″ in wide variety of configurations for specific industrial and commercial needs. Three grades — **Anniversary type:** Super finished, iron and chrome plated. **Wallkiad:** Iron coated and chrome plated. For production and critical lab use. **Wallbrand:** Commercial, copper, nickel plated. Wall's own iron plating facilities produce high quality long-life tips. 1/8″ through 3/8″ iron plated or copper tips available in handy tip dispenser. Tips individually sealed in color-coded continuous belting, plastic envelope.



2AG and AG Heat Guns

Plug-in type hot air guns from 200 to 600 watts at 120 volts adaptable to usage requiring up to 1000°F. One heating element fits both models. Pistol grip available with trigger (extra cost), opens air and heat at same time. Five tip styles interchangeable. Special tips on request. 3-wire cord assembly. Guns include neoprene air hose, hose fittings, pressure regulator and gauge. Send for Bulletin HG-1265.

WALL MANUFACTURING CO.

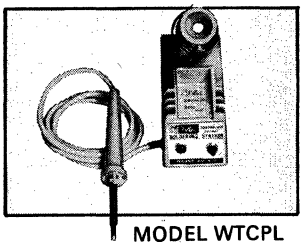
Industrial soldering irons and pencils are built to exceed Federal specification W-S-570. Wallbrand soldering products are UL and CSA listed.

Weller industrial soldering tools

for greater efficiency... lower operating costs and maximum safety

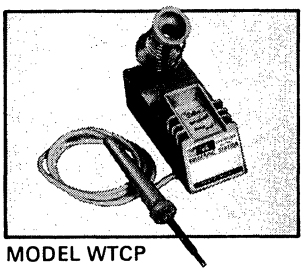
CONTROLLED OUTPUT SOLDERING TOOLS...

Automatically controls output and temperature independent of line voltage.



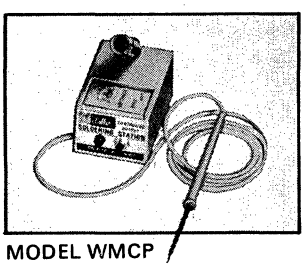
MODEL WTCPL

MODEL WTCPL. Controlled output low voltage soldering with power unit isolated for protection of sensitive devices.Temperatures of 500°F., 600°F. and 700°F. are predetermined by tip selection. Cord set will not burn. Stand will not heat sink. Built-in on/off switch and pilot light. 60W, 120V, 3 wire cord. Comes with 3/16", 700°F. screwdriver tip. New cool blue color. Also available without built-in on/off switch and pilot light as MODEL WTCP.



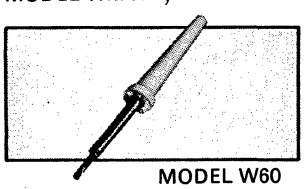
MODEL WTCP

MODEL WTCP. Weller's new miniature tool for micro-soldering, automatically controls output and temperature with power unit isolated and shielded for protection of sensitive devices. Has fixed temperature, interchangeable tips, low voltage operation, built-in on/off switch and pilot light. Available in 3 temperature ranges: 550°F.,...650°F., and 750°F. control 20W, 120V, 50/400 Hz. 3 wire cord. Comes with 5/64" chisel tip. New cool blue color.



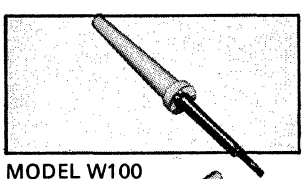
MODEL WMCP

MODEL W60. Low cost, portable, line voltage operation. Automatic control of output and temperature 60W, 2 wire cord. Comes with 700°F., 1/4" screwdriver tip. Model W60-3, 3 wire cord set. New cool blue color. For complete station order PH60 stand.



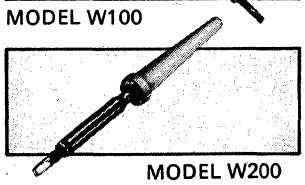
MODEL W60

MODEL W100. Low cost, portable, line voltage operation. Automatic control of output and temperature. 100W, 2 wire cord. Comes with 700°F., 3/8" screwdriver tip. Model W100-3, 3 wire cord set. New cool blue color. For complete station order PH100 stand.



MODEL W100

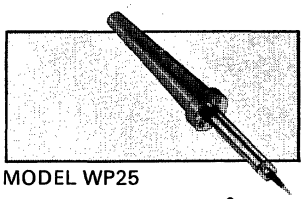
MODEL W200. Low cost, portable, line voltage operation. Automatic control of output and temperature. 200W, 2 wire cord. Comes with 700°F., 1/2" chisel tip. Model W200-3, 3 wire cord set. New cool blue color.



MODEL W200

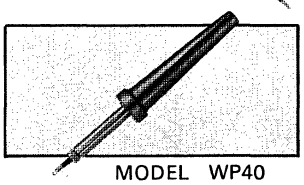
UNCONTROLLED SOLDERING TOOLS...

For lowest cost soldering operations not requiring high efficiency tool.



MODEL WP25

MODEL WP25. Uncontrolled line voltage soldering tool. All stainless steel construction, 25W, 120V, 2 wire cord, with 1/16" screwdriver tip. New cool blue color. Model WP25-3, 3 wire cord set.



MODEL WP40

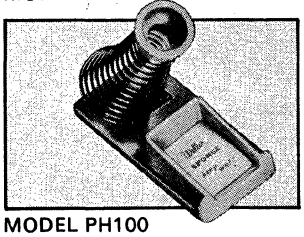
MODEL WP40. Uncontrolled line voltage soldering tool. All stainless steel construction. 40W. 120V, 2 wire cord, with 1/8" screwdriver tip. New cool blue color. Model WP40-3, 3 wire cord set.

SOLDERING TOOLS STANDS...

Have heavy cast iron bases and built-in sponge holders. Design precludes any possible heat sinking of Weller controlled tools. New cool blue color.

MODEL PH60

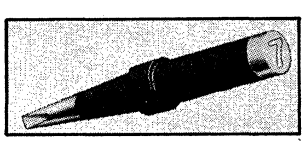
MODEL PH60. Accommodates Weller Models WP25, WP40, W60, and any soldering tool with a barrel diameter up to 15/32".



MODEL PH100

MODEL PH100. Accommodates Weller Model W100 and any soldering tool with a barrel diameter up to 19/32"

TIPS AND ACCESSORIES



All Weller Industrial Soldering Tips have unique heavy iron plating with anti-oxidation coating thereby eliminating freezing... No other tip offers these features!

A complete line of Weller Accessories is available to greatly extend the effectiveness of Weller Soldering Tools.

Each of the three volumes of **eem** contains a Product Index and Directory, the Green Section. This Index is a complete alphabetical listing of products. If the product you are looking for appears in the particular volume you are consulting, the green pages will provide a complete list of manufacturers who make that product. If the product is included in another volume of **eem**, the Index will provide a cross reference, directing you to the correct volume.

Boldface listings under product headings indicate that the listed manufacturer has products cataloged in **eem. Boldface** listings with page numbers indicate that this manufacturer's catalog pages include detailed data on the product indicated in the product heading.

Similar products are grouped together. For example, the many kinds of meters are listed in this manner: "Meters, Ampere," "Meters, Capacitance," "Meters, Flux" etc. To help you locate the prime product heading, there are hundreds of cross references, e.g. "Voltmeters — See Meters, Volt."

Catalog pages in **eem** are divided into three volumes based on very broad product groupings. These are:

Volume 1 — Test Instruments / Equipment and Systems

Volume 2 — Active Components / Circuit Assemblies / Controls and Drives

Volume 3 — Passive Components / Materials / Hardware

These volumes are further divided into 55 **eem** Product Sections which are assigned individually to the most appropriate volume. Within each of the 55 product sections manufacturers are arranged alphabetically, wherever possible. A complete index of all manufacturers' catalog pages is included in every volume. To locate the catalog pages of a specific manufacturer, refer to this index at the beginning of the white section in any of the three volumes. This index will provide the page numbers you require. In Volume 1, the index begins on page 302, in Volume 2 on page 1274 and in Volume 3, page 2310.

More than 6,000 manufacturers of electronic components, materials, instruments, assemblies, systems and key services are listed in the Yellow Section. An identical Yellow Section appears in each of the three volumes of **eem**, listing addresses, phone numbers and sales managers' names. TWX numbers are also included where available. **Boldface** listings indicate that detailed information on the manufacturers' products is cataloged in the White Section of **eem. Boldface** listings also indicate that local sales offices or representatives are listed for that manufacturer.

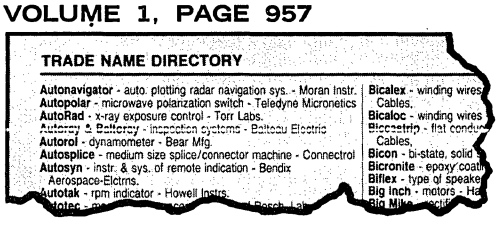
VOLUME 1, PAGE 957



TRADE NAME DIRECTORY

Autonavigator - auto. plotting radar navigation sys. - Moran Instr.
Autopolar - microwave polarization switch - Teledyne Micronetics
AutoRad - x-ray exposure control - Torr Labs.
Autoray & Batteray - inspection systems - Balteau Electric
Autorol - dynamometer - Bear Mfg.
Autosplice - medium size splice/connector machine - Connectrol
Autosyn - instr. & sys. of remote indication - Bendix Aerospace-Electrns.
Autotak - rpm indicator - Howell Instrs.
Autotec - [illegible] Posch Lab[illegible]

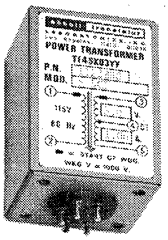
Bicalex - winding wires Cables,
Bicaloc - winding wires
Bicostrip - flat conduc Cables,
Bicon - bi-state, solid
Bicronite - epoxy coati
Biflex - type of speake
Big Inch - motors - Ha
Big Mike - [illegible]

If you know only the trade name, brand name or trade mark of a product, you can locate it in **eem** by using the **Trade Name Directory.** This appears only in Volume 1, beginning on page 957 of the White Section. These pages can be identified by a vertical black band along the outside edge.

if you require additional assistance

contact the Editorial Department, United Technical Publications, Inc., 645 Stewart Ave., Garden City, N.Y. 11530, or phone (516) 248-9700.

abbott 60 transformers



features

- Quality MIL-spec 60 Hz power transformers
- Hermetically sealed
- to meet MIL-T-27C
- 105°C ambient operation
- 5 to 5000 volts
- 5 to 300 watts

DELIVERY IS FROM STOCK

specifications

INPUT PRIMARY: 115 VRMS, 60 Hz ±5 Hz, 1 phase

INSULATION TEST: 1750 VRMS or 150% of secondary voltage (whichever is higher)

CONSTRUCTION: To MIL-T-27C, grade: 4, class: "S", life: "X" (10,000 hrs.) case: smaller

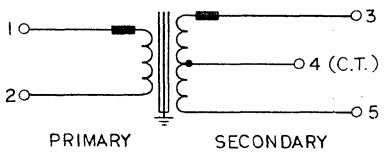
ENVIRONMENT: 105°C maximum ambient temperature. Encapsulated to meet MIL-E-5272C and MIL-E-5400K for vibration, shock, acceleration, sand, dust, humidity, salt spray, fungus, shunshine, rain, explosion and altitude (to a vacuum)

WORKING VOLTAGE: 1000 VAC for all transformers with secondary voltages up to and including 1200 VAC; 80% of rated secondary voltage for all others

SECONDARY VOLTAGE TOLERANCE: Within 3% of listed output voltage when measured at full load and 115 VAC input

OUTPUT SECONDARY: See voltage and current of specific models listed. Standard models with outputs from 63 to 5,000 VAC are also available from stock. Contact our nearest office for your free copy of our complete brochure.

TYPICAL CIRCUIT DIAGRAM



refers to in-phase points

SIZE CHART

Case Size	Width (in.)	Depth (in.)	Height (in.)
A1	1½	1¾	2⅜
A2	1¾	2 1/16	2¾
A3	1⅞	2⅜	3⅛
A4	2	2⅜	3⅛
A5	2⅛	2 1/16	3½
A6	2¼	2 1/16	3½
A7	2⅝	3⅛	4⅛
A8	2⅞	3 1/16	4½
A9	3⅛	3¾	4⅞
A10	3⅞	4 1/16	5¼
A11	3⅞	4 1/16	6

Complete size chart and dimensional drawing are shown in our six page brochure.

Standard models with outputs from 63 to 5,000 VAC are also available from stock. Contact our nearest office for your free copy of our complete brochure.

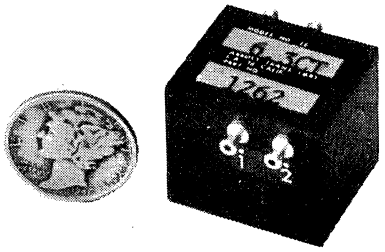
EASTERN OFFICE: 1224 ANDERSON AVE. / FORT LEE, N.J. 07024 / (201) 224-6900

abbott transistor LABORATORIES, INCORPORATED

5200 W. Jefferson Blvd. / Los Angeles 90016

(213) WEbster 6-8185 Cable: ABTLABS

abbott 400 transformers



features

- Hermetically sealed
- 105°C operation
- To meet MIL-T-27C
- Designed exclusively for 400 Hz
- For aerospace application
- Molded diallyl phthalate

DELIVERY IS FROM STOCK

specifications

Input Primary
115V, 400 Hz ±20 Hz, 1 phase

Regulation
10% no load to full load

Secondary Voltage Tolerance
Within 5% when measured at full load and 115 VAC input

Insulation Test
2500 VDC or 150% of secondary voltage (whichever is higher)

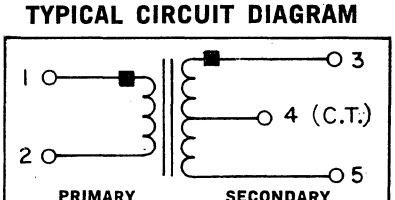
Construction
To MIL-T-27C, grade: 5, class: "S", life: "X" (10,000 hrs.) case: smaller

Environment
Encapsulated to meet MIL-E-5272C, including vibration to Proc. XII, temperature to 105°C, shock, sand, dust, humidity, saltspray, fungus, sunshine, rain, explosion, and altitude (to a vacuum)

Output Secondary
See voltage and current of specific models listed

Standard models with outputs from 350 to 5,000 VAC are also available from stock. Contact our nearest office for your free copy of our complete brochure.

TYPICAL CIRCUIT DIAGRAM



"■" refers to in-phase points

Standard models with outputs from 350 to 5,000 VAC are also available from stock. Contact our nearest office for your free copy of our complete brochure.

Electro Cube Foil Wound Transformers

are available in standard models listed and also to customer requirements. Units may be isolation or auto transformers for frequencies from 25 cycles into the kilocycle range, single or multi-phase, open frame, shell enclosure or hermetically sealed.

Advantages of these aluminum foil wound transformers over conventional wire wound units include: ■ higher operating efficiency ■ reduced weight ■ improved thermal efficiency ■ higher temperature operation ■ improved regulation ■ lower internal losses ■ improved volume efficiency.

A transformer's ability to dissipate heat affects its maximum rating. Electro Cube foil wound coils have the ability to dissipate large amounts of heat because there is a direct metallic path to each end of the coil from any point within the coil. Special end treatment of the coil including attachment to a heat sink, can significantly reduce operating temperatures.

Wire wound coils, by comparison, are more difficult to cool. As a result of a limited heat path a lower coefficient of heat transfer and increased resistance due to heat and vice versa, the heat is greatest in that part of the coil least capable of dissipating it. Heat generated by conductors deep within the coil must pass through many thermal barriers of the insulation between the wires. Materials in Electro Cube foil transformers permit higher operating temperatures than are possible with wire coils with equivalent insulation ratings.

Figure 1 shows the relative difference in volume required for a 100 turn wire coil and an equivalent foil coil, and shows voltage stress and insulation requirements. At 1 volt per turn there would be 20 volts between the 20th and first turn of the wire coil. When the top layer is finished, the last turn may lay against one of the first, resulting in a voltage difference of up to 100 volts. The foil coil never has more than 1 volt between any two conductors, or a 100 to 1 advantage over the wire coil, in this example.

The physical arrangement of the foil windings promotes a lower leakage reactance or power loss in the transformer, which contributes to efficiency and regulation. Together with the lower I^2R loss of the windings, this allows the use of fewer circular mils of conductor area to meet required efficiency and regulation requirements.

Electro Cube transformer design allows a smaller core volume to support the flux density required for any given load. The smaller core and lighter weight of the aluminum foil contribute to a reduction in weight and volume.

Electro Cube also manufactures wire and foil wound transformers, toroids and special inductors, aluminum foil chokes, film capacitors, EMI filters and RC networks. See pages 2378, 2379 for data.

FERRODYNE . . . ADVANCED STATE OF THE ART

Highly sophisticated specialty Transformers, Inductors, and Associated Magnetic Components.

FERRODYNE products are keyed to those segments of the electronics industry that are primarily concerned with high quality, strict specifications, and advanced state of the art products.

Since 1961, the FERRODYNE CORPORATION has been an industry leader in the development of micro-miniature, low profile, and high frequency transformers and inductors for the Computer, Communications, and Electronic Instrument Industries. FERRODYNE products range from highly sophisticated micro-miniature transformers and inductors to ten (10) kilowatt components; frequencies to 50 megahertz; construction categories cover the entire range from open type to hermetically sealed; quality assurance is in accordance with Mil-Q-9858A. The FERRODYNE CORPORATION manufactures magnetic components in compliance with U.L. standards for computer and instrument manufacturers and is also Q.P.L. listed.

Contact FERRODYNE for prompt and efficient engineering assistance with your specialty transformer requirement. FERRODYNE provides quick service on special prototype units. We welcome your inquiries.

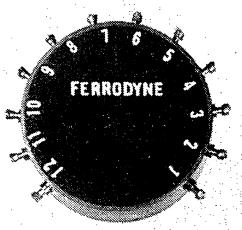
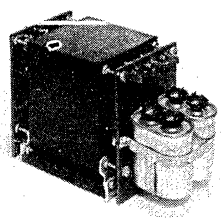
FSI Series Switching Regulator Inductors

This Series is specifically designed for application in switching regulated power supplies operating at frequencies above 10 KHz, constructed to meet high "Q" requirements with a minimum of R.F.I. and flux radiation. The F.S.I. Series uses cold rolled steel cases with fused tin plating. Mounting is provided by through hole in the center.



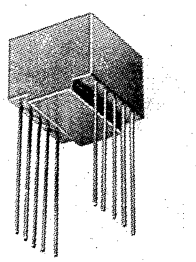
FIC Series Inverter/Converter Transformers

The Ferrodyne inverter and converter toroidal transformers are ideal for use where low voltage DC power must be converted to high efficiency, high voltage DC. The Transformers are epoxy molded under vacuum to eliminate moisture and increase unit ruggedness. The FIC Series exceed Mil-T-27C, grade 5, class R specifications. Frequencies to 10 KHz. Inverter circuit information can also be supplied by Ferrodyne Engineering. For specific application please contact the factory. Units are available upon request in metal enclosures to minimize flux radiation.



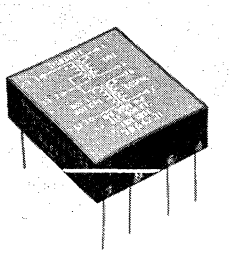
FCV-200 Series Constant Voltage Transformers

Combines both low profile advantages and standard multi-selectable output features to provide the user the optimum application advantages at competitive prices. 70% of the ampere capacity of each unit is available at either plus or minus 5VDC. The 30% balance of power available can be supplied at either plus or minus 12, 15, or 24 VDC. Primary voltage is 95-130V, 1 phase, 60 Hz.



FMC Series Miniature Transformers And Inductors

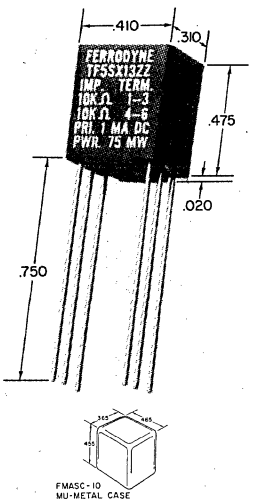
- 2-4 weeks delivery
- Size .630" x .530" x .52" high
- Weight 7 grams
- Frequency range 300 Hz to 50 KHz
- Mil-T-27C, Grade 5, Class S
- All leads separated in increments of 1/10"
- Complete circuit data on each unit
- 500 RMS test voltage
- Ten lead capacity
- MIL-T-27C, Open Construction Grade 6, Class S available



FST Series Precision Scott-T Transformers

For applications from resolver to syncro; or from syncro to resolver. Mil-T-27C, grades 5 and 6, class S. Designed to meet the most stringent requirements such as:

- D.C. resistance balance to within 5%.
- Minimum phase shift down to ½ min.
- Transformation accuracy with .05%.
- Input impedance up to 1 megohm.
- Frequencies from 60 Hz to 1 KHz.



FMA Series Micro-miniature Transformers and Inductors

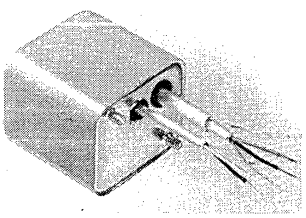
- Size .475" high x .310" wide x .410" long
- Weight 1/10 oz.
- Frequency range 300 HZ to 120 KHZ
- Mil-T-27C, Grade 5, Class S
- All leads separated in increments of 1/10"
- Complete circuit data on each unit
- 500 RMS test voltage

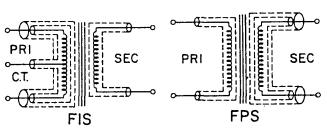
FMA-1 Series Micro-miniature Low Profile, Open Type Version of FMA Units

- 2-4 weeks delivery
- Size .25" high x .35" wide x .375" long
- Mil-T-27C, Grade 6, Class S
- No. 28 leads (Max. number of leads 6) for Printed Circuit application

FMA-2 Series Micro-miniature Low Profile, Solid Epoxy Molded Version of FMA Units

- 2-4 weeks delivery
- Size .30" high x .40" wide x .40" long
- Mil-T-27C, Grade 5, Class S
- 12 Pin capacity





FIS/FPS Series Box Shielded Instrument and Power Transformers

FIS Box Shielded Instrument Transformers are designed for two distinctly different application requirements. The Ferrodyne FIS Series units are designed primarily for use in the instrumentation field, and have many outstanding features generally considered difficult to meet by most competitors. Some of these features are:

- Double box shielded primary and single box shielded secondary windings result in a low winding to winding capacitance or .03PF max.
- Encased in three high permeability cans, shielding is a minimum of 90DB.
- Low microphonic construction.
- Common mode reduction will exceed 140DB.
- Low thermal noise construction.
- Frequency response = 5 Hz to 8 KHz @ 25 mv level.
- Insulation resistance is 10,000 Meg. ohms @ 500VDC.

FPS—The Ferrodyne FPS Series is designed for application where a high degree of isolation is required from the noise generated in the line. Some of the outstanding features are:

- Single box shielded primary and double box shielded secondary result in a primary to secondary winding capacitance of .03PF max.
- Common mode rejection will exceed 140DB.
- Operating frequency is 50/60 Hz.
- Insulation resistance is 10,000 Meg ohms min.
- Designed at low operating flux density with grain oriented silicon steel to reduce the magnetic flux radiation.
- Open construction with shield cable leads, treated and coated with epoxy.

FREED TRANSFORMER CO., INC.

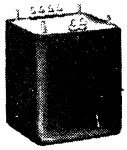
TRANSISTORIZED CONVERTERS—TDC LINE

For DC/DC conversion from low voltage DC sources to high voltage DC output. Stock units are available in power capabilities to 45 watts, with input voltages of 6, 12, 24, 28, and 48 volts.

All TDC converters are hermetically sealed and oil filled. Outputs are filtered with ripple less than .1%. Operating temperatures from −55°C to +70°C. They are ruggedly built to withstand shock and vibration.



CAT. #	NOM. VDC INPUT	VDC OUT	MAX 1 OUT MA	CASE SIZE
TDC 6-15-05	6	150	50

DC TO AC TRANSISTOR INVERTERS—TAC LINE

115 volt outputs at 60 Hz at powers ranging from 50 VA to 350 VA.

Output wave form-square wave; Output frequency – 60 Hz ±1 Hz;

Hermetically sealed-oil filled; Maximum operating temperature – 70°C.

AVAILABLE TYPES:

CAT. #	NOM. VDC IN	OUTPUT VA	SIZE
TAC 6-50	6	50	4⅛ x 3½ x 4½
TAC 12-50	12	50	4⅛ x 3½ x 4½
TAC 12-90	12	90	4⅛ x 3½ x 4⅞
TAC 12-175	12	175	5 x 4⅛ x 6
TAC 28-50	28	50	4⅛ x 3½ x 4½
TAC 28-100	28	100	4⅛ x 3½ x 4⅞
TAC 28-175	28	175	5 x 4⅛ x 6
TAC 28-250	28	250	5½ x 5 x 6¾
TAC 28-350	28	350	5½ x 5 x 6¾
TAC converters are also available with 400 Hz outputs in three models:			
TAC 12-100-4	12	100	4½ x 3½ x 4½
TAC 28-150-4	28	150	4⅛ x 3½ x 4½
TAC 28-250-4	28	250	5 x 4⅛ x 6

DC TO AC TRANSISTOR INVERTERS—PTC LINE

A new line of DC/AC inverters for operation from a 12 volt D.C. source. Output is square wave, 115 volts RMS at 60 Hz. Regulated to ±2 Hz over an input voltage range of 10.5 to 13.5 VDC.

Efficiency on all units is 80% min. at full load. Ambient temperature to 55°C.

Available models listed below:

CAT. #	VA OUT	SIZE	MTG.
PTC 12-15	15	3 x 2½ x 4	1⁹⁄₁₆ x 1¹³⁄₁₆
PTC 12-50	50	3½ x 3 x 4¹³⁄₁₆	2 x 2¾
PTC 12-100	100	5⅞ x 4 x 5¼ HI	3¼ x 3⅛
PTC 12-175	175	7⅞ x 4¹³⁄₁₆ x 5¼ HI	6 x 3½

PTC 12-15 and PTC 12-50 are supplied with 4-terminal headers for input and output connections.

PTC 12-100 and PTC 12-175 use barrier strip terminals and in addition have an auxiliary output receptacle.

DC TO AC TRANSISTOR INVERTERS — VC LINE

A low priced efficient transistor inverter for applications not requiring frequency regulation closer than ±5 Hz is available in 15 VA and 100 VA output capabilities. Input nominal 12 V.D.C. Output square wave 115 volt.

Cat. #	Power	Freq.	Size
VC 12-15	15 watt	55-65 Hz	3 x 3⅛ x 3¾ Hi.
VC 12-100	100 watt	55-65 Hz	4½ x 3½ x 4½ Hi.

MCV – CONSTANT VOLTAGE TRANSFORMERS – MCV
(FERRO-RESONANT TRANSFORMERS)

The MCV line of constant voltage transformers provides accurate regulation against line and/or load variations, without the use of tubes or moving parts.

Input Voltage Range
95 to 130

Rated output within ± 2% of nominal value. Regulation automatically maintained within ± 1%. Regulation from 25% to full load ± 2%.

- MILITARY SPECIFICATIONS
- NO TUBES
- COMMERCIAL
- NO MOVING PARTS
- ACCURATE REGULATIONS
- FAST RESPONSE
- FULLY AUTOMATIC
- SUPPLIED WITH CONDENSERS

AVAILABLE UPON REQUEST
MAGNETIC AMPLIFIERS AND SATURABLE TRANSFORMERS

FERROTRAN ELECTRONICS CO., INC.

MINIATURE TRANSFORMERS

Extremely small rectifier transformers with single or duel secondary winding for electronic designers who wish to design their own solid state power supplies. 115 volt A.C. input, 55-450 cycles ratings below give D.C. outputs for rectifier circuits with condenser input.

SUBMINIATURE UNITS

Channel-frame (1⅜"x1⅛"x1"W).

Model	Sec. D.C., Volts	Sec. D.C., Current	Price
SM-1	10	80ma	$ 9.00
SM-2	15	60	9.00
SM-3	20	50	9.50

DESIGN INFORMATION

CENTER TAP — All units are center tapped. The ratings, therefore, are for a full-wave circuit. SM-7 thru 10, R-9 thru R-18, I-10 thru I-15, S-9 thru S-13, CM-6 thru CM-11, H-9 thru H-20, RT-6 thru RT-10 are not center tapped and are designed for a bridge circuit.

TEST VOLTAGE — 1000 V., D.C. between primary and secondary, and between secondary windings.

INSULATION — Nylon bobbin; insulating paper between each layer.

LEADS — Flexible leads rated for 105°C.

DUAL SECONDARIES — Transformers shown with two output units give indicated current from each tap.

All transformers listed may be wound for 220 v.a.c. input.

ALL TRANSFORMERS MAY BE WOUND WITH ELECTRO STATIC SHIELDS.

SEE SECTION 4000 FOR COMPLETE LIST OF FERROTRAN SOLID STATE POWER SUPPLIES

HIGH CURRENT UNITS

IR	115	14	9.00

ENCASED TRANSFORMERS

All listed transformers are available fully encapsulated in a MIL-T-27 can.

The cost of such units is an additional $11.00 for single secondary transformers and $13.00 additional for dual secondary units.

Standard connectors are of the hooked solder pin type (0.900" in dia.), mounted dead center on the stud side of the case.

Case types are as follows:

Series	Case	Size
SM	AH	1 5/16"x1 5/16"x1¼"
R	AJ	1⅝"x1 5/8"x2⅜"
I	AJ	1⅝"x1 5/8"x2⅜"

specialty transformers

HIPOTRONICS®

. . . A COMPLETE RANGE OF SPECIALTY TRANSFORMERS FOR A WIDE VARIETY OF APPLICATIONS FOR INDOOR OR OUTDOOR USE — PLUS THE DESIGN AND MANUFACTURE OF TRANSFORMERS TO YOUR SPECIFICATIONS.

HIPOTRONICS' TRANSFORMER MANUFACTURING FACILITY IS AMONG THE MOST COMPLETE IN THE INDUSTRY, AND INCLUDES A VACUUM/PRESSURE VARNISH IMPREGNATING SYSTEM CAPABLE OF HANDLING COILS UP TO 7 FEET IN DIAMETER.

CORONA TEST

To assure high reliability and long life, all equipment is tested to Hipotronics' specification #2514 or #2515. These specifications require a corona detector with a basic sensitivity of 1 picocoulomb per centimeter.

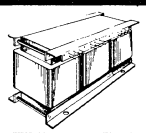
FILAMENT HEATER TRANSFORMERS

Specifications	Options	Applications
Power: as required Frequency: 25 Hz to 1 KHz Insulation: to 600 KV DC	Single or three phase Single or multi coil High voltage isolation Low capacitance High reactance (current limiting)	Oscillator tubes Power tubes Pulse applications (low capacitance) Cold filiment starting (high reactance)

FURNACE TRANSFORMERS

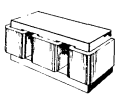
Specifications	Options	Applications
Power: up to 1000 KVA Frequency: 25 Hz to 60 Hz	Tapped primary or secondary (with switches) Water cooled Forced air cooled NEMA 1 or NEMA 12 enclosures	Electric furnaces High vacuum electric furnaces Resistive heating Wire annealing and preheating

PLATE TRANSFORMERS



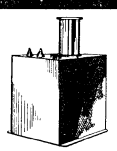
Specifications	Options	Applications
Power: up to 500 KV DC up to 2000 KVA Frequency: 25 Hz to 1 KHz	Tapped primary Epoxy encapsulation High impedance Oil or air insulation	Induction and dielectric heating X-ray equipment Electrostatic precipitators High power modulators Welding

SATURABLE REACTORS



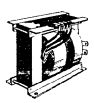
Specifications	Options	Applications
Power: up to 1000 KVA Frequency: 25 Hz to 1 KHz	Epoxy encapsulation Oil or air insulation Forced air, convection, or water cooled Multi-control windings Low turndown	Stepless power control for RF heating Resistance heating and annealing High vacuum furnace Capacitor charging Motor speed control Constant current control

HV AND/OR ISOLATION TRANSFORMERS



Specifications	Options	Applications
Power: up to 1000 KVA up to 500 KV rms Isolation: up to 500 KV Frequency: 25 Hz to 1 KHz	Single or three phase Epoxy encapsulation Oil, gas, or air insulation Multi-primary or secondary	Hipot testing Corona testing Laboratory power supplies Insulation and cable testing Laser power supplies Accelerator power supplies

CONSTANT VOLTAGE TRANSFORMERS



Specifications	Options	Applications
Power: up to 50 KVA Frequency: 50/60 Hz	Multiple inputs and/or outputs High voltage isolation Low capacitance Current limiting ± 2% output change for 15% line change	Oscillator tubes filiment Line voltage regulation

AUDIO TRANSFORMERS

Specifications	Options	Applications
Power: up to 500 KVA Frequency: 5 Hz to 50 KHz	Auto or isolated Multi-tapped outputs Air, oil, gas, or forced air insulation	Vibration testing Shaker amplifiers Ultrasonics

CHOKES

Specifications	Options	Applications
Reactive KVA: up to 2000 Voltage: up to 75 KV Isolation: up to 750 KV AC rms Frequency: DC to 25 KHz	Air or iron core Epoxy, oil, air or gas insulation Mechanically variable tapped, or multi-winding Water or forced air cooled	Filter chokes in DC supplies. Resonant charging, current limiting, AC line reactors Power factor correcting

POWER TRANSFORMERS AND HIGH CURRENT CHOKES

Please refer to our ad, Page 2872, 1970/71 EEM for complete data.

ISOLATION TRANSFORMER

FEATURE:

- Designed to meet UL approval
- Built-in line cord and plug
- Built-in voltage meter
- Built-in circuit breaker protection
- Portable
- Dual Primary windings
- Electrostatic shield
- 50 Hz to 60 Hz

APPLICATION:

- 230 VAC to 115 VAC step-down
- 115 VAC to 230 VAC step-up
- Medical equipment
- House-hold appliances

HOW TO ORDER

★400 Hz TRANSFORMERS

- Available immediately from stock.
- Secondary voltages between the standard units at no additional cost.
- Allow two weeks for non-standard voltage transformers.

★ APPLICATIONS:

- Isolation
- Power supplies
- Step-down

★ DESIGN INFORMATION:

- Transformers designed to meet MIL-T-27C per

TF 6 S X — ZZ

TF: Transformer Open Type; 6: 130°C; S: Open Type; X: (02) Rectified & (01) Unrectified Loads; ZZ: 10,000 Hrs. Minimum

- All primaries 115 Vac 380-1000 Hz.
- Transformer regulation is 6% no load to full load.
- All transformers have two secondary windings. They can be connected for parallel or series operation.
- Refer to POWER TRANSFORMER tables and schematics for rectified D.C. output information.

CONSULT FACTORY FOR:

1. Other impedance ranges.
2. Special applications.

SQUARE CORE SWITCHING TRANSFORMERS

DESIGN FEATURE:

- Designed to meet:
  - MIL-T-27C TF 5 S X — ZZ

Encapsulated; 130°C Temp.; Unrectified (01) Rectified (02); Life > 10,000 hrs.

  - Vibration • Humidity • Altitude • High Shock
- See Figures E and F for the mechanical configurations.
- See Figure 10, *Schematic for Possible Application.
- Tolerance: ±5%.
- Switching efficiency of 95% attainable.
- Isolated feedback windings.
- Secondary can be connected in series or parallel.
- Output power greater than 50 VA should be driven from another stage.
- Terminals for general application.
- Pins for printed circuit installation.
- Nomenclature simplified for ease of design selection.

APPLICATION:

- DC to AC inverter.
- DC to DC converter.
- DC isolation output AC or DC.
- DC to step-up or step-down.
- Volt-second support, saturable reactor

HOW TO ORDER

- Refer to Table I for physical size and cost.
- Refer to Table II for secondary volt-ampere rating and switching frequency that correspond to Table I.
- Recommended % feedback range should be such that it will drive the base of the switching transistor by 1.5 to 2.0 v peak.
- Follow the nomenclature shown below to specify your requirements when placing an order.

NOMENCLATURE: (A sample is shown below).

S12 - 10 - 2.5 - 28 - 6 - 50 - T or P

- S12 — Switching Transformer Size
- 10 — Power Rating in VA
- 2.5 — Switching Frequency in KHz
- 28 — Nominal DC Input Voltage, V_{dc}
- 6 — % feedback (E_f/E_p x 100)
- 50 — Secondary Voltage, E_s in Peak (125 v Max.)
- T or P — Specify Configurations

*Contact factory for the recommended transistors and switching circuit techniques.

CTA/CTAA SERIES

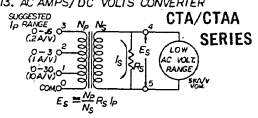

FIGURE 14 AMPS/VOLTS CONVERTER

Series	Typical Application Figures	Available Current Range Table	Description
CT	11 & 12	III	60-400 Hz toroidal type. Primary is single turn provided by conductor under test. Secondary drives 1 ampere or 5 ampere AC ammeter.
CMC	13	IV	60-400 Hz EI type. Multiple-turn primary transforms AC current to proportional AC secondary voltage for AC/DC control.
CTA	14	V	50-3 KHz multi primary current range toroidal type. This Series conveniently converts low AC voltmeter range into AC current meter. R_s = 150 ohms supplied per Fig. 14.
CTAA	14	V	Compact, assembled adaptor unit, using CTA Series, to convert quickly a typical VOM to measure AC current.

Refer to Table VI for size.

POT CORE INDUCTORS

FEATURES:

- Low cost but high quality inductors.
- High Q factor.
- Stable temperature range −30°C to +70°C.
- Designed to meet Mil-T-27C quality.

APPLICATIONS:

- Tank circuits.
- High pass filter.
- Low pass filter.
- Band pass filter.
- Volt-second averaging.

PLUG-IN PRINTED CIRCUIT POWER TRANSFORMERS and CHOKES

145 E. MINEOLA AVE. • VALLEY STREAM, N.Y. 11582 • PHONE: (516) 561-6050 • TWX: 510-225-8412

Plug-in printed circuit transformers designed for use in latest solid state circuitry application such as power supplies, control equipment and instrument applications. Units in this series provide a voltage step down and isolation from power line at relatively low power levels.

Smaller in size, designed for increased power ratings for optimum equipment miniaturization. Precision spaced plug-in terminals provide fixed mounting centers, found only in expensive molded transformers. Constructed in accordance with MIL-T-27 Grade 6, Class R. Class S available on special order.

Secondaries may be parallel connected to obtain twice the current rating or series connected to give twice the voltage.

Primary 115 volts. Also available from stock with 115/230 volt primary.

Size, 1 5/32" x 7/8" x 7/8". Wt., 1¾ oz. **M-AG (Fig. Q):** Enclosed in modified MIL-T-27B AG case with compression sealed ceramic terminals. MIL Type TF4RX—YY. Max. Size, 1" x 1" x 1⅜". Wt., 2⅜ oz. **M-H (Fig. R):** Hermetically sealed with high compression glass terminals, gray enamel finish. Available on special order with .120" holes. MIL Type TF4RX—YY. Size, 1 5/16" dia. x 1 7/16" max. Wt., 1¼ oz. **M-A (Fig. S):** Aluminum case with 2-56 screws. MIL Type TF3RX—YY. Size, .875" dia. x 1 3/16". Wt., 1.25 oz. **M-FB (Fig. L):** Open frame with channel. Available with plug-in tab channel or without channel on special order. MIL Type TF6RX—ZZ. Size, 1 3/64" x 1 3/16" x 2 7/32" max., plus tabs. Wt., 1.13 oz. **M-P (Fig. T):** Octal plug-in type in sealed plastic housing. MIL Type TF6RX—ZZ. Size, 1 3/32" dia. x 1 15/32". Wt., 2 oz. **M90 Shield (Fig. E):** 25 db magnetic shield for Type M-A. Two clearance holes on 1 11/16" centers. **M-PC (Fig. U):** Open frame PC with terminals molded into bobbin to maintain accurate dimensions for PC board. MIL Type TF6RX—ZZ. Size, 7/8" x 1 1/32" x 1"; terminals 3/16" below bobbin. Wt., 1.2 oz. **M-CM (Fig. M):** Contour molded on special order only; for mtg. on top of chassis. Size, 1 5/32" x 7/8" x 7/8". Prices on request.

400 Hz TOROIDAL POWER TRANSFORMERS (FIG. W)

Ideal for applications requiring minimum size and weight. Feature epoxy molded case and printed circuit pins which can be bent for chassis mounting. Toroidal cores provide greater efficiency and low phase shift. All have 115 V primary windings and center .170" clearance hole for #8 screw. MIL Type TF5SX01ZZ.

LOW LEVEL CHOPPER INPUT TRANSFORMERS

Efficiently transfer 30-500 Hz signals to instrument amplifiers. Signal level range, 0.5 μV to 0.5 V. Resin impregnated. Three mu-metal, two copper shields; 90 db shielding. Size, 1⅜" dia. x 1 25/32" h. with 6-32 x ⅜" studs on 1½" ctrs. Wt. 5 oz.

♦Full wave and CT loads may be simultaneously drawn, but for continuous duty, total V.A. output should not be exceeded.
■For positive and negative voltage supply as utilized in op-amp and similar circuitry.
**Based on approximately 1 volt drop per rectifier.
†Frequency depends on load and bias conditions.
▲M8050, M8051, M8073, M8074 are blocking oscillator types.

ULTRA-MINIATURE TOROIDAL INDUCTORS — QE-M SERIES

Affords new application oportunities in high density packaging. Ultra miniaturized with low height design. Exceptionally high "Q" and wide frequency range. Available on special order with ±1% inductance tolerance. Frequency range of QEL Series 1 to 300 kHz; QEM, 3 to 500 kHz. Accuracy, ±2%. Molded in epoxy resin with .020" x 2" gold-plated nickel alloy leads. Size, .450" dia. x .285".

SUBMINIATURE TOROIDAL INDUCTORS — QIL SERIES

Frequency range to 20 kHz; accuracy, ±2%. **QIL-M:** Molded in high temperature epoxy with silver plated turret lugs. Size, 13/16" dia. x 1/2". **QIL-H:** Hermetically sealed in metal case with Teflon® terminals. Size, 1 1/16" x 1/2" x 17/32". **QIL-F:** Open frame. Microcrystalline wax dipped with 4" #28 plastic leads. Size, 1" dia. x 13/32".

HERMETIC POWER TRANSFORMERS AND INDUCTORS

145 E. MINEOLA AVE. • VALLEY STREAM, N.Y. 11582 • PHONE: (516) 561-6050 • TWX: 510-225-8412

POWER SUPPLY TRANSFORMERS (FIG. P)

For silicon rectifier circuitry and filament applications. Hermetically sealed. Primary, 105/115/125 V. Output voltage given for resistive or inductive loads, based on approx. 1 V. drop per rectifier. MIL Type TF4RX01—(add MIL Case Type from table) per MIL-T-27B.

SEND FOR CATALOG

MODIFIED CATALOG ITEMS are available on special order with revisions of electrical and mechanical specifications. Please contact factory.

CUSTOM TRANSFORMERS — DESIGNS TO MEET YOUR NEEDS!

Call our design staff to assist you in all aspects of application and specification. Extensive design files and large specialized material stocks enable our prototype division to render rapid service.

PRECISION HI-FI ACCESSORIES

STEREO CENTER CHANNEL OUTPUT MATCHING TRANSFORMER FOR MONAURAL EXTENSION SPEAKERS

Designed for the Audiophile who wishes to convert a Stereo system to Monaural or wishes to modify or enlarge his Stereo system. Permits "hole-in-the-middle" fill in with 3rd channel speaker. Matches impedance, polarity and power level. 30 watts. Response 40 to 20,000 cps.

HM-90 — User net **$10.95**

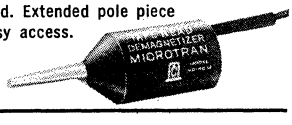
HUM-BUCKING TELEPHONE PICK-UP COIL

Hum free transcription, no connection to phone. Perfect for high impedance tape recorders and dictating machines. Rugged construction of high impact plastic.

HP-70 — User net **$6.95**

TAPE HEAD DEMAGNETIZER Model HD-40M

Removes permanent magnetism, protects tape from erasure, minimizes noise and distortion, reduces hum of tape head. Extended pole piece designed for easy access.



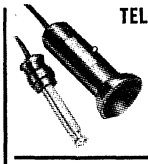
User net **$7.49**

MAGNETIC TAPE ERASER Model HD-15

A compact bulk tape demagnetizer. Erases recorded signals and noise instantly, when passed over tapes of sound film without rewinding. Removes background noise below level of new tapes or film. Universal unit for any size reel. ¼" and ½". Erases cassettes, cartridges.

User net **$12.95**

TELEPHONE PICK-UP COIL



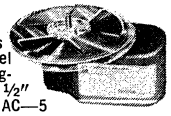
For recorder or direct feed into amplifier — Use as probe for locating hum. Equalized pick-up level.

- Universal design with phone plug
- Black finish with 68" cable
- Size: 5/8"D x 2½"L. Wgt: 1½ oz.
- **Model HP-61**

User net **$6.15**

HEAVY DUTY MAGNETIC TAPE ERASER

Epoxy Molded Model HD-11M



Develops a high intensity magnetic field. Erases tapes without rewinding. Noise level reduced below standard demagnetizers. Restores tape up to ½" to like new condition. 117V AC—5 Amps.
Size: 7"L x 3½"W x 3¼"H.
Weight: 9 lbs.
Adapter hub for 10½ reels Model HD-11-AD — User net **$3.15**
A MUST FOR STEREO RECORDING. Ideal for cassette erasure. Model HD-11M — User net **$31.00**

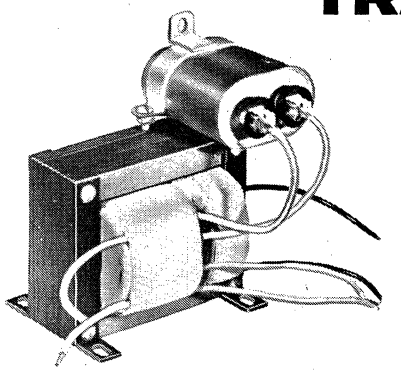
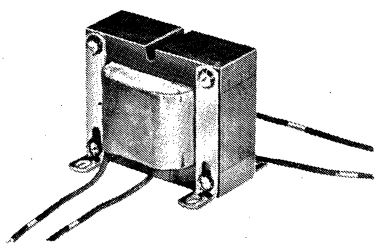
MAGNETIC WINDINGS COMPANY

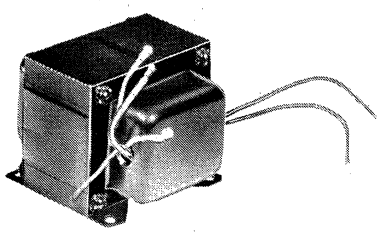
CONSTANT VOLTAGE
control and power
TRANSFORMERS



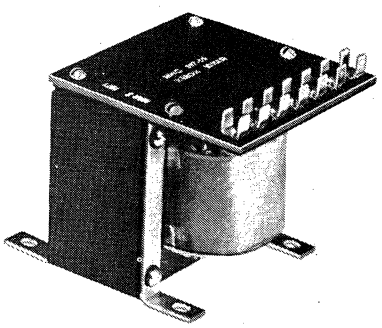
CONSTANT VOLTAGE—Sinusoidal and normal harmonic type regulated for both line and load variations.



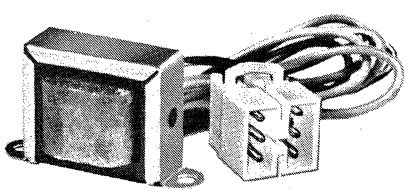
CONTROL TRANSFORMERS — For motor and industrial control, from 10 VA thru 3 KVA, from 24 volts thru 600 volts.



END-BELL TYPE — Enclosed type, both horizontal and vertical mount with flexible insulated leads.



TERMINAL BOARD TYPE — Open type units with solder lugs, quick-connect or threaded type terminations.



OPEN FRAME TYPE WITH CHANNEL OR "L" BRACKET—Mounting with leads or terminals to your requirements.

Commercial industrial, and MIL-T-27C transformers, powers, outputs, inputs, high voltage, drivers, and chokes. Available in, multiple and bobbin wound. Heat conductive impregnants to reduce size are available.

custom engineering to meet your specifications

Quick response is a major benefit when specifying Magnetic Windings' products. For custom applications our experienced staff can submit definite proposals and quotations in a matter of days after receipt of customer's specifications. Following acceptance, prototypes can be available for evaluation within 2 weeks and production quantities can be coming off the production line within 4 weeks after approval. Magnetic's engineers offer a unique blending of practical experience and theory to assure you optimum performance and reliability at the lowest possible cost; and, as new products and techniques are developed, we stand ready to offer knowledge and experience of our first thirty-five (35) years.

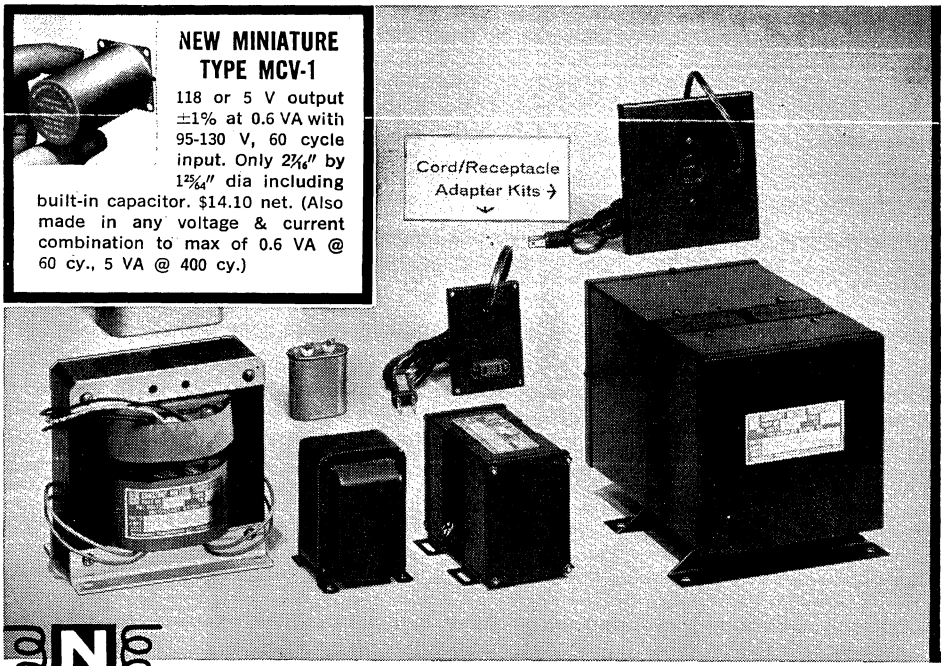
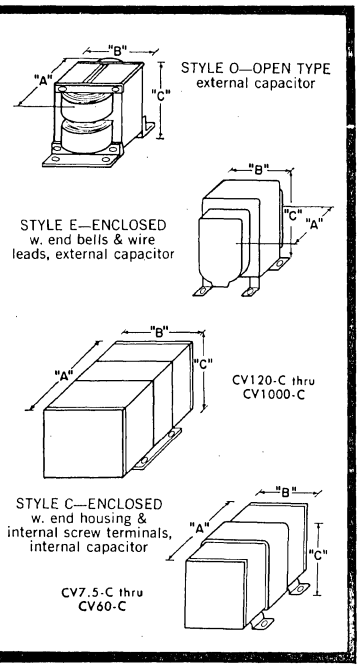
NEW MINIATURE TYPE MCV-1

118 or 5 V output ±1% at 0.6 VA with 95-130 V, 60 cycle input. Only 2 7/16" by 1 25/64" dia including built-in capacitor. $14.10 net. (Also made in any voltage & current combination to max of 0.6 VA @ 60 cy., 5 VA @ 400 cy.)





NTC CONSTANT VOLTAGE TRANSFORMERS

STATIC-MAGNETIC VOLTAGE REGULATING TRANSFORMERS

NORMAL HARMONIC TYPES

- Output capacity from 0.5 to 3,000 VA
- Instantaneous, continuous voltage regulation
- No tubes or manual adjustments
- Ratings made to order at low cost
- Compact, single-unit design
- Low-cost open types for component applications
- Heavy-duty, enclosed types for accessory uses
- Single or multiple secondaries

NTC constant voltage transformers maintain output voltages within one percent with input voltage fluctuations up to 15 percent. Regulation is instantaneous, continuous and completely automatic. Operating on principles of ferro-resonance, the transformers have no tubes, moving parts or separate saturable reactors.

Most important, the design of NTC constant voltage transformers enables their outputs to be made exactly to your specifications — and at decidedly low cost even in small quantities. With only a few basic lamination configurations and windings, virtually any output voltage/current combination can be obtained. *Since the transformers are designed to your specific requirements they often eliminate costly circuitry and expensive components.*

POWER SUPPLIES, too . . . Neshaminy's engineering skills are at your service for the design and quantity production of complete, regulated power supplies in any capacity and rating. Let us discuss your next requirement.

Model	Net User Price	Regulated Output Voltage	Input Voltage Range (60 cycles)	VA Output	Nominal Mounting Centers	Approx. Overall Dimensions, Inches A B C	Approx. Net Wt., lbs.	Style

TYPICAL STANDARD MODELS

1% output regulation. Closer regulation to order. Output contains approx 14% total rms harmonic content. SPECIAL MODELS can be made quickly to exact requirements in any step-up or step-down ratio of voltage to current within the desired VA rating and with single or multiple secondaries, with or without centertaps. CV models also available for 50 cycles, and MCV models for 50 or 400 cycles.

NOTES

1. Cord/Receptacle kits, similar to that shown in illustration are available on all "C" style transformers of 118 VAC output rating.
2. Specify required input voltage range on CV transformers from 250 to 1000 VA.
3. To specify output voltage required (6.3 or 118 VAC) add voltage to model number (Example — 15 VA cased transformer with 118 VAC output would be model #CV15-118).
4. "C" style units have built-in capacitors. Styles "E" and "O" have external capacitors.

Send us your requirements for a prompt quotation.

NESHAMINY TRANSFORMER COMPANY Furlong, Pa. 18925 (215) 794-7411

NTC is a division of the Neshaminy Electronic Corporation

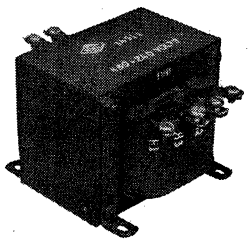
SPECIALISTS IN SPECIAL TRANSFORMERS

POWER & ELECTRONIC

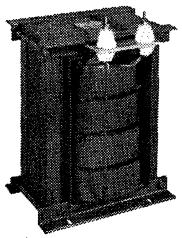
Your one source for all types...designed and manufactured to your specifications or actual requirements

NWL designs and manufactures transformers:

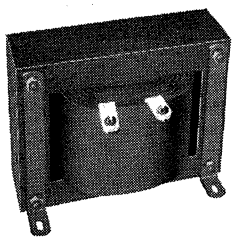
FURNACE
FILAMENT
HEATING
LIGHTING
SCR CONTROLS
PLATE
HIGH FREQUENCY
INSTRUMENT
PHASE CHANGING
WELDING
HIGH VOLTAGE
TESTING
HIGH REACTANCE
OUTPUT
also
SATURABLE CORE REACTORS
CHOKES
AC REACTORS
PACKAGED CONTROLS
AIR CORE REACTORS



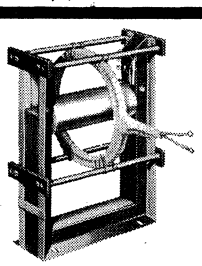
Instrument transformers, current and potential, 1-10,000 amperes, 1-50,000 volts. High accuracy, through type, bus bar, indoor and outdoor.



Plate, audio and modulation transformers in sizes from 50 VA to 100 KVA and up to 100,000 volts.

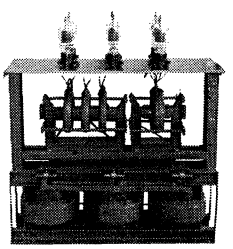


Chokes, linear and swinging. 0.1 millihenry to 10 henry.

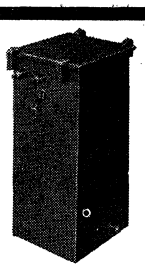


Filament transformers, single and multiple. Up to 100,000 volts, dry and oil types.

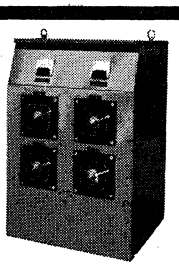
Saturable Core Reactors, from 50 VA to 500 KVA. Single and 3 phase.



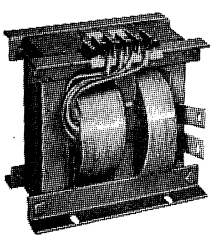
Rectifying transformers and supplies, 1, 2 or 3 phase. 1 to 3,000 amperes, up to 500 KVA.



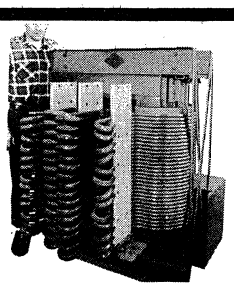
Oil filled specialty and high voltage transformers up to 300 KVA.



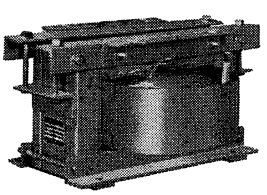
Heating transformers for resistance and induction furnaces. All types. Up to 1200 KVA.



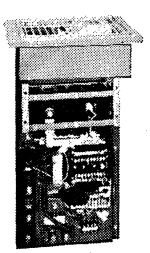
High impedance type transformers, from 50 VA to 50 KVA and up to 10,000 volts.



High power and high current water-cooled transformers.



Reactors, 50 VA to 500 KVA. AC and DC. Linear and swinging.



Solid State SCR Power Controllers.

NORTH HILLS • WIDEBAND TRANSFORMERS AND HYBRIDS

UNBALANCED TO BALANCED TRANSFORMERS

Balanced secondaries center-tapped and dc-isolated from primaries. Power ratings: 1 watt cont., 5, 10, 25, 100 watt versions available. Mid-band insertion loss less than 0.5 dB. Bandwidth defined at low frequency end by 3 dB drop from mid-band response, at high end by max. VSWR of 1.3.

RADIO FREQUENCY SERIES

Response down to 100 kHz. Available in BA, BB, HB cases.

Type No.	Unb/Bal (Ω)	Bandwidth MHz
0001	50:50	.1-125
0101	50:75	.1-125

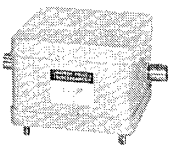
ISOLATION TRANSFORMERS

GROUND ISOLATION IN 75Ω COAXIAL VIDEO/DATA LINES

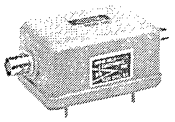


1109-PA: 75Ω Unb: 75Ω Unb.

- 20 Hz to 7 MHz bandwidth.
- Flat frequency, linear phase response.
- Insulated BNC connectors.
- 140 dB isolation at power frequencies.

ISOLATION TRANSFORMERS FOR 50 & 75Ω COAXIAL SYSTEMS

CC case, insulated BNC input and output connectors.



Type No.	Impedance	Bandwidth (MHz)
0005	50:50	.001-20
1103	75:75	.001-20
0112	50:75	.001-20

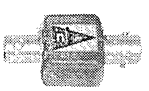
10 KV ISOLATION FOR PUBLIC UTILITY DATA TRANSMISSION

6 kHz to 2.5 MHz bandwidths. Models matching.

- 75Ω coax to 75Ω coax.
- 75Ω coax to 124Ω balanced line.
- Two 75Ω coax inputs to 124Ω balanced line in difference hybrid arrangement.

ULTRA-WIDE SERIES

Unbalanced to unbalanced transformers. BNC input and output connectors. Low VSWR. 0.1-300 MHz. Available in JA case only.



0003-JA	50:50	Phase Reversing
1106-JA	75:75	Phase Reversing
0102-JA	50:75	Impedance Adapter

HYBRIDS

Power Dividers and Adders. 2, 4, and 8-Way.
50 and 75Ω ports. 0.5 to 10, 1 to 50, 50 to 250 MHz bands.
Low VSWR and insertion loss, minimum of 30 dB isolation.
Tight amplitude and phase balance.

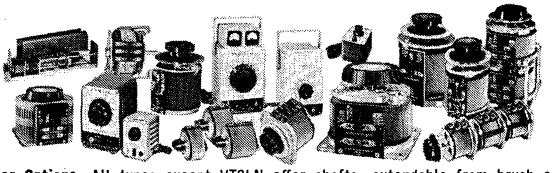
OHMITE has the answer in variable transformers

Seven basic physical types meet most industrial requirements with long, maintenance-free life. Excellent regulation at any point within rated load; free from wave-form distortion. Direct-reading 2-scale (1 per side) dial supplied; CCW also available. New space-saving low power types VT1, VT02 and VT3 have adjustable shaft independent of brush assembly, 3-way terminals, instantly replaceable brush contacts and improved heat dissipation. **Mounting:** Easily replace other brands: VT2LN, VT1, VT02 and VT3 have 3/8-32 thd. bushing; VT8 and VT20, 4-hole bolt mount; VT4, 3-hole bolt mount convertible to 4-hole with adapter plate. **Enclosed Types:** Gray hammertone-finish cases. Units with suffix **B** have exposed terminal panel and mounting base; **E**, fixed type for table or panel mounting; **F**, portable with cord, outlet socket and fuse; **G**, deluxe portable with handle, circuit breaker and switch for overvoltage selection. Final suffix: **V** indicates with voltmeter; **VA**, voltammeter; **VW**, volt/wattmeter; all come with handle except VT8NF series.



Other Options: All types except VT2LN offer shafts, extendable from brush or base side; ganged versions have thru-shaft with same flexibility. Final suffix **C** types come with 3-cond. input and output with one grounded to case. **UL Listing:** Most single and tandem VT4, VT8 and VT20 units for 120 volt operation are U/L Listed. Consult factory.

MULTIPLE, IN-TANDEM TRANSFORMER ASSEMBLIES

SINGLE-PHASE, TWO-IN-TANDEM

Normally wired for series connection; when so connected, load cannot be grounded. Standard CW dial 240/280 volts except VT02 tandems where 240/264 V dial is supplied; on VT8H-2, 480/560 volt dial is standard. Other dials available.

*Minimum; max. up to 1000 cps for all models. †Use also at 50 cps if connected at no overvoltage output. ‡With 120V input tap at which the max. current output rating applies up to 120 volts, but reduces approx. 50% at max. output voltage shown. In tandem units, the use of low voltage inputs would halve the rated input and output voltages. §User wires for desired output; dial normally calibrated for overvoltage. #Factory-connected for overvoltage output; easily re-connected by user for no overvoltage. •Switch selects overvoltage or no overvoltage. ¶5¾" including handle. ■Case height only, excluding handle. ♦Depth behind panel: add 1" for knob thickness for VT8 types; ⅞", VT02 or VT4 types; 1¼" for VT20 types. θ9" including handle. ††Includes knob, dial and hardware. **Must not be connected for overvoltage. ‡ For mounting bracket, add 1¼" w. x 7/16" d.

TRANSFORMER ACCESSORIES

Extra Dials, Extra Knobs for Uncased Units, Adjustable Stops, Brush Contact Assemblies, and Special Mounting Adapters are available for Ohmite Variable Transformers. See Radio Master for Complete Details.

PRECISION TOROIDAL TRANSFORMERS

- **INPUT SCOTT T**
- **OUTPUT SCOTT T**
- **COMBINATION**
- **RESOLVER ISOLATION**
- **REFERENCE ISOLATION**
- **DIGITALLY TAPPED**
- **PRECISION RATIO**
- **CUSTOM DESIGNS**

The Electronic Products Department of the Perkin-Elmer Corporation is in a unique position to provide Custom Precision Signal Transformers as a result of 15 years of experience designing and manufacturing very special transformers for the Vernistat® a.c. potentiometer and allied products. **High Performance in small size has always been a successful objective.** Our State of The Art Winding Equipment and Techniques enable close control of turns and taps for close matching of windings and repeatability of product.

Perkin-Elmer can provide Custom Signal Transformers with high accuracies over the full MIL temperature range. For example, exponential function units with 80 taps to an accuracy of ±0.003% can be provided. SCOTT T Transformers have been built to an accuracy of 5 seconds of arc with a null of 0.1 millivolt. The transformers are fully encapsulated toroidal units and are available with contact pins for PC board mounting. They are manufactured in accordance with MIL-T-27B Grade 5. High input impedance and low output impedance can be matched to specifications. Operating frequency can also be per specifications.

SCOTT T TRANSFORMERS

The SCOTT T input transformers converts 3 wire synchro inputs to 4 wire resolver outputs (sin θ and cos θ) with high transformation accuracy and minimum quadrature. SCOTT T Transformers for converting 4 wire resolver inputs to 3 wire synchro outputs can also be supplied. Our output SCOTT T Transformers maintain high accuracies even under heavy load conditions. These units are useful in solid state synchro to digital and digital to synchro converter applications and are particularly applicable in multiplexed conversion systems.

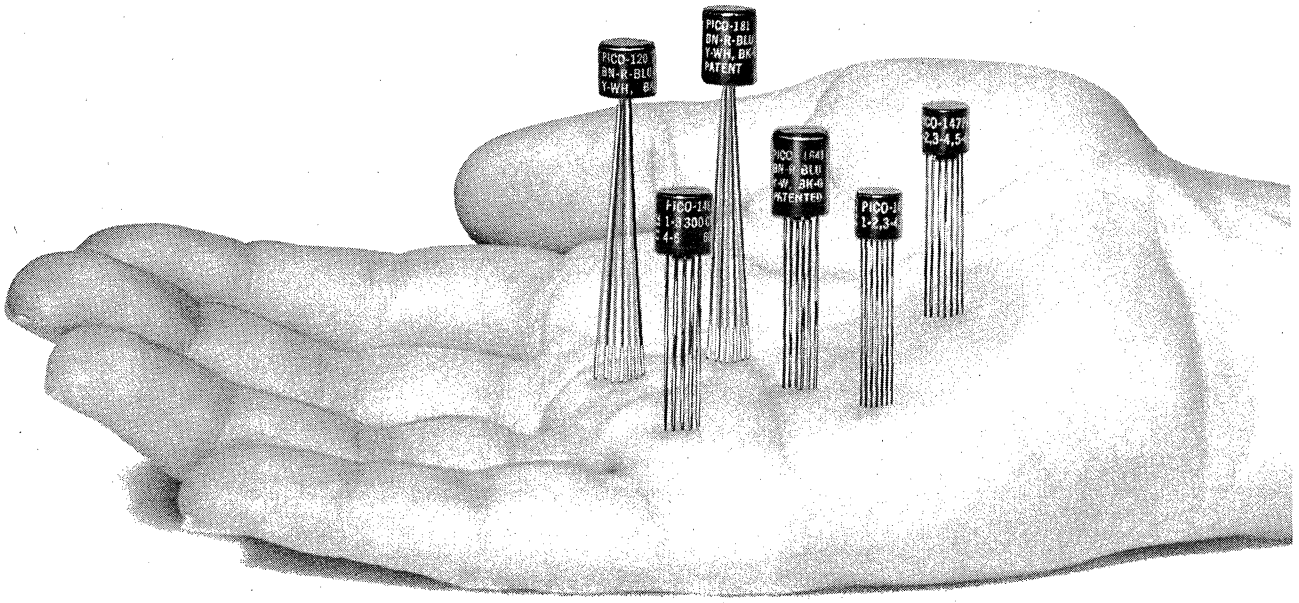
This is a line of the smallest transformers ever offered...



that can meet all of these specs!

Pico Electronics has made a design breakthrough in the ultra-miniaturization of audio transformers.

All Pico units are guaranteed to meet MIL-T-27C. Every transformer is hermetically sealed in a metal case. Each will pass thermal shock requirements of MIL-STD-202D, Method 107, Test Condition A-1 (25 cycles).

Pico Electronics is a QPL source.

.25" diameter x .25" height / Pico-F

- Primary and secondary impedances 3 ohms to 30K ohms
- ±2 DB 300Hz—250KHz
- 90 milliwatts at 1KHz
- Inductors to 10 henries
- Plug-in construction with terminals spaced the same as "TO-5" transistors

.34" diameter x .34" height / Pico-C

- Primary and secondary impedances 3 ohms to 40K ohms
- ±30B 400Hz—100 KHz
- 600 Milliwatts at 1KHz
- Inductors to 20 henries
- Plug-in construction with terminals spaced the same as "TO-5" transistors

.34" diameter x .49" height / Pico-D

- Primary and secondary impedances 3 ohms to 250K ohms
- ±3 DB 300Hz—100KHz
- 600 milliwatts at 1KHz
- Inductors to 50 henries
- Plug-in construction with terminals spaced the same as "TO-5" transistors

.34" diameter x .3" height / Pico-B

- Primary and secondary impedances 3 ohms to 40K ohms
- ±3 DB 400Hz—100KHz
- 600 Milliwatts at 1KHz
- Inductors to 20 henries
- Flying lead construction

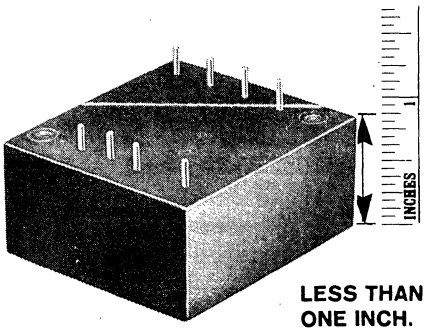
.34" diameter x .45" height / Pico-A

- Primary and secondary impedances 3 ohms to 250K ohms
- ±3 DB 300Hz—100KHz
- 600 Milliwatts at 1KHz
- Inductors to 50 henries
- Flying lead construction

(All PICO Products are patented)

FLAT

EPOXY MOLDED PLUG-IN POWER TRANSFORMERS FOR PRINTED CIRCUIT APPLICATION ALLOW ONE INCH CARD SPACING.



LESS THAN ONE INCH.

MAXIMUM HEIGHT OF 0.850 INCHES - Allows stacking with 1 inch space between PC cards.

6 VA @ 50/60 HZ - in 0.850 inch height, 7 oz weight - 40° C max. temperature rise.

EPOXY MOLDED - completely sealed - class S construction

HUM-BUCKING CONSTRUCTION - Reduced magnetic field - balanced windings.

DUAL PRIMARIES - 115/230V - 50/60HZ

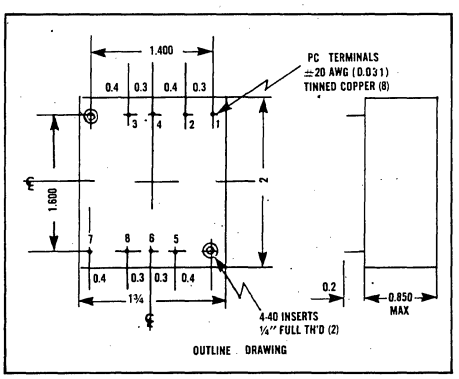
*CORRESPONDS TO 30% REGULATION, I.E., NO LOAD SECONDARY VOLTAGE IS 30% HIGHER THAN FULL LOAD.

Signals "FP" series of epoxy molded PC plug-in power transformers offer the main advantage of 0.850 inch height with a 6VA rating at 50/60HZ. This allows its use in PC boards stacked with 1 inch centers.

Internal construction is semi-toroidal (hum bucking) which results in a reduced radiated magnetic field and balanced windings. All materials used are at least class S in rating. The transformer is completely molded and sealed in epoxy. Two 4-40 inserts are provided to assure secure mechanical mounting.

The dual primary and secondary windings offer a large diversity of output combinations with a 115/230V input. The voltages and currents are ideal for power applications in semi-conductor control and instrumentation such as single or dual output DC supplies and isolated control circuit and reference supplies.



- **We can quote on your specials up to 6 VA**
- **New sizes for ratings up to 25 VA are currently under development. Please check with us on your requirements.**

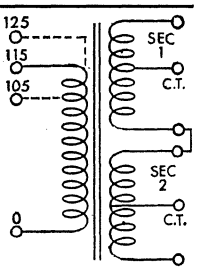
PARALLEL CONNECTED SECONDARIES

SERIES CONNECTED SECONDARIES



All transformers are designed conservatively for a max of 45°C rise above ambient, for use on 115V power line from 50-500 cps. Only prime raw materials are used. Units are thoroughly impregnated and baked with Signal's own high gloss black baking varnish. The transformers and chokes are rugged in construction, well-insulated, and have a consistently uniform appearance. All ratings are at full load current continuous operation.

Electrical ratings have been chosen to cover a wide range of applications. All transformers have two center-tapped secondary windings.

Special variations such as dual primaries, 230V primaries, electrostatic shields, etc. are available on special order.

AVAILABLE IN 3 STYLES

FOR OPEN FRAME USE PART NUMBERS SHOWN

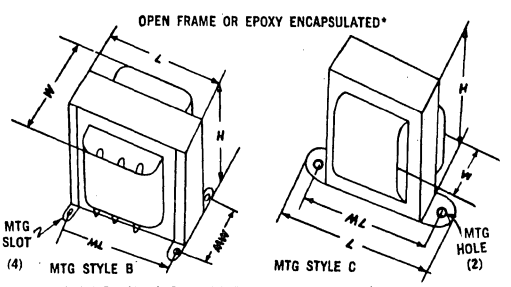
* For epoxy encapsulation add prefix "E-" to Part No., e.g., E-36-1 add 3/16 to L, W, H Dim. Grade 5.
‡ For hermetically sealed units add prefix "H-" to Part No., e.g., H-36-1. Grade 4.

AVAILABLE IN 3 STYLES

METHOD OF DETERMINING SECONDARY CURRENT RATINGS

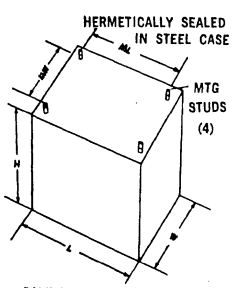
RECTIFIER TYPE	FILTER TYPE	RMS SECONDARY CURRENT
Full Wave Center-Tap	Choke Input	.7 × DC amps
Full Wave Center-Tap	Capacitor Input	1.2 × DC amps
Full Wave Bridge	Choke Input	= to DC amps
Full Wave Bridge	Capacitor Input	1.8 × DC Amps

OPEN FRAME OR EPOXY ENCAPSULATED*



*FOR EPOXY ENCAPSULATION, PART NO'S "E" — ADD 3/16" TO L, W, H

HERMETICALLY SEALED IN STEEL CASE



PART NO'S WITH PREFIX "H"

SIGNAL TRANSFORMER CO., INC

FACTORY: 1 JUNIUS STREET, BROOKLYN, NEW YORK 11212 — (212) 498-5111

HIGH & LOW CURRENT CHOKES 0.1 to 1000 AMPS

OPEN FRAME • EPOXY ENCAPSULATED (GRADE 5) • HERMETICALLY SEALED (GRADE 4)

Signal's line of High and Low Current Chokes is the most extensive available. It is designed to complement the selection of High and Low Current Transformers so that a set may be specified for power supplies using inductive filters.

The inductance ratings given are minimum values guaranteed at full DC current. All resistance ratings are maximum values.

Special variations or intermediate values of inductance, current, or resistance can be supplied promptly and accurately.

FOR MECHANICAL DIMENSIONS REFER TO TRANSFORMER OUTLINES ON PREVIOUS PAGE

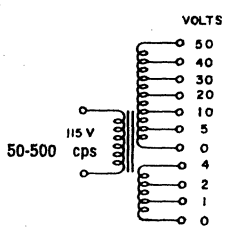
Signal's Dual Chokes are supplied with 2 windings which may be series or parallel connected with rating shown on chart. This line is basically designed for applications requiring lower inductance values at high currents, such as low voltage, DC supplies or SCR filters. Ideal for use to reduce ripple in our ferro-resonant (CDC) line.

MULTI-VOLT 1 to 54 VOLTS in 1 VOLT STEPS



"MV" LINE

MV (multi-voltage) secondaries may be series connected for any output from 1 to 54 volts, in 1 volt steps, at rated current. This is accomplished by using the small buck-boost secondary.

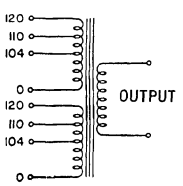
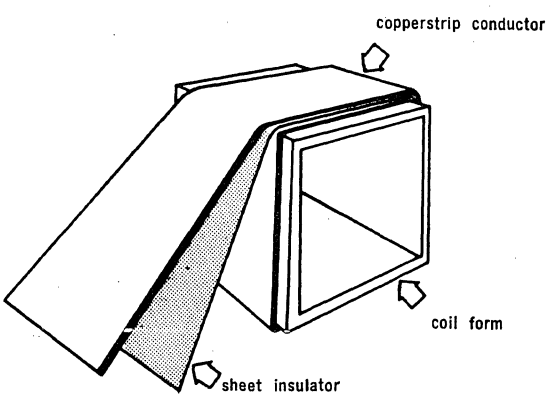
As shown on the schematic diagram dual primaries are provided. This permits parallel connection for 104, 110, or 120 volts or series connection for 208, 214, 220, 230, and 240 volts. Frequency range is 50 to 500 cps.

It is important to note that primary taps may be used to adjust the secondary voltages. Line voltages up to 125V (parallel) or 250V (series) may be used on the lowest primary tap. Nickel plated screw terminals are provided on a heavy phenolic board for easy primary connections.



WINDINGS OF HEAVY COPPER STRIP



STRIP-WOUND SECONDARIES

At the heavy current used in this line it becomes practical and desirable to use wide copper strip (as wide as the coil itself) for windings. Besides the obvious advantages of excellent winding space factor, the heat dissipation of the coil is improved. This improvement is due to the fact that the heat generated in the windings has a pure copper path to the coil ends, where it can be dissipated. In conventional windings of many turns per layer this heat flow is impeded by wire insulation and air spaces between turns. Therefore, the use of copper strip windings yields a dramatic reduction in size and weight.

GRAIN-ORIENTED STEEL CORE

These cores permit the use of higher peak flux densities for the same core loss. This results in a lower number of turns required and therefore, a smaller, more compact transformer.

CLASS F INSULATION USED THROUGHOUT

Class F insulation is rated for unlimited life at a total temperature of 155°C (ambient plus temperature rise).

Class A insulation has a maximum temperature rating of 105°C. The "nominal" current ratings given to this series are for a temperature rise of 45°C above 55°C ambient (Class A). Since Class F insulation is used it is permissible to increase these ratings by 40% (700 and 1400 amperes) without reducing the reliability of the transformer. The temperature rise will be 100°C over a 55°C ambient. The only limitation is not the transformer, but the temperature rating of surrounding components which may be affected by the additional heat radiated by the transformer.

At higher power loads (above 2-3 KVA) it becomes inefficient to use single phase 115 or 230 volt standard lines. With this in mind, our engineering staff has developed a line of 3 phase transformers for use off 208 or 220V 3 phase power lines. These offer the significantly higher conversion efficiency and lighter power line drain of 3 phase systems.

Since the principal application of these items is in high power dc power supplies, output ratings are given in dc voltage and current assuming the use of a 3 phase full wave rectifier.

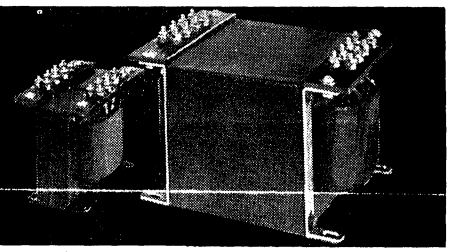
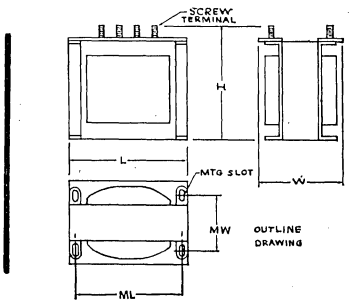
INDUSTRIAL GRADE
STEP-UP OR STEP-DOWN
POWER ISOLATION OR AUTO-TRANSFORMERS
HIGH DEGREE OF VERSATILITY OFFERS MANY POSSIBLE VOLTAGE RATINGS



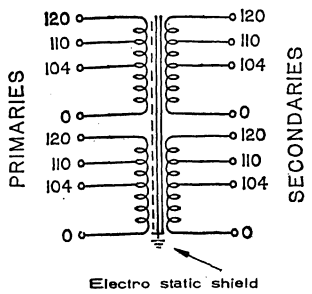
AVAILABLE FROM STOCK FOR IMMEDIATE SHIPMENT

The "DU", "SU", and "UP" lines are designed for a maximum of 55°C rise above ambient for use on standard power lines from 50 to 500 Cps. Only prime raw materials are used. Units are thoroughly impregnated and baked with Signal's own high gloss black baking varnish. The transformers are rugged in construction, well-insulated and have a consistently uniform appearance. All ratings are at full load current, continuous operation.

Heavy ¼ inch phenolic terminal boards are provided with plated brass screws and flat washers (10-32 on ¼ and ½ KVA, ¼-20 on larger sizes). Connections can be easily made with a nut driver. It is also simple to alter the inter-connections to change transformer ratings. **Electro static shields are provided grounded to the core.** The connection is made with a lug to ground and may be opened if an ungrounded shield is desired.



"DU SERIES" 110/220 Dual Primary To 110/220 Dual Sec. (Primary & Secondary may be reversed)



As shown on the schematic diagram the "DU" line is designed with dual primaries and secondaries. All four windings are identically rated at 0/104/110/120 volts. This permits series or parallel connections on either primary or secondary. Therefore, a nominal 110 to 110 volt, 220 to 220 volt, 110 to 220 volt, or 220 to 110 volt transformer can be set up. The winding taps permit intermediate series ratings such as 208, 214, or 230 volts.

It is also possible to make auto-transformer connections by connecting a primary group in series with a secondary group. Such nominal ratings as 440 to 220 volts or 220 to 440 volts can be set-up, in addition to the standard ratings described above. A further advantage to auto-transformer connection is the fact that the KVA rating of a particular type is **doubled.**

Part No.	KVA	Series Secondaries Volts	Series Secondaries Max. Amps	Parallel Secondaries Volts	Parallel Secondaries Max. Amps	Mechanical Dimensions L (Max.)	W (Max.)	H (Max.)	ML ± 1/32	MW ± 1/16	Mtg. & Term. Screw	Appr. Lbs.

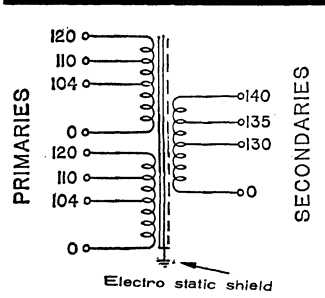
"UP SERIES" 110/220 Dual Primary To 0/130/135/140 V. Sec. (Primary & Secondary may be reversed)



The "UP" line utilizes the same dual primary as the "DU" line. It has, however, a single secondary rated at 0/130/135/140 volts.

This type is quite useful to boost low line voltages or raise line voltages to compensate for drops in series elements. It also finds application in bridge rectifiers for DC voltage outputs of approximately 115 to 130 volts.

Part No.	KVA	Secondary Volts	Max. Secondary Amps	L (Max.)	W (Max.)	H (Max.)	ML ± 1/32	MW ± 1/16	Mtg. & Term. Screw	Appr. Lbs.

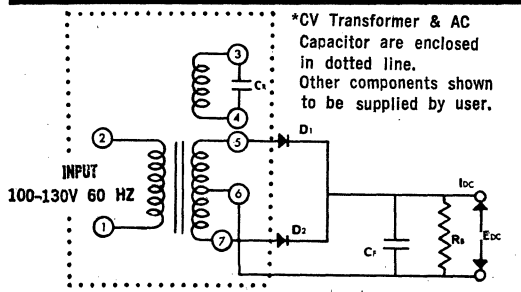
CONSTANT VOLTAGE TRANSFORMERS

FOR USE IN DC POWER SUPPLIES (TYPE CDC)



Available with dual 115/230 50 Hz primaries. Add prefix "21-" to part no., e.g., 21-CV-24-11.

Signal's CDC Regulating Transformers are specifically manufactured for use in DC Power Supplies. They are designed and rated for use with a full wave center-tapped silicon rectifier. CDC transformers are operated in ferro-resonance and are used in conjunction with an AC **tuning capacitor** (Cr in schematic diagram), which is supplied with the transformer.

In order to construct a regulated power supply the only other parts necessary are two diodes (D_1 and D_2), an electrolytic computer grade capacitor (C_f) and a bleeder resistor (R_b). These are standard shelf items.

The specification chart lists specific outputs available and the recommended auxiliary components. Part numbers are coded in terms of DC outputs, e.g., CDC-15-2 will give an output of 15V DC at 2 amps DC.

Electrical performance is completely specified. The DC voltage is constant to ±1% over the line voltage range of 100 to 130V at 60 HZ. The nominal output is held to ±2%. Closer tolerance on nominal output (±1%) can be obtained on special order at slightly higher cost.

Load regulation is specified as the rise in dc voltage output (increase in E_{dc}) from full load to the no load, ¼ load, and ½ load points. The filter capacitor (C_f) specified should be used and will yield the values of ripple voltage shown.

A significant protection feature is the fact that the DC short circuit current is limited to a maximum of 2 times rated current (3 times in size "C-6" units). This protects the entire circuit against shorts.

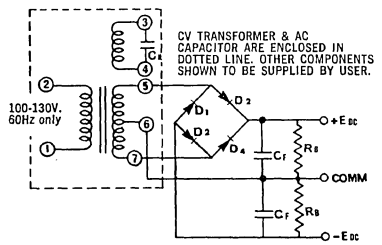
* See mechanical dimensions on opposite page.

† May be reduced if ripple requirements are less severe.

‡ Bleeder resistor may be eliminated if load current does not fall to zero. DC amp rating may be increased accordingly.

** If used in dual complementary supply — see opposite page.

CONSTANT VOLTAGE TRANSFORMERS
FOR USE IN DC POWER SUPPLIES (TYPE CDC)



CDC Transformers may also be used in complementary power supplies and will provide dual outputs at ± the rated voltage.

Each output voltage will be the same as in the single supply, **except that the DC current rating is ½ that in a single supply.**

It is also necessary to adjust the circuit parameters as follows:
C_F — ½ value in MFD, same DCWV.
R_B — 2 x value in ohms, ½ wattage rating.
DIODES — ½ P.I.V., ½ I/Cell.

500 ACV-118	118	4.5	B-500

CONSTANT VOLTAGE TRANSFORMERS
FOR AC APPLICATIONS (TYPE ACV)

Signal ACV Transformers are manufactured for use with AC loads. They are simple, rugged designs and will regulate to ±1% for input variations from 95-130V at 60Hz **only.** 50Hz versions are available on special order. If regulation to ±½% or better is desired, special units can be made to your order.

Full regulation is maintained at any load from about 20 to 100%. Short circuit current is limited to a maximum of 200% of rated current (300% in size C-6 units). ACV Transformers are "normal" harmonic type with approximately a square wave output.

The 6.4 and 12.8V ratings are ideal for use with tube or lamp loads since the short circuit rating limits the inrush current to cold filaments. Stabilization of the voltage results in longer filament life.

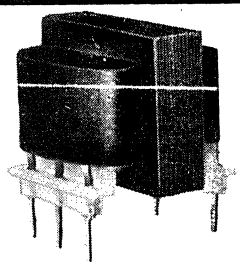
SPECIAL PC TRANSFORMERS OR CHOKES — PROMPT QUOTATIONS

IGNAL TRANSFORMER CO., INC

FACTORY: 1 JUNIUS ST., BROOKLYN, N. Y. 11212 • (212) 498-5111

MINIATURE PLUG-IN POWER TRANSFORMERS



FOR PRINTED CIRCUIT APPLICATIONS

low profile • low regulation • 50-500 Hz

SHIPPED FROM STOCK IMMEDIATELY

FOR INDICATOR TUBE & I.C. APPLICATIONS

"PCN" transformers provide ideal outputs for use in indicator tube and I.C. applications. 175 or 130 V. can be used for DC supplies for "Nixies" and 6.3 or 12.6 V. can supply power for associated I.C. circuitry or supplies.

* Size shown applies to both right and left hand units which are on same horizontal line.
† Use prefix "EN-" for epoxy molded units rather than "PCN-", e.g., PCN-37-1 becomes EN-37-1 when epoxy molded.
‡ Secondary current rating based on 20% regulation. Higher currents may be drawn without over-heating. Check with our Engineering Dept. on specific units.

DUAL INDUCTORS FOR SMOOTHING & SCR SURGE LIMITING

"PCC" dual filter chokes find use in DC supply filters or as inductive elements in switching circuits. Another application is to limit current surge (di/dt) in SCR circuits. These chokes may also be used as AC reactors.

Part** No.	Series Connected Ind. (MHY)	Series Connected Curr. (Amps)	Series Connected Resis. (Ohms)	Parallel Connected Ind. (MHY)	Parallel Connected Curr. (Amps)	Parallel Connected Resis (Ohms)	E-T* (Volt-Millisec)	Size

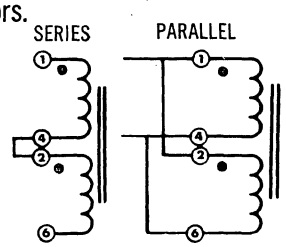
* Based on maximum flux density of 5,000 gauss. (approx. value series connection).
** Use prefix "EC"-, for epoxy molded units rather than "PCC-", e.g., PCC-1-37 becomes EC-1-37 when epoxy molded.



Note Pins 3 & 5 are Dummy Terminals

SPECIAL "PC" COMPONENTS

Signal maintains a unique department which specializes in the design and production of "PC" type transformers and chokes.

It is equipped with the most modern automated coil winding and lamination stacking machinery. Specialized production test equipment assures uniform, high quality transformers at the most economical price. This facility is being constantly improved and expanded to meet the growing demand for our designs.

The "PC" items shown here are stocked in depth at our factory for immediate delivery. However, they represent only a small fraction of our total shipments. The major portion consists of custom designs or variations for our customer's special requirements.

Please contact us for prompt quotations on any of your special requirements for "PC" or other bobbin wound components.

METHOD OF DETERMINING SECONDARY CURRENT RATINGS

RECTIFIER TYPE	FILTER TYPE	RMS SECONDARY CURRENT
Full Wave Center-Tap	Choke Input	.7 X DC amps
Full Wave Center-Tap	Capacitor Input	1.2 X DC amps
Full Wave Bridge	Choke Input	= to DC amps
Full Wave Bridge	Capacitor Input	1.8 X DC amps

Signal's PC Transformers are constructed of prime raw materials using Class S insulation and nylon bobbins with PC pins molded directly in the bobbin wall. They are black varnish impregnated and 100% tested for all parameters before shipment.

Units are available with either 115V or 230V primaries, 50-500HZ. Dual secondaries provide two outputs, or secondaries may be series or parallel connected. This results in a wide variety of output combinations. Load regulation is limited to a maximum of 20%.

**60 cycle operation only.

120 VOLT SINGLE PHASE MODELS WITH CORD & RECEPTACLE

All models housed in rugged cases include pilot light, switch fuse, line cord, plug and matching receptacle.
2 PF models are equipped with 2-wire cords, plugs and receptacles.
3PN models are equipped with 3-wire grounded cords, plugs, and receptacles.

120 VOLT VARIABLE ISOLATION TRANSFORMERS

STACO isolated variable autotransformers provide a means for smooth control of an electrically isolated AC voltage output. Uncased models offer isolated, non-isolated voltage doubler, and series connections with proper external hook-up. Cased models feature circuit breaker, switch pilot light, output voltmeter 3-wire grounded cord, plug, and matching receptacles. Cased models available in isolated connection only. Ratings shown are for isolated connections.

Mfr's Type No.	Volts	Output Amps	KVA	Size	Weight (Lbs.)	Price
J401	0-140	4.0	.56	$6^{1}/_{8} \times 6^{5}/_{8} \times 4^{7}/_{8}$	13.0	82.00
J901	0-140	9.0	1.26	$8^{9}/_{32} \times 7\frac{3}{4} \times 5^{1}/_{8}$	25.0	110.00
EJ401V	0-140	4.0	.56	$9\frac{1}{2} \times 12^{15}/_{16} \times 6^{3}/_{8}$	26.0	110.00

EJ201V, EJ401V, EJ901V have a 0-140 VAC and 0-120 VDC at full rated current available at isolated banana receptacles.

DELUXE VARIABLE AUTOTRANSFORMERS

STACO offers a selected group of variable autotransformers with new style, broad applications, and a unique combination of practical features. Suitable for use in any industrial application, classroom or laboratory. All units provide continuous voltage control over a wide range, and all are protected against short circuit. Convenient controls provide error-free operation and distortionless adjustment of AC voltage.

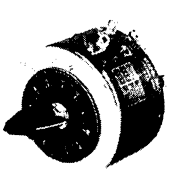
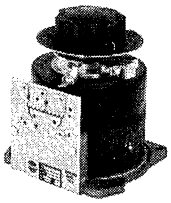
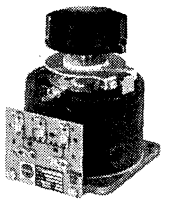
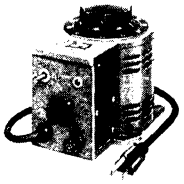
E501V, E501VA, E501VAW, E1010V, E1010VA, E1010VAW have isolated AC and DC outputs of 10% of the output current rating of the unit. Outputs are available at isolated banana receptacles.
V = Voltmeter A = Ammeter W = Wattmeter

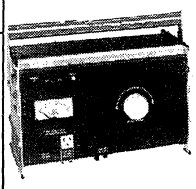
STACO Variable Autotransformers

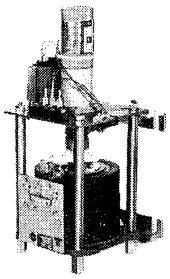












STACO Variable Autotransformers are precision built to exacting tolerances from the finest materials available.

Staco's new improved design provides long life with negligible maintenance, high efficiency and regulation, greater power to size ratio. Staco designs permit replacement of competitive equipment or previous Staco models without modification.

Models are available in various configurations from 1.75 to 300 amperes output. Choose from panel mounted units, cord and plug types or deluxe fully enclosed portable models, with or without metering. Staco products represent 25 years experience in providing safe and dependable control of power.

Contact your local representative for full details or write the factory for our new Product Guide.

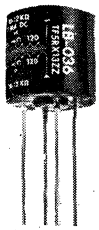
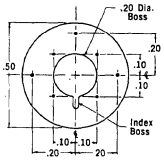
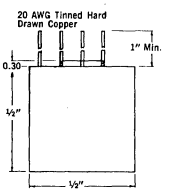
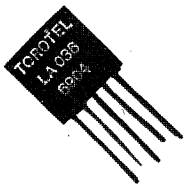
MINIATURE AUDIO TRANSFORMERS — LA & LB SERIES

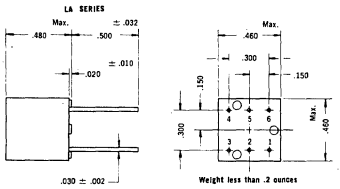


DIMENSIONS WITH SHIELD
O.D. 9/16 MAX.
H.T. 17/32 MAX.









Torotel "LB" Transformers are manufactured to MIL-T-27B, Grade 5, Class S specifications. This Series of "LB" Transformers have 0.1 grid spacing for printed circuit applications and .030 mounting surface to avoid a moisture trap. Leads are made of 20AWG tinned hard drawn copper. Unitizing Dumet wire are available on special request.

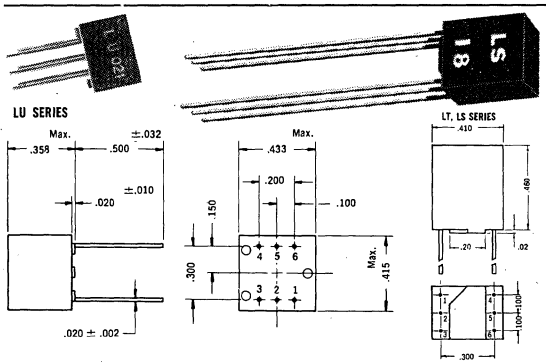
SUB-MINIATURE AUDIO TRANSFORMERS — LT, LS & LU SERIES



LS, LT, and LU Series transformers have successfully passed the rigid requirements of MIL-T-27B, Class R, Grade 5.

Subminiature in size, weighting less than 0.1 ounce, these transformers have tenth inch grid spacing between terminals and are ideally suited for transistor circuit applications which utilize printed circuit board design. All three series have risers on mounting surfaces to facilitate inspection and board cleaning, and also to prevent moisture traps.

MAGNETIC SHIELDING

LS and LT Series transformers are available with magnetic shields when required. Overall dimensions of transformers with the magnetic shield added are .365 max x .465 max x .531 max.

To order transformers with shields installed add 500 to dash numbers shown in the table. For example: to order an LS-22 with shield, specify LS-522.

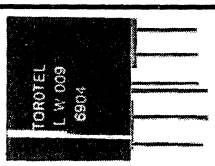
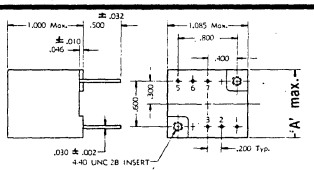
AUDIO TRANSFORMERS LW & LY SERIES





Series	A
LW	.900
LY	1.125

"LW" series transformers are manufactured to MIL-T-27, Grade 5, Class S specifications. Riser areas and 0.1 grid spacing make these units ideal for printed circuit board applications.

RESPONSE: ±1 DB 100 to 10,000 HZ

Each of the three volumes of **eem** contains a Product Index and Directory, the Green Section. This Index is a complete alphabetical listing of products. If the product you are looking for appears in the particular volume you are consulting, the green pages will provide a complete list of manufacturers who make that product. If the product is included in another volume of **eem**, the Index will provide a cross reference, directing you to the correct volume.

Boldface listings under product headings indicate that the listed manufacturer has products cataloged in **eem. Boldface** listings with page numbers indicate that this manufacturer's catalog pages include detailed data on the product indicated in the product heading.

Similar products are grouped together. For example, the many kinds of meters are listed in this manner: "Meters, Ampere," "Meters, Capacitance," "Meters, Flux" etc. To help you locate the prime product heading, there are hundreds of cross references, e.g. "Voltmeters — See Meters, Volt."

Catalog pages in **eem** are divided into three volumes based on very broad product groupings. These are:

Volume 1 — Test Instruments / Equipment and Systems

Volume 2 — Active Components / Circuit Assemblies / Controls and Drives

Volume 3 — Passive Components / Materials / Hardware

These volumes are further divided into 55 **eem** Product Sections which are assigned individually to the most appropriate volume. Within each of the 55 product sections manufacturers are arranged alphabetically, wherever possible. A complete index of all manufacturers' catalog pages is included in every volume. To locate the catalog pages of a specific manufacturer, refer to this index at the beginning of the white section in any of the three volumes. This index will provide the page numbers you require. In Volume 1, the index begins on page 302, in Volume 2 on page 1274 and in Volume 3, page 2310.

More than 6,000 manufacturers of electronic components, materials, instruments, assemblies, systems and key services are listed in the Yellow Section. An identical Yellow Section appears in each of the three volumes of **eem**, listing addresses, phone numbers and sales managers' names. TWX numbers are also included where available. **Boldface** listings indicate that detailed information on the manufacturers' products is cataloged in the White Section of **eem. Boldface** listings also indicate that local sales offices or representatives are listed for that manufacturer.

TRANSFORMERS

STANDARD PULSE TRANSFORMER SELECTION GUIDE

In the pulse generating application, the characteristics of the circuit elements other than the transformer are effective in determining the pulse characteristics. Consequently, the design engineer must know the circuit in which it will be used.

As can be seen below the given transformer will have the same rise time regardless of the pulse width impressed on it. The droop characteristic, in percent will be a linear function of the pulse width. A given transformer, having a 10% droop at 1 microsecond, will have a 20% droop at 2 microseconds.

The repetition rate and the pulse width determine the duty cycle which the transformer will see. This is important in the design for temperature rise consideration. Core loss energy is lost on each pulse due to eddy currents and hysteresis. The repetition rate determines the power loss in the core as well as in the windings. The voltage level as well as the pulse width determines the flux density of the transformer. This is usually stated as the ET constant and expressed in volt-microseconds.

Type No.	Ratio	Pulse Width Micro-Seconds	Rise Time Micro-Seconds	Droop in %	Hi-Pot Voltage RMS	Size	Wt. Grams	MIL Designation	Service	Page

TRANSFORMERS

NEW "PIL"* AUDIO TRANSFORMERS

DESIGNED, MANUFACTURED AND SUCCESSFULLY TESTED TO COMPLETE MIL-T-27C SPECIFICATIONS.

All units are subjected to a 500 volt dielectric strength test, instead of the usual 100 volts, for higher safety margins and reliability.

The units are terminated in weldable and solderable, insulated Gold plated Dumet leads. Dim.: 5/16" dia. x 3/16" h., 1/20 oz.

All units are metal encased to Grade 4. Units made to Class S are available on special order. U.S. Patent No. 2,949,591.

DO-T* AND DI-T* TRANSISTOR TRANSFORMERS

DO-T (Actual Size) DI-T

Revolutionary transistor transformers hermetically sealed to MIL-T-27C specs. Plastic insulated solderable leads, firmly anchored to withstand 10 pound pull. Ideal for printed circuits. DO-T: 5/16" dia. x 13/32" long, wt., 1/10 oz. DI-T: 5/16" dia. x 1/4" long, wt., 1/15 oz. these compact units provide frequency response, high efficiency and low distortion. U.S. Pat. No. 2,949,591.

NEW DI-T200* SERIES TRANSISTOR TRANSFORMERS

These revolutionary transistor transformers embody the same rugged reliable construction afforded by the unique winding techniques and physical construction found in the DO-T and DI-T transformers. DI-T200 series differ by having straight pin, 1" long, .017 d. Dumet wire, gold plated leads. To MIL-T-27C, size 5/16" x 3/8", wt. 1/15 oz. U.S. Pat. No. 2,949,591.

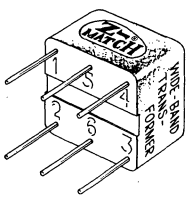
Z-MATCH

MINIATURE WIDEBAND TRANSFORMER



Used For:
Impedance Matching
Phase Detector
Wideband Interstage Coupling
Pulse Transformer
Voltage/Current Step-up or Step-down
Numerous other Applications

Time tested principles are combined with 20 years experience in the design and construction of inductive components in this series of transformers. The broad line of transformers listed below solves circuit coupling problems in today's transistorized equipment, and Z-Match transformers are standard components in many critical applications. They have been qualified to MIL-C-15305C. Operating temperature range is —50°C to +85°C. VSWR is less than 1.3:1 and insertion loss is .5 db max. on all types. Power handling ability is 2W from the lowest frequency specified up to mid range and about 4 W over the high portion. Applicable bulletins are 567, 101 and 103.

LOW FREQUENCY SERIES

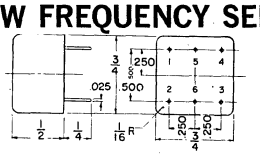

Fig. 1 LF Outline drawing

Slightly larger than the series above but usable at much lower frequencies is the LF line listed in the table directly below. These new units, which were designed at the request of our customers, utilize the proven construction techniques of the original Z-Match line and are produced with the same void-free encapsulation methods. The approximate constants as given above apply to the LF units. Applicable bulletin is 105.

WIDEBAND HYBRID JUNCTION/TRANSFORMER

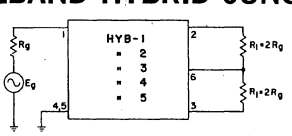

Fig. 2 Hybrid as a conventional wideband transformer

These are true center-tapped, dc isolated transformers which can be used to design or construct singly or doubly balanced mixers and phase detectors. Other applications include vectoral addition and subtraction and power division and addition. They of course also give excellent performance as conventional wide band transformers where dc isolation is necessary. All have 4:1 impedance ratio with 50 Ohms unbal. primary to 200 Ohms balanced secondary. Physical size is shown in figure 4L of the schematic section on page 3. Applicable bulletin 368 gives comprehensive circuit information.

For other Vari-L products see Sections 1800 and 3400.

HYBRID APPLICATIONS

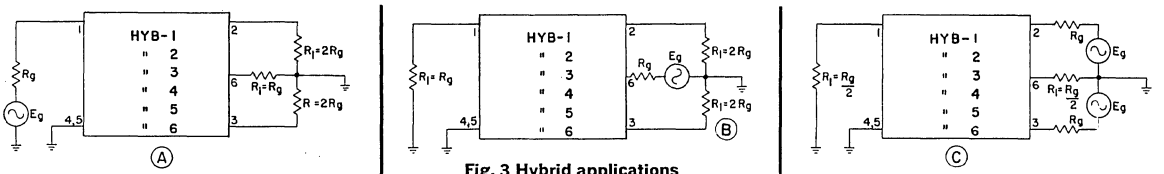

Fig. 3 Hybrid applications

3A: Signal applied at Terminal 1 appears at Terminals 2 and 3. Phase relationship 2 to 3 is 180°. Terminal 6 is isolated.

3B: Signal applied at Terminal 6 appears at Terminals 2 and 3. Phase relationship 2 to 3 is 0°. Terminal 1 is isolated.

3C: By reciprocity it can be correctly assumed from the above that the loads at Terminals 2 and 3 can be replaced by generators, and when the generators are in phase their combined outputs will appear at Terminal 6, and when they are 180° out of phase their combined outputs will appear at Terminal 1.

As illustrated, any of the six HYB transformer types may be used in the circuits in Figures 3A, 3B, and 3C.

POWER WIDEBAND TRANSFORMER

50 Watts (up to 1KW peak for pulses) power handling ability is provided in this series of rugged microstrip-compatible wideband transformers. Operating temperature range is —55 to +125°C, derated per figure 5 linearly at ½% per °C of the 25°C value. They are reciprocal and may be used for impedance/voltage step-up or step-down. Internal conductors will handle steady-state currents up to 4 amps. Applicable bulletins are 100 and 101.

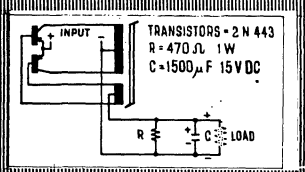
DC TO DC CONVERTER TRANSFORMERS

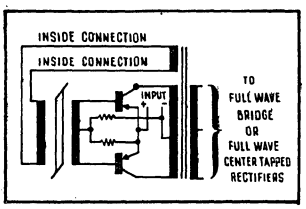
Permits conversion of low voltage direct current to high voltage for operating mobile electronic equipment.

CATALOG NO.	DC INPUT VOLTS	DC OUTPUT VOLTS	DC LOAD AMPS
DD01001	6	12	4
DD01002	9	12	4
DD01003	6	9	4

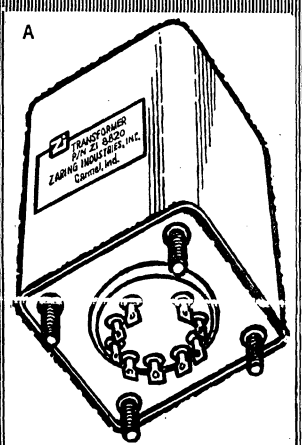
These transformers are used in an efficient circuit using minimum components as it can be seen from the circuit diagram. Transformer used with this circuit gives a safe operation within −60° C to +70° C. The circuit remains highly efficient in either full load or fractional full load operation.



CATALOG NO.	DC INPUT VOLTS	TOTAL VA OUTPUT	TRANSISTORS	OUTPUT Bridge Volt	Bridge mA	CT Volt	CT mA	CONSTRUCTION
DD02004	28	125	Delco 2N174	500	250	250	420	GA
DD02005	12	125	Delco 2N442	500	250	250	420	GA
DD02006	12	40	Delco 2N442	450	90	225	155	FA



A



These transformers are used with relatively high load currents. With a low power saturating transformer the high power transformer can be linear so the circuit will prevent high collector current spikes. Recommended transistors are listed in the table. Feed back and starting resistor values will be supplied with every transformer.

These transformers are hermetically sealed and meet MIL-T-27B TF4RX09, electrical schematic diagram is legible on gray finished cans.

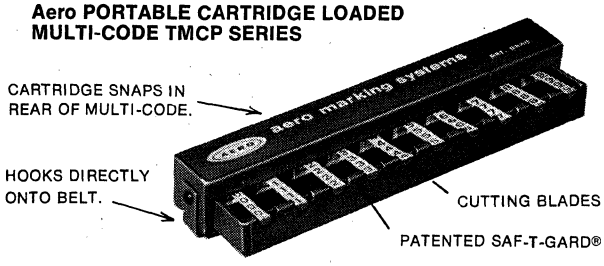
Aero PORTABLE CARTRIDGE LOADED MULTI-CODE TMCP SERIES

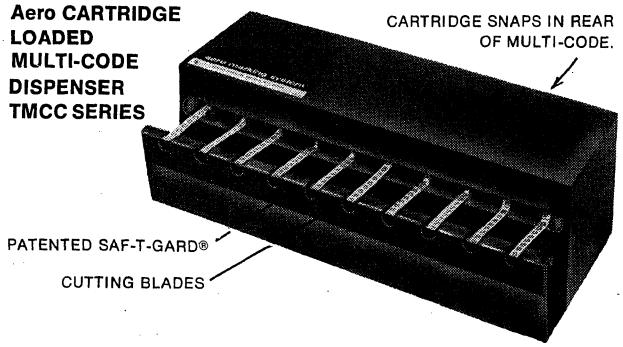


This is the NEW IMPROVED PORTABLE CARTRIDGE LOADED MULTI-CODE. The unit comes pre-packed with ten rolls of white acetate fiber tape with numbers from 0 to 9.

The unit conatins enough tape for 720 markings. The CARTRIDGE LOADED MULTI-CODE cartridges can be instantly loaded by snapping into the rear of the unit.

This tool is used exclusively by electrical contractors and plant electricians. The dispenser can be carried on the contractors pouch or clipped onto the belt, and only weighs 12 oz. fully loaded.

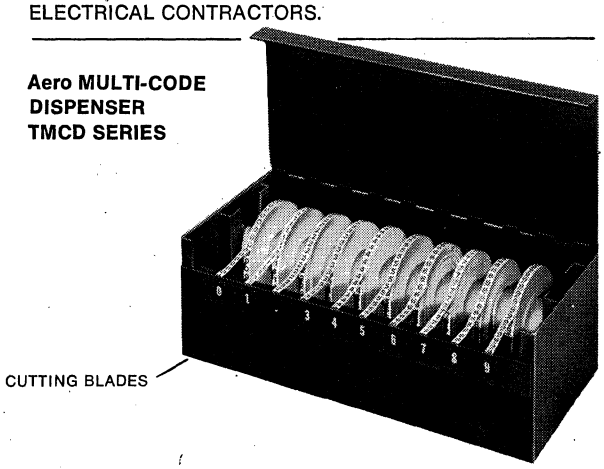
Aero CARTRIDGE LOADED MULTI-CODE DISPENSER TMCC SERIES



AERO DEVICES introduces this new CARTRIDGE LOADED MULTI-CODE DISPENSER. The very streamline design makes this bench unit extremely easy to use. All the numbers or letters are easily visible for quick identification and application. The tape cartridges snap in the rear of the unit in seconds.

This NEW CARTRIDGE LOADED MULTI-CODE can be used in AIRCRAFT, MISSILES, ELECTRONICS, MOTOR REPAIR SHOPS, FACTORY ELECTRICAL MAINTENANCE and ELECTRICAL CONTRACTORS.

Aero MULTI-CODE DISPENSER TMCD SERIES



This MULTI-CODE DISPENSER offers the easiest and fastest way to code your wires. The cabinet is constructed of heavy steel, finished in black baked coritex. The top is secured with a piano hinge which closes flush — no dust or drying of tape to worry about.

Here are some typical areas in which our wire marking system is used; AIRCRAFT and MISSILE ASSEMBLY, ELECTRONICS, MOTOR REPAIR, FACTORY ELECTRICAL MAINTENANCE, ELECTRICAL CONTRACTING, ETC.

send for complete illustrated catalog and prices.

AERO DEVICES 494 SOUTH RIVERVIEW DRIVE. TOTOWA. N.J. 07512 (201) 785-0440

easy wire and cable identification

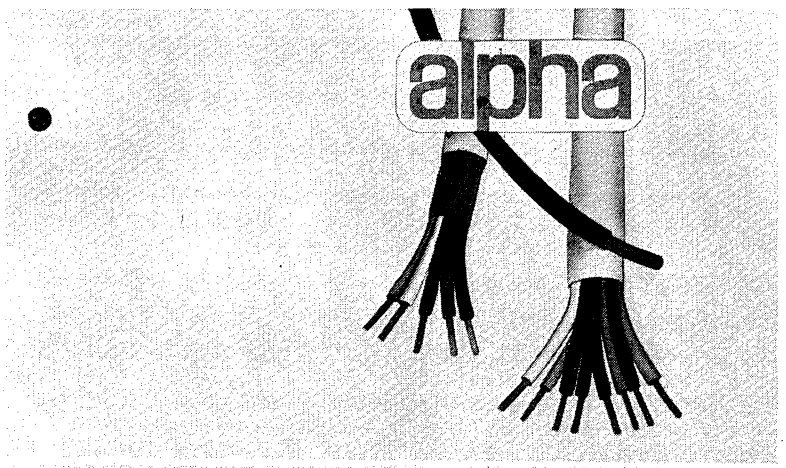
with **aero devices**

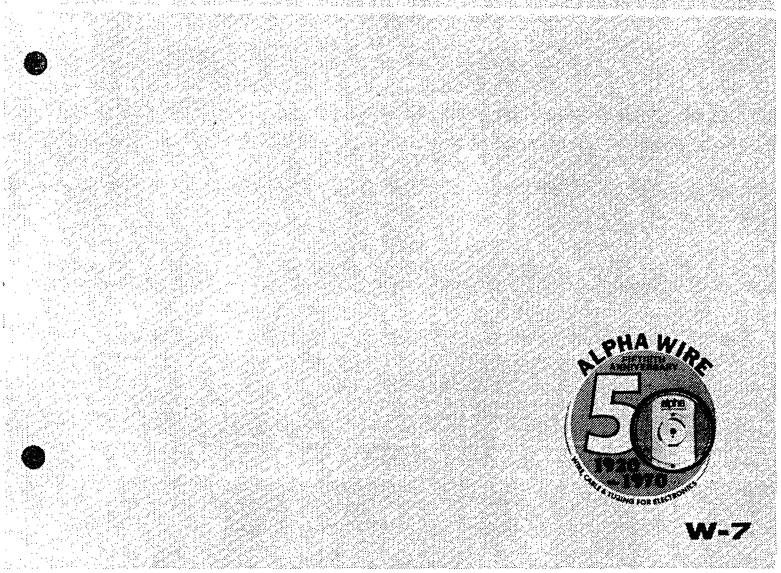
multi-code wire and cable identification systems

ADI multi-code marking tapes will do what you want it to do. Tapes come in letters, numbers or vivid colors for easier identification. Available with High-TAC adhesive for permanent marking or LOW-TAC adhesive for easy removal. All tapes are packaged in boxes to ensure freshness and tape longevity. Shelf life of tape is approximately 1 year.

Specify the tape you need . . . or tell us the specific job its needed for — let our research department help you.

the complete line of wire, cable & tubing for electronic applications





- HOOKUP WIRE TO MIL-W-16878D, MIL-W-76B
- TEFLON® WIRE AND CABLE
- AIRCRAFT WIRE TO MIL-W-5086A
- COMPLETE LINE OF RG COAXIAL CABLES
- CONTROL & INSTRUMENTATION CABLE
- TELEMETERING CABLES
- MICROPHONE CABLES
- AUDIO CABLES
- SERVICE & POWER CORDS
- RETRACTILE COIL CORDS
- SHIELDING & BRAIDING
- HOOKUP WIRE TO U.L. & C.S.A. SPECIFICATIONS
- TV, AND ROTOR CABLE
- PLASTIC TUBING
- TEFLON® TUBING
- ZIPPER TUBING
- LACING CORD & TAPES
- FIT® SHRINKABLE TUBING

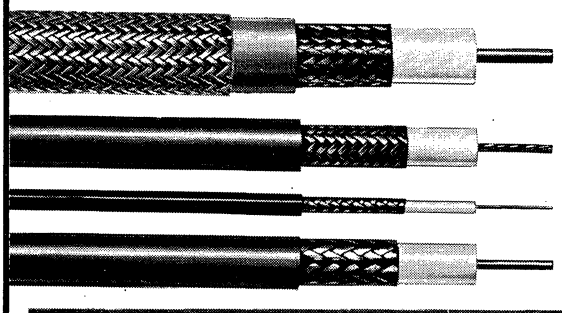
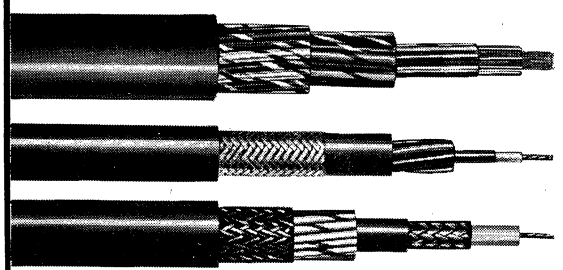
PLASTICOTE WIRE & CABLE BY CHESTER



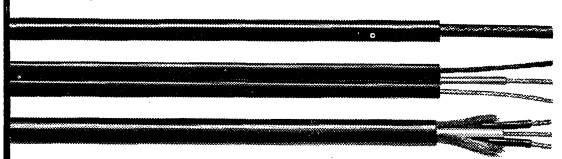
COAXIAL CABLE — Chester Cable Corp. offers a complete line of coaxial cable for military and commercial applications. Manufactured in accordance with MIL-C-17, JAN-C-17 and commercial specifications. Constructions include solid, air-spaced and foam dielectrics with conventional braid shields or flat copper tape shields, having PVC or polyethylene jackets. Custom designed constructions of triaxial cable and high frequency-high voltage cable are also available.



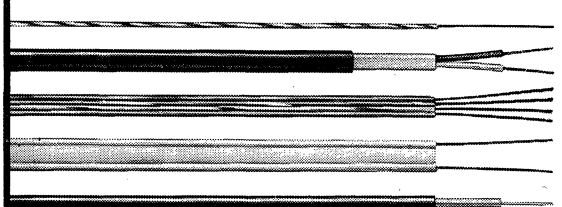
MULTI-CONDUCTOR CABLE -- Wide range of custom designs available, manufactured in accordance with such industry standards as MIL specs., U/L, CSA, IPCEA, EIA, IMSA, ASTM, etc.

Chester Cable Corp. is a preferred source for quality electronic and electrical cable, insulated and jacketed with thermoplastic materials such as polyvinylchloride, polyethylene and nylon. Custom designs of shielded or unshielded cable include: Control Cable • TV Camera Cable • Missile Cable • Intercom Cable • Computer Cable • Special Hi-Voltage Cable and Parallel Bonded Ribbon Cable.

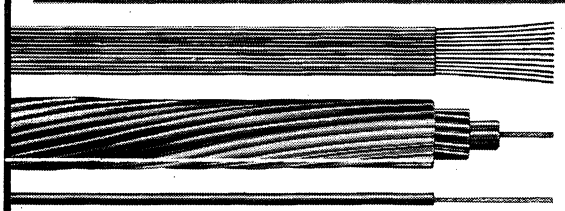
MIL-SPEC WIRE — Made in accordance with specifications MIL-W-16878 (Types B, C & D), MIL-W-76B (Types LW, MW & HW) and MIL-W-5086A for electronic systems. Available in single or multiple constructions, shielded or unshielded, with or without nylon or PVC jackets.



WIRE AND CORD FOR THE APPLIANCE INDUSTRY — U/L and CSA approved, 60°C — 80°C — 90°C — 105°C appliance wiring material — SVT, SJT, ST cord, SJTO & STO oil-resistant cord, SJT & ST oil-proof cord, SPT cord with or without individually insulated ground wire. Used for washers, dryers, refrigerating, air conditioning, vending, heating, X-ray and other electrical and electronic equipment.



RADIO AND TV CIRCUIT WIRE AND CABLE — U/L and CSA approved, 60°C — 80°C — 90°C — 105°C appliance and radio circuit wire, microphone cable, shielded and unshielded audio circuit wire, twin lead antenna wire, phonograph cable, parallel-bonded color convergence ckt. cable, braided hook-up wire, hi-anode wire, hot chassis lead, balun-coil wire, shielded constructions with spiral, braided, aluminum-Mylar tape and conductive materials; all available in Thrif-T-Bond® tinned over-coated conductors.



MISCELLANEOUS WIRE AND CABLE—Machine Tool Wire • Bus Drop Cable • Flexible Test Lead Wire • Municipal Signal Cable • Low Energy Circuit Control Cable • Station Control Cable • Inter-Office Communication and Signaling Cable • Deep-Well Submersible Water Pump Cable • Gas Tube Sign and Oil Burner Ignition Cable • Intercom Cable • Gasoline and Oil Resistant Wire • Computer Cable • Uninsulated Bus Wire • Parallel and Jacketed Cord • Braided Ground Strap, and special custom designed cable for your applications.

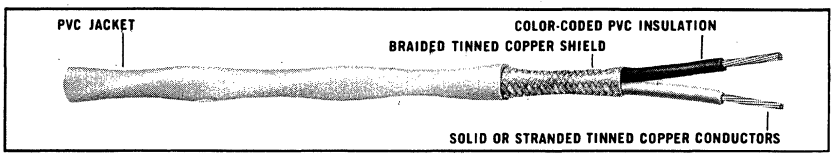
Audio Cable Braid Shielded PVC Jacket



Stock Color:
Chrome gray jacket.

Construction:
Tinned copper conductors, color-coded PVC insulation, conductors cabled, tinned copper braid shield, PVC jacket overall.

Specifications:
−20°C to +60°C.

Applications:
Shielded cable for recording studios, radio transmitters, sound systems and electronic circuits where shielding is required.

Put-up:
100', 500' and 1000' spools. (Other put-ups also available.)

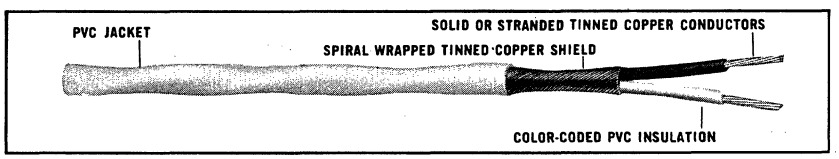
Audio Cable Spiral Shielded PVC Jacket



Stock Color:
Chrome gray jacket.

Construction:
Tinned copper conductors, color-coded PVC insulation, conductors cabled, tinned copper spiral wrapped shield, PVC jacket overall.

Specifications:
−20°C to +60°C.

Applications:
Cable for recording studios, radio transmitters, sound systems and electronic circuits where shielding is required. Spiral shield allows ease of pigtail soldering.

Put-up:
100', 500' and 1000' spools. (Other put-ups also available.)

Audio Cable Mylar® /Aluminum Foil Shielded PVC Jacket

Stock Color: Chrome gray jacket.

Construction: Tinned copper conductors, color-coded polyethylene insulation, conductors cabled, wrapped with Flexfoil® mylar supported aluminum foil shield with foil facing to outside, stranded tinned copper drain wire, PVC jacket overall.

Specifications: −20°C to +60°C.

Applications: 100% shielded cable for recording studios, broadcast sound systems and electronic circuits where RF shielding is required.

Put-up: 100′, 500′ and 1000′ spools. (Other put-ups also available.)

Miniature Audio Cable Mylar® /Aluminum Foil Shielded PVC Jacket

Stock Colors: Chrome gray jacket.

Construction: Tinned copper conductors, color-coded polypropylene insulation, conductors cabled, wrapped with Flexfoil® mylar supported aluminum foil shield with foil facing to outside, stranded tinned copper drain wire, PVC jacket overall.

Specifications: −20°C to +60°C.

Applications: 100% shielded cable for recording studios, broadcast and sound systems. Requires ½ to ⅔ less space than standard broadcast cables.

Put-up: 100′, 500′ and 1000′ spools. (Other put-ups also available.)

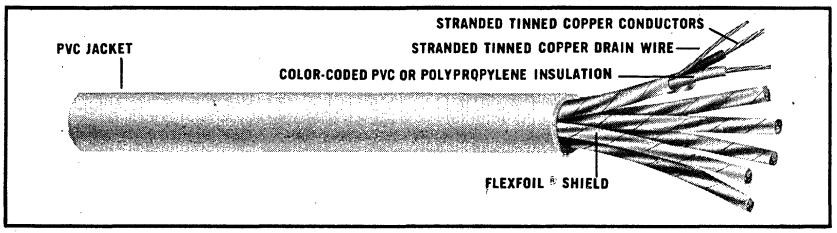
Audio/Data Individually Shielded Multiple Pair Cable PVC Jacket



Stock Color: Chrome gray jacket.

Construction: Tinned copper conductors, color-coded polypropylene insulation, cabled in pairs, each pair and its drain wire under Flexfoil® aluminum foil polyester shield, PVC jacket overall.

Specifications: +105°C. Suggested working voltage 300V. 100 Megohms/M insulation resistance between shields. 115 MMF/Ft. capacitance between adjacent shields. 1500V voltage breakdowns between adjacent shields. 50V working voltage between adjacent shields.

Applications: For audio RF and pulse applications requiring superior circuit isolation. The use of polypropylene insulation results in excellent high frequency properties and mechanical durabilty.

Put-up: 100', 500' and 1000' spools. (Other put-ups also available.)

Audio Cable Unshielded Unpaired Multi-Conductor PVC Jacket

Stock Color: Chrome gray jacket.

Construction: Tinned copper conductors (Cat. Nos. 02754 and 02755 are bare copper), color-coded PVC insulation, PVC jacket overall, conductors cabled.

Specifications: −20°C to +60°C.

Applications: PA systems, unbalanced intercom systems, interconnecting cables, remote control circuits, telephones, low-voltage relay control cables.

Put-up: 100′, 500′ and 1000′ spools. (Other put-ups also available.)

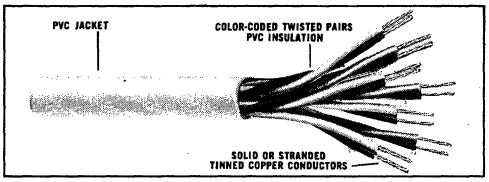
Audio Cable Unshielded Paired Multi-Conductor PVC Jacket



Stock Color: Chrome gray jacket.

Construction: Tinned copper conductors, color-coded PVC insulation, conductors paired with a short lay twist for conductor balance providing a circuit free from cross talk, pairs cabled, PVC jacket overall.

Specifications: −20°C to +60°C. Suggested working voltage: 22 gauge 200V, 18 gauge 400V.

Applications: Heavy-duty intercom and audio cable for intercom systems, signal systems, annunciators, nurse's call systems, multiple speaker systems, control circuit cables.

Put-up: 100′, 500′ and 1000′ spools. (Other put-ups also available.)

Control Cable Multi-Conductor Shielded Neoprene or Rubber Jacket

Stock Color: Black jacket.

Construction: Tinned copper conductors, color-coded rubber insulation, cabled, filled where required, cotton wrap, tinned copper braided shield, cotton wrap, neoprene jacket or rubber jacket.

Specifications: −20°C to +60°C. Suggested working voltage 350V.

Applications: Control circuits, video and audio interconnecting cables, broadcast and studio use. Precision engineered to prevent cross-talk and eliminate hum pick-up. Neoprene and rubber jackets are resistant to impact and abrasion and have extra limpness. For outside installations, neoprene is recommended being resistant to oil, ozone, moisture and sunlight.

Put-up: 100′, 500′ and 1000′ spools. (Other put-ups also available.)

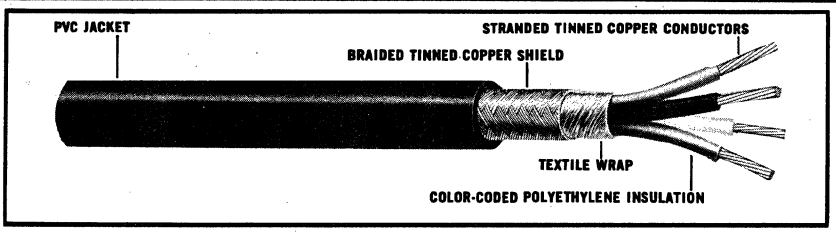
Control Cable Multi-Conductor Shielded PVC Jacket



Stock Color: Chrome gray jacket.

Construction: Tinned copper conductors, color-coded polyethylene insulation, cabled, filled where required, rayon wrap, tinned copper braid shield, PVC jacket overall.

Specifications: −20°C to +60°C. Suggested working voltage 600V.

Applications: Low capacity cable for control circuits, video and audio interconnecting cables, broadcast and studio use. Precision engineered to prevent cross-talk and eliminate hum pick-up. Low capacitance, light weight.

Put-up: 100′, 500′ and 1000′ spools. (Other put-ups also available.)

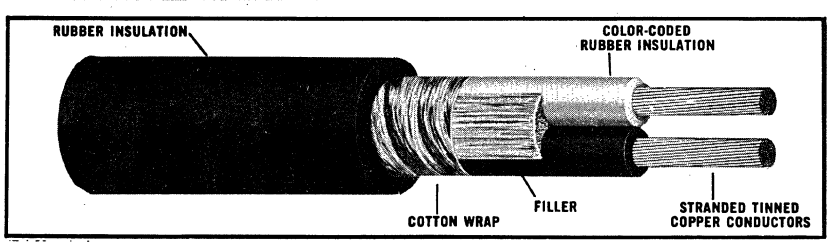
□First color in stripe combination is body color. Second or third colors are stripes. Example: White/Black/Red. Other solid colors and striped combinations available to order.

Control Cable Multi-Conductor Unshielded Rubber Jacket



Stock Color: Black jacket.

Construction: Tinned copper conductors, color-coded rubber insulation, cabled, filled where required, cotton wrap, rubber jacket.

Specifications: −20°C to +60°C. Suggested working voltage 350V.

Applications: Control circuits, broadcast and studio use, traffic and fire alarm control, temperature control systems, other multiple control applications. Resistant to impact and abrasion. Extra limpness.

Put-up: 100′, 500′ and 1000′ spools. (Other put-ups also available.)

UL Listed Style No. 1007 Unshielded

Stock Colors: See table below.

Construction: Tinned copper conductor, color-coded PVC insulation.

Specifications: −40°C to +80°C, 300V. Resistant to acids, oil, alkalis, flame, moisture and fungus.

Applications: Internal wiring of electronic and electrical equipment.

Put-up: 100′ and 1000′ spools. (Other put-ups also available.)

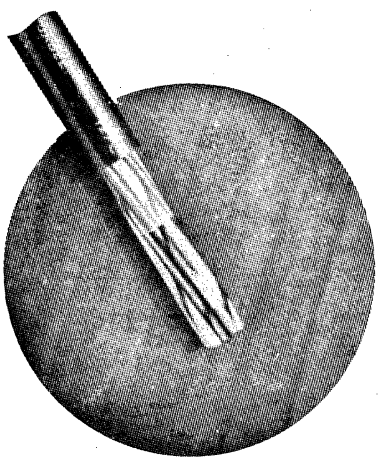
Conco-Foam
...NEW LOW LOSS FOAM POLYETHYLENE ALL CHANNEL COLOR TV CABLE.

Rome Synthinol*
...A THERMO-PLASTIC INSULATED HOOK-UP WIRE APPROVED FOR 80°, 90° & 105° C. OPERATING TEMPERATURE.

CT-B, CT-C Control Cable
...600 AND 1000 VOLT CONTROL CABLE PER IPCEA AND NEMA STANDARDS.



Consolidated Control Cables types CT-B and CT-C

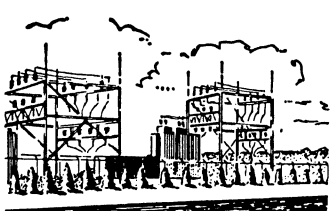
Meeting IPCEA-NEMA standards for use on both AC and DC circuits, these control cables are designed to handle a wide range of applications. Lighter in weight, smaller in diameter and more flexible than conventional rubber insulated multi-conductor cables, consolidated CT Thermoplastic insulated control cables are easy to handle, store and install.

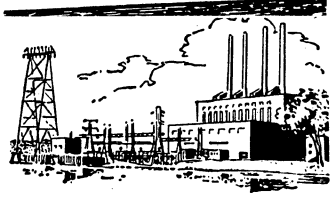
The Consolidated CT control cables are available with various types of copper, bronze or copper clad stainless shielding to provide electrostatic or electromagnetic protection. Shielding also provides added physical protection and acts as a positive deterrent against rodent or insect attack.

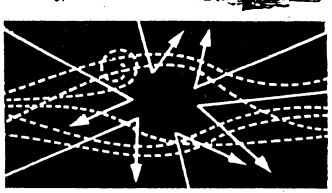
Synthinol (polyvinylchloride) is used for jacketing individual conductors as well as for an over-all jacket. Synthinol provides added resistance to heat and to chemical and corrosive attack. It also provides mechanical protection and is a flame retardant barrier for the cable insulation.

600 volt rated Type CT-B cables are primarily for use in general applications, while 1000 volt rated Type CT-C cables are more frequently used in connection with heavy magnetic trip devices, where induced over-voltages may occur.

Both CT-B and CT-C are made with bare stranded copper conductors, individually insulated and fully color-coded. These cables are suitable for all types of installations — aerial, conduit, duct, tray, direct burial — in wet or dry locations.







USES

In power generating stations and substations as well as throughout industry in both manufacturing and processing plants.

RATINGS

For AC and DC circuits. Type CT-B is rated 600 volts. Type CT-C, 1000 volts. Both are recommended for operation at 90° C. maximum continuous conductor temperature.

INSULATION

Polyethylene insulation is used on individual conductors since it has proven superior to many other dielectric materials used on solid insulated cables. This material is particularly well suited for DC circuits in moist locations where electro-osmosis maye be a problem. Along with its important outstanding electrical properties, polyethylene also resists acids, alkalies and oils. It is thus capable of standing up well under many hazardous environmental conditions.

UNSHIELDED STATION CONTROL CABLE

HEAVY DUTY MULTI-CONDUCTOR PLASTIC JACKET — TYPE CT-B CONTROL CABLE — 600 VOLTS

DESCRIPTION: Each conductor, stranded bare copper, .020" polyethylene insulation, .010" polyvinylchloride jacket over each conductor, color coded, cabled with fillers where necessary, moisture resistant tape, black polyvinyl-chloride jacket overall. 600 volt operating voltage. Approved per IPCEA-NEMA standards.

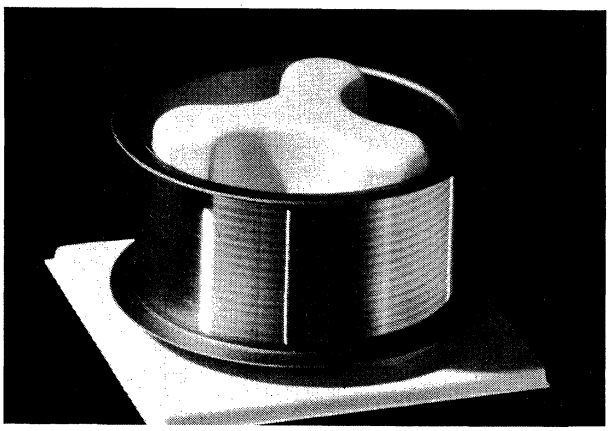
CRM a single source for electronic grade preforms and fine wire of pure metals and special alloys

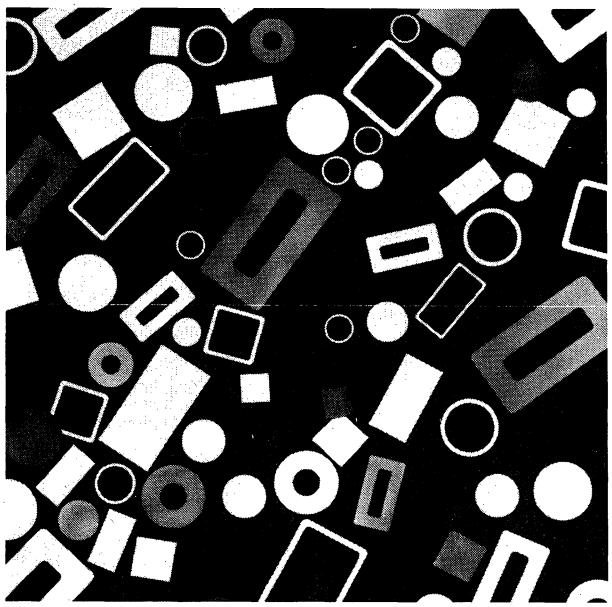
CRM specializes in the manufacture of precision wire and preforms for use in electronic components and semiconductor devices. In order to assure conformance to the most rigid specifications, even metals purification and alloying are done within CRM's own plant. Hundred of stock dies supplement extensive tool-making facilities, permitting fast and inexpensive fabrication of custom sizes and shapes. Appropriate physical, chemical, and performance tests are used at all stages of production to assess and certify both the quality and usability of CRM products. CRM preforms and wire are available from stock or are custom fabricated to meet all your specifications.



WIRE from CRM is available in all varieties required for electronics, semiconductors, and electrical instruments to any specification. Thus, pure Gold may be obtained in 5-9's purity for vapor deposition or lower purity for bonding. Tensile strength and other physical properties can also be varied, even to match particular wire bonding machines. Various doped Gold wires are also available. Similarly, standard and custom wire of pure metals and special alloys are produced by CRM for other semiconductor applications, resistance thermometers, potentiometers, strain gauges, galvanometers, thermocouples, and for experimental applications. All wire can be supplied with any type of enamel or plated, or bare.

Gold bonding wire • silicon-aluminum bonding wire • pure vapor deposition wire • potentiometer wire • platinum resistance thermometer wire • fuse wire • strain gauge wire • enameled wire • plated wire

CRM WIRE CAN HELP YOU MAKE A BETTER PRODUCT.



PREFORMS from CRM range from simple solder washers to precisely sized perfect spheres of high purity gold for semiconductor mounting and special frames for flatpack assembly. Quality is controlled at every processing step to meet customer specifications. For example, Gold spheres are available in either 4-9's or 5-9's purity in sizes from .008″ to .040″ with sphericity controlled to ±.001″. All spheres are checked optically to assure perfect surface finish; they are weighed to assure uniform density, and they are rolled down an inclined plane which automatically rejects all spheres which are out of round. CRM makes preforms from precious metals and alloys, Aluminum and Aluminum alloys, brazing alloys, and soft solders. Over 300 stock dies are on hand to permit custom fabrication without tooling charges.

Discs • rectangles • washers • frames • solder • braze • eutectic gold alloys

CRM PREFORMS CAN HELP YOU MAKE A BETTER PRODUCT.

Call or Write for a useful Data Book and Catalog of CRM Fine Wire and Precision Preforms, and for a quotation on your special requirements.

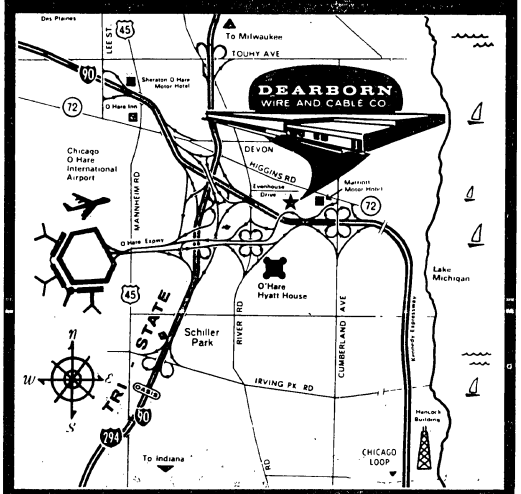
DEARBORN

AMERICA'S FULL-SERVICE SOURCE FOR WIRE, CABLE, INSULATION AND ELECTRONIC ACCESSORIES

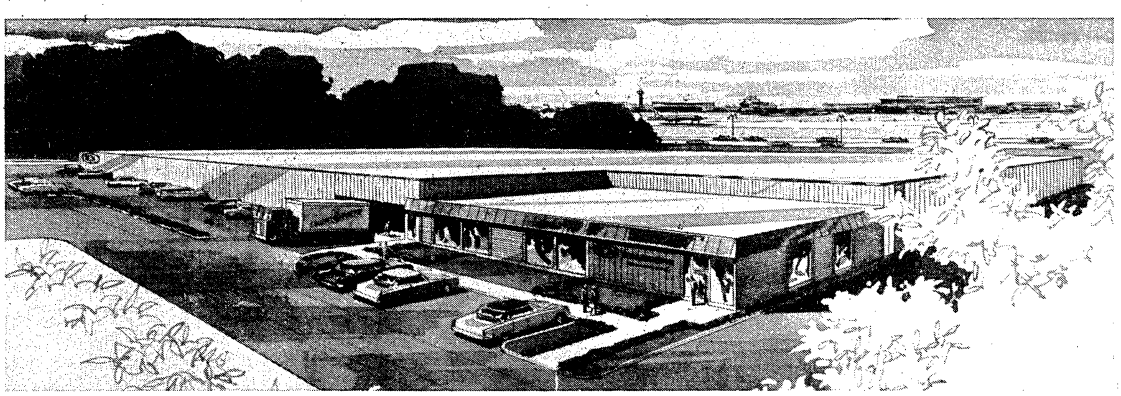
Growing to Serve You Better!

We've Built Our New Home at the Crossroads of the Nation!

AT THE GATEWAY TO CHICAGO'S O'HARE INTERNATIONAL AIRPORT



The new 50,000 square foot Dearborn service center has been designed with "space age" innovations in manufacturing, processing and warehousing equipment. Modern processing systems, together with proximity of plant to O'Hare International Airport air cargo facilities and all major expressways, means rush orders for in-stock items can be well on the way to their destinations in less than half a day.



YES, We Have It!

The vast selection of merchandise listed on the following pages represents only a partial amount of the thousands of wire, cable and insulation items stocked by Dearborn.

Our new 44 page catalog will give you full details on the complete Dearborn line. Send for it, or call us for information on stock or special constructions.

DEARBORN WIRE AND CABLE CO. 9299 Evenhouse Drive • Rosemont, Illinois 60018

Phone Area (312) 696-0090 • Telex Number 28-2449

DEARBORN

MIL SPEC MIL-W-16878D HOOKUP WIRE-TYPES B & C

Single conductor, stranded tinned copper

TYPE B

Insulation PVC .010″ wall thickness, color coded. **Temperature rating:** −55°C to +105°C. **Voltage rating:** 600 volts.

TYPE B — NYLON

Same as above but with clear nylon jacket (.003″ wall) over PVC insulation increasing temperature rating to +115°C.

TYPE B — PREBONDED

Double tinned strands are heated which fuses the individual strands together in order to prevent fraying. Allows easy stripping and insertion in holes in lugs, circuit boards, etc. Color coded .010″ PVC insulation to MIL-W-16878D. **Temperature rating:** −55°C to +105°C. **Voltage rating:** 600 volts.

TYPE C

Insulation PVC .017″ wall thickness. **Temperature rating:** −55°C to +105°C. **Voltage rating:** 1000 volts.

TYPE C — NYLON

Same as above but with clear nylon jacket which increases temperature rating to +115°C.

TYPE C — SHIELD AND NYLON JACKET

Basic type C with 90% coverage braided tinned copper shield and clear nylon .005″ jacket overall.

105°C TYPE B, 600 VOLT

F — SUFFIX INDICATES FUSED OR PREBONDED STRANDS

THE XLV IS ESPECIALLY SUITABLE FOR AEROSPACE, MILITARY AND INDUSTRIAL ELECTRONIC EQUIPMENT

Dual service hook-up wire insulated with a polyvinyl chloride which has been cross-linked by an irradiation process. This process changes the linear molecular configuration of the PVC and connects molecules through a network of chemical bonds. This specially processed insulation "XLV" becomes extremely burn-thru and heat resistant. The shrinkback or heat flow normally encountered when applying a hot soldering iron does not occur when using "XLV" hook-up wire.

This resistance to heat also prevents distortion of the insulation when the wire is subjected to temporary overloads and high temperatures.

Cross linking the PVC by irradiation also increases the abrasion resistance and makes it much superior to regular vinyl insulations.

The table below lists both the UL and military specifications to which "XLV" wire is manufactured.

Note that since the military and U.L. specifications vary, the temperature and voltage ratings assigned differ for the same wire as per the chart.

SPECIFICATIONS	MAX. OPER. TEMPS.	MAXIMUM VOLTAGE
MIL-W-16878/1 TYPE B	105°C	600 V. RMS
U.L. AWM STYLE 1429	80°C	Voltage not specified for general appliance hook-up usage. 300 volt peak for electronic use only.
MIL-W-16878/2 TYPE C	105°C	1000 V. RMS.
U.L. AWM STYLE 1430	105°C	300 VOLT RMS 600 VOLT PEAK For electronic use only.

See other U.L. & CSA products starting with page 21.

All above can be supplied in multi-conductor, with shield and XLV jacket or multi-conductor, and XLV jacket.

DEARBORN

MIL-SPEC MIL-W-16878D HOOKUP WIRE AND CABLE

TYPE D AND D-NYLON

Stranded tinned copper with color coded PVC insulation. Temperature rating: −55°C to +105°C (+115°C with nylon type jacket). Voltage rating: 3000 volts.

105°C TYPE D, 3000 VOLT

MULTI-CONDUCTOR CABLES, TYPE C, FLAT RIBBON

Each conductor to MIL-W-16878D Type C. All conductors bonded together to form ribbon type cable. All conductors color coded and easily separated for ease in terminating.

MULTI-CONDUCTOR, TYPE B, NYLON, SHIELDED AND JACKETED WITH WHITE PVC JACKET*

Stranded tinned copper conductors with .010 PVC insulation, color coded. .003" nylon jacket on each conductor, 90% coverage braided tinned copper shield and white PVC jacket overall.

* This series can be supplied with XL vinyl insulation on conductors and jacket on special order. See preceding page for description.

105°C TYPE C, FLAT MULTI-CONDUCTOR, 1000 V.

DEARBORN

TEFLON* INSULATED AIRCRAFT, MISSILE AND ELECTRONIC WIRE AND CABLE

MIL-W-16878D, TYPE ET

Voltage rating: 250 volts. **Temperature rating:** −65°C to +200°C. Single conductor stranded silver plated copper, extruded TFE Teflon insulation.

MIL-W-7139B, CLASS I WIRE

Voltage rating: 600 volts. **Temperature rating:** −65°C to +200°C. Silver plated copper, insulated with layers of TFE Teflon, interspersed with layers of Teflon impregnated fiberglass. Color is white with blue tracer. Teflon impregnated fiberglass braid overall.

MIL-W-7139B, CLASS II WIRE

Voltage rating: 600 volts. **Temperature rating:** −65°C to +260°C. Nickel coated copper, insulated with layers of TFE Teflon, interspersed with layers of Teflon impregnated fiberglass. Color is white with orange tracer. Teflon impregnated fiberglass braid overall.

- **All Teflon wire and cable listed here is resistant to acids, alkalis, oil, flame, moisture, solvents, fungus, aircraft fuels, hydraulic fluid, skydral, ethylene glycol and alcohol.**

**Not MIL Spec.

TYPE E, 600 VOLT

Single conductor, stranded or solid silver plated copper, extruded TFE Teflon insulaiton. **Voltage rating:** 600 volts. **Temperature rating:** −65°C to +200°C.

TYPE EE, 1000 VOLT

Same as Type E, except for insulation thickness and voltage rating of 1000 volts.

TYPE E, SPIRAL WRAPPED FUSED TEFLON

Same as Type E—600 volt but with spiral wrapped fused Teflon insulation.

TYPE EE, SPIRAL WRAPPED FUSED TEFLON

Same as Type EE, but with spiral wrapped fused Teflon insulation.

TYPE E, SPIRAL WRAPPED FUSED TEFLON

MIL-W-16878D SHIELDED TEFLON* CABLES

- **NO OUTER COVERING OVER SHIELD**
- **TEFLON IMPREGNATED BRAID OVER SHIELD**
  Braided natural or white Teflon impregnated fiberglass braid overall.
- **FEP EXTRUDED JACKET OVER SHIELD**
  Tough abrasion resistant extruded white FEP Teflon jacket overall.
- **TEFLON TAPE WRAP JACKET OVER SHIELD**
  Sintered wrapped white Teflon tape jacketed overall.

Each conductor stranded silver plated copper, Type E extruded TFE Teflon .010" color coded insulation. Braided silver plated copper shield, 90% coverage. **Voltage rating:** 600 volts. **Temperature rating:** −65°C to +200°C. Resistant to acids, alkalis, oil, flame, moisture, solvents and fungus.

*Dupont T.M.

DEARBORN
SPECIAL PURPOSE MILITARY CABLES

HEAVY DUTY VEHICLE CABLE MIL-C-13486B, TYPE 1, CLASS A SINGLE CONDUCTOR, SPECIAL PURPOSE

CONSTRUCTION

Stranded tinned copper conductor, rubber insulating core, inner glass braid, black neoprene jacket.

Ordnance part number, gauge and manufacturer's name stamped on outer jacket.

USAGE

For use on all types of military ground vehicles, such as tanks, trailers, trucks and jeeps.

CHARACTERISTICS

Excellent flexibility, even at low temperatures; resistance to abrasion, fluids and weather allows use in exposed situations. Fungus resistant.

MIL-C-13486B

MIL-C-3432C CABLE AND WIRE ELECTRICAL, POWER AND CONTROL, FLEXIBLE 600 VOLTS

CONSTRUCTION

T.C. stranded conductors, rubber insulated, cabled with filler, cotton served, black rubber jacket.

USAGE

The cables covered by this specification are intended for use by the armed services in extensive electrical and electronic applications. These cables can be used to transmit power, sync pulses, data transmission voltages, video, audio or control.

CHARACTERISTICS

The MGF series is intended for medium duty per specification and the tough flexible jacket amply serves the intended usage under these specifications.

TUBULAR BRAID Tinned copper braid woven in completely round configuration as outlined in MIL-SPEC QQ-B-575. All strands soft drawn tinned copper. Shielding is 95% or more when placed over equivalent diameter mandrel to the inside diameter of the tubular braid.

Used as both shielding and protective covering. While the larger sizes shown in second table below are not listed in the spec, they are manufactured to the same standards.

FLAT BRAID Tinned copper strands, woven and rolled flat to specific width depending on construction, number of strands, etc.
Used for bonding, straps, grounding, or connecting moving parts. Recommended for high current usage.

TUBULAR SILVER OR GOLD WIRE BRAID

This tubular braid is supplied with either silver or gold wire. The wire is braided over a mandrel of monofilament and is .0030" ±.0005" diameter. The braid I.D. is .060" when supplied on the mandrel.

MATERIAL: Silver wire strands are 95% minimum purity. Gold is of extreme high quality and purity.

CONSTRUCTION: Number of carriers: 16. Number of ends/carrier: 2. Number of picks/inch: 42 ±2.

DEARBORN

MULTI-CONDUCTOR CONTROL CABLE-UNSHIELDED NEOPRENE OR PLASTIC

PLASTIC JACKETED 15/5 CONTROL CABLES, 600 VOLT, VN20, 90°C

Stranded bare copper conductors, insulated with .015 PVC color coded insulation and .005 Nylon jacket over each conductor; cabled with fillers. Moisture resistant tape, and a black Polyvinylchloride jacket overall. Used for controlling temperature, voltage, pressure and relay circuits and many other electronic and electrical circuits. **All conductors color coded to IPECA Standards (see bottom, this page).**

* .020″ on sizes 4 and 12; .015″ on size 16.

RUBBER INSULATED CONDUCTORS, NEOPRENE JACKETED

Stranded bare copper conductors, with color coded rubber insulation; cabled with fillers; cotton wrapped; tough Neoprene jacket overall. Used for remote control circuits. Flexible stranding and heavy duty Neoprene jacket combined, make this cable suitable for outdoor usage under extreme conditions. Neoprene jacket resists sunlight, oil, moisture, ozone, abrasion and impact.

FLAME RETARDANT, FR-1 STYLE 1015, 600 V., 105°C AND FR-1 STYLE 1007, 300 V., 80°C

The polyvinyl chloride insulation used on this series of hook-up wire listed below, has incorporated in it the necessary additives that enable the wire to pass the Vertical Flame Test as prescribed by the Underwriters' Laboratories for this U.L. style.

All this wire is imprinted with the symbol FR-1 to indicate that it is covered by the above specifications.

See eem page 3027 for high voltage Flame Retardant wire.

X-L POLYETHYLENE, U.L. STYLES 3173, 3199, 125°C — 600 VOLT, 105°C — 300 VOLT

The Polyethylene insulation used on this series of lead wire is chemically cross-linked, which increases the moisture resistance, solvent resistance and aging characteristics.

When momentary high temperatures caused by overloads or shorts occur, the insulation does not deform as quickly as if not cross-linked.

Typical applications include small motors, control panels, dry transformers, etc.

Recommended maximum baking cycles: 300°F for 24 hrs. — 325°F for 12 hrs. — 350° F for 8 hrs.

FR-1 105°C — 600 VOLT, 1/32", STYLE 1015

MACHINE TOOL WIRE MTW-THWN-THHN

U.L. APPROVED

THWN — THHN

Gas and oil resistant 75°C MTW — 105°C AWM

CONSTRUCTION

Bare soft copper, stranded or solid.
Insulated with polyvinylchloride compounds U.L. listed for temperatures not exceeding 105°C.
Jacketed with nylon armor as follows:
.004″ Thick Sizes 18-10
.005″ Thick Sizes 8-6 .007″ Thick Sizes 1-0000
.006″ Thick Sizes 4-2 .008″ Thick Sizes 250-500 MCM
The clear nylon is applied over all surface printing. Specifically designed for use in wet locations and is resistant to oils, gasoline, water, acids, alkalies, ozone, sunlight and abrasion.

USE

An all around general purpose building wire, for fixture raceways, conduit and tubing raceways, internal wiring of fixtures, and applications requiring building wire, machine tool wire or appliance wiring.

U.L. LISTING COVERS

1. 90°C THHN Dry
2. 90°C MTW (Machine Tool)
3. AWM 105°C Dry — 80°C in Oil (Appliance Wire)
4. 75°C THWN
5. Gasoline and oil resistant to 75°C.

KYNAR INSULATED HOOKUP WIRE FOR WIRE WRAP APPLICATIONS

Especially suited for computer, business machine usage and other areas where space is limited. (For automatic point to point application)

U.L. Approved

The miniaturization of computers and business machines has created special porblems in the wiring of components and associated programming equipment. Essentially there is a need for wire with a tough insulation that is resistant to abrasion and cold flow. It should function at operating temperatures up to 125°C. The wire wrap type of termination requires a high conductivity low corrosive surface on the conductor. Dearborn Kynar insulated wire fulfills these needs.

SPECIFICATIONS

The conductor is OFHC (Oxygen Free High Conductivity) Annealed Copper, Silver Plated.

The insulation is Kynar*, a Vinylidene Fluoride Plastic with unique characteristics.

- All Kynar wire listed is supplied on 1000 ft. putups on LARGE Hub Diameter reels 8½" O.D. and 10⅝" Flange to eliminate curvature set in wire and to function properly in the automatic equipment used for application.

- Larger putups on the same reel can be supplied from Factory stock and **additional colors are available** from Factory on special order.

* Pennwalt Chemicals Corp. Trademark

KYNAR CHARACTERISTICS

- **Mechanically Tough**
- **Flame Retardant, Self Extinguishing**
- **Excellent Resistance to Ultraviolet Light and Weathering**
- **Operating Temperature Up to 125°C Continuous, Assigned U.L. Rating 105°C**
- **Exposure to 300 Million Roentgens Does Not Change Insulation Characteristics**
- **Vivid Colors for Easy Identification**

DATA AND AUDIO CABLE

INDIVIDUALLY SHIELDED MULTIPLE PAIRS

Tinned copper conductors, either stranded or solid (see tables), insulated with high density color coded *.010" Polyethylene, conductors twisted into pairs. Along with a †22 gauge stranded tinned copper drain wire, each pair is shielded with a Mylar supported aluminum foil shield. Covered with a Grey PVC jacket overall. Used for all circuits requiring isolation between pairs. Especially suitable for multiple audio and data control circuits. Mylar Wrap between shields and jacket.

FOIL SHIELDED, PLASTIC JACKETED, MULTI-CONDUCTOR CABLE

Stranded tinned copper conductors, insulated with .016" thick color coded Polyethylene insulation. Conductors are cabled and, along a No. 22 tinned copper stranded drain wire laid parallel, are shielded with aluminum foil Mylar backed shield. Gray PVC jacket overall. This type of shielding provides 100% effective shielding and is suitable for audio and data work where cross talk must be reduced to a minimum. **Temperature rating:** −20°C +60°C. **Operating voltage rating:** 400 V.

HEAT SHRINKABLE TUBING STYLE ST-150 AND ST-301

STYLE ST-301 POLYOLEFIN HEAT SHRINKABLE TUBING TO MIL-I-23053B/5, U.L. APPROVED

Dearborn Style ST-301 Heat Shrinkable Tubing is an irradiated, thermally stabilized, polyolefin product which meets or exceeds MIL-I-23053B/5, AMS 3636B and AMS 3637B. ST-301 shrinks to 50% of diameter at 121°C (250°F) in 7 seconds, and has an operating temperature range of −55°C (−67°F) to +135°C (+275°F).

MIL-I-23053/5 — CLASS I (COLORED INSULATION)

MIL-I-23053/5 — CLASS II (CLEAR INSULATION)

All sizes are shown and supplied in expanded inside diameters. Stock Colors: Black, Red, White and Clear. Clear is Non-Flame Retardant. All other colors are Flame Retardant under MIL-I-23053B/5. Additional colors available on special order. Supplied in either 4 Ft. or 6 Inch lengths, and 6 Inch Assortments. Suitable for all military applications as well as industrial and commercial uses.

STYLE ST-150 HEAT SHRINKABLE TUBING

Dearborn ST-150 is an irradiated polyolefin heat shrinkable tubing which provides heat and environmental characteristics superior to that of vinyl. Suitable for industrial, electronic, electromechanical and electrical uses and applications. Operating Temperature Range: −35°C to +135°C. Flame retardant; flexible. Supplied in coils. Put-ups available vary with size, so check the table. Stock color: Black Only. Also available from stock in 6 Inch assortments.

UNSHIELDED MULTICONDUCTOR COMMUNICATION COIL CORDS

All Conductors No. 23 21/36 T.C.

Special long life plastic jacket, very flexible. Maximum working voltage: 120 volts. Current carrying capacity: 1 ampere. Nominal conductor resistance: .022 OHMS per linear ft., .185 OHMS per retracted ft.

2 ft. retracted cord extends to 12 ft. 4 ft. retracted cord extends to 25 ft.

For use in communications equipment, mobile units, head sets, CB units, microphones, musical instruments, etc.

DEARBORN

COMPUTER TYPE CONTROL CABLES MINIATURE/STYLES 2343 AND 2344

The cables listed below, either cabled pairs or multiconductor (not paired), with or without shield are suited for computer use.

The individual conductors are stranded tinned copper Numbers 22, 24 are 7 strand, No. 20 is 19 strand. Insulated with .010" wall of PVC to MIL-W-16878D Type B. On this usage, conductors are rated 105°C and 600 V. working voltage. The conductors also meet UL Style 1061, rated 80°C, 300 V. working voltage.

Conductors are cabled by the planetary method and laid contra-helically for best flexibility, with a Mylar tape barrier placed under shields. All shielded cables are of tinned copper braid overall of 85% - 90% coverage per MIL-C-7078.

The jacket over the shield is black 105°C Vinyl per MIL-I-631 Type F. All materials are fungus resistant and self extinguishing.

All items approved under UL STYLE 2343 or 2344* for computer usage: +80°C, 300 Volts. On non-UL service can be used at 40°C to +105°C, 600 Volts.

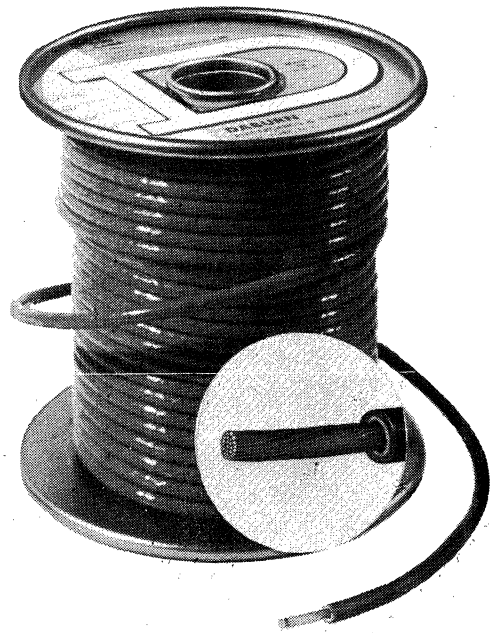
NEW

HI-VOLT CORONA RESISTANT TEFLON* CABLE

Voltage Rating at Sea Level • Voltage Rating at 80,000 feet, approximately 1/3 lower • Minimum life expectancy: 10,000 hours.



SMALL SIZE:
You do not need bulky, thick insulation jacketing as used with silicone rubber and polyethylene insulations to get your hi-voltage requirements. Wire used is MIL-SPEC QQ-W-343 and MIL-W-16878D. Insulation used conforms and surpasses MIL-SPEC-W-16878D.

AVOID CORONA PROBLEMS:
Corona resistant Teflon construction is specifically designed to retard and prevent corona penetration.
Temperature variations from −60°C to +300°C have no life effect on the corona resistant Teflon. In addition, there is no stress or crack failure under severe, adverse conditions including mechanical strain, moisture, corona or chemical conditions.

DESCRIPTION:
Single Conductor, Stranded Silver Plated Copper, Corona Resistant Teflon* Insulation.

TEMPERATURE RATING:
−90°C to +250°C.

VOLTAGE RATING:
Based on insulation thickness.

AVAILABLE COLORS:
White, Black, Red, Green, Yellow, Lt. Blue, Brown, Orange, Gray, Violet. (Also available in tracer colors)

PUT-UP: 250′, 500′, 1000′

*DUPONT

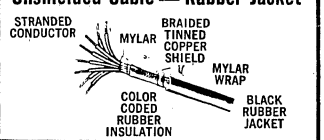
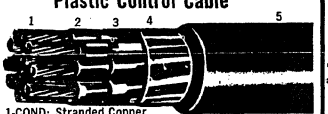
ELECTRONIC WIRE AND CABLE-COMMUNICATION-INSTRUMENTATION-CONTROL

- THE MOST EXTENSIVE INVENTORY OF ELECTRONIC WIRE AND CABLE AVAILABLE IMMEDIATELY FROM STOCK . . . THE PROPER CABLE FOR YOUR SPECIFIC APPLICATION.
- SEVEN REGIONAL STOCKING CENTERS THAT PROVIDE 24 HOUR DELIVERY ANYWHERE IN THE CONTINENTAL UNITED STATES.
- MULTI-CONDUCTOR CABLES CUT TO YOUR EXACT REQUIREMENTS MINIMIZING WASTE AND UNNECESSARY HANDLING. THESE CABLES ARE ALSO AVAILABLE FROM STOCK IN LONG CONTINUOUS LENGTHS.

CIC-R
Shielded Cable — Rubber Jacket
Unshielded Cable — Rubber Jacket

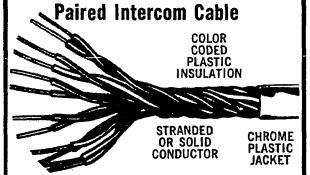


CIC-PT
Plastic Control Cable

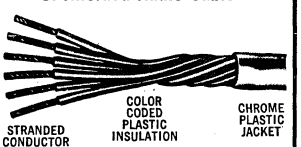


1-COND: Stranded Copper
2-COND: INSUL: 20 Mils PE
3-COND: SHEATH: 10 Mils PVC
4-CABLED: Tape
5-SHEATH: PVC

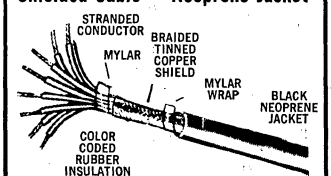
CIC-PIC
Paired Intercom Cable



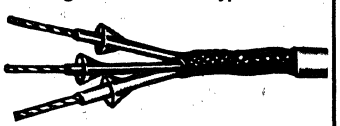
CIC-UAC
Unshielded Audio Cable



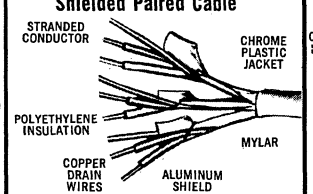
CIC-N
Shielded Cable — Neoprene Jacket



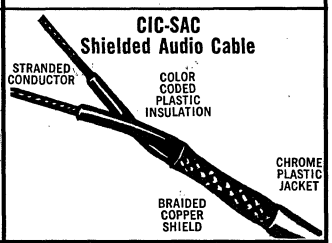
CIC-M
Multi-Conductor Shielded Cable
Type B/N-600V — MIL-W-16878D
Single Conductor — Type C



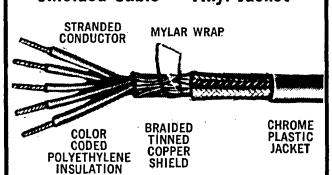
CIC-SPC
Shielded Paired Cable



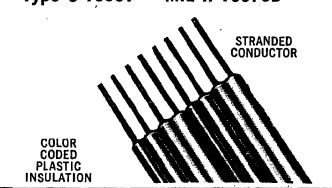
CIC-SAC
Shielded Audio Cable



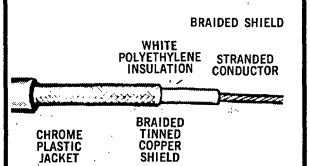
CIC-V
Shielded Cable — Vinyl Jacket



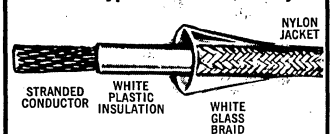
CIC-RIB — Flat Ribbon Cable
Type C-1000V — MIL-W-16878D



CIC-MIC — Microphone Cable
Shielded 1 and 2 Conductor



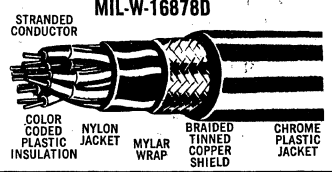
CIC-AN
Aircraft Wire — MIL-W-5086A
Jacket — Type I — Clear Nylon
Type II — Glass Braid Nylon



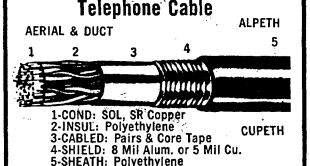
CIC-MSO
Neoprene Control Cable

1-COND: Flexible Copper
2-COND. INSUL: RHW
3-CABLED: Jute Fillers & Separator
4-SHEATH: Neoprene

CIC-MCC — Shielded Control Cable — MIL-W-16878D

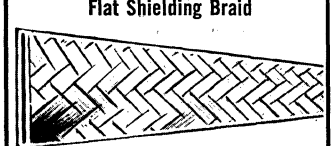


CIC-REA
Telephone Cable

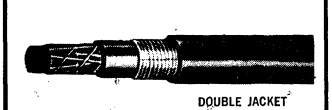


1-COND: SOL, SR Copper
2-INSUL: Polyethylene
3-CABLED: Pairs & Core Tape
4-SHIELD: 8 Mil Alum. or 5 Mil Cu.
5-SHEATH: Polyethylene

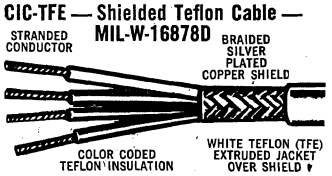
CIC-FB
Flat Shielding Braid



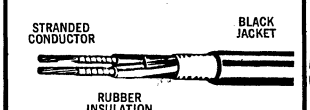
CIC-TLM
Telemetering Control Cable



CIC-TFE — Shielded Teflon Cable — MIL-W-16878D



CIC-PC — Portable Cords — UL Listed & Labeled



CIC-TB
Tubular Braid — QQ-B-575A

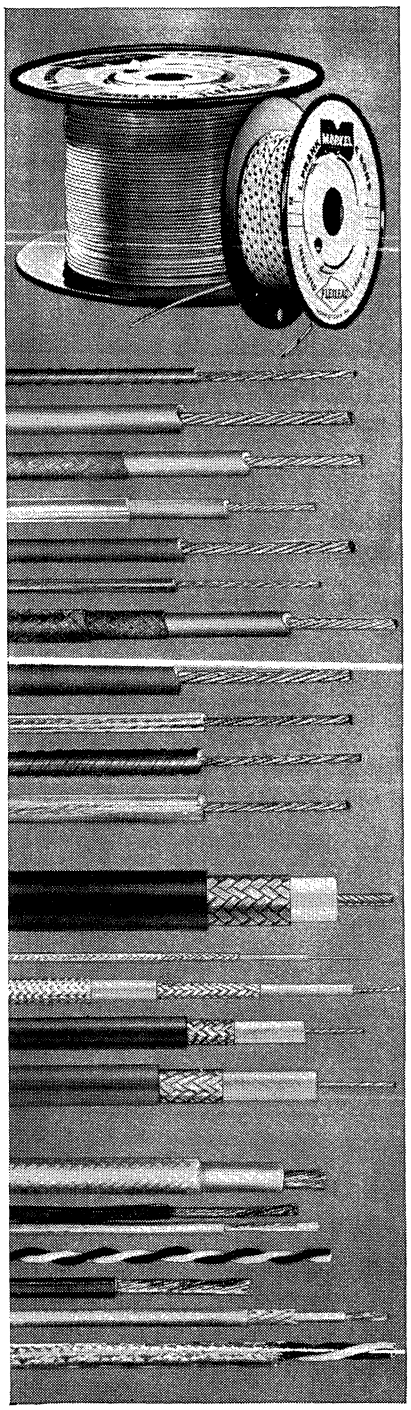
Insulating Tubings and Sleevings- High Temperature Wire and Cable



FLEXLEAD®

High temperature Wire and Cable insulated with Teflon (TFE or FEP) or silicone rubber. You can select a numbered FLEXLEAD type listed below, or let Markel quote, to your specifications, on a custom FLEXLEAD construction.

MIL-W-16878D

Type E—600 v. Stranded silver-plated copper insulated with extruded DuPont Teflon TFE
Type E—600 v. Stranded silver-plated copper insulated with wrapped and sintered Teflon TFE tape
Type EE—1000 v. Stranded silver-plated copper conductor insulated with extruded Teflon TFE
Type EE—1000 v. Stranded silver-plated copper insulated with wrapped and sintered TFE tape
Type ET—300 v. Stranded silver-plated copper conductor insulated with extruded Teflon TFE
Type ET—300 v. Stranded silver-plated copper insulated with wrapped and sintered TFE tape
Type K—600 v. Stranded silver-plated copper conductor insulated with extruded Teflon FEP
Type KK—1000 v. Stranded silver-plated copper conductor insulated with extruded Teflon FEP
Type KT—300 v. Stranded silver-plated copper conductor insulated with extruded Teflon FEP
Type F—600 v. Stranded tin-coated copper conductor insulated with extruded silicone rubber
Type F—600 v. Same as Type F above, jacketed with silicone resin-impregnated fiberglass braid
Type FF—1000 v. Stranded tin-coated copper conductor insulated with extruded silicone rubber
Type FF—1000 v. Same as Type FF above, jacketed with silicone resin-impregnated fiberglass braid

U/L APPROVED

Extruded Teflon Wires, sizes 10-28 AWG; 80°C to 200°C ratings; 300 and 600 volt ratings: U/L Style Nos. **1164, 1180, 1198, 1199, 1212, 1213, 1226, 1227, 1292, 1371.**

Extruded Silicone Rubber Wires, various constructions, with and without fiberglass jackets; sizes 10-32 AWG; 150°C and 200°C ratings; 300 and 600 volt ratings: U/L Style Nos. **3066, 3067, 3068, 3069, 3070, 3071, 3074, 3075, 3101, 3113, 3122, 3123, 3132, 3133, 3134, 3135, 3136, 3137, 3138, 3139, 3140, 3141, 3142, 3143, 3144, 3145, 3180, SF-1, SF-2, SFF-1, SFF-2. 3211, 3212, 3213, 3214, 3215, 3216, 3239(HVS), 5031, 5032.**

Ask for data sheets, prices, and samples of these FLEXLEAD wire constructions

FLEXLEAD Coaxial Cables. Markel manufactures a complete line of both standard and special RG/U coaxial cables. In accordance with specifications, types are available with silver-plated copper, plated or unplated copper-covered steel, or bare copper center conductor; one or two braided shields; tape-wrapped Teflon shield guards; and outer jacketing of impregnated fiberglass braid or Teflon (extruded or tape-wrapped). For complete data, ask for a FLEXLEAD Coaxial Cable Specifications folder.

FLEXLEAD Special Constructions. Because wiring problems cannot always be solved with standard materials, Markel's capacity for engineering high temperature wire and cable constructions to meet particular needs has grown steadily with the demand. We can combine insulations—Teflon, silicone rubber, fiberglass, nylon-shielding, fillers, liners, and jacket materials—with single, twisted pair or multiple conductors—to provide a special cable construction for any temperature range from —90° to 260°C. For more data, ask for a FLEXLEAD Wire and Cable Selector.

FLEXLEAD Fused Twisted Pair. This unique Teflon-insulated twisted pair construction finds wide application in computers and similar circuitry. The fusing, which will withstand predetermined pulls to separate the individual wires, keeps the wires evenly twisted for easier assembly and uniform capacitance and inductance. Ask for a test sample and prices.

FLEXLEAD MB Bondable Teflon. The Markel MB process can be factory-applied to any of the FLEXLEAD Teflon wires, extruded or tape-wrapped, and renders the surface bondable with commonly used elastomeric and epoxy-base potting and encapsulating compounds. Without affecting the color or electrical properties of the insulation, the MB treatment provides a bond with up to 150 psi pull-out strength, and a surface that is receptive to marking and printing.

EXTRA FLEXIBLE

MICRO-MINIATURE CABLES

National Wire & Cable Corp. manufactures a complete line of MICRO-MINIATURE low-voltage instrument control cable. Available as cabled pairs or singles, with optional overall shield.

Conductors are stranded tinned copper with .010″ wall of vinyl primary insulation for use up to 105°C. per MIL-W-16878 Type B, 600 volt working voltage. All are color coded using ten standard colors plus stripes on white per MIL-STD-681.*

Conductors are planetary cabled and helically laid for optimum flexibility, with a barrier under shields. Shielded cables have a tinned copper braid of 85-90% coverage per MIL-C-7078, with braid angles below 40° for easy pushback.

Outer jacket is flexible grey 105°C. vinyl meeting MIL-I-631 Class F. All materials are self-extinguishing and fungus resistant.

STANDARD PUTUPS: 500 and 1000 ft. No-deposit reels.

* Conductors are also UL Listed Style 1061.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage: Greater than 3000 volts AC RMS, 60 cps.

Capacitance: Nominal capacitance from a wire to all else in a cable ranges from 25. to 45 pf/ft at 1. kc. depending on gauge and position.

Insulation Leakage: 200. megohms/1000 ft. min. @ 500. VDC from any conductor to all else in cable.

Sheath Leakage: 10. megohms/1000 ft. min. @ 500 VDC from shield or conductor group through sheath to ground.

Temperature Range: Suitable for continuous use from −40°C. to +105°C.

Bending Characteristics: All cables are suitable for flexing to a circle diameter of 6. cable diameter from +105°C. to −20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at −40°C.

UNDER-WATER CABLES

IN STOCK
DEEP-WATER
MARINE CABLE

National Wire & Cable Corp. manufactures a standard series of multi-conductor marine cables for under-water signal, control and power use. Cables are suitable for depths to 2500. ft.

Stranded conductors have nylon-over-vinyl insulation for 600. volt service; color-coded per MIL-STD-681.

Conductors are planetary cabled and helically laid with water-blocking compound filling interstices between conductors.

Jacket is tough black poly-ether-urethane compound. Highly abrasion resistant. Readily bonds to polyurethane molding compounds.

PUTUPS: 500 and 1000 ft. No-deposit reels. Special lengths to order.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage: Greater than 3000. volts AC, RMS, 60 cps.

Insulation Leakage: 200. megohms/1000 ft min. @ 500. volts DC, from any wire to all else in cable.

Sheath Leakage: 10. megohms/1000. ft min. from conductor group through sheath to seawater.

Temperature Range: From −55°C. to +90°C. use or storage.

Bend Radius: Suitable for bending to a circle diameter of 8 times cable diameter.

MULTIPLE CONDUCTOR CONTROL CABLES

National Wire & Cable Corporation manufactures a complete line of multiple conductor control cable. Conductors are stranded tinned copper with 1/64" wall of vinyl primary insulation for use up to 105°C per MIL-W-16878 Type C.* Insulated for 1000 volts working voltage. Color coded using 10 standard colors plus stripes on white per MIL-STD-681.

All conductors are planetary cabled and contra-helically laid for optimum flexibility, with a Mylar tape serve over cable bundle. Shielded cables have a tinned copper braid overall, of 85-90% coverage per MIL-C-7078, and braid angles below 40 for easy pushback.

The outer jacket is black abrasion-resistant 105°C vinyl meeting MIL-I-631 Class F. All materials are self-extinguishing and fungus resistant. All cables are U. L. LISTED STYLE 2343; rated 80°C. (Higher temp. ratings apply to any non-U.L. service.) Specify polyurethane sheath for extreme rough usage or low-temp. service.

STANDARD PUTUPS: 100 ft, 500 ft or 1000 ft. No-deposit reels.

* Insulated wires also meet U.L. style 1007 and CSA type TR-64.
† Denotes U.L. Style 2344.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage: Greater than 8000 volts AC RMS, 60 cps.

Capacitance: Nominal capacitance from a wire to all else in the cable ranges from 40 to 65 mmfd per ft., @ 1000 cps; dependent on gauge and position.

Insulation Leakage Res.: 200. megohms/1000 ft. min. at 500 VDC from any conductor to all else in cable.

Sheath Leakage Res.: 10. megohms/1000 ft. min. at 500 VDC from overall shield through sheath to outside world.

Usable Temp. Range: Suitable for continuous use from +105°C to −55°C.

Cold Bending Capability: All cables are suitable for flexing to a circle diam. of approx. 6 cable diameters from +105°C to −20°C; Recommended flex diameter should be greater than 20 cable diam. for flexing at −40°C., or for continuous flexing service to −55°C, specify polyurethane sheath, in lieu of vinyl sheath.

MULTI-CONDUCTOR STOCK CABLES

Conductor sizes 22, 20, 18, 16, 14 & 12 gauge. 22 AWG is 7 strand. All others 19 strand.

MULTIPLE PAIR SIGNAL & CONTROL CABLES

IN STOCK
MIL-SPEC

Identical to National's NW-Series Cables except offered as twisted pairs.

National Wire & Cable Corporation manufactures a complete line of multiple pair control cables. Conductors are of tinned copper strand with 1/44" vinyl primary insulation for use up to 105° C per MIL-W-16878D Type C. Insulated for **1000** volts working voltage. Conductors are color coded using 10 standard basic colors, plus spiral tracers on white per table below.

All pairs are planetary cabled and contra-helically laid with a Mylar tape serve over the cable bundle. The overall jacket is a 105°C black vinyl plastic per MIL-I-631; or may be Neoprene to MIL-R-6855 Class 2 Grade 60 specification. (Neoprene at added cost).

SHIELDED CABLES

National Multiple Conductor SHIELDED CABLES are to the same specifications as above with addition of tinned copper braided shield over cable complex with 85-90% coverage to MIL-C-7078A. STANDARD PUT-UPS: 500 ft. and 1000 ft. No-deposit reels.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage:	Greater than 8,000 volts AC RMS, 60 cps.
Capacitance:	Nominal capacitance wire to wire for a pair ranges from 27. to 40. mmfd/ft. Capacitance from both wires tied together measured to all else in common ranges from 35. to 60. mmfd/ft. dependent on gauge and position. Overall shield has negligible effect on W-W capacitance.
Insulation Leakage Res.:	200. megohms / 1000 ft. min. at 500 VDC from any conductor to all else in cable.
Sheath Leakage Res.:	10. megohms / 1000 ft. min. at 500 VDC from overall shield through sheath to outside world.
Usable Temp. Range:	Suitable for continuous use from +105°C to −55°C.
Cold Bending Capability:	All cables are suitable for flexing to a circle diam. of approx. 6 cable diameters from +105°C to −20°C; Recommended flex diameter should be greater than 20 cable diam. for flexing at −40°C., or for continuous flexing service to −55°C, specify our neoprene sheath, in lieu of plastic sheath.

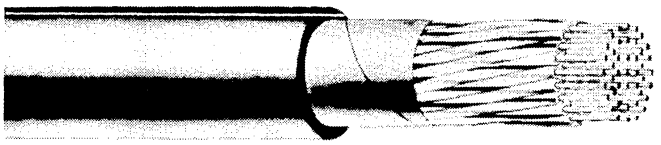
NATIONAL WIRE & CABLE CORPORATION



IN STOCK
U.L. APPROVED COMPUTER GRADE

MINIATURE SIGNAL & CONTROL CABLES

National Wire & Cable Corp. manufactures a complete line of MINIATURE low voltage signal and control cable. Available as cabled pairs or cabled singles, with optional overall shield. Conductors are stranded tinned copper with .010" wall of vinyl primary insulation for use up to 105°C. per MIL-W-16878 Type B. Insulated for **600 volts** working voltage. (Also meets U.L. AWM Type 1061; 300 volt, 80°C.) All are coded using 10 standard colors plus stripes on white per MIL-STD-681.

All conductors are planetary cabled and contra-helically laid for optimum flexibility, with a Mylar tape barrier under shields. Shielded cables have a tinned copper braid overall, of 85–90% coverage per MIL-C-7078; and braid angles below 40° for easy pushback.

The outer jacket is black abrasion-resistant 105°C. vinyl meeting MIL-I-631 Type F. All materials are self-extinguishing and fungus resistant. All items are U.L. APPROVED STYLE 2343 COMPUTER CABLE; rated 80°C. (Higher temp. ratings apply for any non-U.L. service.)

Standard Putups: 500 & 1000 ft. No-deposit reels.

† Denotes U.L. Style 2344.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage:	Greater than 5000 volts AC RMS, 60 cps.
Capacitance:	Nominal capacitance from a wire to all else in a cable ranges from 45. to 70. pf/ft at 1. kc, depending on gauge and position.
Insulation Leakage:	200. megohms/1000 ft. min. @ 500. VDC from any conductor to all else in cable.
Sheath Leakage:	10. megohms/1000 ft. min. @ 500 VDC from shield or conductor group through sheath to ground.
Temperature Range:	Suitable for continuous use from −40°C. to +105°C. (U.L. Service limited to +80°C.)
Bending Characteristics:	All cables are suitable for flexing to a circle diameter of 6. cable diameters from +105°C. to −20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at −40°C.
Impedance: (24. AWG pairs)	Balanced: 87. ohms ±5% Unbalanced: 52. ohms ±5%

MULTI-CONDUCTOR STOCK CABLED SINGLES

Cond: 22, 24 are 7 strand; 20 AWG is 19 strand

NATIONAL WIRE & CABLE CORPORATION

MILITARY & U.L. GRADE RFI SHIELDED PAIR CABLES

MEETS U.L. STYLE 2343 OR 2344 FOR COMPUTER USE.

SHIELDED PAIR CABLES

SIGNAL & CONTROL CABLES

National Wire & Cable Corp., manufactures a complete line of flexible multi-pair cables in which each pair is individually twisted, shielded and plastic-jacketed.

Provides a minimum of crosstalk between signal channels, plus complete isolation between shields. Excellent for analog signals. All jackets moisture-proof. Suitable for use in duct, conduit, aerial or burial installations.

Conductors are stranded tinned copper with .010″ vinyl primary insulation, plus .004″ nylon insulation over the vinyl per MIL-W-16878 Type B. Insulation for 600 volts working rating at 105°C. Color coded: White and black (all conductors are 19 strand.)

Shielding is tinned copper braid with 90% minimum coverage per MIL-C-7078, and shield angle below 40 degrees for easy push-back.

Jackets over shields are extruded 105°C white polyvinyl chloride plastic per MIL-I-631, Class F; Color coded with stripes per MIL-STD-681, starting with 9.

All pairs are planetary cabled and contra-helically laid with a mylar tape serve over the cable bundle. The overall sheath is abrasion-resistant black 105°C vinyl thermoplastic per MIL-I-631, Class F.

Optional overall shielding of cabled bundle is 90% minimum coverage of tinned copper braid applied per MIL-C-7078 over the tape serve under sheath.

STANDARD PUT-UPS: 500 & 1000 FT. ON NO-DEPOSIT REELS.

TECHNICAL DATA

Insulation Breakdown Voltage: Greater than 5000 volts RMS, 60 hz.

Capacitance: (mmfd/ft.)

AWG	Wire-Wire	Wire-Shield
22	37	64
20	44	77
16	55	96

Insulation Leakage Resistance: 200 Megohms/1000 ft. min. at 500 VDC from any conductor to all else in cable.

Sheath Leakage Resistance: 10 Megohms/1000 ft. min. at 500 VDC from overall shield through sheath to saline bath at 25°C.

Usable Temperature Range: Suitable for continuous use from +105°C to −55°C when stationary. Flexing service: +105°C to −25°C.

Cold Bending Capability: All cables are suitable for bending to a circle diameter of 8 cable diameters from +105°C to −20°C. Recommended flex diameter should be greater than 20 cable diameters at −40°C.

Crosstalk: Common-mode, adjacent pairs: Worst case, −50 db @ 1 mhz; falling to −100 db below 100 khz. (Ref. MIL-C-23437 for test method.) For 100 ft. test length.

MIL-SPEC FOR ROUGH USAGE & EXTREME ENVIRONMENTS

TEFLON® -INSULATED CABLES

SIGNAL & CONTROL CABLES

National Wire & Cable Corp., manfactures a standard line of TEFLON®-INSULATED multi-conductor signal and control cables designed for extreme environments and rough usage.

Construction is widely used in aerospace and industrial applications requiring a near-ultimate in cable physical and electrical performance plus high reliability.

Conductors are stranded silver-plated copper, insulated with .010″ of extruded TFE Teflon®; rated at 600 volts working from −65°C to +260°C per MIL-W-16878 Type E. Conductors are color coded using 10 standard colors plus spiral stripes on white per MIL-STD-681. (All conductors are 19 strand.)

All conductors are planetary cabled and contra-helically laid for optimum flexibility, with a Mylar tape wrap over the cabled bundle. The outer sheath is abrasion-resistant black Neoprene per MIL-S-6855, Class 2, Grade 60.

Optional overall shield is a 90% coverage tinned copper braid over the tape wrap per MIL-C-7078.

STANDARD PUT-UPS: 250 FT. LENGTHS ON NO-DEPOSIT REELS.

® Trademark, E. I. Dupont Co.

TECHNICAL DATA

Insulation Breakdown Voltage: Greater than 4000 volts RMS, 60 hz.

Capacitance: Nominal capacitance from a wire to all else in cable ranges from 25 to 45 mmfd/ft. dependent on gauge and position in cable bundle.

Insulation Leakage Resistance: 5000 Megohms per 1000 ft.; minimum from any wire to all else in cable.

Sheath Leakage Resistance: 20 Megohms/ft. minimum; from shield through sheath to saline bath after 24 hr. at 25°C.

Usable Temperature Range: Suitable for continuous use from −55°C to +75°C in flexing service or stored.

Cold Bending Capability: All cables are suitable for bending to a circle diameter as small as 4 times their diameter from −55°C to +75°C. Continuous flexing to less than 6 times diameter is not recommended below −40°C.

General Performance: All materials are self-extinguishing after exposure to flame. Non-nutrient to fungus. Highly resistant to ozone, oils, mild acids and bases, high humidity.

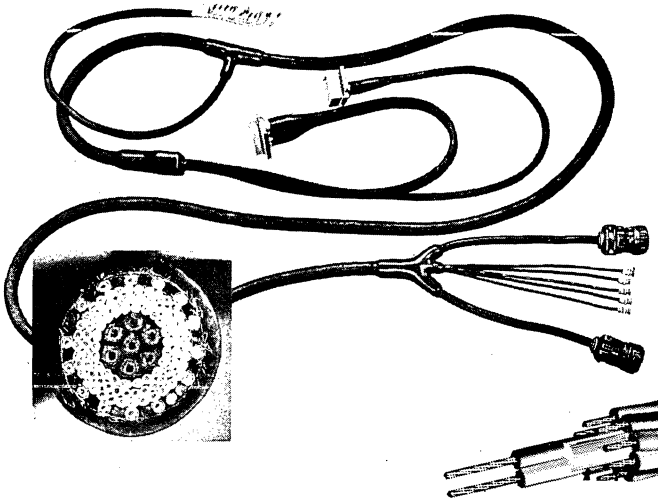
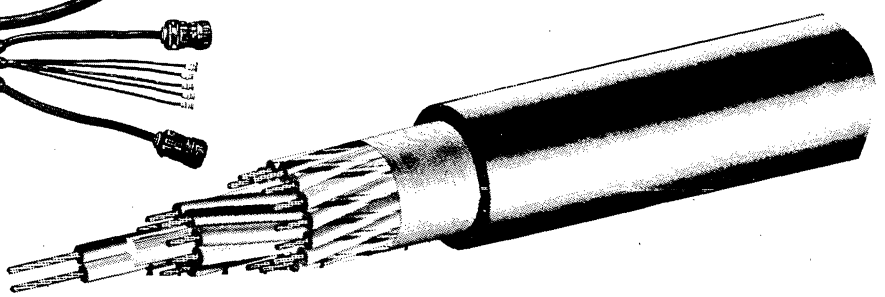
NATIONAL WIRE & CABLE CORPORATION

136 SAN FERNANDO RD., LOS ANGELES, CALIF. 90031 • PHONE (213) 225-5611 • TWX: 910-321-4155 • FED. STOCK CODE H4-04569



COMPLETE WIRE MILL & CABLE MILL FACILITIES TO MEET YOUR NEEDS



CUSTOM-MADE CABLE TO YOUR OWN SPECIFICATIONS....

IS AVAILABLE PROMPTLY – AND AT LOWER COST THAN YOU MAY SUPPOSE . . .

BECAUSE NATIONAL HAS:

1- **The organization & experience** to handle short-runs or rush schedules with consistent quality.

2- **All types of mill machinery** for fabricating cable and all intermediate operations.

3- **An enormous wire inventory** to draw from for material for your cable. (over 100 million feet in stock)

4- **Technical consultants** to aid you in properly specifying your cable needs and construction.

Mr. DESIGNER: May we suggest:

A. **Request a copy of our complete Master Catalog. Write to us on your company letterhead, or phone us directly in Los Angeles with your request**
Then . . .

B. Check our catalog section and the instrumentation cable section for any of our standard stock cables which may meet your needs.

C. Review our cable designer's check list in the "Technical Information" section of the Master Catalog. Note any topics on which you may need information or recommendations.

D. Call National Wire & Cable Corp. (213-225-5611) and discuss your needs with our Technical Consultants. They speak your language and will have the answers you need.

E. Our Consultants will assist you in design, obtain cost and delivery information, and provide formal quotations and drawings, and assist with sales and procurement liaison.

F. Send us your prints for your custom cables for review and quotation. Where necessary, National Wire and Cable will provide engineering at no cost to fit your needs.

TRY OUR SERVICE, AND SEE!

NATIONAL WIRE & CABLE CORPORATION IS UNIQUE AMONG THE LEADING MANUFACTURERS OF CONTROL AND INSTRUMENTATION CABLE FOR THE ELECTRONIC AND AEROSPACE INDUSTRY. UNIQUE, DUE TO OUR HUGE WIRE INVENTORY – OVER 100 MILLION FEET IN STOCK – WHICH ALLOWS VERY RAPID DELIVERY OF CABLE, AND EXCELLENT SERVICE TO OUR WIRE CUSTOMERS.

COMPLETE FACILITIES FOR FABRICATING ALL CONSTRUCTIONS.

COPPER CONDUCTOR FABRICATION
CONDUCTOR INSULATION EXTRUSION
INSULATION CODING & STRIPING
ELECTRICAL SHIELDING
TWISTING & SUBCABLE FABRICATION
PLANETARY CABLE FABRICATION
CABLE SHEATH EXTRUSION
CABLE ASSEMBLY FABRICATION

DIGITAL DATA TRANSMISSION CABLES

Manufactured by our affiliate, Dynatronic Cable Engineering Corp.

THE D-200 SERIES CABLES ARE MULTIPLE-PAIR FLEXIBLE CABLES DESIGNED FOR TRANSMISSION OF DIGITAL PULSE SIGNALS BETWEEN A COMPUTER AND ITS PERIPHERAL EQUIPMENT.

These cables are specifically designed for use with TTL, ECL, DTL or RTL logic systems. They feature signal pairs with a uniform high surge impedance, low delay, low capacitance and attenuation.

The cables may be directly driven by I.C.'s in either balanced or single-ended systems. The compact cable dimensions allow convenient connector installation and tight installation bends.

All cables have an overall shield and black vinyl outer sheath.

The D-200 series cables are designed to be used in either balanced or single-ended systems without the need for individual shields on each pair. By omitting the shields, the surge impedance is kept high yet the cable size is small. The cable geometry, pair and layer lay lengths, rotation directions, and the insulation materials and sizes have been carefully designed for low cross-talk and exact surge impedance.

All cable lengths are factory-tested for surge impedance accuracy using time-domain reflectometry techniques; and are certified to meet the impedance tolerances specified.

STANDARD DATA CABLE CONSTRUCTIONS

Part No.	No. of Pairs	Z_0	Delay ns/ft.	Cond. AWG	Cable Diam.	Sheath
D-200-15	15	110.	1.61	24	.500	PVC
D-200-20	20	110.	1.61	24	.550	PVC
D-200-24	24	110.	1.61	24	.680	PVC
D-200-27	27	110.	1.61	24	.690	PVC
D-200-30	30	110.	1.61	24	.710	PVC
D-200-33	33	110.	1.61	24	.750	PVC
D-200-42	42	110.	1.61	24	.850	PVC
D-200-48	48	110.	1.61	24	.890	PVC
D-200-50	50	110.	1.61	24	.910	PVC

All items available in 50 ft. multiples.

TECHNICAL DATA

Characteristic	Balanced**	Single-Ended*
Surge Impedance	110 ohms ±5%	78 ohms ±4%
Capacitance	14 pf/ft.	21 pf/ft.
Signal Delay	1.61 ns/ft.	1.61 ns/ft.
DC Resistance/100 ft.	5.6 ohms loop	2.8 ohms
Insulation Breakdown	6 KV min. DC	6 KV min. DC
Insulation Resistance	> 1000 megohms/M′	> 1000 megohms/M′
Temperature Range	−20°C up to +80°C	
Min. Bend Radius	6 x cable diameter	

* One conductor of each pair tied to common. ** Both driven, one inverted.

DESIGN FEATURES OF THE D-200 SERIES DIGITAL DATA CABLE

Unlike conventional flexible cable construction, the primary features offered by the D-200 series data cable are the high and accurately-controlled characteristic impedance of every pair, regardless of its position in the cable;† and special geometry chosen to reduce crosstalk.†

ADVANTAGES:

1—Less crosstalk and noise from mismatched loads, due to proper matching.

2—Uniform light loading on drivers allows direct I.C. drive, accurate prediction of current demands from power supply, and driver power dissipation.

3—Proper load match reduces re-reflection and inversion noise where driver end is not matched to line (typical of TTL).

4—Special geometry and pair construction provides exceptionally close capacitance balance between pair wires, reducing differential crosstalk.†

USAGE:

We recommend use of **balanced drive** and **differential-input line receivers** for lowest crosstalk and best pulse-reproduction, utilizing the 110 ohm balanced impedance of the pairs. With such a system, TTL and MECL speeds have been used on D-200 cable at 1 mc data rates over 1000 ft.

Where the system is single-ended drive and receive, all pairs exhibit the 78 ohm impedance. Since these line receivers cannot discriminate between noise and the desired signal, crosstalk limits the cable distance over which transmission is reliable. Typical runs for DTL having 50 ns risetimes are 200 ft. Where risetimes can be slowed to longer than 100 ns, run lengths are practical to 500 ft. Without differential line reception, runs over 500 ft. are not recommended for D-200 cable due to external noise aspects. The **D-210** series cable is recommended for high-noise or long-run application (utilizing individual shields).

† Patent pending

Although use of balanced drive and differential line reception will avoid most noise problems, there are some installations where the expected external noise is unknown but assumed to be very great. Here, the use of data cables having individually-shielded pairs may be considered as conservative engineering practice. The assurance of a lower received noise may justify the increased size, cost and risetime.

For these high-noise long-run applications, Dynatronic Cable Engineering Corp. has developed the D-210 series data cables. Electrical performance is essentially the same as the D-200 series cables, which use only an overall shield. An overall tinned-copper shield braid may be specified on either series by the suffix -RF on the part number. Standard D-200 shield is aluminum-mylar foil.

STANDARD DATA CABLE CONSTRUCTIONS

D-210 Series Cables			Individually-shielded Data Pairs			
Part No.	No. of Pairs	Z_0	Delay ns/ft.	Cond. AWG	Cable Diam.	Sheath
D-210-12	12	110.	1.61	24	.980	PVC

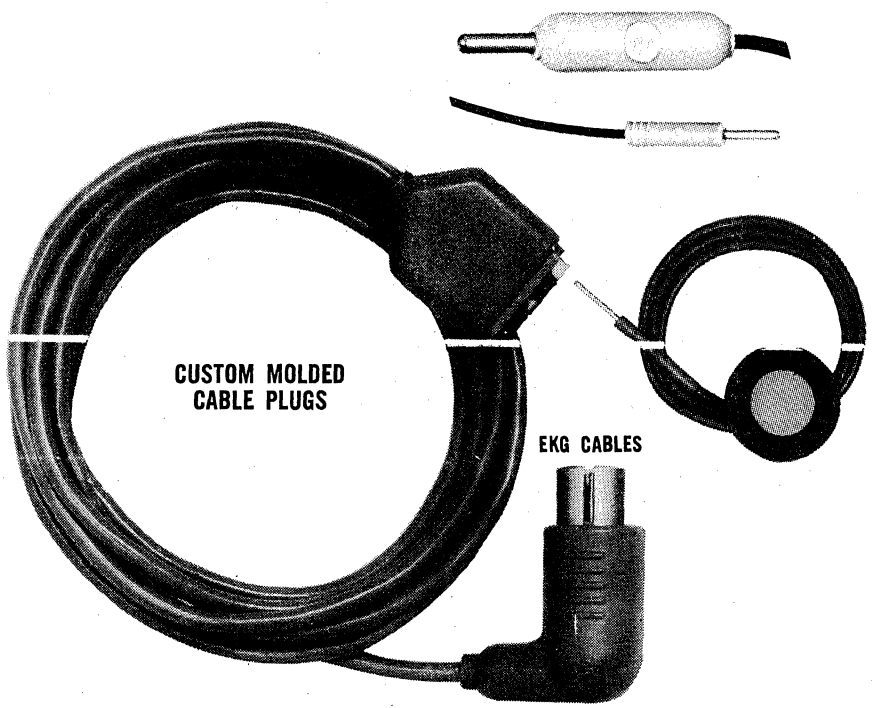
CONNECTOR/CABLE ASSEMBLIES — INTEGRAL-MOLDED

WE SPECIALIZE IN HI-SPEED INJECTION-MOLDING OF CONNECTORS DIRECTLY ONTO CABLES.

Connectors Are Created Directly on Cable by Injection of Plastic Around Contacts, Cable & Hardware; Using Our Proprietary High-Production Techniques.

WE MANUFACTURE:

- MOLDED TEST LEADS
- MOLDED SCOPE PROBES
- MOLDED MEDICAL CABLES
- MOLDED ELECTRODES
- MOLDED CORD CONNECTORS
- MOLDED PATCH CABLES
- MOLDED COMPUTER PLUGS
- MOLDED CABLE ASSEMBLIES



WE ARE A COMPLETE SOURCE:

MANUFACTURING: Since we manufacture all wire, cable, contacts, hardware, molding and tooling within our own facilities, we can ensure consistent quality and dependable delivery. Complete wire & cable mill plus injection-molding plant.

STANDARD ITEMS: We have many standard cables and molded connector styles; all available without tooling or setup expense.

ENGINEERING: Complete engineering and design services to assist you. Cables and molded connectors custom-designed to your requirements. Extra-flexible and low-capacitance construction are our specialty.

Each of the three volumes of **eem** contains a Product Index and Directory, the Green Section. This Index is a complete alphabetical listing of products. If the product you are looking for appears in the particular volume you are consulting, the green pages will provide a complete list of manufacturers who make that product. If the product is included in another volume of **eem**, the Index will provide a cross reference, directing you to the correct volume.

Boldface listings under product headings indicate that the listed manufacturer has products cataloged in **eem. Boldface** listings with page numbers indicate that this manufacturer's catalog pages include detailed data on the product indicated in the product heading.

Similar products are grouped together. For example, the many kinds of meters are listed in this manner: "Meters, Ampere," "Meters, Capacitance," "Meters, Flux" etc. To help you locate the prime product heading, there are hundreds of cross references, e.g. "Voltmeters — See Meters, Volt."

Catalog pages in **eem** are divided into three volumes based on very broad product groupings. These are:

Volume 1 — Test Instruments / Equipment and Systems

Volume 2 — Active Components / Circuit Assemblies / Controls and Drives

Volume 3 — Passive Components / Materials / Hardware

These volumes are further divided into 55 **eem** Product Sections which are assigned individually to the most appropriate volume. Within each of the 55 product sections manufacturers are arranged alphabetically, wherever possible. A complete index of all manufacturers' catalog pages is included in every volume. To locate the catalog pages of a specific manufacturer, refer to this index at the beginning of the white section in any of the three volumes. This index will provide the page numbers you require. In Volume 1, the index begins on page 302, in Volume 2 on page 1274 and in Volume 3, page 2310.

PART NUMBER SYSTEM

Channel Only — Example

E 1.5 x 2 LG 6

Type — 1.5" Wide — 2" High — Light Gray — 6' Long

Cover Only — Example

C 1.5 LG 6

Cover — 1.5" Wide — Light Gray — 6' Long

Color Code:
Dark Gray (DG);
Light Gray (LG);
White (WH).

Order by Total No. of Ft. Req'd. (must be multiple of length per part). Standard Mounting Holes: No Charge — Supplied Only if Specified — See Duct Catalog for Dimensions.
NOTE: Standard Length: 6 ft. Standard Color: Light Gray. White and Dark Gray available. NOTE: Type "S" has solid walls and no wire slots or openings.
NOTE: Total length of all sizes of duct and cover, ordered for shipment at one time to one location, determines price columns.

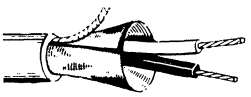
Delivery: F.O.B. Our plant. Minimum Billing: $25.00 net, each customer-designated shipment. Terms: Cash Discount 2%, 10 net 30. FREIGHT ALLOWED via PANDUIT routing on domestic shipments of $300.00 or more net billing. All prices subject to change without notice.

PANDUIT CORP. 17301 Ridgeland Ave., Tinley Park, Ill. 60477 • Phone: 312 — 532-1800 • TELEX 25-4560

SAXTON PRODUCTS INC. is a Complete Source for all Types of Industrial, Commercial and Military Wire and Cable. Listed here are only a few of the Product Groups which Saxton regularly carries in Stock. Many more Stock types are available and countless types can be made to order. We specialize in small quantities and immediate deliveries.

AUDIO CABLES

ALUMINUM FOIL — 100% SHIELDING



Tinned copper, vinyl insulation, aluminum polypropylene foil, tinned copper drain wire, chrome vinyl jacket.

Saxton No.	Conductors No.	AWG	Strands	Wall Thick	Nom. OD	Suggested Working Voltage
1291	2	22	7 x 30	.012	.165	350
1292	3	22	7 x 30	.012	.173	350
1293	2	20	10 x 30	.016	.195	350
1294	3	20	10 x 30	.016	.204	350
1295	2	18	16 x 30	.016	.213	450
1296	3	18	16 x 30	.016	.223	450
1297	2	16	19 x 29	.018	.241	600
1298	3	16	19 x 29	.018	.258	600

1291, 1292 have 24 AWG Drain; 1293, 1294 have 22 AWG Drain; 1295, 1296 have 20 AWG Drain; 1297, 1298 have 18 AWG Drain.
Color Code: 1 - Black, 2 - Red, 3 - White.

BRAID SHIELD — UNJACKETED

TINNED COPPER, VINYL INSULATION, BRAIDED TINNED COPPER SHIELD

Saxton No.	Conductors No.	AWG	Strands	Wall Thick	Nom. OD	Suggested Working Voltage
1445	2	22	Solid	.012	.120	350
1450	2	20	10 x 30	.016	.146	350
1451	2	18	16 x 30	.016	.180	450
1451/R*	2	18	16 x 30	.016	.180	450
1452	2	16	19 x 29	.018	.206	450

1451R — 2 CONDUCTOR SHIELDED WITH 20 AWG SOLID TINNED COPPER RUNNER

* Meets New York City Board of Education Specification.

BRAID SHIELD — JACKETED

TINNED COPPER, VINYL INSULATION, TINNED COPPER BRAID SHIELD, CHROME VINYL JACKET

Saxton No.	Conductors No.	AWG	Strands	Wall Thick	Nom. OD	Suggested Working Voltage
1456	2	20	Solid	.016	.194	350
1458	2	22	7 x 30	.012	.180	350
1459	2	20	10 x 30	.016	.210	350
1459/1	3	20	10 x 30	.016	.217	350
1460	2	18	16 x 30	.016	.225	450

Color Code: 1 - Black, 2 - Red, 3 - White.

SPIRAL WRAP SHIELD — JACKETED

TINNED COPPER, VINYL INSULATION, SPIRAL WRAP TINNED COPPER SHIELD, CHROME VINYL JACKET

Saxton No.	Conductors No.	AWG	Strands	Wall Thick	Nom. OD	Suggested Working Voltage
1400	1	22	7 x 30	.012	.105	350
1401	2	22	7 x 30	.012	.150	350
1403	2	20	10 x 30	.016	.200	350
1404	3	20	10 x 30	.016	.209	350
1406	2	18	16 x 30	.016	.218	450
1407	2	16	19 x 29	.018	.246	450

Color Code: 1 - Black, 2 - Red, 3 - White.

TWISTED PAIRS AND TRIPLETS

SOLID TINNED COPPER, VINYL INSULATION, CABLED

Saxton No.	Conductors No.	AWG	Strands	Wall Thick	Suggested Working Voltage
1318	2	22	Solid	.012	350
1320	2	20	Solid	.016	350
1321	3	20	Solid	.016	350
1322	2	18	Solid	.018	450

Color Code: 1 - Black, 2 - Red, 3 - White.

TINNED COPPER, VINYL INSULATION, CABLED

Saxton No.	Conductors No.	AWG	Strands	Wall Thick	Suggested Working Voltage
1326	2	22	7 x 30	.012	350
1327	3	22	7 x 30	.012	350
1328	2	20	10 x 30	.012	350
1329	3	20	10 x 30	.012	350
1330	2	18	16 x 30	.012	450
1331	3	18	16 x 30	.012	450
1332	2	16	19 x 29	.012	600

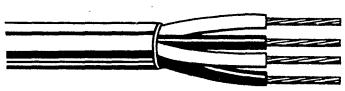
Color Code: 1 - Black, 2 - Red, 3 - White.

FIRE AND BURGLAR ALARM WIRE

One Conductor tinned, one bare, vinyl insulation, cabled brown or ivory.

Saxton No.	Conductors No.	AWG	Strands	Wall Thick
2600	2	22	Solid	.025
2601	2	22	7 x 30	.025
2602	2	20	10 x 30	.025
2603	2	20	10 x 30	.025
2605	2	18	16 x 30	.025

MULTICONDUCTOR CABLES — NOT PAIRED



Saxton No.	Conductors No.	AWG	Strands	Ins. Thick	Nom. OD	Suggested Working Voltage
1370	2	22	7 x 30	.012	.155	200
1371	3	22	7 x 30	.012	.160	200
1372	4	22	7 x 30	.012	.165	200

COAXIAL CABLES

CONDUCTOR AND SHIELD

SBC - solid bare copper; **BC** - bare copper; **SC** - silver coated copper; **TC** - tinned copper; **SBCW** - solid bare copperweld; **BCW** - bare copperweld; **SCW** - silver coated copperweld.

JACKET

PVC - polyvinychloride; **NCV** - non contaminating vinyl; **PE** - polyethylene.

SCCW - silver coated copperweld; **TFE** - polytetrafluoroethylene; **FGB** - fiberglass braid; **FEP** - fluorinated ethylene propylene.
All Shields are braided unless otherwise noted.

DIELECTRIC

PE - polyethylene; **SSPE** - semi-solid polyethylene; **FOAM** - unicellular polyethylene foam.

MIL-C-2486C

CABLE, SPECIAL PURPOSE, ELECTRICAL WM-46/U

This specification covers one type of ten conductors, Buna S insulated and jacketed cable designated as Cable, Special Purpose, Electrical WM-46/U. Eight of the conductors are equivalent to No. 20 AWG, four of which are shielded, and two of the conductors are equivalent to No. 16 AWG, one of which is shielded.

MIL-C-3432D

CABLE AND WIRE, ELECTRICAL (POWER AND CONTROL; SEMI-FLEXIBLE, FLEXIBLE, AND EXTRA-FLEXIBLE, 300 AND 600V)

* CO	02	L G	F-Flexible E-Extra Flexible	2/18	0.250″

L-Light M-Medium H-Heavy G-General Purpose O-Oil Resistant L-Low Temperature

This specification covers light duty, medium duty, and heavy duty, semi-flexible, flexible, and extra-flexible, single-conductor wires and multi-conductor cables, shielded and unshielded, for use in circuits of 300 and 600 volts root mean square (rms). It also covers heavy duty, multi-conductor, unshielded cables containing ground wires. The latter cables are limited to two, three, and four conductors, all of the conductors being of the same size, ranging from No. 500 MCM to No. 8 AWG, inclusive.

WM-85/U	5	0.305 ± 0.010

MIL-C-10392B

CORDAGE

Extra flexible miniature multi-conductor Jacketed cable. Designed primarily for communication equipment, but can be used for voltages up to 300 (rms).

Tinned Cadmium bronze conductors, Buna S insulation, twisted around staycord, with outer jacket of smooth dense Buna. This cable can also be furnished to Addendum #2, using tinned copper conductors. Both constructions are less Paragraph 3.13. (Marking of outer jacket.)

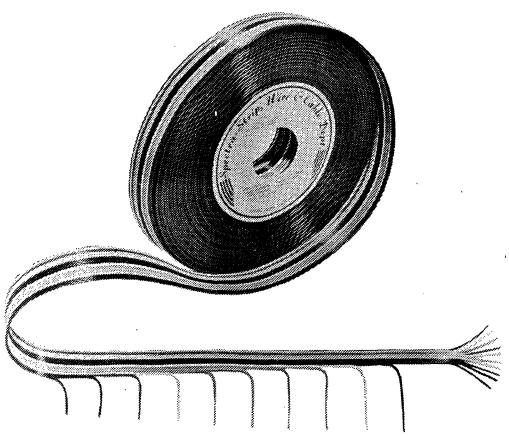
NEW 3C CONTROLLED CHARACTERISTICS CABLE

Spectra-Strip Corporation now offers electronic equipment designers a permanent solution to the problem of predicting and controlling the electrical, electronic and mechanical characteristics of multi-conductor cable.

A new development known as 3C or Controlled Characteristics Cable provides multi-conductor cable with spacing between conductors specified and controlled to tolerances of ±.003 inch.

With this precise spacing, the electronic equipment designer can predict, specify and control capacitance, impedance, reactance, attenuation, transient and thermal noise, and other parameters. The exact spacing also means accurate matching of conductors with connector and circuit board pin arrangements.

Because conductors are at fixed distance apart, 3C Cable means fast, error-free termination with automatic equipment. This new product is available as cable of virtually any length and number of conductors, or as ready-to-install harnesses or IC interconnect assemblies in a wide range of insulation, sizes, styles, and color coding. Some of the standard, widely-used Spectra-Strip ribbon cable products such as Spectra-Flex, twisted pair and coax in XL PVC, TEFLON and other special insulations are available in this new 3C spaced cable.



SPECTRA-STRIP® FLAT RIBBON CABLE*

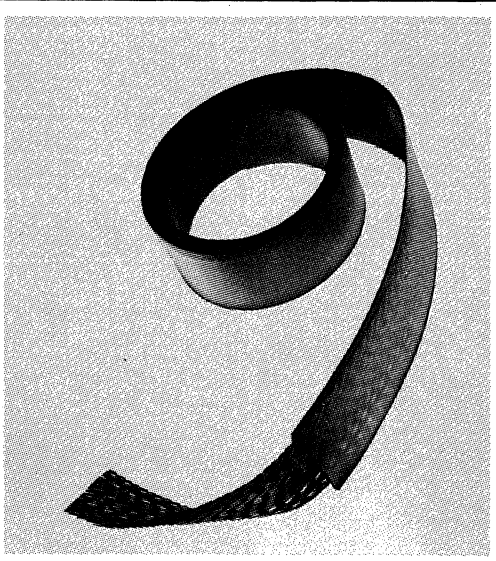
The original and still most popular cable in our line, Spectra-Strip ribbon cable is the general-purpose cable that pioneered the flat bonded ribbon concept in the electronic industry. It is PVC-insulated to meet all requirements of MIL-W-16878D, Types B, C, and D, and is UL approved over a wide range of wire sizes and stranding. Spectra-Strip ribbon cable is usable over an operating temperature range of −55°C to +105°C.

There is practically no limit to the number of conductors, size of conductors, or length of cable that can be assembled. Cabling in stock for immediate delivery ranges from 10 to 40 conductors, 14 to 30 gauge and 7 to 105 strands.

Spectra-Strip ribbon cable is readily available on a standard 10-color code, although special sequences or colors can be furnished. Special cables that can be made up (many from stock) include coaxial, shielded, and twisted pairs.

UL-Approved

Underwriters' Laboratories approval covers Spectra-Strip round conductor flat ribbon cable consisting of 2-100 round wire conductors of 16-28 gauge bonded in ribbon form in cable and harnesses of virtually unlimited length and configuration. Flat ribbon cable consisting of up to 50 twisted pairs of conductors is also covered. Spectra-Strip cable is covered under UL style designation 2444.



NEW JACKETING PROTECTS CABLES FOR A FRACTION OF COST

Stops Moisture, Contamination, Dirt, Abrasion, Other Damage

Spectra-Strip has developed a complete new line of protective jacketing for cable to protect external cables against moisture, contamination, dirt, abrasion, and other damage.

Major use of this new jacketing will be to protect external cabling connecting computer bays, central processors and peripheral devices, and other electronic systems involving multi-conductor cabling between equipment bays.

Money saving price is a major benefit of this new type of cable jacketing, with typical cost pegged at a fraction of the more conventional type protective jacketing.

The jacketing, made from tough PVC, is available in a variety of styles. For example, both sides of the jacketing can be solid, both can be clear or you can have a combination of clear and solid color. And if either or both sides are solid color, choice is available in one of Spectra-Strip's 10 industry-standard colors, the same offered in the company's widely used flat ribbon cable.

The jacketing comes in 15, 20 and 40 mil thicknesses, heavy and tough enough to meet UL requirements for external cable protection, yet pliable enough to accommodate accordion folds and flexing if necessary.

According to Spectra-Strip spokesmen, key to use of their new protective jacketing is pre-planning by the equipment designer with respect to initially specifying external cabling supplied complete with the jacketing.

*U. S. patents 3,006,739; 3,208,896/Gt. Britain 930434/Australia 257318/France 1310622/others pending.

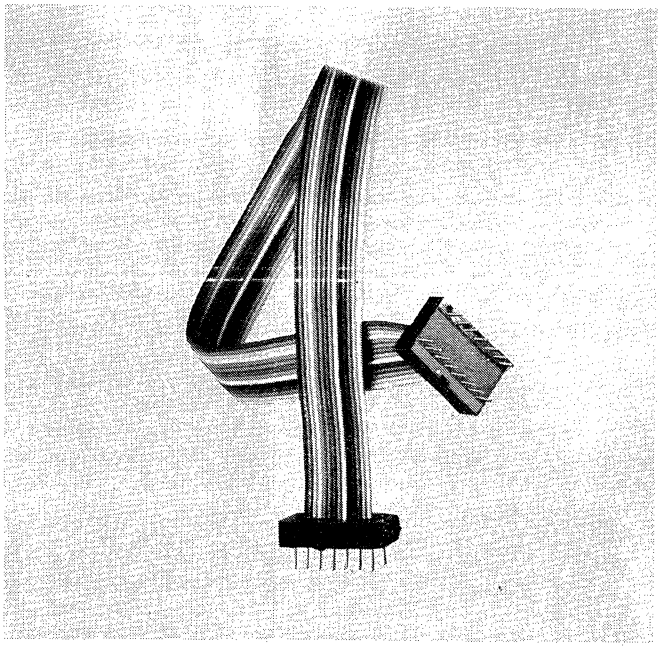
RIBBON CABLE IC INTERCONNECT ASSEMBLIES NOW PRICED LESS THAN $1.00



The cost of interconnecting IC circuitry in computers and other electronic equipment has just come down radically with introduction of Spectra-Strip's interconnect assembly priced less than $1.00.

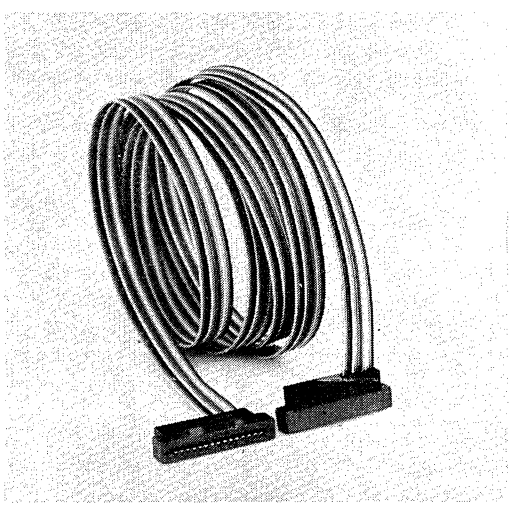
The new price breakthrough offers a 1-foot, 14-conductor cable terminated at one end with a high-reliability 14-pin IC connector and the other end ready for stripping, tinning and whatever termination desired.

Conductors in this new low-cost assembly can be 24 to 30 AWG. PVC is the standard insulation, although many other types are available.

Spectra-Strip's unique IC interconnect assemblies have significantly changed IC circuitry interconnection techniques since their introduction about two years ago. Equipment designers now have a simple, fast and inexpensive method of connecting PC boards, motherboards, backplanes and other IC circuit elements without complicated and costly crossovers.

With the price reduction of the interconnect assemblies now down to less than $1.00 in volume quantities, both the cost and technical advantages of Spectra-Strip's approach to the problem have become obvious.

LOW-PROFILE EDGE BOARD CONNECTOR DESIGN SAVES SPACE



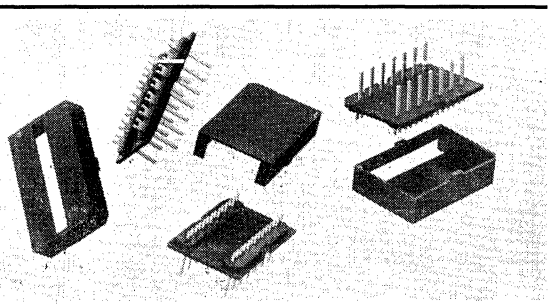
Designers using edge connected PC boards in their electronic equipment will find important space-saving benefits by specifying a new low-profile Spectra-Strip connector for linking multiconductor cable to the boards.

The new connector combines an edge board connector element and a special mounting block in such a way that branching of all cable conductors for termination takes place within the combined dimensions of the two connector elements.

The complete connector unit, with 75 mil center-to-center pin spacing, is substantially smaller than conventional connectors, making more head room available — especially important in compact equipment using IC circuitry.

The new connectors are primarily designed for use with 1/32 inch PC boards. The accompanying photograph shows a 15-conductor ribbon cable with one of the new connectors at each end. However, the new connector design is readily adaptable to almost any type of edge board — 38-pin, 52-pin, or whatever your equipment involves.

14-PIN IC CONNECTORS — 19¢ EACH

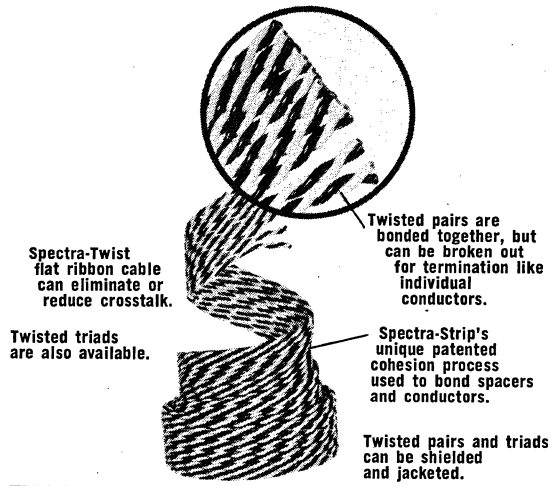


Volume users of IC circuitry can take advantage of a Spectra-Strip advance in production techniques that now offers 14-pin IC connectors for as little as 19 cents each.

And just as significant as the low price is the fact that the connectors are high reliability types with permanent molded-in pins that won't loosen or press out during terminating, installation or use.

SPECTRA-STRIP® CORPORATION

P.O. Box 415, Garden Grove, Cal. 92642 • Phone (714) 892-3361 • TWX 910-596-1314 • P.O. Box 6023, Hamden, Conn. 06517 • Phone (203) 281-3200 • TWX 710-465-1020



SPECTRA-TWIST® FLAT RIBBON CABLE*

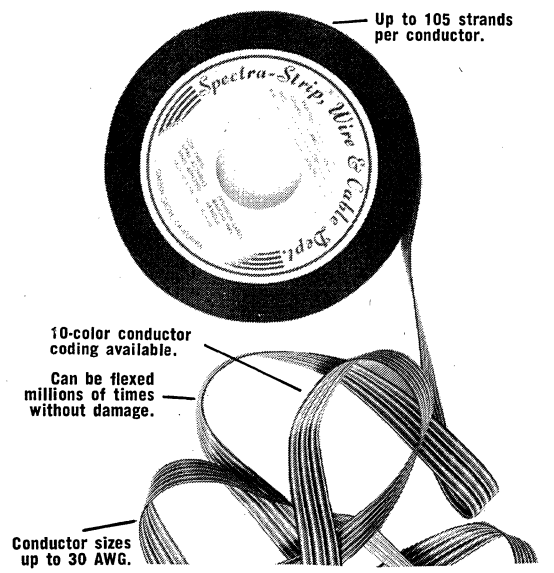
In Spectra-Twist, round wire conductors of desired size are twisted together. These twisted pairs are then bonded by the patented Spectra-Strip cohesion process to form a ribbon cable. Each pair can then be treated like an individual conductor and broken out, stripped, tinned or otherwise prepared for termination or connector.

Spectra-Twist Effective Against Crosstalk

Using twisted pairs of conductors instead of shielding to reduce or eliminate crosstalk saves space and is substantially less expensive than shielding.

Tests have shown that Spectra-Twist cables hold crosstalk spikes to voltages far below the level that might falsely trigger gates or other logic devices. Minimal loss of signal amplitude can be detected; Spectra-Twist transmits signals with virtually no signal degradation in the form of attenuation or distortion.

A recent test demonstrating the crosstalk reduction capability of Spectra-Twist was made on a cable of 26 twisted pairs of 24 gauge conductors. Signals were 5 volts at 3Mhz, using both TTL and DTL logic. No noise spikes of more than 0.5 volts were detected.



SPECTRA-FLEX® ULTRA-FLEXIBLE FLAT BONDED RIBBON CABLE

Up to 105 Strands per Conductor for Superlimpness, Superflexibility

Spectra-Flex is an ultra-flexible version of the general purpose Spectra-Strip flat ribbon cable. It has the same important advantages of our basic round conductor flat ribbon cable with respect to reducing weight, space and labor, ability to break out individual conductors in any desired pattern, and termination with any standard type of connector.

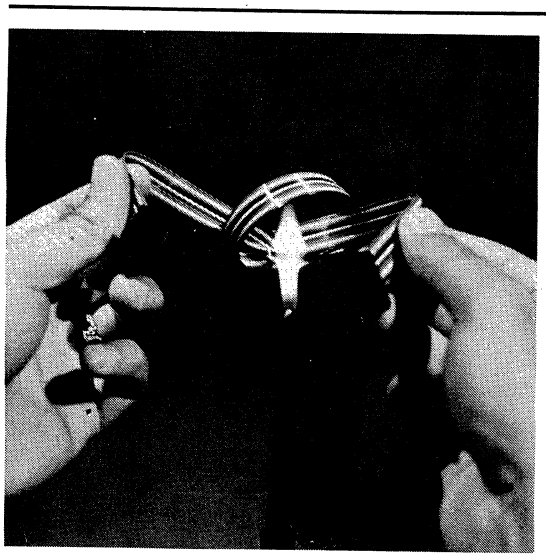
In addition, it offers the electronic equipment designer unusual limpness and flexibility in a cable because conductors can contain up to 105 strands of wire. This makes Spectra-Flex especially suited for applications involving intermittent or continuous flexing, or in equipment with doors and drawers that bend, hinge, fold and slide. Spectra-Flex cable can undergo literally millions of flexings without physical damage and without altering its electrical and mechanical properties.

AWG and Stranding

Spectra-Flex is available with 26, 64 or 105 strands per conductor in sizes ranging from 18 to 30 AWG. Cables of up to 100 conductors can be assembled. When required, cables using different size conductors can be provided.

Insulation and Shielding

Spectra-Flex insulation is normally PVC, meeting requirements of MIL-W-16878D, Types B or C. Shielding, with either a standard braided shield or the more flexible spiral type, can be provided.



CROSSLINKED XL PVC FLAT RIBBON CABLE*

Tougher, Costs Less Than TFE

FEATURES

- Withstands hot soldering irons @ 350°C.
- Resists distortion at elevated temperatures due to current overload.
- Resists abrasion.
- Operates continuously at 115°C.
- Withstands temperatures up to 150°C for short periods.
- Costs much less than TFE.

Irradiated crosslinked PVC-insulated wire with many of the advantages of TFE at half the cost is now being made into round conductor flat ribbon cable by Spectra-Strip.

Like TFE, crosslinked PVC won't melt, smoke or shrinkback if hit by a hot soldering iron. It's more solvent-resistant than ordinary PVC and several times tougher than TFE against cutting, crushing and abrasion.

Form stability and stable dielectric properties at higher temperatures and overloads are XL PVC's most important benefits. Using this insulation, Spectra-Strip's unique bonded flat ribbon cable, harnesses and cable assemblies are rated at 115°C for continuous operations, intermittent service at 150°C and momentary temperatures up to 350°C.

XL PVC meets all requirements of MIL-W-16878D, Types B, C and D and carries UL approval.

Each of the three volumes of **eem** contains a Product Index and Directory, the Green Section. This Index is a complete alphabetical listing of products. If the product you are looking for appears in the particular volume you are consulting, the green pages will provide a complete list of manufacturers who make that product. If the product is included in another volume of **eem**, the Index will provide a cross reference, directing you to the correct volume.

Boldface listings under product headings indicate that the listed manufacturer has products cataloged in **eem. Boldface** listings with page numbers indicate that this manufacturer's catalog pages include detailed data on the product indicated in the product heading.

Similar products are grouped together. For example, the many kinds of meters are listed in this manner: "Meters, Ampere," "Meters, Capacitance," "Meters, Flux" etc. To help you locate the prime product heading, there are hundreds of cross references, e.g. "Voltmeters — See Meters, Volt."

Catalog pages in **eem** are divided into three volumes based on very broad product groupings. These are:

Volume 1 — Test Instruments / Equipment and Systems

Volume 2 — Active Components / Circuit Assemblies / Controls and Drives

Volume 3 — Passive Components / Materials / Hardware

These volumes are further divided into 55 **eem** Product Sections which are assigned individually to the most appropriate volume. Within each of the 55 product sections manufacturers are arranged alphabetically, wherever possible. A complete index of all manufacturers' catalog pages is included in every volume. To locate the catalog pages of a specific manufacturer, refer to this index at the beginning of the white section in any of the three volumes. This index will provide the page numbers you require. In Volume 1, the index begins on page 302, in Volume 2 on page 1274 and in Volume 3, page 2310.

OTHER HIGH TEMPERATURE WIRE AND CABLE PRODUCTS FOR INDUSTRIAL AND COMMERCIAL USAGE

1. Thermoplastic Wire & Cable Bulletin 109A	Insulations & Jackets — PVC Nylon, Kynar Polyurethane, FEP, Polysulfone, etc.
2. Ultra-Thin Hook-Up Wire Bulletin 112	100 Vrms Type UT wire, sizes 36 through 26 in solid conductors, and 28 through 36 in stranded conductors. Wall thickness from .0015" to .004"
3. Instrumentation and Control Cables	Fluorocarbon, polyimide or high temperature thermoplastic insulated multi-conductor cables for instrumentation, signal, and control cable applications.
4. Heater Cables	TFE and Polyimide insulated resistance alloy conductors. Ratings to 500°F.
5. Power Cables	600 and 1000 Vrms ratings in sizes AWG 22 through 4/0. Copper and aluminum conductors.
6. Transmission Lines Bulletin 110	Flat laminated or extruded constructions, including tri-line cables.
7. Medical Wire	Insulated 26-42 AWG conductors SS#316, copper other alloys and precious metals.
8. Parallel Wrapped PVC and TFE Insulations	Increased flexibility for phonograph tone arms and hearing aids. High dielectric strength for TV and radio wiring.
9. Computer Wire Bulletin 110	Wide variety of insulation and conductors for use in automatic wiring equipment. TFE, FEP, Kynar, Tefzel®, Polyimide overcoated Kapton, etc.
10. Tufflite™ Polyimide Insulated Wires Bulletin 108B	Medium and heavy wall constructions to MIL-W-81381. Thin wall, .0045", construction also available.
11. Ribbon Cables Bulletin 102A	Bonded and woven high temperature Teflon, Kapton, and thermoplastic components.
12. Railite™ Bulletin 117	High temperature, non-flammable, modified fluorocarbon locomotive and car wiring.
13. Teflon Polyimide-Tuffcote™ Bulletin 113	For airframe and computer back panel use where cut-through resistance is required.
14. Thermocouple	High temperature Teflon and Kapton insulated.

For detailed information on these products, send for Tensolite's 200 page Product and Technical Handbook, or contact the Tensolite representative in your area.

NOTES:

1. **Abrasion Resistance:** Tubing made of Polyurethane will often outwear other materials by a margin of 5 to 50 / one when severe abrasion is a factor.
2. **Oil and Solvent Resistance.**
3. **Load-Bearing Capacity:** Polyurethane has a higher load-bearing capacity than any conventional rubber.
4. **Tear Resistance:** Tear-strength ranges between 500-1000 lbs/linear inch.
5. **Heat and Cold Resistance:** Continuous use above 225°F. is not recommended nor is urethane recommended in hot water over 175°F. At low temperatures polyurethane will remain flexible down to −90°F. A gradual stiffening will occur at 0°F. but will not become pronounced until much lower temperatures are obtained.
6. **Weather Resistance:** Outstanding resistance to oxygen and ozone.
7. **Electrical Properties:** Polyurethane has excellent electrical insulating properties and is used successfully in many wire and cable harness assemblies.
8. **Bonding to Metal:** When polyurethane is molded directly onto metal inserts, outstanding bonds are obtained.
9. **Flex-Life:** Most formulations offer extremely high flex-life and can be expected to outlast other elastomeric materials where this feature is an important requirement.

STANDARD LENGTH IS 100′ COILS—OTHER LENGTHS AVAILABLE UPON REQUEST

For Information on Transcon's SemiConductor Mounting Pads, see Section 4800, Vol. II

Transcon ENGINEERED HARDWARE IS THE STANDARD OF INDUSTRY

VINYL (PVC) TUBING

Non-Toxic Flexible Clear Vinyl Tubing is chemical resistant, odorless, tasteless. Formulated with compounds that have been approved by the U. S. Food & Drug Administration. Used for food and beverage tubing, laboratory tubing and medical tubing.

General Purpose Clear Vinyl Tubing is tough, flexible, long-lasting. Used for water lines, refrigerating tubing, chemical and industrial applications.

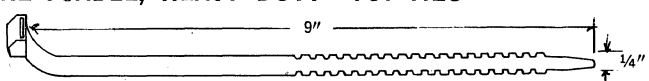
Patent No. 3,484,905

RE-USABLE, HEAVY DUTY "TUF-TIES"



This "Tuf-Tie" can be snuggly looped around cables and locked in place, without the use of tools.

You can release the "Tuf-Tie" as often as required without damage to itself and without any loss in its holding efficiency.

Nylon Cable Clamps are stronger than most other cable clamp material. They resist acids better and have a higher operating temperature, +135°C (+275°F). Basically conforms to MIL-P-17091A* and amendment 2, MIL-P-17091B*, MIL-M-20693A type 1*, NAS-1397, MS-39014*, MIL-P-20693.

*Conforms to dimensional requirements and materials specifications.

Polypropylene Clamps are stronger and stand higher temperatures than Ethocel and at a lower cost.

Ethocel clamps have satisfied unlimited fastening problems throughout the electrical/electronic industry. It is light weight, yet very durable with excellent shock resisting properties in a temperature range from 185°F to −40°F.

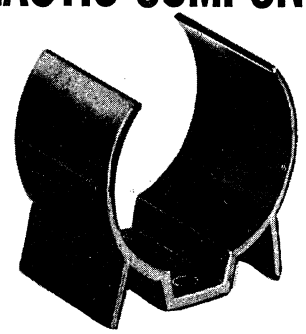
USED IN:
Television and Radio
Business Machines
Industrial Machines
Electrical and Electronics
Aircraft
Home Appliances
Vending Machines

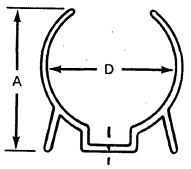
USED FOR:
Durability
Electrical Properties
Strength
Corrosion Resistance
Economy
Moisture Resistance
Abrasion Resistance
Resilience
Lightness of Weight
Single Wires
Group Wires
Pipe
Tubing

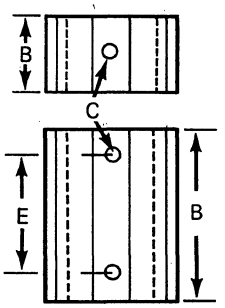
For Information on Transcon's SemiConductor Mounting Pads, see Section 4800, Vol. II

Transcon ENGINEERED HARDWARE IS THE STANDARD OF INDUSTRY

PLASTIC COMPONENT CLIPS







TRANSCON Plastic Component Clips are a convenient and economical means for fastening a wide variety of electrical and electronic components, accessories and parts. They are designed for fast, easy insertion, hold firmly and yet are easily removed. Typical applications are capacitors, resistors, lamps, batteries and fuses.

The clips are made of a strong combination of rigid vinyl and polypropylene with insulating properties having higher di-electric strength.

The floor of the clip is punched with one or two holes for screws or other fastening devices.

These bushings will cut your production cost because there is no need to knot or tie your cords to avoid strain on connections! They are quickly and easily installed with specially designed pincers or even with ordinary pliers.

Once installed they lock the cords to the chassis panel in a vice-like grip and are locked there until deliberately removed for servicing or trouble shooting.

TRANSCON Bushings on an appliance are a symbol of highest quality.

SPECIAL PINCERS FOR SPEEDIER INSTALLATION ARE AVAILABLE.

MicroCoax®

Close-Tolerance Miniature Solid-Jacketed Coaxial Cables

Uses of close-tolerance MicroCoax cables include:

- Microwave transmission and delay lines
- Totally shielded connections (mixers, klystrons, stripline)
- High-speed computer leads
- Audio crosstalk suppression
- Low-noise amplifier isolation

Advantages:

- Low loss
- Essentially total RF shielding
- Easily soldered, stripped and connected
- Close tolerance, resulting in a high degree of uniformity and reliability, both mechanically and electrically
- Comprehensive mechanical and electrical test data available

Specifications and Technical Data—10, 25, 50, 70, and 93 Ohm MicroCoax Cables

NOTES: SPCW = Silver Plated Copperweld Wire; SPC = Silver Plated Copper Wire; C = Copper Wire; T = Tophet (1) C Wire; BeCu = Beryllium Copper Wire; 304SS = Stainless Steel, Type 304; TFE = Teflon (2) TFE Resin; FEP = Teflon (2) FEP Resin; IP = Irradiated Polyethylene. (1) = Trade Name W. B. Driver, (2) = Trade Name E. I. DuPont.

CONDUCTOR MATERIALS

Alloys or Pure Aluminum, Copper, Beryllium Copper, Iron, Nickel, Gold, Silver, Columbium (Niobium), Stainless Steel.

DIELECTRICS

ORGANICS: Teflon (TFE and FEP), KEL-F, PVC, RTV, Polystyrene, Polyethylene.

INORGANICS: Titanite, Alumina, Magnesium Oxide, Beryllium Oxide.

CABLE ASSEMBLIES

Fabricated from any of the standard MicroCoax cables, these assemblies are fully tested for VSWR and attenuation characteristics. A large stock of connectors assures the engineer rapid delivery of either straight or formed units. Comprehensive VSWR and attenuation test data is also available on request.

CUSTOM DELAY LINES

The fabrication of any of the MicroCoax cables listed in the above table into delay elements is one of our specialties. Obtaining the best combination of attenuation, size, shape, cost and weight can be best accomplished by discussing your delay requirements with our engineering staff.

STANDARD DELAY LINES

Stock delivery of delay elements is available for prototype or production requirements. Cable sizes include UT-250, UT-141-A, UT-85, UT-34 and UT-20. Delay values of 5, 10, 25, 50 and 100 nanoseconds allow the cascading of these elements to obtain specific delay and attenuation characteristics.

CERTIFIED WIRE FOR INDUSTRY

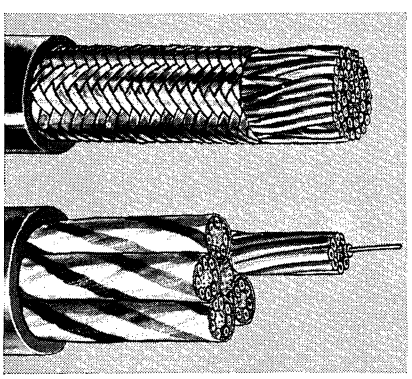
QPL *The largest and only "QPL" listed manufacturer of Polyethylene PVC, and Teflon® coaxial cable on the west coast to RG/U call-outs. Manufactured to the latest revision MIL-C17.*

DESC and UL Approved
Approved in-plant test facilities by authorization of DESC and UL Underwriters

HOOK-UP WIRE

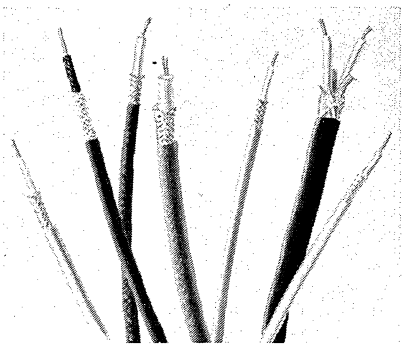
Hi voltage Teflon® wire • Aircraft wire to MIL-W-5086A and MIL-7078A • Business machine wire • High voltage Polyethylene and Rulan • Wire to meet MIL-W-76B and MIL-W-16878D • Kapton wrapped • Teflon® wrapped • Thermocouple • Test lead wire Types B, BN, C, CN, D, DN, E, EE, ET, F, FF, K, KK.

MULTI-CONDUCTOR CABLE



High, medium, and low temperature cables are available with over 200 conductors of various gages and lay patterns to meet specific termination and electrical requirements. Our engineering department is continually designing cables that reduce overall manufacturing costs.

COAXIAL CABLE



RG/U, over fifty Teflon® insulated and over 125 polyethylene insulated cables manufactured to MIL-C-17. SPECIALLY DESIGNED RG cables for specific RF requirements. These cables are designed to give the latest improved electrical characteristics. LOW CAPACITANCE • LOW ATTENUATION • MINIATURIZED • LOW NOISE • FOAMED DIELECTRICS • HIGH FLEXIBILITY • HIGH TEMPERATURE (1500°F) • LOW TEMPERATURE (−350°F).

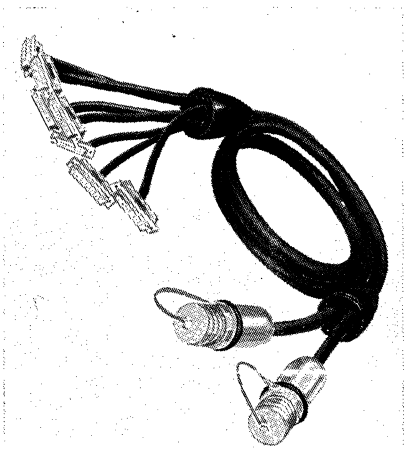
LARGE WAREHOUSE STOCK

of all type military specification wire and cable, commercial power cords and cable, business machine UL style single conductors and multi-conductor, high temperature electronic wire and cable. Aircraft wire to the latest specifications.

VICTOR WIRE AND CABLE CORP.

is a modern, engineered oriented manufacturer that can offer personalized interest in customer requirements that can not be aqualed.

CABLE ASSEMBLIES



TERMINATIONS, MOLDINGS, HARNESSES

Victor Wire and Cable offers a service that is only equalled by the largest and most sohisticated cable companies. It is important to state that every production stage of termination, molding, and harnessing takes place at Victor Wire and Cable. Therefore we offer a quality controlled, in-house assembly program unequalled in the industry.

Victor Wire and Cable provides all types of termination and assembly work for Coaxial, Multi Conductor cable and harnesses with 100% accuracy and at low cost. Our custom engineering service is qualified to design cables, and cable assemblies to meet the most critical applications. Our customer guarantee is many years of experience.

W-1219*	12	19	.060	.820	.060	.820	.060	.845	.060	.845

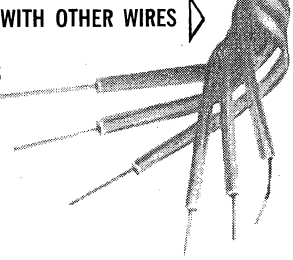
*Designate jacketing desired as follows: V=vinyl X=Dur-X-thane P=polyethylene N=neoprene - Mil-S-6855 - Class 2 - Grade 60
EXAMPLE: W-1827P=Cable w/27 conductors, 18 gauge wire, w/polyethylene jacketing. **Add "S" to PART NO. for Shielded cable.
Other constructions available on request using 1/32" PVC insulation (3000 V, Military Type D); (600 V, Style 1015 U.L. Commercial)

TECHNICAL DATA

Whitmor Wire and Cable Corporation manufactures a complete line of multiple conductor control cables. All conductors are Type C per MIL-W-16878, insulated for 1000 V and 105° C. Conductors are color coded per MIL-STD 681. All conductors are planetary cabled and contra-helically laid with Mylar tape over the cable bundle.

® Dur-X-thane is Whitmor's Registered T.M. for extruded Polyurethane.

SHIELDED CABLES: Same specifications as above with additions of tinned copper braided shield over cable complex with 85%-95% coverage to MIL-C-7078A, cables shipped on non-returnable reels.



WHITMOR WIRE AND CABLE CORPORATION

electronic engineers master

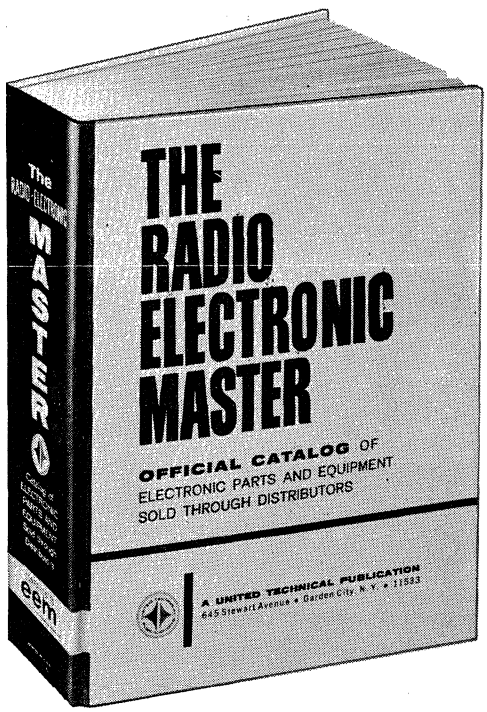
1971-72

THIS IS THE LAST PAGE
OF THE
CATALOG SECTION, VOLUME 3

1971 edition

$5.95 from electronic distributors

World's most useful source of standard electronic products



14 WAYS

the MASTER helps engineers, P.A.'s, buyers, service technicians, hobbyists

1. Saves "shopping" time — no looking from catalog to catalog, no wading through piles of literature for the product you want. It's all in The MASTER.
2. Aids in selecting the right product to do the job best — comparison of specs, features, prices of many makes of similar type products is simplified. All similar products in same product section.
3. Saves design time — the product you are looking for is illustrated and completely described.
4. Short-cuts delivery time — products shown in The MASTER are available from local distributors — just a phone call away.
5. Speeds inter-company communications — wide distribution of The MASTER at your company means other engineers, purchasing agents and buyers have a copy — thus you have a common frame of reference.
6. Cuts production cost — big illustrations, detailed specs, wide variety help you locate standard items that meet your requirements. Eliminates need to order a custom item.
7. Keeps production lines moving — you can get that much needed product that's holding up production, from your local distributor's stock.
8. Saves prototype and development time — helps you locate a standard product available for off-the-shelf delivery from a local distributor.
9. Makes it easy for you to find the product you want immediately — 33 product sections and complete index make the world's biggest electronic catalog also the easiest to use.
10. Leads to extra service income — in addition to radio-TV products, The MASTER describes in detail thousands of products for profitable hi-fi, sound and industrial servicing.

UNITED TECHNICAL PUBLICATIONS • DIVISION OF COX BROADCASTING CORP. • 645 STEWART AVENUE, GARDEN CITY, N.Y. 11530

Get your copy today!

The most efficient

RAPID REFERENCE TO OFF-THE-SHELF PRODUCTS

available from distributors

200,000 items • 33 Product Sections
- **Descriptions, Specifications, Prices**
- **13,000 Illustrations • 200 Manufacturers**

11 Includes new items indispensable in servicing — new subminiature and printed circuit components, new color TV and hi-fi test instruments.

12 Increases profits for service technicians — buy and sell direct from The MASTER. It contains prices.

13 Guides radio amateurs — select the best equipment to get the most out of your hobby. Shows latest SSB, mobile and CB gear.

14 Speeds better kit building for experimenters — it contains thousands of useful items not contained in smaller, incomplete catalogs.

These manufacturers catalog their products in the 1971 edition of The MASTER

This is the last page of Volume 3, Catalog Section

Next page starts Manufacturers and Sales Offices Directory

MANUFACTURERS AND SALES OFFICE DIRECTORY

This is an alphabetical listing of more than 6,000 manufacturers supplying electronic equipment, instrumentation, components, materials and fabrication services. Included for each company are address, telephone number and name of the key sales executive.

Bold Face listings indicate those manufacturers who have information in the catalog sections (white pages) of the three volumes of **eem.** Their page numbers are included, as well as listings of their local sales offices. Sales offices are listed by state and city. Look for the sales office nearest you. Be sure to ask the sales office if there is a distributor of electronic parts nearby who handles the line in which you are interested.

Allen Avionics manufactures passive delay lines and filters that are used in Broadcast and Television and for computer applications, data transmission, navigation and guidance. Radar, satellite and space communications. Telemetry, telephone and telegraph and vehicular communications. We are unique in our field in that we build lumped delay lines having time delay to rise time rations of up to 300/1. We are the sole supplier of the Spiradel delay line. See section 2350 for information.

American Radar Flanges have been used in every major system over the last 20 years. While attaining this performance record, we have amassed the largest collection of flange tooling in the world. No order is too large or too small and no requirement is too difficult.

In addition to UG, WR, RE, CMR and CPR flanges we manufacture and almost infinite variety of specials in all types of material.

ATC Porcelain Capacitors increase power output by typically 1. dB, as much as 3. dB, because of their extremely low series resistance, especially when used for base-emitter tuning in high frequency or high power amplifiers. They extend the bandwidth of amplifiers and varactor-tuned circuits because of their low inductance and high Q.
ATC Phased Array Capacitors operate at up to 1000. volts peak RF with such negligible loss that system efficiency is significantly increased, the DC current necessary decreased (reducing the heat generated), and system MTBF increased compared to that possible with common NPO or K1200 ceramic types. This also allows the use of less expensive transistors. Both ATC types reduce the number of stages necessary to attain a given power output by increasing the available gain per stage. They provide the lowest Insertion Loss and widest frequency range of operation available.

Alois Zettler, a Swiss company, is one of the largest relay and switch manufacturers in Europe. American Zettler, a wholly owned subsidiary, follows the traditional Swiss observance of quality and precision. Assembly and checkout facilities in the United States are staffed by highly skilled and experienced circuit analysts who are on call to assist you in specifying any relay or switch application. A complete stock of products assures you of immediate, off-the-shelf delivery. Our engineers will be glad to provide you with free samples of American Zettler relays and switches and discuss your problems at no cost or obligation. Simply call or write one of the Sales-Engineering Representatives listed, or contact our headquarters in Costa Mesa, California.

Data-Control Systems offers complete "Turn Key" systems or individual instrumentation hardware for the data acquisition, data reduction, and date communications marketplace. At present, the company offers complete end-to-end systems capability, starting with output of a transducer, to generating computer compatible tapes, including multiplexing, transmission, storage, reduction and conversion to digital format. Computer controlled and manually operated PCM decommutation systems are also available. In the data transmission field, DCS equipment plays a vital role in system testing, bit synchronization, PSK demodulation, DM demodulation, etc.

PULSE GENERATORS
Model 5101 50 MHz General Purpose
Model 5102 50 MHz for IC Testing
Model 5103 200 MHz General Purpose
Model 5109 10 MHz General Purpose
Model 5113 50 MHz Variable Rise and Fall Time
Model 5114 10 MHz MOS Pulse Generator
Pulse Generator Systems, Word Generators, Digital Timing and Control Equipment. Systems designed to customer specifications. Call or write for a demonstration.

Equipped with the newest Tri-Phasic automatic zero conversion techniques and other 1971 features the Data Precision 5 1/2 and 4 1/2 decimal digital multimeters provide all the features of the expensive units at a fraction of their cost. With a basic d.c. accuracy of 0.004% of range the model 2540, 5 1/2 digit unit without extra cost options measures full range d.c. volts, a.c. volts, ohms, and ratio. The standard unit also automatically ranges, provides both isolated BCD outputs and remote control inputs. At better than 0.01% accuracy the 4 1/2 digit model 2440 has the same features. Option include an extremely low level preamp and rechargeable battery operation capability.

Advertisement

We manufacture a complete line of small, precision fuses and circuit breakers for electronic and automotive applications: over 300 different types including all regular sizes and fusion characteristics. Our special, patented SERIES 02 FUSE gives a TWO-SECOND-MINIMUM TIME DELAY at the same price and size of a 3AG fuse, available in all standard current ratings. Ideal for protection of consumer or professional power supplies.

Elmag Corporation manufactures to customer specifications Electromagnetic Interference Filters, High Voltage and Special Capacitors. The RFI Filters achieve the optimum in the suppression of noise from all spurious energies and can be housed in virtually any package. The High Voltage and Special Capacitors are custom fabricated to meet unique specifications for High Voltage, Multiple Sections, Close Tolerances, High Capacity and High Insulation Resistance. We welcome an opportunity to serve you.

ECL's chip carriers are approved by the E.I.A. & Mil. They are inert in material and are completely free from electrostatic charge. ECL's chip TRAYPAK is widely used for optical insp., automatic loading, test and shipping. Achieve accountability of chips after slicing. REduce your rejects from contaminates and excessive handling. TRAYPAK's are coated with either Teflon, Silicon or Electroplate. Are capable of withstanding high bonding temperatures for Molytab processes.

Advertisement

Hayden Book Co., Inc. offers an outstanding selection of technical books dealing with electronics and microelectronics, computers, aeronautical technology, communications, and test equipment. These books are designed to meet the reference needs of engineers and managers. Also included are training materials -- books, records, and overhead transparencies -- designed for students and technicians.

The MOS Division of Hughes designs and builds standard and custom MOS products.
D to A converters, discrete MOSFET transistors, Multiplexers, Dynamic Shift Registers up to 1024 bits and frequencies to 20 Mhz. Static Shift Registers, Read Only Memories ROM up to 10Mhz rates, RAM Memories, Display drivers, Frequency Dividers, Counters, TV Synch Circuits, Differential Digital Analyzers, Standard logic elements - P channel, CMOS, 5V CMOS and 1.5V CMOS.
For custom and standard MOS MSI and LSI call Hughes.

Manufactures Low Inertia D.C. Motors for use in applications where motion control is required. The extreme high torque to Inertia ratios enables these motors to accelerate to 3,000 RPM in less than .00001 sec. with stepping rates of 2,000 steps per second per revolution. Available in all sizes from 1 & 7/8" to 6.5" O.D., with integral digital and analog tachometers.

IFI manufactures BROADBAND POWER AMPLIFIERS with instantaneous bandwidths (flat within 1.5 db) to 15 octaves. Power outputs from "milliwatts to kilowatts" can be obtained using conventional signal generators, sweepers and synthesizers as drivers. Typical systems cover 10 kHz to 220 MHz without tuning or bandswitching.

Most requirements can be met with off-the-shelf hardware. Specials are produced quickly and inexpensively with standard modules.

Since we know more about broadband power amplifiers than anybody, why not call us direct, collect if you wish. Ask for Jim Fahnestock or El Swanson (516-694-1414). It's the quickest, surest way to get direct answers to your questions and authoritative information about our products. West of the Rockies call Del Black (714-821-6600).

Or if you prefer, drop us a note describing your requirement. Our response will be prompt and thorough.

Isotemp Research is dedicated to precise temperature control using all state-of-the-art temperature sensing elements. Our specialty is low cost solid state proportional control. We offer temperatures from 0 to 2,000°C, stabilities to .0005°C, output from milliwatts to kilowatts, DC to 1,000 CPS. Consult us on your temperature control needs for military, industrial or consumer applications.

Johanson Technology offers a complete line of monolithic ceramic chip capacitors. The same high quality chips are also available as glass encapsulated leaded devices. J.T.I. glass encapsulated units are designed for critical space problems found in computer and communication system applications, yet are competitively prices with common molded devices.

Coil Tester--Shorted Turn Indicator--used since 1946 by repeat and new customers. New circuit-board construction. Standard probes for unmounted coils (no iron core or brass sleeve) range in six sizes from 5/32x7/32x3-inch (detects one shorted turn of #44 copper wire in 2-inch dia. loop or #20 wire in 3-ft. dia. loop) down to 0.045x0.050x5/8-inch requiring 3 or more turns #44 to indicate a short. Non-shocking, goof-proof. Requires 5-minute warmup, 10-minute housewife training, your sample shorted turns for "calibration", and your "wire-around-probe and through donut" for toroids at reduced sensitivity. Built for squashing by Mack truck, except small (soft-iron) probes are fragile. Price $250. Shipping wt. 9 lbs.

Advertisement

Specialists in microwave wageguide components and subsystems assemblies. Unusual custom waveguide devices fabricated to customer drawings or completely designed to customer specifications. Employing cost-saving production techniques, MCS produces in reasonable time, with no do-overs. In addition to custom capabilities a complete catalog line of microwave test equipment from 1.7 to 90 GC is available. This includes ferrite devices, slotted lines, couplers, standard gain horns, attenuators, flanges and related components.

NES has a broad range of products which include such things as: digital clocks, accumulators, code translators, data acquisition systems, process control computers, system interface elements, electronic time clocks and various systems components.

Besides this large selection of standard products, NES is still interested and builds custom-fitted systems and equipment in any quantities, single to magnitudinous. This is economically feasible because of the modular and versatile construction designs and practices utilized by NES.

Parker Instrument's unique etched circuit coil produces a light weight, externally rugged meter movement. Use in panel, control, edgewise, and aerospace applications where low cost must be accompanied by reliability. Available in a wide choice of styles and ranges to fit any application. Broad Engineering background to assist in design and manufacture of special purpose instrumentation.

Peripheral Equipment Corp. is recognized by industry as the leader in latest-generation digital magnetic tape transports. PEC is the largest independent supplier of low-cost tape transports with thousands of units in the field and more than 300 models to choose from. PEC also offers a complete line of data formatters for use with its magnetic tape transports. A new addition is PEC's line of low-cost disc drives designed especially for mass storage in mini and small computer systems. Send for a complete set of literature from PEC.

Ultra low noise (IDB typical) transistor amplifiers for use with infrared detectors and electrical transducers; voltage mode, current mode and automatic bias control. Standard models are available to match all infrared detectors and transducers produced in the U.S. and Europe. Multi-Element amplifier arrays are available in all operating modes with hybrid modules containing up to 100 signal channels. Standard secondary function amplifiers such as; logarythmic, AGC, video, RF, etc., are also available from stock.

Specializing in microelectronic inductors and transformers, we offer fixed and tunable devices ranging in sizes smaller than transistor dice to as large as 1/3 To-5 can volume. Extended tuning range units give 10:1 tuning range. Our devices are considered the most stable in the industry irregardless of size. Present applications include sattelites, military i-f amplifiers, minature transmitters.

Pioneer Metals, Inc. manufactures a special Honeycomb for R.F.I. sheilding. This material is commonly referred to as "Copper Brazed Honeycomb", and is made from a mild steel foil .005 to .010" thick. The cell is hexagonal in shape, and is brazed with copper under vacuum or Hydrogen atmosphere. We also have facilities for contract furnace brazing and complete manufacture of component parts.

Stock Drive Products specializes in providing the widest selection of small, commercial quality, drive components from stock - at the right price. You select from the 9 most needed product categories - gear products, speed reducers, motors and motor controls, couplings, chain and belt drives, shafts, bearings, counters, fasteners and vibration mounts. The services of SDP's thoroughly experienced application engineering staff is available to you in the form of technical assistance. A 520-page SDP Handbook of Commercial Drive Components (Catalog 71) is available on request.

PITRAN PRESSURE TRANSISTORS

Linear ranges available from 0.1 to 15 psi. FEATURES: Small Size - TO-46 can. High Output - 2 volt linear range for all models. Fast Response - 10 microsecond rise time. Resonant Frequency - above 100 kHz. Overload - 5 X range, minimum. APPLICATIONS: industrial controls, counter, rate sensor, tape/film loop control, biomedical sensor, switch, fluidic interface, meteorological accelerometer, force, flow, leak. Electronics for static or dynamic measurements available, and D.C. power supplies. Quantity pricing for production applications.

SIR provides complete data acquisition systems, matched to the customer's requirements and guaranteed compatible with the customer's computer. Systems are assembled from standard sub-systems and selected components to provide the best solution to the customer's problem.
SIR also designs and manufactures Ebert Spectrophotometers and other custom spectro-optical instruments.
Sales representatives have been established in most sections of the country to work with our customers.

Datapulse Division of Systron-Donner Corporation is a leading manufacturer of automatic, semi-automatic and manually operated pulse, data, and waveform generation equipment and systems. Product line reflects sophisticated design with exemplary accuracy and reliability, plus unusually high speed parametric performance capabilities where needed. Comprehensive selection of products is extremely flexible and compatible with other makers' systems/components. Included in the line are manual and fully programmable pulse generators, function generators, data generators, character generators, trigger program generators, PCM simulators, output plug-in units, and a useful range of instrumentation accessory options.

Tau-Tron, Incorporated designs and manufactures a broad line of extremely high speed digital test systems. Products fall into three testing categories: General Purpose, Digital Communications, and Semi-Conductor Memory. General Purpose--Single and multiple channels, 8 bit to 96 bit word lengths, 1 Hz to 330 MHz. Digital Communications--Pseudo-random patterns, self-synchronization, bit-by-bit error detectors, and display, 1 Hz to 330 MHz. Semi-Conductor Memory--Manual and computer programmable, waveshape control, data control, bit fields from 8 x 8 to 24 x 256, 1 Hz to 120 MHz, self-contained error check systems.

Manufacturer of the Micrajust Model 20, a dependable, rigidly built, attractively finished, inexpensive, manually operated screening jig. It features lightning fast setup with high precision. Most useful for screening resists for etching and plating electronic printed circuits, for screening panels and resists for panel etching and for general screening of terminal boards, parts and components. Provides means for turning out work of the highest precision at a faster rate, using present personnel and facilities. An experienced screen operator will require no retraining or additional instruction to operate Micrajust.

Thomson-CSF Electron Tubes, Inc. markets a complete line of electron tubes:

Power grid tubes for industrial equipment and radar and TV broadcasting. High power pulsed tubes are also used for low frequency radars, linear particle accelerators and switching applications.

Microwave tubes such as magnetrons, crossed-field amplifiers, high power and reflex klystrons, traveling wave tubes, backward-wave oscillators. Two new developments are the Teratron (wide-band klystron) and the Carpitron (locked BWO for amplifying a frequency-modulated signal).

Image and storage tubes such as cathode-ray tubes for radar and computer displays and instrument use, scan-converters, barrier-grid and direct-view storage tubes. Two new developments are a 150-MHz cathode-ray tube for high frequency oscilloscopes and a dual-color storage tube for radar display.

In addition to these three families of tubes, the Electron Tube Group of Thomson-CSF is also very active in the field of X-ray image intensifiers and gas lasers.

TTI's SYNCLAMPS are the ONLY quick-releasing, self-locking and INSTANT NULLING SYNCHRO-CLAMPS! Their INTEGRAL STOPS permit component mounting and nulling (techniques that can save 70% OR MORE of the mounting and nulling time!). SYNCLAMPS meet the MAXIMUM MIL SHOCK AND VIBRATION: 2000 ft-lbs/2000 cps! They also have the LOWEST INSTALLED COST of any type of clamp! A size and style for ANY size component and ANY application!!

"Special cable, connectors, patching and switching for Video, T.V., data, and instrumentation systems. Patching includes patch panels, patch cords, and many special accessories in coax, triax, twinax, and quadrax noise-rejecting cable systems. Switching includes custom built matrices and multipole - multithrow relays including complete control for coax, isolated coax, triax and twinax cable systems. Frequencies from D.C. up through 3 GHz. Technical discussion of noise rejecting cable systems in catalog."

Tucker Electronics sells and services all types of commercial and military test equipment. Complete calibration laboratory with NBS traceability. Stock includes wide variety of overhauled and calibrated equipment such as Tektronix 530/540 series oscilloscopes. Hewlett Packard 606A, 608A/B/C/D, 612A, 620A, 623B generators. Hewlett Packard frequency counters and plug-ins. Hewlett Packard 400D/H and 410B voltmeters. General radio 874 series coaxial items, unit oscillators and bridges. Stoddart, Measurements, Weston and many other types stocked. We also stock military test equipment such as TS-510A/U, TS-497B/U, SG-13, SG-1, MD-83.
Write or call for test equipment catalog or calibration quotation. We also buy and trade quality used equipment.

Advertisement

In many cases it costs much less to order that special manifold, flange assembly, adaptor, or pumping system, than to buy the separate components required and do the assembly yourself. Either way Vactronic stands ready to service your requirement. Choose from our broad line of high vacuum components, or send us your sketch and let us quote on the complete assembly; cleaned, leak-checked, and ready for service.

Advertisement

VANGUARD manufactures an extensive line of general purpose relays and time delay modules covering a broad spectrum of industrial applications. Relay types from 1 to 4 poles and 2 to 20 amps. Models include open, plug-in, enclosed, printed circuit use, antenna, sensitive and contactor. Time delay relays are plug-in, enclosed units with solid state timing circuit and relay output, with some models available from stock. All VANGUARD products are quality engineered and produced, competitively priced with dependable deliveries. Full literature available upon request.

CRT display supplies custom-designed to OEM specifications. Our designs are optimized for CRT display and feature regulation to 20PPM, ripple to 10PPM, TC to 5PPM/°C, and fast response to transients with output voltage peaks held as low as 100PPM. They are entirely silicon, solid-state and absolutely silent, Short circuit and CRT-arc proof. Multiple-output designs provide all CRT voltages from the heater to 50KV. Prices as low as $70.

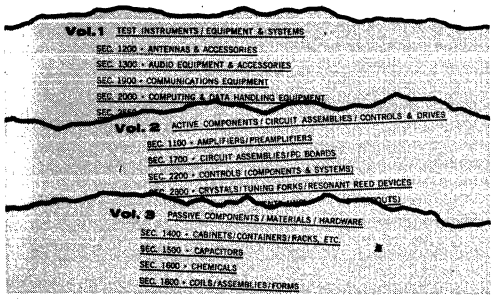
Each of the three volumes of **eem** contains a Product Index and Directory, the Green Section. This Index is a complete alphabetical listing of products. If the product you are looking for appears in the particular volume you are consulting, the green pages will provide a complete list of manufacturers who make that product. If the product is included in another volume of **eem**, the Index will provide a cross reference, directing you to the correct volume.

Boldface listings under product headings indicate that the listed manufacturer has products cataloged in **eem. Boldface** listings with page numbers indicate that this manufacturer's catalog pages include detailed data on the product indicated in the product heading.

Similar products are grouped together. For example, the many kinds of meters are listed in this manner: "Meters, Ampere," "Meters, Capacitance," "Meters, Flux" etc. To help you locate the prime product heading, there are hundreds of cross references, e.g. "Voltmeters — See Meters, Volt."

to find manufacturers' catalog information

WHITE SECTION



Vol. 1 TEST INSTRUMENTS / EQUIPMENT & SYSTEMS
SEC. 1200 - ANTENNAS & ACCESSORIES
SEC. 1300 - AUDIO EQUIPMENT & ACCESSORIES
SEC. 1900 - COMMUNICATIONS EQUIPMENT
SEC. 2000 - COMPUTING & DATA HANDLING EQUIPMENT

Vol. 2 ACTIVE COMPONENTS / CIRCUIT ASSEMBLIES / CONTROLS & DRIVES
SEC. 1100 - AMPLIFIERS/PREAMPLIFIERS
SEC. 1700 - CIRCUIT ASSEMBLIES/PC BOARDS
SEC. 2200 - CONTROLS (COMPONENTS & SYSTEMS)
SEC. 2400 - CRYSTALS/TUNING FORKS/RESONANT REED DEVICES

Vol. 3 PASSIVE COMPONENTS / MATERIALS / HARDWARE
SEC. 1400 - CABINETS/CONTAINERS/RACKS, ETC.
SEC. 1500 - CAPACITORS
SEC. 1600 - CHEMICALS
SEC. 1800 - COILS/ASSEMBLIES/FORMS

Catalog pages in **eem** are divided into three volumes based on very broad product groupings. These are:

Volume 1 — Test Instruments / Equipment and Systems

Volume 2 — Active Components / Circuit Assemblies / Controls and Drives

Volume 3 — Passive Components / Materials / Hardware

These volumes are further divided into 55 **eem** Product Sections which are assigned individually to the most appropriate volume. Within each of the 55 product sections manufacturers are arranged alphabetically, wherever possible. A complete index of all manufacturers' catalog pages is included in every volume. To locate the catalog pages of a specific manufacturer, refer to this index at the beginning of the white section in any of the three volumes. This index will provide the page numbers you require. In Volume 1, the index begins on page 302, in Volume 2 on page 1274 and in Volume 3, page 2310.

More than 6,000 manufacturers of electronic components, materials, instruments, assemblies, systems and key services are listed in the Yellow Section. An identical Yellow Section appears in each of the three volumes of **eem,** listing addresses, phone numbers and sales managers' names. TWX numbers are also included where available. **Boldface** listings indicate that detailed information on the manufacturers' products is cataloged in the White Section of **eem. Boldface** listings also indicate that local sales offices or representatives are listed for that manufacturer.

WILTRON Company produces measuring instruments for microwave, baseband and telephone line frequencies. Product line includes: Audio-video phase meters, Solid-State sweep generators 100kHz to 18GHz, VSWR bridges for 50kHz to 12.4 GHz, RF detectors 100kHz to 12.4GHz, RF Network Analyzers 2MHz to 40GHz, programmable attenuators and AM/FM Signal Generators. Also telephone line measuring sets: Echo Return Loss-Singing Point and Peak to Average Ratio (PAR) meters.

1971-72 eem

55 PRODUCT SECTIONS IN 3 VOLUMES

TEST INSTRUMENTS EQUIPMENT & SYSTEMS	Vol. 1
ACTIVE COMPONENTS / CIRCUIT ASSEMBLIES / CONTROLS & DRIVES	Vol. 2
PASSIVE COMPONENTS MATERIALS / HARDWARE	Vol. 3

eem — Electronic Engineers Master saves you engineering, specifying and purchasing time. Manufacturers' catalogs are grouped under easy-to-remember headings.

The 55 Product Sections categorize related electronics components, equipment, materials, instruments and systems, and fabrication services, enabling you to quickly compare and evaluate similar items.

To find a specific manufacturer's catalog pages refer to the Index of Manufacturers which precedes each Catalog Section (white pages).

These are the 55 eem Product Sections grouped in 3 volumes

Volume Number	Product Section	Page Number	Products
2	1100	1278	Amplifiers, Audio, Operational, etc.
1	1200	307	Antennas & Accessories
1	1300	308	Audio Equipment & Accessories
3	1400	2314	Cabinets, Chassis, Containers, Racks, Boxes, etc.
3	1500	2330	Capacitors (All Types)
3	1600	2478	Chemicals (Acids, Adhesives, Coatings, Lubricants, etc.)
2	1700	1296	Circuit Assemblies, Circuit Boards & Breadboarding Kits
3	1800	2481	Coils (Inductors, Chokes), Assemblies, Forms
1	1900	322	Communications Equipment (Facsimile, Telephone, Television)
1	2000	328	Computing, Data Handling Equipment & Accessories
3	2100	2510	Connectors, Electrical (Receptacles, Sockets, Terminal Boards
2	2200	1304	Controls, Control Components & Systems
2	2300	1353	Crystals & Mechanical Tuning Devices; Oscillators
3	2350	2728	Delay Lines (All Types)
2	2400	1435	Panel Components (Including Lighting & Readouts)
3	2500	2754	Fabricated Mechanical Parts (Bearings, Cores, Magnets, etc.)
1	2550	388	Environmental Test Equipment
3	2600	2776	Fans, Blowers & Cooling Equipment
2	2700	1506	Filters
3	2800	2809	Hardware, Non-Current Carrying (Fasteners, Washers, etc.)
1	2900	391	Instruments, Measuring & Test
1	3000	587	Instruments, Graphic Recording
3	3100	2810	Insulators, Insulating Materials & Parts
2	3130	1535	Integrated Circuits & Hybrid Microcircuits
3	3150	2814	Manufacturing, Subcontracting, Custom Fabrication
3	3200	2816	Materials, Raw (Metals, Plastics, Glass, Rubber, Cloth, etc.)
1	3300		Medical Electronic Equipment
1	3400	598	Microwave, Laser & Radar (Systems & Subsystems)
2	3450	1552	Microwave, Laser & Radar (Components/Accessories)
2	3500	1572	Motors, Rotating Components & Accessories
1	3600		Nuclear & Radiation Equipment
2	3700	1636	Photoelectric Equipment & Components
2	3800	1641	Optical Equipment & Accessories
1	4000	616	Power Supplies, Converters, Inverters, Batteries, etc.
1	4100	947	Production Machinery & Automation Equipment
3	4200		Engineering Aids (Books, Drafting Equipment, Whiteprinter
1	4300	950	Recording Equipment (Non-Audio Types)
2	4500	1645	Relays
3	4600		Research, Development, Engineering Services
3	4700	2818	Resistors, Fixed
3	4750	2902	Resistors, Variable (Potentiometers & Rheostats)
2	4800	1794	Semiconductors & Devices, Rectifiers (Non-Tube Types)
2	4900	1865	Servomechanisms & Components
1	5000	951	Studio Equipment
2	5100	1877	Switches, Circuit Breakers, Fuses, Protective Devices
1	5200	953	Telemetering Equipment
2	5300	1963	Thermal Devices, Thermistors, Thermocouples, Thermostat
3	5400	2933	Tools (Hand & Power); Soldering Supplies
2	5500	1985	Transducers & Associated Equipment
3	5600	2948	Transformers
2	5700	1995	Tubes, Tube Parts, Shields, Inserts, etc.
1	5800		Ultrasonic, Sonic, Subsonic Equipment
1	5850		Vacuum Equipment & Accessories
2	5900	2006	Vibrators, Choppers, etc.
3	6000	2994	Wire, Cable, Harnesses & Accessories

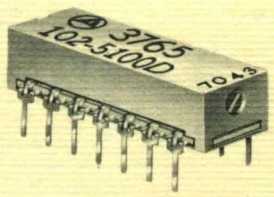
Specify... BUNKER RAMO AMPHENOL

THE LEADING NAME IN CONNECTORS, POTENTIOMETERS, SWITCHES AND CONTROLS, AND INTERCONNECTION SYSTEMS

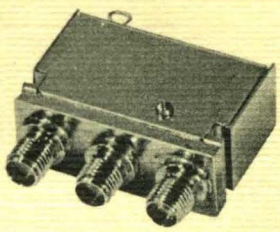
TRN



Amphenol's "New Concept" Trimming Resistive Networks (TRN) are a combination of a variable resistor and up to 5 fixed resistors in a single package.

CONTROLS DIVISION

MINIFORM® SWITCHES



The unusually high power handling capability of these tiny, inexpensive units make them ideal for microwave signalling, communications and EDP matrix switching.

RF DIVISION

For more information and fast sales service, contact your nearest Amphenol Sales Representative or Amphenol Industrial Distributor.
